Assessment Requirements for AMPS305 Thaw product - air

Release: 1

Assessment Requirements for AMPS305 Thaw product - air

Modification History

Release	TP Version	Comment
1	AMPv2.0	Initial release

Performance Evidence

Candidates must consistently thaw product according to workplace and regulatory requirements.

Candidates must:

- follow the requirements of the work instruction
- work at production speed
- check and prepare chillers for thawing
- thaw product according to workplace and regulatory requirements
- maintain control of the flow of product through thawing and despatch to further processing
- apply communication and mathematical skills relevant to work instructions and Standard Operating Procedures (SOPs)
- keep records to workplace requirements
- follow workplace hygiene and workplace health and safety requirements

Knowledge Evidence

The candidate must demonstrate a factual, technical, procedural and theoretical knowledge of:

- sources of contamination and cross-contamination
- ways of minimising contamination
- regulations dealing with the thawing of product
- workplace requirements for thawing product including:
 - workplace health and safety
 - Standard Operating Procedures (SOPs)
- principles of stock rotation
- work instructions

Assessment Conditions

Competency must be demonstrated over time and under typical operating conditions for the enterprise.

Assessment must occur in the workplace under normal production conditions.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time

Assessors must satisfy the current standards for RTOs.
