Release: 1

Assessment Requirements for AMPX406 Manage or oversee an external audit of the establishment's quality system

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

The candidate must manage or oversee at least one complete external audit of the establishment's quality system.

The candidate must:

- apply relevant communication and problem-solving skills
- work effectively as an individual and as part of a team
- demonstrate clear communication and interpersonal skills related to preparing for and participating in an external audit
- schedule, record the schedule and manage the planning for external audits
- ensure the quality systems covering the area to be audited are in place and effective as shown by internal audit reports
- identify and apply relevant workplace health and safety and regulatory requirements
- use available technology to prepare for and follow up external audits
- identify reports of internal and external audits and take corrective action
- maintain currency of knowledge through independent research and professional development

Knowledge Evidence

The candidate must demonstrate a broad factual, technical and theoretical knowledge of:

- regulatory and other requirements for external audits
- technical and regulatory aspects covered by each external audit

Assessment Conditions

Competency must be demonstrated while managing or overseeing one complete external audit of the company's quality system.

As a minimum, the following three forms of assessment must be used:

- quiz of underpinning knowledge

- workplace demonstration
- workplace referee or third-party report of performance over time.

All evidence must be collected in the context of current Australian meat industry standards and regulations.

Assessors must satisfy current standards for RTOs.
