Assessment Requirements for AUMATK007 Install vehicle plant, equipment and systems

Release: 1

Assessment Requirements for AUMATK007 Install vehicle plant, equipment and systems

Modification History

Release	Comment
Release 1	Unit updated to reflect the new standards for Training Packages Replaces AUMATK4007 Install plant, equipment or systems

Performance Evidence

Before competency can be determined, individuals must have competently installed plant, equipment and systems on a minimum of two occasions.

Individuals must demonstrate they can:

- follow workplace installation procedures of vehicle plant, equipment and systems
- maintain knowledge of workplace inventory processes of vehicle plant, equipment and systems
- install plant, equipment and systems safely, in line with work health and safety (WHS) requirements
- prepare and test installed plant, equipment and system
- complete installation forms relating to testing vehicle plant, equipment and systems
- achieve work quality goals when testing vehicle plant, equipment and system.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- WHS requirements and workplace procedures relating to installing vehicle plant, equipment and systems
- methods for installing vehicle plant, equipment and systems
- vehicle plant installation plans and design drawings
- types of tools and equipment and their operating procedures
- problem identification and resolution techniques
- workplace recording and reporting documentation.

Assessment Conditions

Assessors must satisfy SNR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the vehicle plant, equipment and systems they have installed, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive manufacturing workplace or simulated workplace
- tools, plant, equipment and system required in the installation process
- workplace documentation:
 - design drawings
 - fault reports
 - installation plans
 - inventory lists
 - vehicle specifications
 - work instructions
- workplace procedures for installing plant and equipment.
