Assessment Requirements for AURHTA001 Carry out heavy vehicle pre-repair cleaning

Release: 1

Assessment Requirements for AURHTA001 Carry out heavy vehicle pre-repair cleaning

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- clean three of the following heavy vehicle systems or components:
 - vehicle body
 - engine
 - transmission
 - final drive
 - steering and suspension system
 - wheels and hubs
 - chassis
 - electrical component
 - fuel system component
- use chemical cleaning when cleaning one of the above systems or components.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) relating to heavy vehicle pre-repair cleaning, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using cleaning tools and equipment
 - safely handling cleaning agents
 - controlling hazards, including hazardous materials and toxic substances

- environmental requirements, including procedures for trapping, storing and disposing of cleaning agents and contaminants
- cleaning procedures, techniques and materials appropriate for mechanical and chemical components, and relevant to the task instructions
- protective treatment and storage procedures for cleaned heavy vehicle components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct or third-party observation of tasks.

Where assessment of competency includes third-party observation, individuals must provide evidence that links them to the heavy vehicles or components that they have cleaned before repair, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- workplace instructions
- manufacturer cleaning material specifications
- heavy vehicle systems and components specified in the performance evidence requiring pre-repair cleaning
- cleaning equipment, cleaning agents, materials and tools appropriate for pre-repair cleaning.
