AURHTJ004 Remove, inspect, repair and refit agricultural equipment tyres and tubes

Release: 1

AURHTJ004 Remove, inspect, repair and refit agricultural equipment tyres and tubes

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to remove and refit tyres and tubes from the wheels and rims of agricultural equipment. It involves identifying and confirming work requirements, preparing for the work; inspecting, repairing and refitting the tyres and tubes, and completing workplace processes and documentation.

It applies to those working in the automotive service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical - Heavy Vehicle

Unit Sector

Technical - Wheels and Tyres

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to remove, repair and refit agricultural tyres and tubes	1.1 Job requirements are determined from workplace instructions 1.2 Tyre and tube remove, inspect, repair and refit information is sourced and interpreted 1.3 Hazards associated with the work are identified and risks are managed

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.4 Tools, equipment and materials are selected and checked for serviceability
2. Remove and inspect tyres, tubes and wheels	2.1 Tyres and tubes are removed from wheels according to manufacturer procedures, workplace procedures and <i>safety and environmental requirements</i> 2.2 Tyres, tubes, wheels or rims are inspected according to manufacturer specifications and workplace procedures 2.3 Inspection findings and recommendations for necessary repairs are reported according to workplace procedures
3. Repair and refit tyres and tubes	3.1 Repair options are analysed and those most appropriate to the circumstances are selected 3.2 Tyres and tubes are repaired according to manufacturer specifications, workplace procedures, and safety and environmental requirements 3.3 Tyre is mounted to wheel or rim according to manufacturer specifications and workplace procedures, and without causing damage to components or systems 3.4 Assembled wheel is checked for serviceability and correct assembly, and is inflated according to manufacturer specifications and workplace procedures
4. Complete work processes	4.1 Final inspection is made to ensure work is to workplace expectations and assembled wheel is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected 4.3 Tools and equipment are checked and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	locate appropriate sources of information efficiently.

Skills	Description
Reading skills to:	interpret information from manufacturer procedures when seeking tyre and tube repair procedures and specifications.
Writing skills to:	legibly and accurately fill out workplace documentation, making repair recommendations, and recording parts and material used.
Numeracy skills to:	- interpret numerical information when repairing tyres and tubes - understand both metric and imperial units of measurement.
Technology skills to:	- operate tyre changing tools and equipment - operate tyre and tube repair equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safety and environmental requirements</i> must include:	- work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: - deflating and inflating tyres on agricultural equipment - raising and supporting machinery on unstable surfaces - manual handling when lifting wheel assemblies - removing, repairing and refitting tyres and tubes - environmental requirements, including procedures for trapping and disposing of tyre material produced during repair procedures.
---	--

Unit Mapping Information

Equivalent to AURHTJ2004 Demount, inspect, repair and mount agricultural equipment tyres and tubes
