# **AURLTD001 Select and install performance enhanced suspension system products**

**Release: 1**

## AURLTD001 Select and install performance enhanced suspension system products

### Modification History

| Release   | Comment                 |
|-----------|-------------------------|
| Release 1 | New unit of competency. |

### Application

This unit describes the performance outcomes required to select, install and adjust products to suit a customer's suspension system modification requirements.

It applies to those working in the automotive service and repair industry. The suspension systems are those of four-wheel drive (4WD) vehicles, light vehicles, light commercial vehicles or motor sport vehicles.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Competency Field

Mechanical - Light Vehicle

### Unit Sector

Technical - Steering and Suspension

### Elements and Performance Criteria

| Elements                                                                              | Performance Criteria                                                                                                                                                                                                                                                               |

| 3. Fit components and make suspension system adjustments     | 3.1 Original components are removed and stored according to customer requirements, workplace disposal procedures and <b>safety requirements</b><br>3.2 New components are inspected before installation to confirm serviceability<br>3.3 New components are installed according to manufacturer specifications, workplace procedures and safety requirements<br>3.4 Fluids and lubricants are added to components according to manufacturer specifications and workplace procedures<br>3.5 Suspension system adjustments are completed according to manufacturer specifications, workplace procedures and safety requirements |
| 4. Road test vehicle and make final adjustments              | 4.1 Vehicle is road tested to ensure compliance with project intent<br>4.2 Suspension system is inspected to confirm it is free of leaks and other malfunctions<br>4.3 Final adjustments are completed according to manufacturer specifications, workplace procedures and safety requirements                                                                                                                                                                                                                                                                                                                                 |
| 5. Complete work processes                                   | 5.1 Final inspection is made to ensure work is to workplace expectations and vehicle is presented ready for use<br>5.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected<br>5.3 Tools and equipment are checked and stored according to workplace procedures<br>5.4 Workplace documentation is processed according to workplace procedures                                                                                                                                                                                                                       |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

| Skills                             | Description                                                                                                                                                                                                                                                                                                                                                                     |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Learning skills to:                | <ul style="list-style-type: none"> <li>locate appropriate sources of information efficiently.</li> </ul>                                                                                                                                                                                                                                                                        |
| Reading skills to:                 | <ul style="list-style-type: none"> <li>interpret safe operating procedures for suspension system testing, dismantling and assembling equipment from signs and workplace and manufacturer literature</li> <li>interpret information from manufacturer and workshop manuals when seeking suspension system specifications and procedures.</li> </ul>                              |
| Writing skills to:                 | <ul style="list-style-type: none"> <li>legibly and accurately fill out workplace documentation when reporting findings, making installation recommendations, and recording parts and material used.</li> </ul>                                                                                                                                                                  |
| Oral communication skills to:      | <ul style="list-style-type: none"> <li>clarify instructions, report findings, and make installation recommendations.</li> </ul>                                                                                                                                                                                                                                                 |
| Numeracy skills to:                | <ul style="list-style-type: none"> <li>understand and communicate suspension system information in degrees and metric and imperial units of measurement</li> <li>measure suspension system components and use basic mathematical operations, including addition and subtraction, to calculate distances, tolerances and deviations from manufacturer specifications.</li> </ul> |
| Planning and organising skills to: | <ul style="list-style-type: none"> <li>plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.</li> </ul>                                                                                                                                                                                    |
| Technology skills to:              | <ul style="list-style-type: none"> <li>use measuring equipment, such as tape measures, rulers and vernier calipers.</li> </ul>                                                                                                                                                                                                                                                  |

## Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

|                                                 |                                                                                                                                                                                                                    |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><i>Safety requirements</i></b> must include: | <ul style="list-style-type: none"> <li>work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for managing stored energy in springs and torsion bars.</li> </ul> |
|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
