Assessment Requirements for AURMGA101 Set up and dismantle temporary work location and equipment at motor sport events

Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- set up and dismantle a temporary work location at three different motor sport event locations, including at least one sanctioned motor sport event.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to locate and interpret information required to set up and dismantle temporary work location and equipment at motor sport events, including:
 - information provided by customer and supervisors
 - information provided by controlling body
 - manufacturer specifications and procedures or equivalent documentation
 - event documentation
- workplace procedures required to set up and dismantle temporary work location and equipment at motor sport events, including:
 - establishing serviceability of tools and equipment
 - documentation procedures
 - housekeeping procedures, including:
 - examination of tools and equipment
 - storage of equipment
 - identification, tagging and isolation of faulty equipment
 - disposal of excess materials
 - recycling procedures
- work health and safety (WHS) requirements relating to setting up and dismantling a temporary work location and equipment at a motor sport event, including procedures for:

- selecting and using personal protective equipment (PPE)
- identifying hazards and managing risks
- key requirements of motor sport event category rules and supplementary regulations
- principles and functionality requirements of the layout of temporary work shelter, including:
 - workflow of pit lane and service area operations
 - tooling and equipment required for specific events
 - methods of monitoring effectiveness of area layout
- temporary shelter assembly and erection methods and techniques, including procedures for:
 - positioning equipment for ease of access, security, logical workflow and ergonomic use
 - setting up equipment for safe and effective operation, including:
 - correct boom height
 - securing gas bottles
 - securing service area moorings.

Assessment Conditions

Competency is to be assessed in the workplace, for one sanctioned event.

Other competencies are to be assessed in an automotive repair workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the motor sport events in which they have set up and dismantled temporary work locations and equipment, e.g. event sign-on sheet.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- three different motor sport events, including one sanctioned event
- motor sport event officiating documentation, including rules and regulations, safety procedures and event procedures
- site instructions
- temporary shelter
- temporary shelter specifications and erection procedures
- tools, equipment and materials appropriate for erecting temporary shelter
- tools and equipment appropriate for setting up and dismantling temporary work locations and equipment at specific motor sport events.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
