Release: 1

Assessment Requirements for AURTTL003 Install CNG fuel systems

Modification History

Release	Comment
Release 1	AURTTL3003 Install CNG fuel systems

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- install one complete compressed natural gas (CNG) fuel system in a vehicle.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to installing CNG fuel systems, including procedures for working with extremely cold and flammable gas
- environmental requirements, including procedures for preventing loss of gas to atmosphere
- requirements of AS/NZS 2739 Natural gas (NG) fuel systems, including:
 - containers and fuel system components
 - fuel service lines and materials
 - fuel control equipment
- Australian standard inspection, testing and commissioning requirements
- CNG system adjustment procedures, including exhaust gas analysis
- Australian standard certification, compliance plate, and marking and label requirements.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the CNG fuel systems that they have installed, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- AS/NZS 2739 Natural gas (NG) fuel systems for vehicle engines
- manufacturer vehicle CNG system specifications
- one vehicle requiring installation of a CNG fuel system
- CNG installation kit, including:
 - fill valve and fill hose
 - fuel container and mounting
 - service line
 - vaporiser
 - regulator
 - safety lock-off devices
 - mixers or injectors
 - associated electrical and electronic system, including selector and safety switches
 - compliance plates
- testing equipment for CNG fuel systems, including CNG fuel leak testing equipment, including exhaust gas analyser
- tools, equipment and materials appropriate for installing CNG fuel systems.
