Assessment Requirements for AURTTL008 Diagnose and repair LPG fuel systems

Release: 1

Assessment Requirements for AURTTL008 Diagnose and repair LPG fuel systems

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- diagnose and repair a fault in two vehicles with different liquefied petroleum gas (LPG) fuel systems.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to diagnosing and repairing LPG fuel systems, including procedures for:
 - working with extremely cold and flammable gas
 - storing LPG
- environmental requirements, including procedures for preventing loss of gas to atmosphere
- key requirements of AS/NZ 1425 LP Gas fuel systems for vehicle engines
- licensing requirements for working on LPG fuel systems
- application, purpose and operating principles of LPG fuel systems and associated components, including:
 - mixers
 - regulators
 - fuel lock-off valves
 - filters
 - tanks
 - control valves and switches
- diagnostic testing procedures for LPG fuel systems, including:

- mixers
- regulators
- fuel lock-off valves
- electronic control valves and switches
- repair procedures for LPG fuel systems, including removing, replacing and adjusting the systems
- post-repair testing procedures for LPG fuel systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the LPG fuel systems that they have worked on, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- manufacturer LPG fuel system specifications
- AS/NZ 1425 LP Gas fuel systems for vehicle engines
- two vehicles with different LPG fuel systems with faults
- diagnostic equipment for LPG fuel systems, including exhaust gas analyser
- tools, equipment and materials appropriate for repairing LPG fuel systems.
