# **Assessment Requirements for AURTTX001 Remove and tag driveline components**

**Release: 1**

## Assessment Requirements for AURTTX001 Remove and tag driveline components

### Modification History

| Release   | Comment                 |
|-----------|-------------------------|
| Release 1 | New unit of competency. |

### Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- remove and tag one of the following driveline components by title and application:
  - manual transmission
  - automatic transmission
  - drive shaft
  - axles and axle housing.

### Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to removing and tagging driveline components, including procedures for working with oils and fluids released from driveline systems
- environmental requirements, including procedures for trapping, storing and disposing of oils and fluids released from driveline systems
- identification and basic function of the driveline components specified in the performance evidence
- driveline component removal procedures
- driveline component tagging and storage procedures.

### Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the driveline components that they have removed and tagged, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- workplace instructions
- driveline components specified in the performance evidence requiring removal and tagging
- tools, equipment and materials appropriate for removing and tagging driveline components.
