Assessment Requirements for AURVTG110 Remove and install vehicle movable body glass

Release: 1

Assessment Requirements for AURVTG110 Remove and install vehicle movable body glass

Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- remove and install at least two different movable body glass components in a vehicle.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to locate and interpret information required to remove and install moveable body glass, including:
 - safety data sheets (SDS) relating to fixed body glass
 - manufacturer's specifications or equivalent documentation
- workplace procedures required to remove and install moveable body glass, including:
 - establishing the serviceability of tools and equipment
 - documentation procedures
 - housekeeping procedures, including:
 - examination of tools and equipment
 - storage of equipment
 - identification, tagging and isolation of faulty equipment
 - disposal of excess materials
 - recycling procedures
- workplace health and safety (WHS) requirements relating to removing and installing vehicle movable body glass, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using tools and lifting equipment
 - using safety data sheets (SDS) for adhesives
 - material handling and storage

- environmental requirements relating to removing and installing vehicle movable body glass, including procedures for trapping, storing and disposing of waste materials and chemicals
- movable body glass removal and installation methods and techniques, including:
 - types and uses of movable body glass tools and equipment
 - glass and material handling techniques
 - adhesive types and bonding methods
 - potential problems associated with removal and installation, and their consequences
 - movable body glass location
 - testing procedures
- procedures for protecting vehicle and components during removal and installation work
- procedures for final inspection of fitted movable body glass.

Assessment Conditions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the movable body glass they have removed and installed, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive glazing workplace, off-site workplace location or simulated workplace
- workplace instructions
- PPE to remove and install movable body glass
- SDS for adhesives
- supplier or manufacturer specifications or fitting instructions
- two different movable body glass components
- a vehicle requiring movable body glass to be removed and installed
- movable body glass installation materials, including glass sealants and adhesives
- glass cleaning materials
- tools, equipment and materials appropriate for removing and installing movable body glass.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
