Assessment Requirements for AURVTK001 Use and maintain vehicle body repair hand tools

Release: 1

Assessment Requirements for AURVT K001 Use and maintain vehicle body repair hand tools

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- use and maintain body repair hand tools to complete three different minor vehicle body repairs.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to using and maintaining vehicle body repair hand tools, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using vehicle body repair hand tools
- types, characteristics, uses and limitations of vehicle body repair hand tools, including:
 - application and operation
 - hazards and control measures
 - manufacturer specifications relating to operating procedures and maintenance requirements for the tools
- procedures for selecting tools
- procedures for identifying and tagging faulty tools
- basic maintenance and storage procedures for tools.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the use and maintenance of body repair tools in an automotive repair workplace, e.g. equipment maintenance program.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- body repair hand tools to use and maintain
- PPE applicable to the tools
- vehicles, components or materials that require the use of tools specified in the performance evidence
- material relevant to maintaining body repair hand tools, including:
 - tool operating instructions and manuals
 - relevant tool adjusting or calibration equipment
 - tagging material.
