Assessment Requirements for AURVTN039 Set up body alignment equipment on vehicles

Release: 1

Assessment Requirements for AURVTN039 Set up body alignment equipment on vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standards defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- correctly set up body alignment equipment on one vehicle.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to setting up body alignment equipment on vehicles, including procedures for:
 - selecting and using personal protective equipment (PPE), including safety glasses, ear protection and safety footwear
 - using hand tools
- types and construction of vehicle bodies
- types and application of vehicle body alignment equipment.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the body alignment equipment they have set up on vehicles, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- PPE for setting up body alignment equipment
- one vehicle requiring body alignment
- vehicle alignment measuring tools
- tools, equipment and materials appropriate for setting up body alignment equipment on vehicles.
