AURVTP016 Rectify and touch up vehicle direct gloss paint faults using two-pack systems

Release: 1

AURVTP016 Rectify and touch up vehicle direct gloss paint faults using two-pack systems

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to rectify and touch up direct gloss paint faults on vehicle body components. It involves preparing for the task, selecting and using specialist tools and equipment, identifying and rectifying faults using two-pack paint according to manufacturer specifications, and completing workplace processes and documentation.

It applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical - Paint

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to rectify and touch up paint fault	1.1 Job requirements are determined from workplace instructions 1.2 <i>Touch-up information</i> is accessed and interpreted 1.3 Vehicle paint specifications are identified from workplace instructions, and recorded

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.4 Paint materials are selected and inspected for quality 1.5 Hazards associated with the work are identified and risks are managed 1.6 Tools and equipment, including personal protective equipment (PPE), are selected and checked for serviceability 1.7 Work is planned to identify methods to rectify and touch up direct gloss paint faults, minimise waste, and prevent damage to vehicle
2. Determine paint fault, its cause and rectification requirements	2.1 Cause of paint fault is determined from available information 2.2 Faulty paintwork is visually inspected to determine extent of damage and areas requiring rectification 2.3 Damage to paintwork is assessed from visual comparison with undamaged paintwork 2.4 Fault rectification requirements are determined without causing undue damage to vehicle components or systems
3. Rectify and touch up paint fault	3.1 Materials required to restore paintwork to pre-damage condition are determined from paint manufacturer recommended procedures 3.2 Materials are measured, mixed and applied using approved equipment 3.3 Damaged paintwork is rectified and blended with existing paintwork using direct gloss two-pack system and approved blending and drying techniques 3.4 Rectification processes are completed according to workplace procedures and safety and environmental requirements , and without causing damage to vehicle components and systems
4. Complete work processes	4.1 Final inspection is made to ensure work meets workplace expectations and vehicle or component is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 4.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	locate appropriate sources of information efficiently.
Writing skills to:	legibly and accurately fill out workplace documentation.
Oral communication skills to:	- clarify instructions and procedures - clearly report quality issues and job outcomes.
Numeracy skills to:	- identify paint specification codes - use basic mathematical operations, including addition, subtraction, multiplication and division to: - calculate and measure quantities of paint and materials - determine ratios for mixing paint - calculate and set paint drying times - set spray painting air pressure and spray booth temperatures - set paint measuring system.
Planning and organising skills to:	plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Technology skills to:	use specialist tools and equipment, including paint measuring systems.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Touch-up information</i> must include:	- paint manufacturer specifications - paint technical data sheets (TDS) - paint safety data sheets (SDS) - workplace procedures.
<i>Safety and environmental requirements</i> must include:	- work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: - selecting and using PPE - using TDS and SDS for direct gloss two-pack paint - handling and storing paint materials

	• using tools and equipment • using approved drying area • environmental requirements, including procedures for trapping, storing and disposing of waste materials.
--	---

Unit Mapping Information

Equivalent to AURVTP3016 Carry out paint rectification and touch-up work for solids using two component systems

Assessment Requirements for AURVTP016 Rectify and touch up vehicle direct gloss paint faults using two-pack systems

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- rectify and touch up faults in the direct gloss paint of three different vehicles using two-pack systems, including:
 - using partial blend and fade-out blend on one vehicle
 - blending and clearing panels on one vehicle.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to rectifying and touching up vehicle direct gloss paint faults using two-pack systems, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - using technical data sheets (TDS) and safety data sheets (SDS) for direct gloss two-pack paint
 - handling and storing paint materials
 - using tools and equipment
 - using approved drying area
- environmental requirements, including procedures for trapping, storing and disposing of waste materials
- paint manufacturer specifications
- types and features of direct gloss materials
 - types and use of painting equipment, including:
 - types of spray guns and maintenance requirements

- spray gun set-up, use and maintenance
- correct use of positive air feed masks
- paint rectification and touch-up techniques and procedures, including:
 - identifying paint surface faults
 - surface preparation methods
 - paint mixing procedures
 - direct gloss paint application methods and techniques
 - paint drying methods for direct gloss materials
- procedures for protecting vehicle and components when touching up paint faults
- procedures for final inspection of paint rectification and touch-up work using direct gloss two-pack systems.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to vehicle paintwork they have rectified using direct gloss two-pack materials, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- TDS and SDS for direct gloss two-pack paint
- PPE required to rectify paintwork using direct gloss two-pack paint systems
- direct gloss refinishing materials
- three different vehicles requiring paint rectification and touch-up using direct gloss two-pack refinishing
- tools, equipment and materials appropriate for rectifying and touching up paint faults using direct gloss two-pack paint.
