AURVTP117 Rectify and touch up vehicle paint faults using clear over base two-pack systems

Release: 1

AURVTP117 Rectify and touch up vehicle paint faults using clear over base two-pack systems

Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

Application

This unit describes the skills and knowledge required to rectify and touch up paint faults on vehicle body components. This unit involves preparing for the task, selecting and using specialist tools and equipment, identifying and rectifying faults using clear over base (COB) two-pack paint materials according to manufacturer specifications, and completing workplace processes and documentation.

The unit applies to those working in the automotive refinishing industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Vehicle Body Technical - Paint

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify job requirements from workplace instructions 1.2 Identify hazards associated with the work, assess potential risks and implement control measures in line with workplace policies and procedures 1.3 Identify tools, equipment and chemicals required for repair activity and establish serviceability according to workplace procedures
2. Identify paint fault, its cause and rectification requirements	2.1 Identify cause of paint fault from paint manufacturer information and confirm with appropriate personnel 2.2 Inspect visually inspect faulty paintwork according to

ELEMENTS	PERFORMANCE CRITERIA
	workplace procedures 2.3 Assess damage to paintwork through visual comparison with undamaged paintwork 2.4 Identify fault rectification requirements according to manufacturer and workplace procedures
3. Rectify and touch-up paint faults	3.1 Identify materials required to restore paintwork to pre-damage condition from paint manufacturer recommended procedures 3.2 Measure, mix and apply materials using approved equipment 3.3 Rectify and blend damaged paintwork with existing paintwork using COB two-pack system and blending and drying techniques according to workplace procedures 3.4 Complete rectification processes according to workplace procedures
4. Complete work processes	4.1 Conduct final inspection according to workplace procedures and confirm vehicle is ready for use 4.2 Clear work area and dispose of or recycle materials according to workplace procedures 4.3 Complete documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

SKILL	DESCRIPTION
Learning	Locates required sources of information efficiently.
Reading	- Interprets workplace instructions such as job cards - Organises and interprets technical information from workplace procedures, manufacturer specifications, industry standards and paint technical data sheets (TDS) and safety data sheets (SDS).
Oral communication	- Clarifies instructions and procedures - Reports quality issues and job outcomes clearly.
Numeracy	- Identifies paint specification codes - Uses basic mathematical operations, including addition,

SKILL	DESCRIPTION
	- subtraction, multiplication and division to: - calculate and measure quantities of paint and materials - determine ratios for mixing paint - calculate and set paint drying times - Sets spray painting air pressure and spray booth temperatures - Sets paint measuring system.
Planning and organising	- Plans own work requirements - Prioritises actions to achieve required outcomes - Ensures tasks are completed within workplace timeframes.
Technology	Uses specialist tools and equipment.

Unit Mapping Information

Supersedes and is equivalent to AURVTP017 Rectify and touch up vehicle paint faults using clear over base two-pack systems.
