AURVTS002 Repair wooden components in vehicles

Release: 1

AURVTS002 Repair wooden components in vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to repair plugs, moulds, frames and flooring in vehicle bodies using wood materials. It involves preparing for the task, selecting and using wood materials and wood working equipment to repair plugs, moulds, frames and flooring components, and completing workplace processes and documentation.

It applies to those working in the automotive service and body repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Vehicle Body

Unit Sector

Technical – Fabrication

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for work	1.1 Job requirements are determined from workplace instructions 1.2 Materials are selected and inspected for quality 1.3 Hazards associated with the work are identified and risks are managed 1.4 Wood working tools and equipment and personal protective equipment (PPE) are selected and checked for serviceability

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.5 Work area is prepared and work is planned to identify methods for repairing wooden components, minimise waste, and use time efficiently
2. Carry out repair procedures	2.1 Damaged component identified for repair is removed from vehicle, and damage or fault is assessed 2.2 Repairs to damaged component are carried out using manufacturer approved techniques, repair materials and equipment according to workplace procedures and <i>safety and environmental requirements</i> 2.3 Repairs to wooden component are completed without causing damage to equipment, machinery or vehicle 2.4 Repaired component is reinstalled and finished according to workplace procedures
3. Complete work processes	3.1 Final inspection is made to ensure work meets workplace expectations and component is presented ready for use 3.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected and stored 3.3 Tools and equipment are checked, reported if faulty, and stored according to workplace procedures 3.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
Learning skills to:	locate specifications and relevant information efficiently.
Writing skills to:	legibly and accurately fill out workplace documentation.
Oral communication skills to:	- clarify instructions and procedures - clearly report quality issues and job outcomes.
Numeracy skills to:	- interpret job specifications and measurements - calculate material quantities.

Skills	Description
Planning and organising skills to:	plan own work requirements and prioritise actions to achieve required outcomes and ensure tasks are completed within workplace timeframes.
Problem solving skills to:	assess damage or faults to wooden components to determine repair method.
Technology skills to:	use specialist wood working tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance.

Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Wood working tools and equipment</i> must include:	- measuring equipment - hand tools - machine wood working equipment - adhesive and screwing equipment.
<i>Safety and environmental requirements</i> must include:	- work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: - selecting and using PPE - handling and storing vehicle plugs, moulds, frames and flooring - using tools and equipment - environmental requirements, including procedures for storing and disposing of waste materials and adhesives.

Unit Mapping Information

Equivalent to AURVTS3002 Repair plugs, moulds, frames and flooring using wood materials

Assessment Requirements for AURVTS002 Repair wooden components in vehicles

Modification History

Release	Comment
Release 1	New unit of competency.

Performance Evidence

Before competency can be determined, individuals must demonstrate they can perform the following according to the standard defined in this unit's elements, performance criteria, range of conditions and foundation skills:

- repair two of the following vehicle components using wood materials:
 - plugs
 - moulds
 - frames
 - flooring.

Knowledge Evidence

Individuals must be able to demonstrate knowledge of:

- work health and safety (WHS) and occupational health and safety (OHS) requirements relating to repairing wooden components in vehicles, including procedures for:
 - selecting and using personal protective equipment (PPE)
 - handling and storing vehicle plugs, moulds, frames and flooring
 - using tools and equipment
- environmental requirements, including procedures for storing and disposing of waste materials and adhesives
- wood repair procedures and techniques, including:
 - types and application of wood working tools and equipment
 - types and features of wood
 - types and application of adhesives
 - measuring techniques
 - patterns and template development

- procedures for final inspection of repaired wooden plugs, moulds, frames and flooring components.

Assessment Conditions

Assessors must satisfy NVR/AQTF assessor requirements.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to wooden vehicle components that they have repaired, e.g. repair orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive repair workplace or simulated workplace
- workplace instructions
- PPE required to repair wooden components
- materials required to repair wooden components
- wooden components specified in the performance evidence requiring repair
- tools, equipment and materials appropriate for repairing wooden components in vehicles.
