AURT304231A Install LPG fuel systems

Release: 1

AURT304231A Install LPG fuel systems

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the competence required to carry out the installation of LPG fuel systems.
------------------------	---

Application of the Unit

Application of the unit	The unit includes identification and confirmation of work requirement, preparation for work, installation of LPG fuel systems and completion of work finalisation processes including clean-up and documentation. Work requires individuals to demonstrate judgement and problem-solving skills in managing work activities and contributing to a productive team environment. Work is carried out in accordance with award provisions.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to install LPG fuel systems	1.1. Nature and scope of work requirements are identified and confirmed 1.2. OH&S requirements, including State/Territory regulatory requirements and personal protection needs are observed throughout the work 1.3. Procedures and information such as workshop manuals and specifications, and tooling are sourced 1.4. Method options are analysed and those most appropriate to the circumstances are selected and prepared 1.5. Technical and/or calibration requirements for installation of the systems are sourced and support equipment is identified and prepared 1.6. Warnings in relation to working with LPG fuel systems are observed
2. Carry out installation	2.1. Methods for the installation are implemented in accordance with workplace procedures and manufacturer/ component supplier specifications 2.2. Adjustments made during the installation are in accordance with manufacturer/component supplier specifications
3. Prepare vehicle for use or storage	3.1. Installation documentation is completed 3.2. Final inspection is made to ensure safety features are in place 3.3. Final inspection is made to ensure work is to workplace expectations 3.4. The vehicle is cleaned for use or storage to workplace expectations 3.5. Job card is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures and workplace policies and procedures
- apply analytical skills for the identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with clients and team members
- apply questioning and active listening skills, e.g. when obtaining information from customers
- apply oral communication skills to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring own performance
- interact with other people both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply measurements, calculate material requirements and establish quality checks
- use workplace technology related to the installation of LPG fuel systems, including use of specialist tooling, measuring equipment, computerised technology and communication devices and the reporting/recording of results

Required knowledge

A working knowledge of:

- OH&S and environmental regulations/requirements, equipment, material and personal safety requirements
- dangers of working with gas fuel systems
- operating principles of LPG fuel systems
- installation procedures
- test procedures
- enterprise quality procedures
- work organisation and planning processes

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence in this unit signifies ability to transfer competence to changing circumstances and to respond to unusual circumstances in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- conducting installation in accordance with workplace and manufacturer/component supplier requirements
- interpreting and recording the test results
- installing LPG fuel systems and associated components within workplace timeframes
- vehicle is presented to customer in compliance with workplace requirements

Context of, and specific resources for assessment

Application of competence is to be assessed in the workplace or simulated worksite

Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints

Assessment is to comply with regulatory requirements including Australian and Gas Industry Standards

The following resources should be made available:

- workplace location or simulated workplace
- materials relevant to the installation of LPG fuel systems
- equipment, hand and power tooling appropriate to the installation of LPG fuel systems
- activities covering mandatory task requirements
- specifications and work instructions

Method of assessment

Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R training package

Assessment methods must confirm consistency and accuracy of performance together with application of underpinning

EVIDENCE GUIDE

	knowledge Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies Assessment may be applied under project related conditions and require evidence of process Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role
Guidance information for assessment	

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OH&S

OH&S requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of material, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and

RANGE STATEMENT	
	substances
Personal protective equipment	Personal protective equipment is to include that prescribed under legislation/regulations/codes of practice and workplace policies and practices
Safe operating procedures	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting and working in proximity to others and site visitors
Emergency procedures	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and site evacuation
Environmental requirements	Environmental requirements are to include, but are not limited to waste management, noise, dust and clean-up management
Quality requirements	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal enterprise quality policy and standards and enterprise operations and procedures
Statutory/regulatory authorities	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice
Tooling and equipment	Tooling and equipment may include hand tooling, meters, gauges and load and gas leak testing devices
Materials	Materials may include installation kits, spare parts, gas sealants, adhesives and cleaning material
Communications	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include site specific instructions, written instructions, plans or

RANGE STATEMENT	
	instructions related to job/task and telephones and pagers
Information/documents	Sources of information/documents may include: • verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets and diagrams or sketches • safe work procedures related to the installation of LPG fuel systems • regulatory/legislative requirements pertaining to automotive industry including Australian Design Rules and Gas Industry Standards • engineer's design specifications and instructions • organisation work specifications and requirements • instructions issued by authorised enterprise or external persons • Australian Standards
