AURT317968A Identify and fit tyres and rims for specific applications (heavy)

Release: 1

AURT317968A Identify and fit tyres and rims for specific applications (heavy)

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the competence required to identify tyre and rim configurations and fit tyres and rims to suit specific heavy applications.
------------------------	--

Application of the Unit

Application of the unit	The unit includes identification and confirmation of work requirement, preparation for work, identification of configurations and fitting of tyres and rims for specific heavy applications and completion of work finalisation processes, including clean-up and documentation. Work involved includes heavy wheeled vehicles and mobile equipment. Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment. Work is carried out in accordance with award provisions.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to fit tyres and rims for specific applications	1.1. Nature and scope of work requirements are identified and confirmed 1.2. OH&S requirements, including individual State/Territory regulatory requirements and personal protection needs are observed throughout the work 1.3. Procedures and information such as workshop manuals and specifications, and tooling, are sourced 1.4. Method options are analysed and those most appropriate to the circumstances are selected and prepared 1.5. Technical and/or calibration requirements for air pressures are sourced and support equipment is identified and prepared 1.6. Warnings in relation to working with various tyre profiles are observed
2. Identify tyre and rim configuration	2.1. Methods for identification of configuration are applied in accordance with workplace procedures and manufacturer/ component supplier specifications 2.2. Tyre and rim configuration is identified and confirmed
3. Fit tyres and rims	3.1. OH&S requirements, including individual State/Territory regulatory requirements and personal protection needs are observed throughout the work 3.2. Procedures and information are identified and sourced 3.3. Technical and tool requirements for fitting tyres and rims are identified and support equipment is identified and prepared
4. Fit tyres and rims	4.1. Methods for fitting are implemented in accordance with workplace procedures and manufacturer/component supplier specifications 4.2. Adjustments made during the fitting are in accordance with manufacturer/component supplier specifications
5. Prepare vehicle for use or storage	5.1. Tyre and rim fitting schedule documentation is completed 5.2. Final inspection is made to ensure safety features are in place 5.3. Final inspection is made to ensure work is to workplace expectations 5.4. Vehicle is cleaned for use or storage to workplace expectations

ELEMENT	PERFORMANCE CRITERIA
	5.5.Job card is processed in accordance with workplace procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- apply research and interpretive skills sufficient to locate, interpret and apply manufacturer/component supplier procedures, workplace policies and procedures
- apply analytical skills for identification and analysis of technical information
- apply plain English literacy and communication skills in relation to dealing with customers and team members
- apply questioning and active listening skills for example when obtaining information from customers
- apply oral communication skills sufficient to convey information and concepts to customers
- apply planning and organising skills to own work activities, including making good use of time and resources, sorting out priorities and monitoring own performance
- interact effectively with other persons both on a one-to-one basis and in groups, including understanding and responding to the needs of a customer and working effectively as a member of a team to achieve a shared goal
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to correctly calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to the identification and fitting of tyres and rims for specific heavy applications, including the use of specialist tooling, measuring equipment and communication devices and the documenting/recording of results

Required knowledge

A working knowledge of:

- OH&S and environmental regulations/requirements, equipment, material and personal safety requirements
- dangers of working with air operated equipment
- operating principles of tyres and rims and their relationship to each other

REQUIRED SKILLS AND KNOWLEDGE

- meanings of tyre and rim configurations
- identification procedures
- fitting procedures
- enterprise quality procedures
- work organisation and planning processes

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential that competence in this unit signifies ability to transfer competence to changing circumstances and to respond to unusual circumstances in the critical aspects of: • observing safety procedures and requirements • communicating effectively with others involved in or affected by the work • selecting methods and techniques appropriate to the circumstances • completing preparatory activity in a systematic manner • interpreting tyre and rim configurations • conducting fitting of a range of tyres and rims (heavy) in accordance with workplace and manufacturer/ component supplier requirements • interpreting customer requirements • fitting of tyres and rims within workplace timeframes • vehicle presentation to customer in compliance with workplace requirements
Context of, and specific resources for assessment	Application of competence is to be assessed in the workplace or simulated worksite Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints Assessment is to comply with regulatory requirements, including Australian Standards The following resources should be made available: • workplace location or simulated workplace • material relevant to the identification and fitting of tyres and rims for specific heavy applications • equipment, hand and power tooling appropriate to the identification and fitting of tyres and rims for specific heavy applications • activities covering mandatory task requirements • specifications and work instructions
Method of assessment	Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package

EVIDENCE GUIDE

Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge

Assessment must be by direct observation of tasks, with questioning on underpinning knowledge and it must also reinforce the integration of key competencies

Assessment may be applied under project related conditions and require evidence of process

Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances

It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements

Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role

EVIDENCE GUIDE**Guidance information for assessment****Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tyre and rim requirements

Tyre and rim requirements are selected in relation to differing applications such as terrain, soil condition and load

OH&S

OH&S requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of material, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances

Personal protective equipment

Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices

Safe operating procedures

Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and site visitors

Emergency procedures

Emergency procedures related to this unit are to include but may not be limited to emergency shutdown and stopping of equipment,

RANGE STATEMENT	
	extinguishing fires, enterprise first aid requirements and site evacuation
Environmental requirements	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management
Quality requirements	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures
Statutory/regulatory authorities	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice
Tooling and equipment	Tooling and equipment may include hand tooling, meters, gauges, lifting and tyre fitting devices
Materials	Materials may include spare parts and cleaning materials
Communications	Communications are to include, but are not limited to verbal and visual instructions and fault documenting and may include site specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers
Information/documents	Sources of information/documents may include: • verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches • safe work procedures related to the identification and fitting of tyres and rims for specific heavy applications • regulatory/legislative requirements pertaining to automotive industry, including Australian Design Rules • engineer's design specifications and instructions • organisation work specifications and requirements

RANGE STATEMENT

	• instructions issued by authorised enterprise or external persons • Australian Standards
