## Elements and Performance Criteria Pre-Content

|                                                                   |                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes of a unit of competency. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide. |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Elements and Performance Criteria

| ELEMENT                                                      | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Prepare for work                                          | <p>1.1. Work instructions are used to determine job requirements, including job sheets, removal procedures and manufacturer/component supplier specifications.</p> <p>1.2. Job specifications are read and interpreted.</p> <p>1.3. Occupational health and safety (OHS) requirements, including personal protection needs, are observed throughout the work.</p> <p>1.4. Components to be removed are identified.</p> <p>1.5. Hand, power tooling and safety equipment are identified and checked for safe use.</p> <p>1.6. Procedures are determined to minimise waste materials/ components.</p> <p>1.7. Procedures are identified for maximising energy efficiency while completing the job.</p> |
| 2. Remove salvageable components, clean and present for sale | <p>2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications.</p> <p>2.2. Salvageable components are removed from vehicle according to enterprise/manufacturer/component supplier procedures.</p> <p>2.3. Components are cleaned and prepared for sale.</p> <p>2.4. Activities are carried out according to industry regulations/ guidelines, OHS requirements, legislation and enterprise procedures/policies.</p>                                                                                                                                                                                                                                          |
| 3. Clean up work area and maintain equipment                 | <p>3.1. Material that can be reused is collected and stored.</p> <p>3.2. Waste and scrap is removed following workplace procedure.</p> <p>3.3. Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures.</p> <p>3.4. Unserviceable equipment is tagged and faults identified in accordance with workplace procedures.</p> <p>3.5. Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures.</p> <p>3.6. Tooling is maintained in accordance with workplace procedures.</p>                                                                                             |

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills include:

- collect, organise and understand information related to work orders, plans and safety procedures for removing components, cleaning and presenting for sale
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and material to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- use mathematical ideas and techniques to complete removal of components required for the work
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and wastage
- use workplace technology related to removing salvageable components from vehicles, including the use of specialist tooling and equipment and communication devices and the reporting/documenting of results
- 

#### Required knowledge

Required knowledge includes:

- OHS cleaning materials, equipment, material and personal safety requirements
- vehicle safety requirements
- types and layout of service/repair manuals (hard copy and electronic)
- industry codes of practice removal methods
- inspection procedures
- sales preparation procedures
- cleaning methods, material and equipment
- manual handling methods
- work organisation and planning processes
- enterprise quality processes

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of:

- observing safety procedures and requirements
- communicating effectively with others involved in or affected by the work
- selecting methods and techniques appropriate to the circumstances
- completing preparatory activity in a systematic manner
- removing and cleaning of a range of components without causing damage or injury to tooling, equipment and persons
- preparing the components for sale.

#### Context of, and specific resources for assessment

- Application of competence is to be assessed in the workplace or simulated worksite.
- Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints.
- Assessment is to comply with regulatory requirements, including Australian Standards.
- The following resources should be made available:
  - workplace location or simulated workplace
  - material relevant to removing salvageable components from vehicles
  - equipment, hand and power tooling appropriate to removing salvageable components from vehicles
  - activities covering mandatory task requirements
  - specifications and work instructions.

#### Method of assessment

- Assessment must satisfy the endorsed Assessment Guidelines of the Automotive Industry Retail, Service and Repair Training Package.
- Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge.
- Assessment must be by direct observation of tasks, with

| <b>EVIDENCE GUIDE</b>                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                            | <p>questioning on underpinning knowledge and it must also reinforce the integration of key competencies.</p> <ul style="list-style-type: none"> <li>• Assessment may be applied under project-related conditions and require evidence of process.</li> <li>• Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.</li> <li>• It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements.</li> <li>• Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.</li> </ul> |
| <b>Guidance information for assessment</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Range Statement

| <b>RANGE STATEMENT</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p> |                                                                                                                                                                                                                                                                |
