AURVTG3013 Remove and install large vehicle windscreens

Release 1

AURVTG3013 Remove and install large vehicle windscreens

Modification History

Release	Comment
Release 1	Replaces AURV334263A Remove and install large vehicle windscreens Unit code updated to meet policy requirements Reference to OHS legislation replaced with new WHS legislation Licensing statement added to unit descriptor

Unit Descriptor

Unit descriptor	This unit covers the competence required to remove and install windscreens in "large" mining and agricultural vehicles. Licensing, legislative, regulatory or certification requirements may apply to this unit in some jurisdictions. Users are advised to check with the relevant regulatory authority.
------------------------	---

Application of the Unit

Application of the unit	The unit includes identification and confirmation of work requirement, preparation for work, removal and installation of windscreens, testing of installation and completion of work finalisation processes, including clean-up and documentation. Large vehicles are defined as, including major mining and agricultural vehicles or equivalent. Work requires individuals to demonstrate judgement and problem-solving skills in managing own work activities and contributing to a productive team environment.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for work	1.1. Work instructions are used to determine job requirements, including method, materials and equipment. 1.2. Job specifications are read and interpreted. 1.3. WHS requirements, including personal protection and specific needs when working at heights, are observed throughout the work. 1.4. Material for work is selected. 1.5. Equipment and tooling are identified and checked for safe and effective operation. 1.6. Procedures are determined to minimise waste material. 1.7. Procedures are identified for maximising energy efficiency while completing the job.
2. Remove vehicle windscreen	2.1. Information is accessed and interpreted from manufacturer/ component supplier specifications. 2.2. Tooling and equipment for removal and screen support are selected and used. 2.3. Work height safety harnesses/equipment and procedures are adopted. 2.4. Removal is carried out in accordance with vehicle manufacturer/component supplier and tolerances. 2.5. Removal is completed without causing damage to any component or system. 2.6. Removal activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 2.7. Workplace documentation is completed and dealt with relevant to removal outcomes.
3. Install vehicle windscreen	3.1. Information is accessed and interpreted from manufacturer/ component supplier specifications. 3.2. Type of glass for application is selected and used. 3.3. Equipment for cutting windscreens from flat laminated glass is selected and used. 3.4. Tooling and equipment for installation and screen support are selected and used. 3.5. Work height safety harnesses/equipment and procedures are adopted. 3.6. Installation is carried out in accordance with vehicle

ELEMENT	PERFORMANCE CRITERIA
	manufacturer/component supplier tolerances. 3.7.Installation is completed without causing damage to any component or system. 3.8.Drying times adhered to according to job requirements and manufacturer/component supplier specifications. 3.9.Installation activities are carried out according to industry regulations/guidelines, WHS legislation, and enterprise procedures/policies. 3.10. Workplace documentation is completed and dealt with relevant to installation outcomes.
4. Clean up work area and maintain equipment	4.1.Material that can be reused is collected and stored. 4.2.Waste and scrap is removed following workplace and environmental procedures. 4.3.Equipment and work area are cleaned and inspected for serviceable condition in accordance with workplace procedures. 4.4.Unserviceable equipment is tagged and faults identified in accordance with workplace requirements. 4.5.Operator maintenance is completed in accordance with manufacturer/component supplier specifications and worksite procedures. 4.6.Tooling is maintained in accordance with workplace procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- collect, organise and understand information related to work orders, plans and safety procedures for removal and installation of rubber/urethane glazed windscreens in "large" mining and agricultural vehicles
- communicate ideas and information to enable confirmation of work requirements and specifications, coordination of work with worksite supervisor, other workers and customers, and the reporting of work outcomes and problems
- plan and organise activities, including preparation and layout of worksite and obtaining of equipment and materials to avoid backtracking, workflow interruptions or wastage
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise workflow and productivity
- establish safe and effective work processes which anticipate and/or resolve problems and downtime, to systematically develop solutions to avoid or minimise reworking and avoid wastage
- use mathematical ideas and techniques to calculate time, assess tolerances, apply accurate measurements, calculate material requirements and establish quality checks
- use workplace technology related to removal and installation of windscreens, including the use of specialist tooling, measuring equipment and communication devices and the reporting/recording of results

Required knowledge

A working knowledge of:

- WHS regulations/requirements, equipment, material and personal safety requirements
- equipment safety requirements, including safety harnesses
- types of glass, including special acoustic glass
- manufacturer/component supplier/company policy and procedures
- windscreen attachment methods, including frames, clamps and special rubber sections
- removal and installation procedures, including working at heights and support of heavy windscreens
- test procedures
- work organisation and planning processes
- enterprise quality processes

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	It is essential that competence is fully observed and there is ability to transfer competence to changing circumstances and to respond to unusual situations in the critical aspects of: • observing safety procedures and requirements • communicating effectively with others involved in or affected by the work • selecting methods and techniques appropriate to the circumstances • completing preparatory activity in a systematic manner • removing and installing a minimum of two different "large" vehicle windscreens • completing workplace records.
Context of, and specific resources for assessment	Application of competence is to be assessed in the workplace or simulated worksite. Assessment is to occur using standard and authorised work practices, safety requirements and environmental constraints. Assessment is to comply with regulatory requirements, including Australian Standards. The following resources should be made available: • workplace location or simulated workplace • materials relevant to removal and installation of windscreens • equipment, hand and power tooling appropriate to removal and installation of windscreens • activities covering mandatory task requirements • specifications and work instructions.
Method of assessment	• Assessment must satisfy the endorsed assessment guidelines of the automotive industry's RS&R Training Package. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must be by direct observation of tasks, with

EVIDENCE GUIDE

	questioning on underpinning knowledge and it must also reinforce the integration of key competencies. • Assessment may be applied under project related conditions and require evidence of process. • Assessment must confirm a reasonable inference that competence is able not only to be satisfied under the particular circumstance, but is able to be transferred to other circumstances. • It is preferable that assessment reflects a process rather than an event and occurs over a period of time to cover varying quality circumstances. Evidence of performance may be provided by customers, team leaders/members or other persons subject to agreed authentication arrangements. • Competence in this unit may be assessed in conjunction with other functional units which together form part of the holistic work role.
Guidance information for assessment	

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Removal and installation methods

Removal and installation methods are to include frames, clamps, special rubber sections and glazed windscreen, cutting windscreens from flat laminated glass, and installing.

Installation

Installing may require/involve glass components, moulding/trims, mirrors, sun visors, aerials, electrical and mechanical components, rubbers, locking strips.

WHS

WHS requirements are to be in accordance with

RANGE STATEMENT	
	legislation/regulations/codes of practice and enterprise safety policies and procedures. This may include protective clothing and equipment, use of tooling and equipment, workplace environment and safety, handling of materials, use of fire fighting equipment, enterprise first aid, hazard control and hazardous materials and substances.
Personal protective equipment	Personal protective equipment is to include that prescribed under legislation/regulation/codes of practice and workplace policies and practices.
Safe operating procedures	Safe operating procedures are to include, but are not limited to operational risk assessment and treatments associated with vehicular movement, toxic substances, electrical safety, machinery movement and operation, manual and mechanical lifting and shifting, working in proximity to others and worksite visitors.
Emergency procedures	Emergency procedures related to this unit are to include, but are not limited to emergency shutdown and stopping of equipment, extinguishing fires, enterprise first aid requirements and worksite evacuation.
Environmental requirements	Environmental requirements are to include but are not limited to waste management, noise, dust and clean-up management.
Quality requirements	Quality requirements are to include, but are not limited to regulations, including Australian Standards, internal company quality policy and standards and enterprise operations and procedures.
Statutory/regulatory authorities	Statutory/regulatory authorities may include Federal, State/Territory and local authorities administering acts, regulations and codes of practice.
Tooling and equipment	Tooling and equipment may include hand tooling, power tooling, cleaning equipment, sealing equipment, lifting and supporting equipment, safety harnesses, scaffolds and cutting equipment.

RANGE STATEMENT	
Materials	Materials may include adhesives, solvents, installation consumables and cleaning materials.
Communications	Communications are to include, but are not limited to verbal and visual instructions and fault reporting and may include worksite specific instructions, written instructions, plans or instructions related to job/task, telephones and pagers.
Information/documents	Sources of information/documents may include: • verbal or written and graphical instructions, signage, work schedules/plans/specifications, work bulletins, memos, material safety data sheets, diagrams or sketches • safe work procedures related to removal and installation of windscreens • regulatory/legislative requirements pertaining to working with glass • engineer's design specifications and instructions • organisation work specifications and requirements • instructions issued by authorised enterprise or external persons • Australian Standards.
