Assessment Requirements for AVID0007 Conduct aviation freight weighing operations

Release: 1

Assessment Requirements for AVID0007 Conduct aviation freight weighing operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards, including:
 - contamination of, or from, materials being handled
 - dust/vapours
 - hazardous or dangerous materials
 - spill, leakages and ruptures
- applying precautions and required action to minimise, control or eliminate identified hazards applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying and correctly using equipment required to conduct aviation freight weighing operations
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information, signs and labels
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to cultural differences in the workplace
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or

damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- types of freight, including:
 - allowable dangerous goods
 - diplomatic items
 - fragile goods
 - general freight
 - human remains
 - live freight
 - loose freight
 - mail/express
 - perishable goods
 - unaccompanied baggage
 - valuables
- air waybill documentation requirements
- features and differences in various types of weighing equipment used at Australian airports and aviation freight terminals
- manual lifting precautions and procedures
- manufacturer instructions for equipment used during aviation freight weighing operations
- people to be consulted about accepting freight for air transport, including:
 - customers
 - dangerous goods experts and advisors
 - experts and advisors on the transport of animals and livestock
 - experts on other special categories of air freight
 - flight crew
 - other members of the work team/s
 - perishable goods experts and advisors
 - supervisors and managers
 - technical staff
- principles of the hierarchy of risk control:
 - elimination
 - substitution
 - isolation
 - engineering control measures
 - safe working practices

- PPE
- documentation, including:
 - aircraft loading/trim sheet
 - aviation freight weighing checklists
 - conditions of service, legislation and industrial agreements, including workplace agreements and awards
 - emergency procedures
 - flight schedules
 - freight manifest, air waybill and other relevant freight documentation
 - induction and training materials
 - local instructions
 - manufacturer specifications and instructions relevant weighing equipment
 - WHS regulations
 - sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders relevant to aviation freight weighing operations
 - workplace procedures and instructions, and job specifications
- principles of aviation freight transport, and importance of load planning and aircraft trim
- problems that may occur when conducting aviation freight weighing operations and appropriate action that should be taken in each case
- relevant WHS and environmental procedures and regulations
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- risks that exist when conducting aviation freight weighing operations and related risk control procedures and precautions
- workplace procedures for aviation freight weighing operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Aviation freight weighing operations must be carried out in one or more of the following:

- aviation freight depot/terminal, or freight check-in point at either a major airport or regional airport
- domestic or international aviation freight transport

- fully manual process, or in conjunction with automated freight handling/management equipment

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and PPE currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulation assessment.
