Assessment Requirements for AVID2005 Accept freight for air transport

Release: 1

Assessment Requirements for AVID2005 Accept freight for air transport

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- modifying activities dependent on differing workplace contingencies, situations and environments
- monitoring and anticipate operational problems and hazards and take appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communication equipment to required protocol
- reading and interpreting relevant instructions, regulations, procedures and other information
- reporting and/or rectifying any identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- chain of responsibility requirements
- characteristics and ways of identifying various types of freight
- cold chain checklists and guidelines for the air transport of perishable goods
- dangerous goods including potential hidden or undeclared dangerous goods and the regulatory requirements procedures, checklists and guidelines for dangerous goods identification, acceptance (or otherwise), handling, packing, storage, labelling, etc.
- documentation requirements for the transport of various types of freight by air
- people to be consulted about accepting freight for air transport:
 - customers
 - dangerous goods experts and advisors
 - experts and advisors on the transport of animals and livestock
 - experts on other special categories of air freight
 - flight crew
 - other members of the work team(s)
 - perishable goods experts and advisors
 - supervisors and managers
 - technical staff
- problems that may occur when carrying out acceptance of freight for air transport and appropriate action that should be taken in each case
- relevant WHS and environmental procedures and regulations
- relevant regulatory requirements pertaining to acceptance, packing, marking, labelling, documenting, storing and despatching of freight designated for air transport, including International Air Transport Association (IATA) and Civil Aviation Safety Authority (CASA) requirements
- risks that exist when accepting freight for air transport and related risk control procedures and precautions
- safety principles for accepting freight for air transport
- workplace procedures for accepting, packing, marking, labelling, documenting, storing and despatching various types of freight designated for air transport.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
