Assessment Requirements for AVIE3003 Complete a Notice to Airmen

Release: 1

Assessment Requirements for AVIE3003 Complete a Notice to Airmen

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aerodrome operating procedures
- En Route Supplement Australia (ERSA) information:
 - aerodrome diagram
 - aerodrome frequency response unit
 - aerodrome location and administration
 - air traffic services
 - ground services
 - lighting data
 - movement area data
 - navigation aids data
 - notices
 - obstacle-clear take-off gradients
 - obstacle survey areas
 - one directional runways
 - runway distance supplement
 - runway slope
 - runway strip width
 - special procedures
 - supplementary take-off distances (STODA)
 - traffic advisory frequency
 - unicom
- aircraft schedules and their use in aerodrome inspection and reporting
- problems that may occur when completing a NOTAM and appropriate action that should be taken in each case
- purpose and application of Method of Working Plans (MOWPs)
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders pertaining to completing a NOTAM
- relevant WHS/OHS and environmental procedures and regulations
- reporting procedures
- safety hazards and risks that exist when completing a NOTAM and related risk control procedures and precautions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
