AVIO0006 Conduct vehicle search for access to security sensitive areas

Release: 1

AVIO0006 Conduct vehicle search for access to security sensitive areas

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct vehicle searches, in compliance with relevant regulatory requirements and national operating standards.

It includes: planning and prepare for vehicle search; implementing a search; recognising and acting on abnormal situations; and completing post search activities.

This unit addresses technical skill requirements (physical, mental and task-management abilities) related to security duties of screening officers, and contributes to safe and effective performance in complex transport security operational environments.

Operations are conducted as part of recreational and commercial across a variety of operational contexts within the Australian aviation industry and maritime environment.

Screening is performed independently or under limited supervision until accredited as a screener then as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

O – Security

Unit Sector

Assessment Requirements for AVIO0006 Conduct vehicle search for access to security sensitive areas

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying hazard and risk mitigation processes and requirements for identifying and responding to them
- applying regulatory requirements, including work health and safety and environmental procedures, in the context of searching and vehicle and seizure of prohibited items
- using search methods specified in operating procedures
- using equipment for the purpose and in the manner intended and authorised
- using information systems to report items found and record incidents
- identifying weapons, explosives, prohibited items accurately
- applying relevant regulatory requirements and workplace procedures in handling and storage of Weapons, explosives and prohibited items
- using correct techniques and procedures in accordance with work health and safety (WHS)/occupational health and safety (OHS)/Occupational Safety and Health (OSH) procedures, legislative requirements and workplace procedures
- applying relevant procedures in the process of seizing prohibited and unauthorised items to limit of authority
- presenting clear, concise and accurate information in relation to post search activities
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- using safe, thorough and systematic search techniques
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- OHS/WHS/OSH requirements and regulatory requirements for vehicle security checks and precautions within limits of own role and workplace procedures
- relevant legislation and workplace procedures

- relevant authority to vehicle search procedures, in the context of search and seizure of prohibited and unauthorised items
- selecting and using relevant search and other equipment
- documenting and reporting outcomes of search procedures
- unauthorised and illegal items and substances in accordance with organisation's policies, procedures and legal requirements
- analysis and observation techniques in vehicle searches for prohibited and unauthorised items
- relevant procedures in the process of seizing prohibited and unauthorised items to limit of authority
- notification processes of results in accordance with regulatory requirements and workplace procedures
- effective communication techniques with others when following vehicle search security procedures
- documentation and recording processes for vehicle search details
- response plan and procedures for damaged property associated with vehicle search
- systematic search techniques.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.
