Assessment Requirements for AVIO0023

Coordinate response to security incidents and breaches

Release: 1

Assessment Requirements for AVIO0023 Coordinate response to security incidents and breaches

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one separate occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified security threats
- applying relevant agreements, codes of practice, legislative requirements and workplace procedures
- communicating effectively with relevant personnel
- completing relevant documentation
- collecting evidence related to the security incidents/breaches
- conducting debriefing post incident
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and security environment
- operating electronic communications equipment to required protocol
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying problems, faults or malfunctions promptly in accordance with workplace procedures
- responding to threats or potential threats, including one or more of the following:
 - aviation transport security threats
 - biosecurity and/or biohazardous substances
 - firearm handling
 - hazardous and/or dangerous materials
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards

- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Acts, regulations and codes of practice that relate to security incidents
- screening authority role and responsibilities in relation to coordinating response to security incidents and breaches
- aviation screening notices, including:
 - specifications on equipment
 - screening methodology
 - contingency arrangements
- incident review procedures as relevant to airport
- modification of screening based on changes to policies and procedures
- responding agencies, including:
 - law enforcement
 - local/federal police
 - emergency services
- reporting arrangements, including:
 - workplace policies, procedures
 - WHS obligations
 - statutory obligations
 - law enforcement
- relevant stakeholders, including:
 - airline staff
 - law enforcement
 - screeners
 - passengers
 - other airport staff
- security breaches
- threats, including hazardous items/persons
- training/upskilling requirements of staff.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice, guidance material and operation manuals
- acceptable means of simulation assessment.
