Assessment Requirements for AVIO0026 Manage aviation security screening equipment

Release: 1

Assessment Requirements for AVIO0026 Manage aviation security screening equipment

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with others
- completing relevant documentation
- identifying, selecting, using and routinely checking relevant equipment, processes and procedures when using screening equipment in a transport security screening environment
- identifying and responding to screening equipment failure during testing
- identifying and responding to screening equipment failures during screening of articles at an airport
- modifying activities in response to different workplace contingencies, risk situations and environments
- operating screening testing equipment correctly in accordance with workplace procedures
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- using correct procedures, set-up and test screening equipment while meeting work health and safety (WHS)/occupational health and safety (OHS) requirements
- working collaboratively and liaising with others when managing security screening equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Acts, regulations and codes of practice that relate to security screening equipment standard operating procedures (SOPs) in a transport security protection screening environment
- record keeping requirements
- testing resources, including:
 - screening equipment
 - logs
 - screening staff
 - reports

- re-testing procedures
- state and territory radiation testing requirements and certification
- statutory requirements
- sections of the legislation relevant for using screening equipment
- site layout, organisational structures, organisation's transport security program and testing equipment
- WHS requirements relevant to setting up and operating screening equipment
- workplace procedures for carrying out daily, weekly or monthly tests of screening equipment
- workplace procedures to be followed when screening equipment does not meet the required standard during testing
- workplace procedures to be followed when screening equipment fails during screening of articles to enter a security zone.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice, guidance material and operation manuals
- acceptable means of simulation assessment.
