Assessment Requirements for AVIO0027

Apply electronic metal detection

Release: 1

Assessment Requirements for AVIO0027 Apply electronic metal detection

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- accurately describing in verbal, written and digital format security risks and incidents
- conducting general procedures for monitoring security in a security screening environment
- conducting response procedures for the detection of prohibited items
- following security legislative requirements applicable to the security screening environment
- interpreting selected pictorial, graphical and written signage and instructions using electronic metal detection equipment
- preparing, testing and using electronic metal detectors
- relaying information to others
- reporting identified security risks or incidents in a security screening environment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- applicable commonwealth, state or territory legislation relevant to own work environment and role
- applicable Work Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- chain of command and communication channels
- communication modes and security equipment and systems relevant to own work environment
- communication, interpersonal and literacy skills to ask effective questions and clarify security procedures
- customer service principles and standards
- duty of care requirements of self and others
- general methods for observing incidents and monitoring risks within a security screening environment

- general methods for observing potential security risks or suspicious behaviour
- methods, techniques and equipment involved when screening people and cargo using an electronic metal detector including special requirements
- organisational policy on security equipment operation, systems and procedures
- organisational procedures for responding to positive alarms
- own responsibilities to comply with safe working practices
- procedures for emergency, evacuation and first aid response
- procedures for reporting identified security risks or suspicious behaviour
- procedures for reporting the detection of prohibited items
- role of designated personnel for security response
- the range of potential security risks or incidents relevant to a security screening environment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
