Assessment Requirements for AVIW0025 Complete aircraft and flight equipment pre- and post-flight actions

Release: 1

Assessment Requirements for AVIW0025 Complete aircraft and flight equipment pre- and post-flight actions

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and the range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and using ground support equipment required for replenishing aircraft systems
- identifying and using required communications technology
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following aircraft documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in communications equipment in accordance with standard operating procedures (SOPs)
- operating specialist equipment
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and rectifying identified problems, faults or malfunctions promptly in accordance with workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of

the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aircraft and aircraft systems configuration and operation
- aircraft and flight equipment inspection procedures and serviceability criteria
- documentation inspection and compilation procedures
- aircraft publications, including:
 - aviation maintenance documentation
 - checklists
 - flight manuals
 - organisational policy and procedures manuals
- pre- and post-flight inspection procedures
- relevant Australian Standards
- aircraft documentation, including:
 - aeronautical information publication (AIP)
 - aircraft flight manual (AFM)
 - approved checklists
 - charts
 - in a Defence context, relevant Defence Orders and Instructions
 - induction and training materials
 - operations manuals
 - pilot operating handbook (POH)
 - relevant sections of Civil Aviation Safety Regulations (CASRs)
- workplace procedures and instructions, and job specification relevant legislation and regulations, including:
 - CASRs and Civil Aviation Orders related to aircraft maintenance
 - state/territory environmental protection
 - national and state/territory WHS
- relevant WHS responsibilities
- specialist equipment inspection procedures
- specialist equipment uses, capabilities and limitations
- typical problems that may occur when completing aircraft and flight equipment pre- and post-flight actions, and appropriate solutions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate,

assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals,
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.
