Assessment Requirements for CPCCBBC4002 Manage work health and safety in the building and construction workplace

Assessment Requirements for CPCBC4002 Manage work health and safety in the building and construction workplace

Modification History

- Release 3 Updated reference to general construction induction training program.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Typographical error in Element and Performance Criteria 2.4 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting a workplace safety audit for a construction worksite.

In doing this, a candidate must:

- access and interpret relevant government work health and safety (WHS) legislation and regulations
- identify faults, problems and non-compliances and their impact on workplace safety
- introduce safety systems allowing for ease of reporting safety issues, controlling hazards and maintaining worker safety and competence.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- current WHS Acts and regulations
- relevant safety codes, standards and guidelines
- organisation's workplace safety policies and procedures:
 - workplace safety and reporting requirements
- inspection, auditing and investigation processes
- hazards arising from:
 - high-risk construction work:
 - crane operation
 - dogging and rigging

- concrete pumping
- tilt-up panel construction
- scaffolding
- operation of plant and equipment
- demolition
- asbestos removal and exposure to asbestos fibres
- exposure to silica
- airborne contaminants
- exposure to excessive noise
- electrical work
- working at heights
- hazardous materials and substances
- working in confined spaces
- safe work practices:
 - emergency, first aid and evacuation procedures
 - waste management and environmental practices
 - personal protective equipment (PPE)
- educational programs:
 - worker site-specific induction training
 - contractor detailed WHS induction
 - WHS induction for visitors
 - Health and Safety Representative (HSR) training
- mental health first aid and welfare of workers
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract, integrate and compile information.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- WHS legislation and regulations
- safety codes, standards and guidelines
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- workplace incident data and incident reports

- business equipment to collect and record data, and produce reports
- digital devices, applications and software to research, transmit and receive information electronically.
