Assessment Requirements for CPCCB5003 Supervise the planning of on-site building and construction work

Release: 2

Assessment Requirements for CPCCBC5003 Supervise the planning of on-site building and construction work

Modification History

Release 2 Updated reference to general construction induction training program.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCBC5003A Supervise the planning of on-site medium rise building or construction work. Change to title. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by supervising the planning of one on-site building and construction project for:

- a Class 1 and 10 building, to a maximum of three storeys, or
- a Class 2 to 9, Type B or C.

In doing this, the candidate must:

- translate contract requirements into construction plans and processes
- develop strategies that effectively maximise physical and human resource use
- apply construction planning processes that effect desired outcomes and meet proposed timeframes
- establish and maintain a workplace environment representative of good management practice.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction legislation, codes and standards for construction
- building and construction industry contracts
- building and construction industry subcontracting system:
 - organisational and subcontracted human resources
 - human resource principles and practices
 - subcontractor requirements and availability
 - relevant licensing arrangements
 - rates and costs related to payments and claims

- on-site and off-site management practices, including:
 - on-site facilities
 - plant and equipment
 - power, water, telephone and other temporary services
 - pre-cut or pre-cast components
 - raw materials
 - temporary site facilities
- construction planning process, including:
 - project scheduling
 - critical events and milestones
 - labour, materials and plant and equipment coordination
- workplace safety requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- relevant project plans, specifications, codes, standards and regulations for building class
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- technology and applications to access, extract, integrate and compile information
- national and state industrial relations legislation.
