strategies**

Assessment Requirements for CPCCE3016 Identify hazards on demolition sites and apply risk management strategies

Modification History

Release 2 Updated reference to general construction induction training program.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCE3016A Identify hazards on demolition sites and apply risk management strategies. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency in this unit, a candidate must identify two different hazards on two separate occasions and apply a risk management strategy for each hazard on each occasion.

In doing this, the candidate must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- the compliance requirements of the relevant Australian Standards, Building Code of Australia (BCA), model codes of practice, environmental and work health and safety (WHS) legislation
- workplace safety risk management strategies for:
 - exposure to silica dust
 - exposure to loud noise
 - hazardous manual tasks
 - trips or falls
 - air quality
- demolition methods and procedures
- general construction terminology
- hazards occurring and risk management strategies used on demolition sites:
 - falling objects
 - flying debris
 - structural composition hazards
 - services hazards
 - fire or explosion risk

- stormwater management
- groundwater monitoring
- traffic management
- types of plant, tools and equipment applicable to demolition tasks:
 - applications of each tool or piece of equipment
 - maintenance requirements
 - safe methods of operation for different demolition tasks.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment.

Assessors are responsible for ensuring that the candidate demonstrating competency has access to:

- demolition worksite/s and specifications for identifying hazards and applying risk management strategies
- appropriate documents, materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- requirements of workplace policies, procedures and demolition plans.
