Assessment Requirements for CPCCPB3005 Fix ceiling sheets to external protected areas

Release: 2

Assessment Requirements for CPCCPB3005 Fix ceiling sheets to external protected areas

Modification History

- Release 2 Updated reference to general construction induction training program.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and equivalent to CPCCPB3005A Fix ceiling sheets to external protected areas. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by fixing a minimum 15 square metres of ceiling sheets to an external protected area.

All work must be performed to the standard required in the workplace and must comply with Commonwealth and state/territory laws and regulations, the National Construction Code, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards for fixing ceiling sheets to external protected areas, including AS/NZS2589 Gypsum linings - application and finishing
- quality policies and standards for fixing ceiling sheets to external protected areas
- safety requirements for fixing ceiling sheets to external protected areas, including personal protective equipment (PPE), job safety analyses, safe work method statements and safety data sheets
- processes for safe handling and lifting of ceiling sheets
- environmental requirements for fixing ceiling sheets to external protected areas
- manufacturers' product installation procedures and nominated specifications for fixing ceiling sheets to external protected areas
- types and uses of fasteners for fixing ceiling sheets to external protected areas
- plasterboard materials
- materials storage and environmentally friendly waste management
- plans, drawings and specifications for fixing ceiling sheets to external protected areas
- plasterboard fixing techniques for fixing ceiling sheets to external protected areas

- processes for the calculation of material requirements for fixing ceiling sheets to external protected areas
- types of tools and equipment for ceiling sheets to external protected areas.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.
