Assessment Requirements for CPCCPB3020 Match, mitre and install cast ornamental cornices

Release: 2

Assessment Requirements for CPCCPB3020 Match, mitre and install cast ornamental cornices

Modification History

- Release 2 Updated reference to general construction induction training program.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and equivalent to CPCCPB3020A Match, mitre and install cast ornamental cornices. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by matching, cutting mitres and installing a minimum of 12 metres of ornamental cornice.

All work must be performed to the standard required in the workplace and must comply with Commonwealth and state/territory laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of Australian Standards for matching mitre and installing cast ornamental cornices
- workplace quality policies and standards for matching mitre and installing cast ornamental cornices
- safety requirements for matching mitres and installing cast ornamental cornices, including personal protective equipment (PPE), job safety analyses, safe work method statements and safety data sheets, working safely at heights
- techniques for cutting, safe lifting, temporary and permanent fixing of cornice
- methods of using levels to align ornamental cornice
- manufacturers' specifications for preparing adhesives
- identifying faults in materials and construction that may influence the matching mitres process
- types and uses of ornamental cornice profiles and sizes
- plans, drawings and specifications for cutting and fixing ornamental cornices
- processes for measuring, calculating and recording cornice requirements

- types of tools and equipment for cutting and fixing ornamental cornices.

Assessment Conditions

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.
