Assessment Requirements for CPCCPB3021 Install and fix residential acoustic plaster products

Release: 2

Assessment Requirements for CPCCPB3021 Install and fix residential acoustic plaster products

Modification History

Release 2 Updated reference to general construction induction training program.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCPB3021A Install and fix residential acoustic plaster products. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by installing a minimum 15 square metres of an acoustic plaster system to walls and ceiling.

All work must be performed to the standard required in the workplace and must comply with the National Construction Code, Commonwealth and state/territory laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards for installing and fixing residential acoustic plaster products
- quality policies and standards for installing and fixing residential acoustic plaster products
- safety requirements for installing and fixing residential acoustic plaster products, including personal protective equipment (PPE), job safety analyses, safe work method statements and safety data sheets
- environmental requirements for installing and fixing residential acoustic plaster products
- techniques for selecting materials required for task, including fasteners, sealers and penetration seals compatible with system performance requirements
- manufacturers' specifications for installing and fixing residential acoustic plaster products
- types and uses of tools and equipment for installing and fixing residential acoustic plaster products.

Assessment Conditions

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.
