**Release: 4**

# Assessment Requirements for CPCCPD3027 Remove and apply wallpaper

## Modification History

- Release 4 Updated reference to general construction induction training program.
- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.  
Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package Release 1.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.  
Minor edits to formatting.
- Release 1 This version first released with CPC Property Services Training Package Release 5.0.  
Supersedes and is equivalent to CPCCPD3027A Apply wallpaper. Minor title change. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- removing a minimum of six square metres of wallpaper
- preparing and applying a minimum of six square metres of lining paper
- preparing and applying a minimum of six square metres of vinyl wallpaper
- preparing and applying a minimum of six square metres of unpasted wallpaper.

In removing this wallpaper, the following procedures, products and techniques must be included:

- dry stripping
- soaking
- steam stripping

In applying this wallpaper, a minimum of the following must be included:

- walls and internal and external corners
- a reveal
- a window
- an arch

- walls containing power points and switches
- a ceiling to a minimum of three metres by three strips wide
- one set pattern
- one drop pattern
- one random pattern.

All work must be performed to the standard required in the workplace and must meet the requirements of work health and safety (WHS), Commonwealth and state or territory legislation, manufacturers' specifications, and environmental plans and obligations.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- safety requirements relevant to applying wallpaper
- environmental requirements relevant to applying wallpaper
- painting and decorating terminology
- use and application of woven and non-woven wallpaper
- plans, drawings and specifications relevant to applying wallpaper
- plans for hanging wallpaper
- common wallpapering defects
- compatibility of preparatory materials and wallpaper
- types of wallpaper:
  - borders
  - lining paper
  - unpasted and ready pasted wallpapers (simplex and duplex)
  - vinyl wallpaper
  - washable wallpaper
  - paste on wall
- types of wallpaper adhesives:
  - cellulose
  - latex
  - acetate
  - starch
  - other special adhesive blends
- preparation for wallpaper applications for walls:
  - set plaster
  - flat surfaces
  - curved surfaces
- surface preparation for:
  - fibre cement products
  - fibrous plaster
  - medium density fibre board

- plasterboard
- lined surface
- rendered surface
- types, characteristics, uses and limitations of tools and equipment relevant to applying wallpaper
- procedures used to apply straight pattern match, drop pattern match and random match wallpapers
- use of laser levels relevant to applying wallpaper
- procedures, products and techniques associated with removal of wallpaper, including:
  - dry stripping
  - soaking
  - steam stripping
- processes for the calculation of material requirements relevant to applying wallpaper
- quality requirements relevant to applying wallpaper
- surface preparation techniques for the application of wallpaper
- types and properties of wall coverings and their suitability to various substrates
- types, uses and limitations of commonly used wallpaper adhesives
- wallpaper hanging processes and techniques.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures.
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.
