Assessment Requirements for CPCCR2001 Handle roof tiling materials

Release: 3

Assessment Requirements for CPCCRT2001 Handle roof tiling materials

Modification History

- Release 3 Updated reference to general construction induction training program.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Correction to Elements and Performance Evidence 4.1 and 4.2.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and equivalent to CPCCRT2001A Handle roof tiling materials.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by:

- transferring sufficient materials to sark, batten and tile a minimum 45 square metres of roof from ground level to the roof working area
- relocating waste materials from the roof working area to ground level
- disposing of waste material.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of Australian Standards for handling roof tiling materials
- quality policies and standards for handling roof tiling materials
- safety requirements for handling roof tiling materials, including:
 - safety data sheets
 - job safety analyses and/or safe work method statements in accordance with Safe Work Australia *Code of Practice for Construction Work* or state and/or territory equivalent
 - personal protective equipment (PPE)
- environmental requirements for handling roof tiling materials

- handling characteristics of roof tiling materials:
 - adhesives
 - concrete and terracotta tiles
 - fastenings and other mechanical fixings
 - flashings
 - bedding
 - sarking materials
 - timber and metal battens
 - flexible pointing material
 - lead
 - shingles
 - slate
- types and uses of materials storage and environmentally friendly waste management
- types and uses of plans, drawings and specifications for handling roof tiling materials
- types and uses of tools and equipment for handling roof tiling materials
- roof construction systems, structures and tiling loading considerations
- roof tiling materials handling and disposal techniques and processes.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
