Assessment Requirements for CPCCSC2001 Handle and position scaffolding tools, equipment and components

Assessment Requirements for CPCCSC2001 Handle and position scaffolding tools, equipment and components

Modification History

- Release 2 Updated reference to general construction induction training program.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and is equivalent to CPCCSC2001A Safely handle and use scaffolding tools and equipment. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by handling and locating scaffolding tools, equipment and components for three different scaffolding tasks.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for handling and positioning scaffolding tools, equipment and components under applicable Commonwealth, state or territory work health and safety (WHS) legislation and codes of practice:
 - job safety and environmental analyses (JSEAs)
 - safe work method statements (SWMSs)
 - safety data sheets (SDSs)
 - signage
 - environmental and worksite safety plans
 - reporting problems
- interpreting task plans and specifications relating to safely handling and locating scaffolding tools, equipment and components
- types, characteristics, uses and limitations of scaffolding tools and equipment:
 - hammers
 - ladders
 - nips
 - pallet trolleys
 - planks, including laminated
 - spanners

- spirit levels
- tape measures
- processes for assisting mechanical handling equipment operator, including signalling methods
- storage requirements for scaffolding tools, equipment and components.

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry-standard equipment used to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.
