CPCSC2001 Handle and position scaffolding tools, equipment and components

Release: 2

CPCCSC2001 Handle and position scaffolding tools, equipment and components

Modification History

- Release 2 Updated reference to general construction induction training program.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and is equivalent to CPCCSC2001A Safely handle and use scaffolding tools and equipment. Updated to meet the Standards for Training Packages.

Application

This unit specifies the skills and knowledge required to handle and locate scaffolding tools, equipment and components. It includes selecting, moving, locating, positioning and storing scaffolding tools, equipment and components.

It applies to those who work under the direction of more experienced workers to support dogging activities.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit Sector

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- | | |
|-----------------------|--|
| 1 Plan and prepare to | 1.1 Read work order and associated documentation and |
|-----------------------|--|

handle, move and locate scaffolding tools, equipment and components.		clarify work tasks with relevant persons.
	1.2	Plan all work to comply with relevant legislation, regulations, standards, codes, work health and safety (WHS), environmental and workplace requirements.
	1.3	Select tools and equipment required for work tasks, check for serviceability and rectify or report identified faults.
	1.4	Select and fit personal protective equipment (PPE) appropriate for work activities.
2 Handle, move, sort and stack scaffolding tools, equipment and components.	2.1	Move scaffolding tools, equipment and components manually using safe manual handling techniques.
	2.2	Stack or band scaffolding tools, equipment and components for mechanical handling in accordance with work order.
	2.3	Load, unload, move or locate scaffolding tools, equipment and components at specified location, assist mechanical handling equipment operator and ensure safe handling.
	2.4	Sort scaffolding tools, equipment and components, and stack for ease of identification and retrieval, in accordance with task sequence and job location.
	2.5	Protect scaffolding tools, equipment and components against physical and water damage, and store clear of access ways for ease of identification, retrieval and distribution.
3 Store scaffolding tools, equipment and components.	3.1	Use safe handling techniques to move scaffolding tools, equipment and components manually or mechanically to storage area after conclusion of scaffolding task.
	3.2	Clean, check, maintain and store scaffolding tools, equipment and components in accordance with manufacturer and workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and is equivalent to CPCSC2001A Safely handle and use scaffolding tools and equipment.

Assessment Requirements for CPCSC2001 Handle and position scaffolding tools, equipment and components

Modification History

Release 2 Updated reference to general construction induction training program.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCSC2001A Safely handle and use scaffolding tools and equipment. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by handling and locating scaffolding tools, equipment and components for three different scaffolding tasks.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for handling and positioning scaffolding tools, equipment and components under applicable Commonwealth, state or territory work health and safety (WHS) legislation and codes of practice:
 - job safety and environmental analyses (JSEAs)
 - safe work method statements (SWMSs)
 - safety data sheets (SDSs)
 - signage
 - environmental and worksite safety plans
 - reporting problems
- interpreting task plans and specifications relating to safely handling and locating scaffolding tools, equipment and components
- types, characteristics, uses and limitations of scaffolding tools and equipment:
 - hammers
 - ladders
 - nips
 - pallet trolleys
 - planks, including laminated
 - spanners

- spirit levels
- tape measures
- processes for assisting mechanical handling equipment operator, including signalling methods
- storage requirements for scaffolding tools, equipment and components.

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry-standard equipment used to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.
