Assessment Requirements for CPCCSH3006 Prepare shopfittings and surfaces and apply liquid finishes

Release: 1

Assessment Requirements for CPCCSH3006 Prepare shopfittings and surfaces and apply liquid finishes

Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded non-equivalent CPCCSH2001A Prepare surfaces and CPCCSH3006A Apply finishes.

Performance Evidence

A person who demonstrates competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must:

- prepare, stain and spray lacquer two surfaces of at least two square metres each, as follows:
 - one veneered board surface
 - one solid timber surface
- prepare surface and spray paint or seal at least two square metres of manufactured board
- prepare surface and spray paint at least two square metres of previously painted surface.

In doing the above work, the person must:

- interpret and confirm job requirements, including calculating area of surfaces and estimating volume of liquid finish required
- plan and organise work to achieve outcomes of job requirements, in consultation with client and other shopfitters, as required
- comply with health and safety requirements relevant to preparing shopfittings and surfaces and applying liquid finishes
- apply workplace and relevant work site procedures relevant to preparing shopfittings and surfaces and applying liquid finishes
- develop or adapt job safety analyses (JSA) or safe work method statements (SWMS) for tasks
- identify and select suitable finishes and applicators
- correctly and efficiently use applicators
- identify typical faults and problems that occur when preparing shopfittings and applying liquid finishes and action required to rectify them
- communicate with others to ensure safe and effective shopfitting operations.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- applicators and equipment relevant to applying liquid finishes, including safe operating procedures
- characteristics of liquid finishes listed in the range of conditions, including safety data sheet (SDS) information
- construction terminology relating to shopfitting areas and liquid finishing requirements
- surface preparation required for surfaces specified in the performance evidence
- types of hazardous materials used for coating shopfittings and surfaces and requirements for their safe handling
- workplace and equipment safety requirements relating to preparing shopfittings and surfaces and applying liquid finishes.

Assessment Conditions

Suitable assessment of performance requires:

- equipment and tools:
 - as listed in the range of conditions
- materials:
 - surfaces and liquid finishes as listed in the range of conditions
- specifications:
 - job requirements
 - health and safety requirements
 - manufacturer specifications
 - SDS
 - JSA or SWMS
 - workplace and relevant work site procedures
- physical conditions:
 - retail space with shopfitters working concurrently
- relationships with team members and supervisor:
 - must schedule and complete work to accommodate requirements of other shopfitters
- relationship with client:
 - must schedule and complete work to accommodate client requirements
- timeframe:
 - according to job requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
