CPCCSP2001 Handle solid plastering materials

Release: 2

CPCCS2001 Handle solid plastering materials

Modification History

- Release 2 Updated reference to general construction induction training program.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and equivalent to CPCCS2001A Handle solid plastering materials.
Updated to meet the Standards for Training Packages 2012.

Application

This unit specifies the skills and knowledge required to safely and effectively handle, sort, prepare, position and remove solid plastering materials.

The unit is suitable for people with basic skills and knowledge who undertake routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

CPCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Unit Sector

Plastering

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Plan and prepare to handle solid plastering materials.	1.1 Read and interpret work instructions and plan sequence of work.
	1.2 Plan all work to comply with laws and regulations,

- Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.
- 1.3 Select and use personal protective equipment (PPE) for each stage of the task.
 - 1.4 Inspect work site, assess hazards and apply risk controls, including required signage and barricades, and identify hazardous materials for separate handling by authorised personnel.
 - 1.5 Select tools and equipment, check for serviceability and report any faults.
- 2 Handle, sort and store solid plaster materials.
- 2.1 Check materials for compliance to plans and specifications.
 - 2.2 Determine handling requirements for materials from manufacturers' specifications and select and use safe manual and mechanical handling techniques.
 - 2.3 Sort materials for type and size, distribute to job locations, both manually and using mechanical devices, and stack for ease of access, task sequence and clear of traffic ways.
 - 2.4 Protect materials against physical and water damage.
- 3 Remove materials and clean up.
- 3.1 Determine handling requirements for unused materials and select and use safe handling techniques following safety data sheets.
 - 3.2 Clear the work area, and dispose of, reuse or recycle materials in accordance with state and territory legislation and workplace policies and procedures.
 - 3.3 Identify hazardous materials for separate handling by authorised personnel.
 - 3.4 Use dust suppression procedures to minimise health risk to self and others.
 - 3.5 Store reusable materials and protect against physical and water damage.

- 3.6 Clean tools and equipment, check for serviceability, report any damage or faults and store and secure.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

Supersedes and equivalent to CPCCS2001A Handle solid plastering materials.

Assessment Requirements for CPCCS2001 Handle solid plastering materials

Modification History

Release 2 Updated reference to general construction induction training program.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCS2001A Handle solid plastering materials.
Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by safely manually and mechanically handling and preparing a minimum of five solid plastering materials, including hazardous materials, for two separate solid plastering projects, and cleaning up after each project.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of Australian Standards and work health and safety legislation for handling solid plastering materials, including *HB161 Guide to plastering*
- workplace quality policies and standards for handling solid plastering materials
- safety requirements for handling solid plastering materials, including:
 - job safety analyses and/or safe work method statements in accordance with Safe Work Australia *Code of Practice for Construction Work* or state and/or territory equivalent
 - personal protective equipment (PPE)
- handling requirements for materials for solid plastering, including:
 - loose materials
 - bagged materials
 - bucketed materials
 - pre-mixed materials
 - corner beads
 - casing beads
 - timber or expanded metal lathing (EML)

- plaster compounds and finishing coats
- additives, such as plasticisers, colour and waterproofing agents
- types and uses of tools and equipment for handling solid plastering materials
- types and uses of plans and specifications for handling solid plastering materials
- processes for identifying and handling hazardous materials
- environmental and sustainability requirements for handling and disposing of solid plastering materials.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
