Assessment Requirements for CPCCSP3007 Apply plaster by projection machine

Release: 3

Assessment Requirements for CPCCSP3007 Apply plaster by projection machine

Modification History

- Release 3 Updated reference to general construction induction training program.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2.
- Correction to prerequisite unit code from CPPWHS2001 Apply WHS requirements, policies and procedures in the construction industry to CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and equivalent to CPCCSP3007A Apply plaster by projection machine. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by applying plaster using a projection machine to a minimum of 3 square metres of wall surface and a minimum 3 square metres of ceiling.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the NCC and Australian Standards for applying plaster by projection machine
- workplace quality policies and standards for applying plaster by projection machine
- safety requirements for applying plaster by projection machine, including:
 - job safety analyses and/or safe work method statements in accordance with Safe Work Australia *Code of Practice for Construction Work* or state and/or territory equivalent
 - safety data sheets (SDS)
 - personal protective equipment (PPE)
- environmental requirements for applying plaster by projection machine

- processes, procedure and techniques of:
 - conducting prestart checks
 - mixing materials for projection machines
 - applying plaster using projection machine
 - operating various projection machines
 - calculating material using measurements and formulas
- types and uses of tools and equipment for applying plaster by projection machine, including:
 - piston driven projection machines
 - air driven/spray projection machines
- types and uses of plans, drawings and specifications for applying plaster by projection machine.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
