Assessment Requirements for CPCCWC2001 Complete penetrations and flashings

Release: 2

Assessment Requirements for CPCCWC2001 Complete penetrations and flashings

Modification History

- Release 2 Updated reference to general construction induction training program.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and equivalent to CPCCWC2001A Complete penetrations and flashings. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by completing three penetration and flashing tasks including:

- one for electrical services
- one for communication services.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- requirements of Australian Standards for completing penetrations and flashings associated with wall and ceiling lining
- safety requirements for completing penetrations and flashings associated with wall and ceiling lining, including:
 - job safety analyses and/or safe work method statements in accordance with Safe Work Australia *Code of Practice for Construction Work* or state and/or territory equivalent
 - safety data sheets (SDS)
 - personal protective equipment (PPE)
- characteristics and applications of wall and ceiling lining materials:
 - beads
 - cement render
 - fibre cement sheets
 - finishing materials
 - plaster compounds
 - plasterboard

- plasterglass sheets
- water resistant plasterboard
- penetration and flashing techniques
- processes for calculating material requirements and measuring penetration locations
- quality requirements for completing penetrations and flashings
- techniques for locating services
- types and uses of plans, drawings and specifications for penetrations and flashings
- types and uses of tools and equipment used when completing penetrations and flashings
- types of services and purposes for which penetrations and flashings are required.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
