Assessment Requirements for CPCCWF3007 Tile curved surfaces

Release: 2

Assessment Requirements for CPCCWF3007 Tile curved surfaces

Modification History

Release 2 Updated reference to general construction induction training program.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCWF3007A Tile curved surfaces. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by tiling:

- the surface of a circular column that is at minimum 360 millimetres in diameter and one metre high
- an archway with minimum dimensions:
 - span one metre
 - rise 200 millimetres
 - 100 millimetre returns.

All work must be performed to the standard required in the workplace and comply with Commonwealth and state/territory laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of Australian Standards for installing wall tiles
- workplace quality policies and standards for tiling
- safety requirements for installing wall tiles to curved surfaces, including:
 - job safety analyses and/or safe work method statements in accordance with Safe Work Australia *Code of Practice for Construction Work* or state and/or territory equivalent
 - personal protective equipment (PPE)
- environmental requirements for installing tiles
- placement and design of movement joints when installing wall tiles to curved surfaces
- types and uses of materials storage and environmentally friendly waste management
- types and uses of plans, drawings and specifications for installing tiles to curved surfaces
- types and uses of tools and equipment for installing tiles to curved surfaces

- processes for the calculation of material requirements for installing tiles to curved surfaces
- techniques in installing tiles to curved surfaces:
 - preparation of structures and substrates
- types of substrates
- cutting and installing of types of tiles in common use on curved surfaces
- tiling material qualities, characteristics, preparation requirements, techniques, applications and limitations
- processes for the calculation of material requirements for tiling curved surfaces
- tiling material qualities, characteristics, preparation requirements, techniques, applications and limitations:
 - adhesive types and classifications
 - grout types, including epoxy grout.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
