Assessment Requirements for CPCPCM4011 Carry out work-based risk control processes

Release: 2

Assessment Requirements for CPCPCM4011 Carry out work-based risk control processes

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.
Unit Sector added to unit.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
Supersedes and is equivalent to CPCPCM4011A Carry out work-based risk control processes. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- conducting a plumbing and services work-based risk assessment
- documenting and evaluating a risk management process
- locating, interpreting and applying relevant information
- complying with work health and safety (WHS) regulations and Commonwealth, state and territory legislation applicable to workplace operations
- identifying WHS duty holders and their duties
- developing a risk control policy and procedure.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- risk management theory and risk assessment terminology, including the hierarchy of controls
- reporting and recording procedures
- quality assurance systems and standards
- regulatory requirements related to obligations and risk management
- personal risk assessment and control processes
- how to access relevant information, including codes and standards
- tools, materials and equipment used for carrying out work-based risk control processes
- WHS requirements for carrying out work-based risk control processes.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
