**Assessment Requirements for
CPCPCM4015 Access and interpret
regulatory requirements for the plumbing
and services industry**

Release: 1

Assessment Requirements for CPCPCM4015 Access and interpret regulatory requirements for the plumbing and services industry

Modification History

- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- New unit.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- Locating, downloading and identifying the different volumes of the National Construction Code (NCC)
- Identifying ten (10) different Australian Standards referenced in the National Construction Code volume 3 “Plumbing Code of Australia” (PCA) and the area of plumbing they cover, including jurisdictional variations and additions
- Identifying the official location where to obtain five (5) current versions of Australian Standards referenced in the PCA
- Determining classes and type of buildings referenced in the National Construction Code (NCC)
- Identifying the cross-volume considerations in the PCA, locating their location within NCC volumes 1 or 2.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- the different sections, parts and their purpose contained in each volume of the National Construction Code (NCC)
- the difference between Performance Solutions and Deemed to Satisfy (DTS) installations
- the hierarchy of legislation and relationship between Acts, regulations, codes and standards
- jurisdictional requirements and application process for a performance solution
- jurisdictional requirements and process to lawfully carry out plumbing and services work
- WaterMark certification scheme and its relevance to installation and design of plumbing systems, or
- a metal cladding system on a building to meet compliance for three of the following provisions:
 - structural
 - sound transmission

- energy efficiency
- bushfire
- condensation management
- weatherproofing
- fire resistance.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
