Assessment Requirements for CPCPRF3026 Install roof sheets, wall cladding and complex flashings

Release: 2

Assessment Requirements for CPCPRF3026 Install roof sheets, wall cladding and complex flashings

Modification History

- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.
- Amended Performance Criteria 1.4, 2.2, 3.2, 4.1 through 4.4.
 - Amended Performance Evidence.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.
- Supersedes and is not equivalent to CPCPRF3026A Install composite roof systems. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria for this unit by:

- installing roof sheeting, wall cladding and insulation to a steep pitch roof structure not less than two metres wide and 1.5 metres long incorporating a dorma window or portico, draining onto a flat roof.
- installing the following complex flashings to a roof structure incorporating a
 - complex junction with two barges and a rolled ridge over a dormer roof; and
 - dorma or portico valley installation penetrating and terminating through a steep pitched roof; and
 - a transition flashing to seal between the steep pitch roof and the flat roof.

Note: Jointing and sealing to be weatherproof.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Safe Work Australia - Managing the risk of falls in housing construction, Code of Practice
- sequential installation
- battens and/or safety battens required spacings for:
 - 600 mm truss spacing
 - >900 mm truss spacing
- batten fixing requirements to roof trusses
- roof components:
 - roof sheeting
 - wall cladding

- flashing and capping
- complex flashing
- roof battens
- fixings and fasteners
- weathering
- approved sealants
- installation in bushfire prone areas
- how to access relevant information, including codes and standards
- tools, materials and equipment used to install roof sheeting, wall cladding and complex flashings
- work health and safety (WHS) requirements to install roof sheeting, wall cladding and complex flashings.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.
