Assessment Requirements for CPCSH3002 Fabricate and assemble shopfront structures

Release: 3

Assessment Requirements for CPCSHHP3002 Fabricate and assemble shopfront structures

Modification History

Release 3	Updated reference to general construction induction training program.
Release 2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Rectified numbering of Performance Criteria.
Release 1	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0. Supersedes and is equivalent to CPCCSH3002 Fabricate and assemble shopfront structures.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit of competency by fabricating and assembling a shopfront for one of the following as a minimum:

- shopping centre with a minimum size of 2.4 metres high and 3.0 metres wide
- commercial building with a minimum size of 2.4 metres high and 3.0 metres wide
- industrial building with a minimum size of 2.4 metres high and 3.0 metres wide.

The shopfronts must:

- include the entry, bulkheads and component fittings
- be constructed using aluminium, glass and timber
- comprise of one special finish.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- shopfront regulations, codes and standards, in particular:
 - Australian Standard (AS) 1288 Glass in buildings
- organisation's quality assurance requirements relating to fabricating and assembling shopfront structures
- sustainable shopfitting practices
- key features of shopfront working drawings and specifications
- workplace processes and procedures and environmental requirements

- characteristics, applications and limitations of materials and components used in shopfront structures:
 - aluminium
 - glass
 - timber
 - special finishes
 - glues/silicones/adhesives/tapes
 - nuts/bolts/screws
 - brackets
 - closers/handles and stops
- workplace safety:
 - job safety and environmental analysis (JSEA)
 - safe work method statements (SWMSs)
 - safety data sheets (SDSs)
 - hierarchy of control
 - hazardous manual tasks
 - hazardous materials
 - exposure to excessive noise
 - exposure to dust
 - electrical safety
 - emergency procedures (evacuation, location and use of firefighting equipment, first aid)
 - safety of public, visitors and others in the workplace
- induction and safe operation of CNC equipment:
 - start-up and shutdown procedures
 - data input to achieve job requirements
 - reduced speed dry run to check functions and alarms
 - faults and problems and actions to rectify
 - types and uses of CNC machinery
 - range of software applications appropriate to CNC machinery
- processes and techniques for fabricating and assembling shopfront structures:
 - levelling techniques using laser and spirit levels
 - using measurements and formulas to calculate overall and internal sizes of components
 - measuring and squaring frames
- functional and operational features of power tools and equipment:
 - static machinery
 - air compressor and hoses
 - grinders
 - laser levels
 - drills

- planers/routers/joiners
- sanders
- battery operated tools.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- relevant shopfront legislation, codes and Australian Standards
- current workplace procedures, workplace safety and environmental documentation
- shopfront drawings and specifications, organisational policies, procedures and equipment to undertake the performance criteria and assessment requirements
- digital technology, devices and software to program equipment and to develop and save documents electronically.
