Assessment Requirements for CPCSH3006 Prepare shopfittings and surfaces and apply liquid finishes

Release: 2

Assessment Requirements for CPCSH3006 Prepare shopfittings and surfaces and apply liquid finishes

Modification History

Release 2	Updated reference to general construction induction training program.
Release 1	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0 Supersedes and is not equivalent to CPCSH3006 Prepare shopfittings and surfaces and apply liquid finishes.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by preparing new and previously coated surfaces for staining and painting to meet product specifications by:

- staining and spraying a lacquer finish to a new timber surface with a minimum of two square metres
- priming and painting a metal or concrete surface
- preparing and painting a previously painted surface
- painting a surface using a roller and brush.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- shopfitting regulations, codes and standards relevant to preparing and finishing surfaces
- relevant organisation's quality assurance requirements relating to the preparation and application of liquid finishes to shopfittings and surfaces
- sustainable shopfitting practices
- workplace processes and procedures and environmental requirements
- construction and shopfitting terminology relating to preparing and applying finishes to surfaces, including technical data for various surface finishes
- characteristics, applications and limitations of materials used for preparing and applying finishes to surfaces:
 - volatile organic compounds (VOC)
 - sealers
 - lacquers
 - paints
 - stains

- workplace safety:
 - job safety and environmental analysis (JSEA)
 - safe work method statements (SWMSs)
 - hierarchy of control
 - safety data sheets (SDSs)
 - hazardous manual tasks
 - hazardous chemicals
 - exposure to excessive noise
 - exposure to dust
 - electrical safety
 - emergency procedures (evacuation, location and use of firefighting equipment, first aid)
 - safety of public, visitors and others in the workplace
- processes and techniques for preparing and finishing surfaces:
 - surface preparation using grinding, manual and mechanical scraping and sanding, heat guns, washing down
 - cleaning previously coated surfaces of dust, grease, chalking, mould, smoke damage and blistering, flaking, peeling, cracking
 - horizontal and vertical application methods using brush, pad, roller, spray gun
- functional and operational features of tools and equipment:
 - spray equipment
 - heat removal equipment
 - mechanical sanders
 - spill kits
 - ventilation and extraction equipment
 - applicators and equipment
- solving problems, overcoming issues and meeting project schedules.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- relevant shopfitting regulations, codes and Australian Standards
- current workplace procedures, workplace safety and environmental documentation
- job requirements, organisational policies, procedures and equipment to undertake the performance criteria and assessment requirements

- digital technology, devices and software to source information and to develop and save documents electronically.
