CPC Construction, Plumbing and Services Training Package

Release: 11.0

Table of Contents

CPC10126 Certificate I in Construction 57
CPC20120 Certificate II in Construction 60
CPC20220 Certificate II in Construction Pathways 65
CPC20720 Certificate II in Drainage 74
CPC20822 Certificate II in Prefabricated Concrete Element Installation 79
CPC30120 Certificate III in Shopfitting 84
CPC30216 Certificate III in Signs and Graphics 88
CPC30320 Certificate III in Concreting 92
CPC30326 Certificate III in Carpentry 99
CPC30426 Certificate III in Demolition 110
CPC30620 Certificate III in Painting and Decorating 115
CPC30720 Certificate III in Rigging 122
CPC30820 Certificate III in Roof Tiling 128
CPC30920 Certificate III in Scaffolding 133
CPC31020 Certificate III in Solid Plastering 138
CPC31120 Certificate III in Steelfixing 144
CPC31220 Certificate III in Wall and Ceiling Lining 149
CPC31320 Certificate III in Wall and Floor Tiling 160
CPC31420 Certificate III in Construction Waterproofing 166
CPC31920 Certificate III in Joinery 171
CPC32320 Certificate III in Stonemasonry 179
CPC32420 Certificate III in Plumbing 189
CPC32620 Certificate III in Roof Plumbing 206
CPC32720 Certificate III in Gas Fitting 213
CPC32820 Certificate III in Fire Protection 221
CPC32920 Certificate III in Construction Crane Operations 229
CPC33020 Certificate III in Bricklaying and Blocklaying 234
CPC33226 Certificate III in Utility Locating 244
CPC40120 Certificate IV in Building and Construction 249
CPC40320 Certificate IV in Building Project Support 257
CPC40820 Certificate IV in Swimming Pool and Spa Building 263
CPC40920 Certificate IV in Plumbing and Services 267

© Commonwealth of Australia, 2026 BuildSkills Australia

CPC41020 Certificate IV in Demolition....273
CPC50220 Diploma of Building and Construction (Building)....278
CPC50320 Diploma of Building and Construction (Management)....284
CPC50520 Diploma of Fire Systems Design....289
CPC50620 Diploma of Hydraulic Services Design....293
CPC50722 Diploma of Construction Waterproofing Design and Survey....297
CPC60121 Advanced Diploma of Building Surveying....302
CPC60220 Advanced Diploma of Building and Construction (Management)....308
CPCSS00005 Provide Building Surveying Services for Residential Buildings up to Three Storeys....312
CPCSS00006 Apply BIM Processes to Construction Work....315
CPCSS00007 Prefabricated Concrete Element Installation General Skill Set....317
CPCSS00008 Lift and Place Prefabricated Concrete Elements Skill Set....320
CPCSS00009 Inspect the Erection of Prefabricated Concrete Elements Skill Set....322
CPCSS00010 Design Waterproofing Skill Set....324
CPCSS00011 Design and Survey Waterproofing Skill Set....326
CPCSS00012 Ground Disturbance Skill Set....328
CPCSS00026 Assess Operational Risk When Working with Hydrogen Skill Set....331
AHCLSC319 Implement a retaining wall project....333
Assessment Requirements for AHCLSC319 Implement a retaining wall project....336
AURVTP109 Apply vehicle body film wrapping....338
Assessment Requirements for AURVTP109 Apply vehicle body film wrapping....341
BSBAUD513 Report on quality audits....343
Assessment Requirements for BSBAUD513 Report on quality audits....346
BSBCMM411 Make presentations....348
Assessment Requirements for BSBCMM411 Make presentations....351
BSBESB301 Investigate business opportunities....353
Assessment Requirements for BSBESB301 Investigate business opportunities....356
BSBESB303 Organise finances for new business ventures....358
Assessment Requirements for BSBESB303 Organise finances for new business ventures....361
BSBESB305 Address compliance requirements for new business ventures....363
Assessment Requirements for BSBESB305 Address compliance requirements for new business ventures....366
BSBESB402 Establish legal and risk management requirements of new business ventures....368

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for BSBESB402 Establish legal and risk management requirements of new business ventures....372
BSBESB403 Plan finances for new business ventures....374
Assessment Requirements for BSBESB403 Plan finances for new business ventures....377
BSBESB406 Establish operational strategies and procedures for new business ventures....379
Assessment Requirements for BSBESB406 Establish operational strategies and procedures for new business ventures....384
BSBESB407 Manage finances for new business ventures....386
Assessment Requirements for BSBESB407 Manage finances for new business ventures....389
BSBHRM415 Coordinate recruitment and onboarding....391
Assessment Requirements for BSBHRM415 Coordinate recruitment and onboarding....395
BSBLDR413 Lead effective workplace relationships....397
Assessment Requirements for BSBLDR413 Lead effective workplace relationships....400
BSBLDR414 Lead team effectiveness....402
Assessment Requirements for BSBLDR414 Lead team effectiveness....405
BSBMKG623 Develop marketing plans....407
Assessment Requirements for BSBMKG623 Develop marketing plans....410
BSBOPS304 Deliver and monitor a service to customers....412
Assessment Requirements for BSBOPS304 Deliver and monitor a service to customers....416
BSBOPS404 Implement customer service strategies....418
Assessment Requirements for BSBOPS404 Implement customer service strategies....422
BSBOPS502 Manage business operational plans....424
Assessment Requirements for BSBOPS502 Manage business operational plans....427
BSBOPS504 Manage business risk....429
Assessment Requirements for BSBOPS504 Manage business risk....432
BSBOPS505 Manage organisational customer service....434
Assessment Requirements for BSBOPS505 Manage organisational customer service....438
BSBOPS601 Develop and implement business plans....440
Assessment Requirements for BSBOPS601 Develop and implement business plans....444
BSBPEF501 Manage personal and professional development....446
Assessment Requirements for BSBPEF501 Manage personal and professional development....449
BSBPEF502 Develop and use emotional intelligence....451
Assessment Requirements for BSBPEF502 Develop and use emotional intelligence....454
BSBPMG422 Apply project quality management techniques....456

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for BSBPMG422 Apply project quality management techniques 459
BSBPMG426 Apply project risk management techniques.....461
Assessment Requirements for BSBPMG426 Apply project risk management techniques....465
BSBPMG430 Undertake project work 467
Assessment Requirements for BSBPMG430 Undertake project work.....471
BSBPMG532 Manage project quality 473
Assessment Requirements for BSBPMG532 Manage project quality 476
BSBPMG535 Manage project information and communication.....478
Assessment Requirements for BSBPMG535 Manage project information and communication 481
BSBPMG536 Manage project risk 482
Assessment Requirements for BSBPMG536 Manage project risk.....486
BSBPMG538 Manage project stakeholder engagement.....488
Assessment Requirements for BSBPMG538 Manage project stakeholder engagement.....491
BSBSUS211 Participate in sustainable work practices 493
Assessment Requirements for BSBSUS211 Participate in sustainable work practices 496
BSBSUS411 Implement and monitor environmentally sustainable work practices 498
Assessment Requirements for BSBSUS411 Implement and monitor environmentally sustainable work practices 503
BSBTEC201 Use business software applications.....505
Assessment Requirements for BSBTEC201 Use business software applications.....508
BSBWHS513 Lead WHS risk management.....510
Assessment Requirements for BSBWHS513 Lead WHS risk management.....514
BSBWHS516 Contribute to developing, implementing and maintaining an organisation's WHS management system 517
Assessment Requirements for BSBWHS516 Contribute to developing, implementing and maintaining an organisation's WHS management system 522
BSBWRT411 Write complex documents.....524
Assessment Requirements for BSBWRT411 Write complex documents 527
CHCDIV001 Work with diverse people.....529
Assessment Requirements for CHCDIV001 Work with diverse people.....532
CPCBIM4001 Plan to comply with BIM requirements for construction work.....535
Assessment Requirements for CPCBIM4001 Plan to comply with BIM requirements for construction work.....538
CPCBIM4002 Use BIM processes to carry out construction work.....540

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for CPCBIM4002 Use BIM processes to carry out construction work 543
CPCBIM4003 Contribute to BIM deliverables for construction work....545
Assessment Requirements for CPCBIM4003 Contribute to BIM deliverables for construction work 548
CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings....550
Assessment Requirements for CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings....554
CPCCBC4002 Manage work health and safety in the building and construction workplace 557
Assessment Requirements for CPCCBC4002 Manage work health and safety in the building and construction workplace 561
CPCCBC4003 Select, prepare and administer a construction contract 564
Assessment Requirements for CPCCBC4003 Select, prepare and administer a construction contract....569
CPCCBC4004 Identify and produce estimated costs for building and construction projects 572
Assessment Requirements for CPCCBC4004 Identify and produce estimated costs for building and construction projects 576
CPCCBC4005 Produce labour and material schedules for ordering....578
Assessment Requirements for CPCCBC4005 Produce labour and material schedules for ordering 582
CPCCBC4006 Select, procure and store construction materials for building and construction projects 584
Assessment Requirements for CPCCBC4006 Select, procure and store construction materials for building and construction projects 588
CPCCBC4007 Plan building and construction work....591
Assessment Requirements for CPCCBC4007 Plan building and construction work 595
CPCCBC4008 Supervise site communication and administration processes for building and construction projects 598
Assessment Requirements for CPCCBC4008 Supervise site communication and administration processes for building and construction projects....603
CPCCBC4009 Apply legal requirements to building and construction projects....607
Assessment Requirements for CPCCBC4009 Apply legal requirements to building and construction projects 611
CPCCBC4010 Apply structural principles to residential and commercial constructions 613
Assessment Requirements for CPCCBC4010 Apply structural principles to residential and commercial constructions 619
CPCCBC4012 Read and interpret plans and specifications 623

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for CPCCBC4012 Read and interpret plans and specifications ..627
CPCCBC4013 Prepare and evaluate tender documentation 630
Assessment Requirements for CPCCBC4013 Prepare and evaluate tender documentation ..633
CPCCBC4014 Prepare simple building sketches and drawings 635
Assessment Requirements for CPCCBC4014 Prepare simple building sketches and drawings 638
CPCCBC4015 Prepare specifications for all construction works 640
Assessment Requirements for CPCCBC4015 Prepare specifications for all construction works 644
CPCCBC4017 Arrange resources and prepare for the building and construction project 646
Assessment Requirements for CPCCBC4017 Arrange resources and prepare for the building and construction project 650
CPCCBC4018 Apply site surveys and set-out procedures to building and construction projects 652
Assessment Requirements for CPCCBC4018 Apply site surveys and set-out procedures to building and construction projects 656
CPCCBC4019 Apply sustainable building design principles to water management systems 658
Assessment Requirements for CPCCBC4019 Apply sustainable building design principles to water management systems 662
CPCCBC4020 Build thermally efficient and sustainable structures 665
Assessment Requirements for CPCCBC4020 Build thermally efficient and sustainable structures 669
CPCCBC4021 Minimise waste on the building and construction site 671
Assessment Requirements for CPCCBC4021 Minimise waste on the building and construction site 674
CPCCBC4022 Supervise tilt-up work 676
Assessment Requirements for CPCCBC4022 Supervise tilt-up work 681
CPCCBC4024 Resolve business disputes 684
Assessment Requirements for CPCCBC4024 Resolve business disputes 687
CPCCBC4026 Arrange building applications and approvals 690
Assessment Requirements for CPCCBC4026 Arrange building applications and approvals 693
CPCCBC4027 Establish a basis for sales consulting 695
Assessment Requirements for CPCCBC4027 Establish a basis for sales consulting 699
CPCCBC4028 Prepare design brief for construction works 701
Assessment Requirements for CPCCBC4028 Prepare design brief for construction works ..704
CPCCBC4029 Apply construction information to the sales process 706

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for CPCCBC4029 Apply construction information to the sales process....709
CPCCBC4030 Analyse and communicate industry information....712
Assessment Requirements for CPCCBC4030 Analyse and communicate industry information 715
CPCCBC4031 Process client requirements....718
Assessment Requirements for CPCCBC4031 Process client requirements....722
CPCCBC4032 Apply contract law to sales processes....724
Assessment Requirements for CPCCBC4032 Apply contract law to sales processes....728
CPCCBC4033 Maintain the sales environment....730
Assessment Requirements for CPCCBC4033 Maintain the sales environment....733
CPCCBC4052 Lead and manage teams in the building and construction industry....735
Assessment Requirements for CPCCBC4052 Lead and manage teams in the building and construction industry....739
CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings....741
Assessment Requirements for CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings....745
CPCCBC5001 Apply building codes and standards to the construction process for Type B construction....748
Assessment Requirements for CPCCBC5001 Apply building codes and standards to the construction process for Type B construction....752
CPCCBC5002 Monitor costing systems on complex building and construction projects....755
Assessment Requirements for CPCCBC5002 Monitor costing systems on complex building and construction projects....759
CPCCBC5003 Supervise the planning of on-site building and construction work....761
Assessment Requirements for CPCCBC5003 Supervise the planning of on-site building and construction work....766
CPCCBC5004 Supervise and apply quality standards to the selection of building and construction materials....768
Assessment Requirements for CPCCBC5004 Supervise and apply quality standards to the selection of building and construction materials....773
CPCCBC5005 Select and manage building and construction contractors....776
Assessment Requirements for CPCCBC5005 Select and manage building and construction contractors....781
CPCCBC5006 Apply site surveys and set-out procedures to building projects up to three storeys....784

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for CPCCBC5006 Apply site surveys and set-out procedures to building projects up to three storeys 788

CPCCBC5007 Administer the legal obligations of a building and construction contractor ..790

Assessment Requirements for CPCCBC5007 Administer the legal obligations of a building and construction contractor 795

CPCCBC5009 Identify services layout and connection methods for Type B and C constructions 797

Assessment Requirements for CPCCBC5009 Identify services layout and connection methods for Type B and C constructions 801

CPCCBC5010 Manage construction work 804

Assessment Requirements for CPCCBC5010 Manage construction work 808

CPCCBC5011 Manage environmental management practices and processes in building and construction 811

Assessment Requirements for CPCCBC5011 Manage environmental management practices and processes in building and construction 815

CPCCBC5012 Manage the application and monitoring of energy conservation and management practices and processes 817

Assessment Requirements for CPCCBC5012 Manage the application and monitoring of energy conservation and management practices and processes 822

CPCCBC5013 Manage professional technical and legal reports on building and construction projects 824

Assessment Requirements for CPCCBC5013 Manage professional technical and legal reports on building and construction projects 828

CPCCBC5018 Apply structural principles to the construction of buildings up to three storeys 831

Assessment Requirements for CPCCBC5018 Apply structural principles to the construction of buildings up to three storeys 835

CPCCBC5019 Manage building and construction business finances 838

Assessment Requirements for CPCCBC5019 Manage building and construction business finances 841

CPCCBC6001 Apply building codes and standards to the construction process for large building projects 844

Assessment Requirements for CPCCBC6001 Apply building codes and standards to the construction process for large building projects 848

CPCCBC6002 Generate and direct the development of new projects 850

Assessment Requirements for CPCCBC6002 Generate and direct the development of new projects 855

CPCCBC6003 Establish, maintain and review contract administration procedures and frameworks 857

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for CPCCBC6003 Establish, maintain and review contract administration procedures and frameworks 861
CPCCBC6005 Manage tender developments for major projects 864
Assessment Requirements for CPCCBC6005 Manage tender developments for major projects 869
CPCCBC6006 Manage the procurement and acquisition of resources for building and construction projects 872
Assessment Requirements for CPCCBC6006 Manage the procurement and acquisition of resources for building and construction projects 876
CPCCBC6007 Develop, plan and implement building and construction environmental management processes 879
Assessment Requirements for CPCCBC6007 Develop, plan and implement building and construction environmental management processes 883
CPCCBC6008 Develop and implement an estimating and tendering system 886
Assessment Requirements for CPCCBC6008 Develop and implement an estimating and tendering system 890
CPCCBC6009 Develop, plan and implement a building and construction planning process 892
Assessment Requirements for CPCCBC6009 Develop, plan and implement a building and construction planning process 896
CPCCBC6010 Plan, develop and implement building and construction energy conservation and management processes 899
Assessment Requirements for CPCCBC6010 Plan, develop and implement building and construction energy conservation and management processes 903
CPCCBC6011 Establish systems to develop and monitor building and construction costs...906
Assessment Requirements for CPCCBC6011 Establish systems to develop and monitor building and construction costs 910
CPCCBC6012 Manage and administer development of documentation for building and construction projects 912
Assessment Requirements for CPCCBC6012 Manage and administer development of documentation for building and construction projects 916
CPCCBC6013 Evaluate concrete performance for multi-storey buildings 918
Assessment Requirements for CPCCBC6013 Evaluate concrete performance for multi-storey buildings 922
CPCCBC6014 Apply structural principles to the construction of large, high-rise and complex buildings 925
Assessment Requirements for CPCCBC6014 Apply structural principles to the construction of large, high-rise and complex buildings 930
CPCCBC6015 Apply building surveying procedures 933
Assessment Requirements for CPCCBC6015 Apply building surveying procedures 936

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBC6016 Assess construction faults in large building projects 938
Assessment Requirements for CPCCBC6016 Assess construction faults in large building projects 942
CPCCBC6017 Evaluate services layout and connection methods for the planning of large building projects.....945
Assessment Requirements for CPCCBC6017 Evaluate services layout and connection methods for the planning of large building projects 950
CPCCBC6018 Manage processes for complying with legal obligations of a building and construction contractor.....953
Assessment Requirements for CPCCBC6018 Manage processes for complying with legal obligations of a building and construction contractor.....957
CPCCBL2001 Handle and prepare bricklaying and blocklaying materials 959
Assessment Requirements for CPCCBL2001 Handle and prepare bricklaying and blocklaying materials 963
CPCCBL2002 Use bricklaying and blocklaying tools and equipment.....965
Assessment Requirements for CPCCBL2002 Use bricklaying and blocklaying tools and equipment.....969
CPCCBL3001 Lay paving 972
Assessment Requirements for CPCCBL3001 Lay paving 976
CPCCBL3002 Carry out masonry veneer construction.....978
Assessment Requirements for CPCCBL3002 Carry out masonry veneer construction 983
CPCCBL3003 Carry out cavity brick construction 985
Assessment Requirements for CPCCBL3003 Carry out cavity brick construction 990
CPCCBL3004 Construct masonry steps and stairs.....993
Assessment Requirements for CPCCBL3004 Construct masonry steps and stairs 997
CPCCBL3005 Lay masonry walls and corners 1000
Assessment Requirements for CPCCBL3005 Lay masonry walls and corners 1004
CPCCBL3006 Lay multi-thickness walls and piers 1006
Assessment Requirements for CPCCBL3006 Lay multi-thickness walls and piers.....1010
CPCCBL3007 Install glass blockwork 1013
Assessment Requirements for CPCCBL3007 Install glass blockwork 1017
CPCCBL3009 Install flashings and damp proof course 1019
Assessment Requirements for CPCCBL3009 Install flashings and damp proof course 1023
CPCCBL3010 Construct masonry arches.....1025
Assessment Requirements for CPCCBL3010 Construct masonry arches.....1029
CPCCBL3011 Construct curved walls 1032

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Requirements for CPCCBL3011 Construct curved walls....1037
CPCCBL3012 Construct fireplaces and chimneys....1039
Assessment Requirements for CPCCBL3012 Construct fireplaces and chimneys....1044
CPCCBL3013 Construct masonry structural systems....1046
Assessment Requirements for CPCCBL3013 Construct masonry structural systems....1050
CPCCBL3014 Install fire-rated masonry construction....1052
Assessment Requirements for CPCCBL3014 Install fire-rated masonry construction....1056
CPCCBL3015 Construct decorative brickwork....1058
Assessment Requirements for CPCCBL3015 Construct decorative brickwork....1062
CPCCBL3016 Construct battered masonry walls and piers....1064
Assessment Requirements for CPCCBL3016 Construct battered masonry walls and piers 1068
CPCCBL3017 Carry out tuck pointing and repointing to masonry....1070
Assessment Requirements for CPCCBL3017 Carry out tuck pointing and repointing to masonry....1074
CPCCBL3018 Install aerated autoclaved concrete products....1076
Assessment Requirements for CPCCBL3018 Install aerated autoclaved concrete products....1081
CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store....1083
Assessment Requirements for CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store....1086
CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys....1091
Assessment Requirements for CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys....1094
CPCCBS6103 Identify and apply legal and ethical requirements to building surveying functions....1098
Assessment Requirements for CPCCBS6103 Identify and apply legal and ethical requirements to building surveying functions....1102
CPCCBS6104 Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storey....1104
Assessment Requirements for CPCCBS6104 Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storey....1108
CPCCBS6105 Assess and advise on compliance of design documentation for Class 2 to 9 buildings to three storeys....1110
Assessment Requirements for CPCCBS6105 Assess and advise on compliance of design documentation for Class 2 to 9 buildings to three storeys....1114

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBS6107 Prepare planning and development applications for buildings to three storeys 1116

Assessment Requirements for CPCCBS6107 Prepare planning and development applications for buildings to three storeys....1119

CPCCBS6108 Process building applications for Class 1 and 10 buildings to three storeys 1121

Assessment Requirements for CPCCBS6108 Process building applications for Class 1 and 10 buildings to three storeys 1125

CPCCBS6109 Process building applications for Class 2 to 9 buildings to three storeys....1127

Assessment Requirements for CPCCBS6109 Process building applications for Class 2 to 9 buildings to three storeys 1131

CPCCBS6110 Conduct and report on building surveying audits of Class 1 and 10 buildings to three storeys 1133

Assessment Requirements for CPCCBS6110 Conduct and report on building surveying audits of Class 1 and 10 buildings to three storeys 1137

CPCCBS6111 Conduct and report on building surveying audits of Class 2 to 9 buildings to three storeys 1139

Assessment Requirements for CPCCBS6111 Conduct and report on building surveying audits of Class 2 to 9 buildings to three storeys 1143

CPCCBS6112 Conduct and report on initial construction inspections of Class 1 and 10 buildings to three storeys 1145

Assessment Requirements for CPCCBS6112 Conduct and report on initial construction inspections of Class 1 and 10 buildings to three storeys 1149

CPCCBS6113 Conduct and report on initial construction inspections of Class 2 to 9 buildings to three storeys 1152

Assessment Requirements for CPCCBS6113 Conduct and report on initial construction inspections of Class 2 to 9 buildings to three storeys 1156

CPCCBS6114 Conduct and report on advanced and final inspections of Class 1 and 10 buildings to three storeys 1159

Assessment Requirements for CPCCBS6114 Conduct and report on advanced and final inspections of Class 1 and 10 buildings to three storeys 1162

CPCCBS6115 Conduct and report on advanced and final inspections of Class 2 to 9 buildings to three storeys 1165

Assessment Requirements for CPCCBS6115 Conduct and report on advanced and final inspections of Class 2 to 9 buildings to three storeys 1168

CPCCBS6116 Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys 1171

Assessment Requirements for CPCCBS6116 Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys 1175

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBS6117 Monitor and advise on construction and compliance upgrade work on buildings to three storeys 1178
Assessment Requirements for CPCCBS6117 Monitor and advise on construction and compliance upgrade work on buildings to three storeys....1182
CPCCBS6118 Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys 1184
Assessment Requirements for CPCCBS6118 Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys....1188
CPCCCA2002 Use carpentry tools and equipment 1191
Assessment Requirements for CPCCCA2002 Use carpentry tools and equipment 1194
CPCCCA2011 Handle carpentry materials 1198
Assessment Requirements for CPCCCA2011 Handle carpentry materials....1201
CPCCCA3001 Carry out general demolition of minor building structures....1203
Assessment Requirements for CPCCCA3001 Carry out general demolition of minor building structures 1206
CPCCCA3002 Carry out setting out....1209
Assessment Requirements for CPCCCA3002 Carry out setting out 1213
CPCCCA3003 Install flooring systems 1215
Assessment Requirements for CPCCCA3003 Install flooring systems 1219
CPCCCA3004 Construct and erect wall frames 1222
Assessment Requirements for CPCCCA3004 Construct and erect wall frames 1226
CPCCCA3005 Construct ceiling frames 1228
Assessment Requirements for CPCCCA3005 Construct ceiling frames....1231
CPCCCA3006 Erect roof trusses....1233
Assessment Requirements for CPCCCA3006 Erect roof trusses 1237
CPCCCA3007 Construct pitched roofs 1239
Assessment Requirements for CPCCCA3007 Construct pitched roofs 1243
CPCCCA3008 Construct eaves 1245
Assessment Requirements for CPCCCA3008 Construct eaves....1249
CPCCCA3009 Construct advanced roofs....1251
Assessment Requirements for CPCCCA3009 Construct advanced roofs 1255
CPCCCA3010 Install windows and doors....1257
Assessment Requirements for CPCCCA3010 Install windows and doors 1261
CPCCCA3011 Refurbish timber sashes to window frames 1263
Assessment Requirements for CPCCCA3011 Refurbish timber sashes to window frames.1267

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCA3012 Frame and fit wet area fixtures....1269
Assessment Requirements for CPCCCA3012 Frame and fit wet area fixtures....1273
CPCCCA3014 Construct and install bulkheads....1275
Assessment Requirements for CPCCCA3014 Construct and install bulkheads....1279
CPCCCA3016 Construct, assemble and install timber external stairs....1281
Assessment Requirements for CPCCCA3016 Construct, assemble and install timber external stairs....1285
CPCCCA3017 Install exterior cladding....1287

Important information

This training package release includes one or more units of competency developed before the implementation of the Standards for Training Packages 2012. These units of competency are not included in this training package release document. Please refer to the training package on *training.gov.au* for details.

CPC10126 Certificate I in Construction

Modification History

Release	Comments
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 10.0.

Qualification Description

This qualification provides an introduction to the construction industry, its culture, occupations, job roles and workplace expectations. The units of competency cover essential work health and safety requirements, the industrial and work organisation structure, communication skills, work planning, and basic use of tools and materials. The qualification is built around a basic construction project unit that integrates the skills and embeds the facets of employability skills in context.

The qualification is suited to vocational education and training (VET) in Schools programs or learners with no previous connection to the construction industry or relevant employment history.

There are no specific job outcomes to this qualification, but the skills achieved will assist in successfully undertaking a Certificate II pre-vocational program or job outcome qualification or will facilitate entry into an Australian Apprenticeship.

Licensing/Regulatory Information

The unit *CPCWHS1001 Prepare to work safely in the construction industry* is designed to meet WHS regulatory authority requirements for WHS induction and must be achieved before access to any building and construction work site.

Entry Requirements

This qualification has no entry requirements.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in 11 units of competency:

- 8 core units
- 3 elective units.

The elective units are to be chosen as follows:

- up to 3 units from the elective units below

© Commonwealth of Australia, 2026 BuildSkills Australia

- one unit from Certificate I or II qualifications in the CPC Training Package or another current Training Package or accredited course, provided the integrity of the AQF alignment is ensured, and it contributes to a valid, industry-supported vocational outcome.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM1011	Undertake basic estimation and costing
CPCCCM2004*	Handle construction materials
CPCCCM2005*	Use construction tools and equipment
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCVE1011*	Undertake a basic construction project
CPCWHS1001	Prepare to work safely in the construction industry
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
BSBSUS211	Participate in sustainable work practices
CPCCCM2006	Apply basic levelling procedures
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM1017	Prepare simple construction sketches
CPCCOM2001*	Read and interpret plans and specifications
CPCCVE1002	Undertake a basic computer design project

© Commonwealth of Australia, 2026 BuildSkills Australia

CPC20120 Certificate II in Construction

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2. Imported unit codes updated in Elective list: • RIICCM210D Install trench support to RIICCM210E Install trench support • RIIWMG203D Drain and dewater civil construction site to RIIWMG203E Drain and dewater civil construction sites.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.1. Imported unit code corrected in elective list: RIICCM210E Install trench support to RIICCM310D Install trench support.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides an occupational outcome and a range of support tasks applicable to the majority of construction work sites.

Occupational titles may include:

- builder's labourer.

The qualification has core units of competency that are required in many Certificate III qualifications. The elective options are structured to allow choice from a range of units aligned at Certificate III level and in total could provide meaningful credit in a construction industry Australian Apprenticeship.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

© Commonwealth of Australia, 2026 BuildSkills Australia

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in 15 units of competency:

- 10 core units
- 5 elective units.

The elective units are to be chosen as follows:

- up to 5 units from the elective units below
- one unit may be chosen from Certificate I, II or III qualifications in CPC Training Package or another current Training Package or accredited course, provided the integrity of the AQF alignment is ensured, and they contribute to a valid, industry-supported vocational outcome.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM2005*	Use construction tools and equipment
CPCCCM2006	Apply basic levelling procedures
CPCCCM2012*	Work safely at heights
CPCCCO2013*	Carry out concreting to simple forms
CPCCOM1012	Work effectively and sustainably in the construction industry

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
CPCCCM2002*	Carry out hand excavation
CPCCCM2007*	Use explosive power tools
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2009*	Carry out basic demolition
CPCCRI3001*	Operate personnel and materials hoists
CPCCSF2004*	Place and fix reinforcement materials
RIICCM210E	Install trench support
RIIWHS202E	Enter and work in confined spaces
RIIWHS205E	Control traffic with stop-slow bat
RIIWMG203E	Drain and dewater civil construction site
TLILIC0003	Licence to operate a forklift truck

© Commonwealth of Australia, 2026 BuildSkills Australia

	Group I: General elective unit list is updated by removing "A" from the unit codes CPCPCM2043 and CPCPRF2022 and addin
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides a pathway to the primary trades in the construction industry with the exception of plumbing. Trade outcomes are predominantly achieved through an Australian Apprenticeship and this qualification allows for inclusion of skills suited for entry to off-site occupations, such as joinery as well as carpentry, bricklaying and other occupations in general construction.

This qualification is designed to introduce learners to the recognised trade callings in the construction industry and provide meaningful credit in a construction industry Australian Apprenticeship.

The qualification has core unit of competency requirements that are required in most Certificate III qualifications. The elective options are structured to allow choice from areas of trade skills as an introduction to a range of occupations.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency in one of the two occupational streams must be achieved.

- **Construction Pathways**

For the award of the *CPC20220 Certificate II in Construction Pathways*, the candidate must demonstrate competency in 10 units of competency:

- 5 core units
- 5 elective units.

Elective units are to be chosen from at least two but no more than four of groups A to I.

One elective may be chosen from any current training package or accredited course as long as it contributes to a valid industry-supported vocational outcome, maintains the AQF level of

© Commonwealth of Australia, 2026 BuildSkills Australia

this qualification, and does not replicate the content of another unit used to achieve this qualification.

- **Remote Area Building**

For the award of the *CPC20220 Certificate II in Construction Pathways (Remote Area Building),* the candidate must demonstrate competency in a minimum of 10 units of competency:

- 5 core units
- 5 units can be selected from Group I.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCOM1012	Work effectively and sustainably in the Construction Industry
CPCCOM1013	Plan and organise work
CPCCOM1015	Carry out measurements and calculations
CPCCVE1011*	Undertake a basic construction project
CPCCWHS2001	Apply WHS requirements, policies and procedures in the Construction Industry
Elective units	
Group A: Brick and blocklaying	
CPCCBL2001*	Handle and prepare bricklaying and blocklaying materials
CPCCBL2002*	Use bricklaying and blocklaying tools and equipment
Group B: Carpentry

CPC20720 Certificate II in Drainage

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. • Typographical correction made to title of HLTAID011 Provide First Aid. • Unit CPCPCM2043 Carry out WHS requirements to metadata.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Correction to unit title CPCPCM3022 in Elective units.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of a drainer, responsible for carrying out installation of below ground stormwater and sub-soil drainage systems, sanitary drainage systems, domestic treatment plants, on-site disposal systems and trench support, locating and clearing blockages and/or installing prefabricated inspection openings and chambers.

Occupational titles could include:

- Drainer.

Completion of this qualification indicates that a person has the practical skills and operational knowledge to perform routine drainage tasks in a defined context, usually working under direct supervision.

This qualification includes units of competency common to other qualifications in the plumbing industry as well as specialist drainage units and can provide a pathway to further learning and work in the plumbing industry.

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

© Commonwealth of Australia, 2026 BuildSkills Australia

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *CPCWHS1001 Prepare to work* safely in *the construction industry* meets this requirement.

Licensing, legislative, regulatory and certification requirements apply to drainage in some states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded this qualification, the candidate must achieve competency in:

- 18 units of competency:
  - 13 core units
  - 5 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- 4 elective units must be chosen from electives listed below,
- 1 unit may be chosen from the elective units listed below, or from any relevant nationally endorsed Training Package or accredited course.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
CPCPCM2039	Carry out interactive workplace communication
CPCPCM2040 *	Read plans, calculate quantities and mark out materials
CPCPCM2041	Work effectively in the plumbing services sector
CPCPCM2043	Carry out WHS requirements
CPCPCM2047 *	Carry out levelling

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPCM2054*	Carry out simple concreting and rendering
CPCPCM3024*	Prepare simple drawings
CPCPCM3025	Install trench support
CPCPDR2025*	Install stormwater and sub-soil drainage systems and drain work site
CPCPDR2026*	Install prefabricated inspection openings and inspection chambers
CPCPDR3021*	Plan layout and install below ground sanitary drainage systems
CPCPDR3023*	Install on-site domestic wastewater treatment plants and disposal systems
HLTAID011	Provide First Aid
Elective units	
CPCCCM2012*	Work safely at heights
CPCCST2005*	Carry out load slinging of off-site materials
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCPCM2049*	Cut mild steel using oxy-LPG-acetylene equipment
CPCPCM2052*	Weld mild steel using oxy-acetylene equipment
CPCPCM3022*	Weld polymer pipes using fusion method
CPCPDR2021*	Locate and clear blockages
CPCPRF2023*	Collect and store roof water

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPSN3025 *	Install pre-treatment facilities
CPCPSN3026 *	Install sewerage pumpsets
RIICTT306E	Install cure in-place linings for existing pipeline systems
RIIMPO320F	Conduct civil construction excavator operations
RIIWHS202E	Enter and work in confined spaces

CPC20822 Certificate II in Prefabricated Concrete Element Installation

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 11.0. Elective units; 1 elective unit revised, 2 elective units added.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 9.0.

Qualification Description

This is a qualification for installers of prefabricated concrete elements. It includes knowledge of compliance and safety requirements. This work must be undertaken alongside licensed crane and/or rigging operators. Installation processes and procedures are determined by an Erection Engineer.

Occupational titles include:

- installer
- grouter
- caulker
- patcher.

This qualification has core unit of competency requirements that cover common skills for the construction industry, as well as a specialist field of work in prefabricated concrete element installation.

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in an actual workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Licensing/Regulatory Information

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Additional Licensing, legislative, regulatory or certification requirements may apply in some states and territories. For further information, check with the relevant regulatory authority.

© Commonwealth of Australia, 2026 BuildSkills Australia

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 11 core units
  - 5 elective units.

The elective units must ensure the integrity of the Australian Qualification Framework **(**AQF**)** alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

For the elective units:

- 4 elective units must be chosen from the electives listed below
- 1 unit may be chosen from the elective units listed below, or from any relevant nationally endorsed Training Package or accredited course.

Prerequisite units

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for more information. All prerequisites are packaged in the qualification.

Core units

CPCCCM2005*	Use construction tools and equipment
CPCCCM2006	Apply basic levelling procedures
CPCCCM2012*	Work safely at heights
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCPRE2001*	Brace and prop prefabricated concrete elements
CPCPRE2002*	Remove temporary supports from prefabricated concrete elements
CPCPRE2003*	Grout prefabricated concrete elements
CPCPRE2004*	Caulk prefabricated concrete elements
CPCPRE3001*	Patch prefabricated components of concrete elements
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry

© Commonwealth of Australia, 2026 BuildSkills Australia

Elective units

CPCCCM2007*	Use explosive power tools
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCSIL1001	Identify products and materials containing crystalline silica
CPCSIL2002*	Use and maintain respiratory protective equipment
CPCSIL3002*	Work with products and materials containing crystalline silica
HLTAID011	Provide First Aid
RIIRTM203E	Work as a safety observer/spotter
RIIWHS205E	Control traffic with stop-slow bat

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCCM2005 Use construction tools and equipment	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

CPC30120 Certificate III in Shopfitting

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package in Releases 1 and 2.
2	This version first released with CPC Property Services Training Package Release 6.3. Units: • CPCCJN3100 Process materials to produce components using static machines • CPCCWC3004 Install suspended ceilings marked with an asterisk as a prerequisite requirement must be met.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of shopfitters who construct or renovate commercial premises such as retail or office environments. It includes the skills and knowledge required to work safely using tools and equipment and to apply information from plans and drawings to fabricate, assemble and fix shop fronts and install internal units and partitions.

Occupational titles may include:

- shopfitter.

Licensing, legislative or certification requirements may apply to shopfitting in some states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of CPCWHS1001 *Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:
  - 12 core units
  - 6 elective units.

For the elective units:

- a minimum of four units must be selected from Group A
- the remaining two units can be selected from Group A and/or Group B or from any currently endorsed Training Package or accredited course as long as they contribute to a valid, industry-supported vocational outcome and maintain the integrity of the Australian Qualifications Framework (AQF) level of this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite units must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core Units	
CPCCCA2002*	Use carpentry tools and equipment
CPCCCM3004	Identify and apply information in construction plans, drawings and specifications
CPCCJN3100*	Process materials to produce components using static machines

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCOM3006	Carry out levelling operations
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCSHP3001	Fabricate shopfitting components using CNC machines
CPCSHP3002	Fabricate and assemble shopfront structures
CPCSHP3003	Assemble and install shopfront structures
CPCSHP3004	Assemble internal shopfitting units and prepare for transport
CPCSHP3005	Apply and trim decorative additions to shopfittings and components
CPCSHP3007	Install prefabricated internal shopfitting units
CPCSHP3008	Install internal shop walls and fixtures
Group A: Specialist elective units	
CPCSHP3006	Prepare shopfittings and surfaces and apply liquid finishes
CPCSHP3009	Demolish shopfronts and bulkheads
CPCSHP3010	Prepare shop floors for new coverings
CPCCWC3004*	Install suspended ceilings
MSFFM3009	Produce manual and computer-aided production drawings
MSFFM3011	Measure and draw site layout for manufactured furniture products
MSFFM3019	Set up, operate and maintain automated edge banding machines
MSFFM3020	Fabricate synthetic solid surface products
MSFGG3036	Install commercial glazing products
Group B: General elective units	
BSBESB301	Investigate business opportunities

© Commonwealth of Australia, 2026 BuildSkills Australia

BSBESB407	Manage finances for new business ventures
CPCCCM2010	Work safely on scaffolding higher than two metres
CPCCCM3005	Calculate costs of construction work
CPCCLHS3001	Licence to operate a personnel and materials hoist
CPCWHS3001	Identify construction work hazards and select risk control strategies

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCCA2002 Use carpentry tools and equipment	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCCJN3100 Process materials to produce components using static machines	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

CPC30216 Certificate III in Signs and Graphics

Modification History

Release	Comments
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Correction to Training Package title in the Modification History from CPP Property Services to CPC Construction, Plumbing and Services Training Package in Release 2.
2	This version released with CPP Property Services Training Package Release 11.0. Imported units updated to current releases.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Qualification Description

This qualification reflects the role of sign manufacturers who design and produce signs and graphics for a range of purposes.

Signs and graphics can be produced using a range of traditional and contemporary techniques, often involving the use of advanced printing software and technology, and a range of methods for illumination and fabrication.

No licensing, legislative, regulatory, or certification requirements apply to this qualification at the time of endorsement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2026 BuildSkills Australia

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 7 core units
  - 9 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- all 9 units may be chosen from the elective units listed below
- up to 3 units may be chosen from other CPC Certificate III or Certificate IV qualifications, or another current Training Package or accredited course, provided they provided they do not duplicate the outcome of another unit chosen for the qualification.

Core units	
CPCCSG3001	Design and lay out digital signs for production
CPCCSG3002	Produce and apply vinyl signs
CPCCSG3003	Colour manage signs
CPCCSG3004	Print digital signs
CPCCSG3011	Install LED technology into signs
CPCCSG3012	Fabricate signs
CPCWHS3001	Identify construction work hazards and select risk control strategies
Elective units	
AURVTP109	Apply vehicle body film wrapping
CPCCCM2006	Apply basic levelling procedures
CPCCCM2010	Work safely on scaffolding higher than two metres

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCM3001	Operate elevated work platforms up to 11 meters
CPCCCM3003	Work safely around electrical sources, services and assets
CPCCCM3004	Identify and apply information in construction plans, drawings and specifications
CPCCLSF2001	Licence to erect, alter and dismantle scaffolding basic level
CPCCSG3005	Engrave signs
CPCCSG3006	Apply gilding to signs
CPCCSG3007	Paint lines and scrolls
CPCCSG3008	Hand draw chalkboards and showcards
CPCCSG3009	Screen-print signs
CPCCSG3010	Hand render pictorials
CPCCSG3013	Paint letters and decorative effects for signs
CPCCSG3014	Manufacture gas-charged glass-formed illuminated signs
CPCCSG3015	Produce airbrushed signs
CPCCSG3016	Prepare surfaces for signs
CPCCSG3017	Erect and install signs
MEM05049	Perform routine gas tungsten arc welding
MEM05050	Perform routine gas metal arc welding

© Commonwealth of Australia, 2026 BuildSkills Australia

MSFFF2006	Apply surface coatings by spray gun
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
MEM05049 Perform routine gas tungsten arc welding	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information
MEM05050 Perform routine gas metal arc welding	MEM11011 Undertake manual handling MEM13015 Work safely and effectively in manufacturing and engineering MEM16006 Organise and communicate information

CPC30320 Certificate III in Concreting

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This is a qualification for concreters working in concreting operations on residential and commercial projects.

Occupational titles include:

- concreter
- concrete tilt panel fabricator.

This qualification has core unit of competency requirements that cover common skills for the construction industry, as well as a specialist field of work in concreting.

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in an actual workplace or very closely simulated workplace environment, and this qualification requires all units of competency to be delivered in this context.

Licensing, legislative, regulatory or certification requirements apply to concreting in some states and territories. For further information, check with the relevant regulatory authority.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2026 BuildSkills Australia

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 22 units of competency:
  - 17 core units
  - 5 elective units.

For the elective units:

- 3 units must be selected from Group A
- the remaining 2 elective units may be selected from Group A and/or Group B or from any currently endorsed Training Package or accredited course at Certificate III or Certificate IV level.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCA3002*	Carry out setting out
CPCCCA3028*	Erect and dismantle formwork for footings and slabs on ground
CPCCCM2002*	Carry out hand excavation
CPCCCM2006	Apply basic levelling procedures
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCON2021 *	Handle concreting materials and components
CPCCON2022 *	Select, use and maintain concreting plant, tools and equipment
CPCCON3035 *	Determine concrete supply requirements
CPCCON3041 *	Place concrete
CPCCON3042 *	Finish concrete
CPCCON3043 *	Cure concrete
CPCCSF2004 *	Place and fix reinforcement materials
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units **Group A: Specialist elective units**	
CPCCON3036 *	Plan concrete work and brief team
CPCCON3044 *	Apply decorative finishes to concrete
CPCCON3046 *	Repair and rectify concrete
CPCCON3047 *	Cut concrete
CPCCON3048 *	Construct tilt panels on site
CPCCON3049 *	Apply and finish sprayed concrete

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCON3050*	Carry out high performance concreting
CPCCON3051*	Conduct off-form vertical concrete operations
CPCCON3053*	Slump test concrete
CPCCON3054*	Operate concrete agitator trucks
CPCCON3055*	Install topping slabs
CPCCON3056*	Conduct concrete pump delivery operations
CPCCON3057*	Core concrete
Group B: General elective units	
CPCCCM2007*	Use explosive power tools
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2012*	Work safely at heights
CPCCLBM3001	Licence to operate a concrete placing boom
CPCCOM1016	Identify requirements for safe precast and tilt-up work
CPCCSF2003*	Cut and bend materials using oxy-LPG equipment
CPCCSF3001*	Apply reinforcement schedule

© Commonwealth of Australia, 2026 BuildSkills Australia

Pre-requisite Requirements

CPC30326 Certificate III in Carpentry

Modification History

Release	Comments
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 11.0.

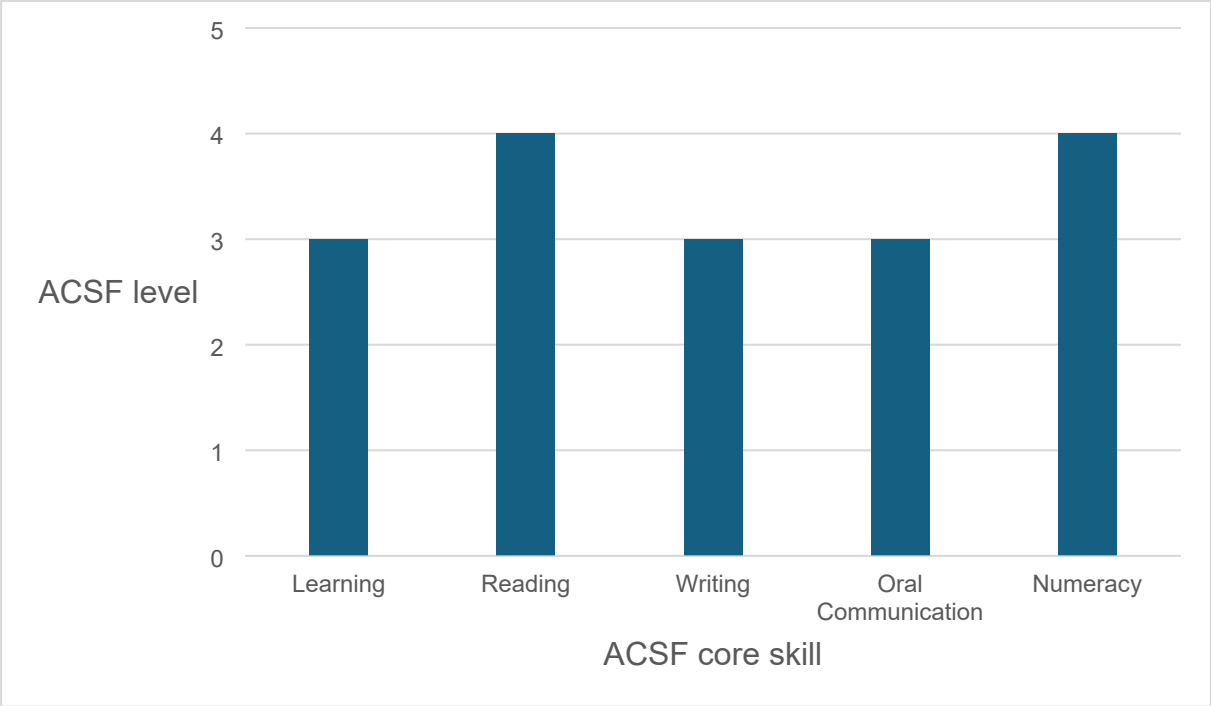
Qualification Description

This is a trade qualification for carpenters in residential and commercial workplaces, meeting all relevant requirements of the building standards described in Commonwealth and state or territory legislation, codes and Australian Standards. It includes setting out, manufacturing, constructing, assembling, installing and repairing products made using timber and non-timber materials.

Occupational titles may include:

- Carpenter - Commercial
  Carpenter - Formwork
  Carpenter - Residential

This qualification is suitable for an Australian apprenticeship pathway.



Licensing/Regulatory Information

Completion of the general construction induction training required by applicable work health and safety (WHS) legislation is mandatory for any person carrying out construction work. Achievement of the current unit of competency that covers general construction induction training meets this requirement.

Foundation Skills Outcomes

The foundation skills outcomes in this qualification are outlined below.

© Commonwealth of Australia, 2026 BuildSkills Australia

Entry Requirements

This qualification has no entry requirements.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- **Total number of units = 34**
- **27 core units**, plus
- **7 elective units**, of which:
  - a minimum of five (5) units must be selected from Group A
  - the remaining two (2) maybe selected from Group A or Group B or from any group or current training package, as long as it contributes to a valid, industry-supported vocational outcome and maintains the AQF level of this qualification.

Core Units	
CPCCCA2002 *	Use carpentry tools and equipment
CPCCCA2011 *	Handle carpentry materials

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCA3001*	Carry out general demolition of minor building structures
CPCCCA3002*	Carry out setting out
CPCCCA3003*	Install flooring systems
CPCCCA3004*	Construct and erect wall frames
CPCCCA3005*	Construct ceiling frames
CPCCCA3006*	Erect roof trusses
CPCCCA3007*	Construct pitched roofs
CPCCCA3008*	Construct eaves
CPCCCA3010*	Install windows and doors
CPCCCA3016*	Construct, assemble and install timber external stairs
CPCCCA3017*	Install exterior cladding
CPCCCA3024*	Install lining, panelling and moulding
CPCCCA3025*	Read and interpret plans, specifications and drawings for carpentry work
CPCCCA3029*	Erect and dismantle formwork for footings and slabs on ground
CPCCCM2006	Apply basic levelling procedures
CPCCCM2008*	Erect and dismantle restricted height scaffolding

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCM2012*	Work safely at heights
CPCCCO2013*	Carry out concreting to simple forms
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM3001	Perform construction calculations to determine carpentry material requirements
CPCCOM3006	Carry out levelling operations
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCWHS3001	Identify construction work hazards and select risk control strategies
Group A - Specialist Electives	
CPCCCA3009*	Construct advanced roofs
CPCCCA3012*	Frame and fit wet area fixtures
CPCCCA3014*	Construct and install bulkheads
CPCCCA3020*	Erect and dismantle jump form formwork
CPCCCA3022*	Install curtain walling
CPCCCA3027*	Set up, operate and maintain indirect action powder-actuated power tools

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCA3030*	Construct, erect and dismantle formwork for stairs and ramps
CPCCCA3031*	Erect and dismantle formwork to suspended slabs, columns, beams and walls
CPCCCM2002*	Carry out hand excavation
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCJN3003*	Manufacture components for doors, windows and frames
CPCCJN3004*	Manufacture and assemble joinery components
CPCCJN3100*	Process materials to produce components using static machines
CPCCON3048*	Construct tilt panels on site
CPCCSF2004*	Place and fix reinforcement materials
CPCCWC3003*	Install dry wall passive fire-rated systems
CPCCWC3004*	Install suspended ceilings
Group B - General Electives	
CPCCCA3011*	Refurbish timber sashes to window frames
CPCCCA3026*	Assemble partitions
CPCCCM3005	Calculate costs of construction work
CPCCLSF2001	Licence to erect, alter and dismantle scaffolding basic level

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCOM1013	Plan and organise work
CPCCPB3001*	Fix standard plasterboard wall sheets
CPCCPB3002*	Fix standard plasterboard ceiling sheets
CPCCSF2005*	Arc weld reinforcement steel
CPCCSF3002*	Carry out monostrand post-tensioning
CPCCSF3003*	Carry out multistrand post-tensioning
CPCCSF3004*	Carry out stressbar post-tensioning
CPCCST4001	Prepare to undertake the heritage restoration process
CPCCST4002	Undertake the heritage restoration process
CPCPCM2043	Carry out WHS requirements
CPCPCM2052*	Weld mild steel using oxy-acetylene equipment
CPCPCM2053*	Weld using metal arc welding equipment

Pre-requisite units

An asterisk (*) against a unit code indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk.

CPC30426 Certificate III in Demolition

Modification History

Release	Comments
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 10.0.

Qualification Description

This qualification is designed to meet the needs of specialist demolition workers who dismantle and demolish public, residential, commercial and industrial structures of all types, and process the resulting materials for salvage, recycling and waste disposal.

Occupational titles could include:

- Demolition worker
- Demolition plant operator
- Demolition team leader.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of C*PCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements for demolition work differ between states and territories. Please consult with the relevant regulatory authority.

Entry Requirements

This qualification has no entry requirements.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 20 units of competency:
    - 11 core units
    - 9 elective units.

The elective units can be selected from any of the groups listed below. Two elective units can be selected from any training package or accredited course, as long as they contribute to a valid, industry-supported vocational outcome and supports the AQF level of this qualification.

Prerequisite units of competency

© Commonwealth of Australia, 2026 BuildSkills Australia

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM2012*	Work safely at heights
CPCCDE3030*	Identify hazards on demolition sites and apply risk management strategies
CPCCDE3017*	Select and use hand tools and equipment for demolition tasks
CPCCDE3018*	Select and use small plant and equipment for demolition tasks
CPCCDE3019*	Demolish small buildings and structures using hand tools and small plant and equipment
CPCCDE3020*	Select and use tools and equipment for hot work in the demolition industry
CPCCDE3027	Read and interpret demolition site plans and drawings
CPCCOM1015	Carry out measurements and calculations
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
TLID0020	Shift materials safely using manual handling methods
TLID0021	Store and handle dangerous goods and hazardous substances
Elective units	
Group A - General electives	
CPCCDE3028*	Remove non-friable asbestos
CPCCDE3029*	Remove friable asbestos
CPCCSF2003*	Cut and bend materials using oxy-LPG equipment
RIIWHS202E	Enter and work in confined spaces
RIIWHS205E	Control traffic with stop-slow bat
RIIWHS302E	Implement traffic management plans

© Commonwealth of Australia, 2026 BuildSkills Australia

RIIRIS202E	Respond to site based spills
RIIRTM203E	Work as a safety observer/spotter
Group B - Plant operation field of work	
CPCCDE3021*	Operate demolition material crushing plants
CPCCDE3022	Manage demolition recyclable waste materials and contaminated soil using load shifting equipment
CPCCDE3023	Operate skid steer loaders at ground level on demolition sites
CPCCDE3024	Operate mobile plant on suspended floors on demolition sites
CPCCDE3025	Operate remote-controlled plant on demolition sites
CPCCDE3026	Operate excavators at ground level to demolish building elements
RIIHAN309F	Conduct telescopic materials handler operations
RIIMPO320F	Conduct civil construction excavator operations
Group C - Licensing field of work	
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCLDG3001	Licence to perform dogging
CPCCLHS3001	Licence to operate a personnel and materials hoist
CPCCLRG3001*	Licence to perform rigging basic level
CPCCLRG3002*	Licence to perform rigging intermediate level
CPCCLSF2001	Licence to erect, alter and dismantle scaffolding basic level
CPCCLSF3001*	Licence to erect, alter and dismantle scaffolding intermediate level
CPCCLSF4001*	Licence to erect, alter and dismantle scaffolding advanced level
TLILIC0003	Licence to operate a forklift truck
TLILIC0005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides a trade outcome in painting and decorating for residential and commercial construction work.

Occupational titles may include:

- Painter and Decorator.

Licensing, legislative and regulatory or certification requirements for painting and decorating work differ between States and Territories. Please consult with the relevant regulatory authority.

This qualification is suitable for an Australian Apprenticeship pathway.

© Commonwealth of Australia, 2026 BuildSkills Australia

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 29 units of competency:
  - 26 core units
  - 3 elective units.

Elective units of competency can be selected as follows:

- 3 from the listed electives

or

- 2 from listed electives and 1 from any endorsed Training Package or accredited course, as long as it contributes to a valid, industry supported vocational outcome and supports the AQF level of this qualification.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit/s must be assessed before assessment of any unit of competency with an asterisk. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCCM3005	Calculate costs of construction work

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCPB3026*	Erect and maintain trestle and plank systems
CPCCPD2011*	Handle and store painting and decorating materials
CPCCPD2012*	Use painting and decorating tools and equipment
CPCCPD2013*	Remove and replace doors and door and window components
CPCCPD3021*	Prepare existing coated surface for painting
CPCCPD3022*	Apply paint by brush and roller
CPCCPD3023*	Apply texture coat paint finishes by brush, roller and spray
CPCCPD3024*	Apply paint by spray
CPCCPD3025*	Match specific paint colours
CPCCPD3026*	Apply stains and clear timber finishes
CPCCPD3027*	Remove and apply wallpaper

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCPD3028 *	Apply decorative paint finishes
CPCCPD3030 *	Apply protective paint coating systems
CPCCPD3031 *	Work safely with lead-painted surfaces in the painting industry
CPCCPD3035 *	Prepare uncoated surfaces for painting
CPCCPD3036 *	Work safely to encapsulate non-friable asbestos in the painting industry
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
BSBESB301	Investigate business opportunities
BSBESB303	Organise finances for new business venture
CPCCPD3029 *	Remove graffiti and apply anti-graffiti coatings
CPCCPD3032 *	Apply advanced wall coverings
CPCCPD3033 *	Apply intumescent coatings
CPCCPD3034 *	Apply advanced decorative paint finishes
CPCCSP3003 *	Apply trowelled texture coat finishes
MSFID4016	Design colour schemes for interior and exterior spaces

© Commonwealth of Australia, 2026 BuildSkills Australia

Qualification Description

This qualification reflects the role of individuals working the area of rigging and dogging in the building and construction industry.

Occupational titles can include rigger and dogger.

The qualification includes units of competency that cover common skills and knowledge for the building and construction industry, as well as those that are more specific to the occupations of a dogger and rigger. Due to the high-risk nature of the job role, the qualification provides a strong focus on safety.

This is a licensed occupation. Users should check requirements with their relevant licensing authority.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 19 units of competency:
    - 12 core units
    - 7 elective units.

The elective units must be selected as follows:

- 6 units must be selected from the list of elective units below
- 1 unit can be selected from the list of elective units below or from any current training package or accredited course where the unit is packaged in an Australian Qualifications Framework (AQF) Certificate III or Certificate IV qualification that maintains the integrity of the AQF level of this qualification, contributes to a valid, industry-supported vocational outcome, and does not duplicate the outcome of another unit used to achieve this qualification.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit/s must be assessed before assessment of any unit of competency with an asterisk. All prerequisite requirements are packaged in the qualification.

CPC30820 Certificate III in Roof Tiling

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Unit CPCCOM2001 Read and interpret plans and specifications marked with an asterisk as a prerequisite requirement must be met.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides a trade outcome in roof tiling for residential and commercial construction work. Roof tilers create a waterproof barrier between the exterior and the interior of a home or other building. The qualification has core unit of competency requirements that cover common skills for the construction industry, as well as the specialist field of work, roof tiling. Roof tilers create a waterproof barrier between the exterior and interior of a home or other building.

Occupational titles may include:

- Roof tiler.

State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

© Commonwealth of Australia, 2026 BuildSkills Australia

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 17 units of competency:
  - 14 core units
  - 3 elective units.

Electives must be selected as follows:

- all three units from the electives listed below, or
- two units from the electives listed below, plus one unit selected from any current training package or accredited course as long as it contributes to a valid, industry-supported vocational outcome, maintains the integrity of the AQF level of this qualification and does not duplicate the outcome of another unit used to achieve this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCRT2001*	Handle roof tiling materials
CPCCRT2002*	Use roof tiling tools and equipment

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCRT3001*	Tile regular roofs
CPCCRT3002*	Tile irregular roofs
CPCCRT3003*	Repair and replace valleys, valley irons and flashings
CPCCRT3004*	Repair and renovate tile roofs
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCPCM2043	Carry out WHS requirements
CPCPCM2055*	Work safely on roofs
Elective units	
BSBESB301	Investigate business opportunities
BSBESB407	Manage finances for new business ventures
CPCCPD3030*	Apply protective paint coating systems
CPCCRT3005*	Slate a roof
CPCCRT3006*	Fix shingles to roofs and facades
CPCCCM2007*	Use explosive power tools
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCSC2002*	Erect and dismantle basic scaffolding

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 10 core units
  - 4 elective units.

Elective units must be selected as follows:

- 3 units must be selected from the list of elective units below
- 1 unit can be selected from the list of elective units below or from any current training package or accredited course where the unit is packaged in an Australian Qualifications Framework (AQF) Certificate III or Certificate IV qualification that maintains the integrity of the AQF level of this qualification, contributes to a valid, industry-supported vocational outcome, and does not duplicate the outcome of another unit used to achieve this qualification.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit/s must be assessed before assessment of any unit of competency with an asterisk. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM2006	Apply basic levelling procedures
CPCCLSF2001	Licence to erect, alter and dismantle scaffolding basic level
CPCCLSF3001*	Licence to erect, alter and dismantle scaffolding intermediate level
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCSC2001*	Handle and position scaffolding tools, equipment and components
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
BSBESB301	Investigate business opportunities
BSBESB407	Manage finances for new business ventures
CPCCCM2007*	Use explosive power tools
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCCM3002*	Operate a truck-mounted loading crane
CPCCLDG3001	Licence to perform dogging
CPCCLSF4001*	Licence to erect, alter and dismantle scaffolding advanced level
CPCCRI3001*	Operate personnel and materials hoists
CPCCSC2002*	Erect and dismantle basic scaffolding
CPCCSC3001*	Erect and dismantle intermediate scaffolding
CPCCSF2003*	Cut and bend materials using oxy-LPG equipment
RIIWHS302E	Implement traffic management plan
TLILIC0003	Licence to operate a forklift truck

CPC31020 Certificate III in Solid Plastering

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3 Unit CPCCOM2001 Read and interpret plans and specifications marked with an asterisk as a prerequisite requirement must be met.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides a trade outcome in solid plastering for residential and commercial work. The qualification has core unit of competency requirements that cover common skills for the construction industry, as well as the specialist field of work, solid plastering. Solid plasterers apply plaster, cement and other mixtures to walls to create smooth or decorative finishes to interior walls and to render to exterior walls.

Occupational titles may include:

- Solid Plasterer
- Renderer.

State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 20 units of competency:
  - 15 core units
  - 5 elective units.

Electives are to be selected as follows:

- all five units from the electives listed below, or
- four units from the electives listed below, plus one unit selected from any current training package or accredited course as long as it contributes to a valid, industry-supported vocational outcome, maintains the integrity of the AQF level of this qualification and does not duplicate the outcome of another unit used to achieve this qualification.

Pre-requisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM2006	Apply basic levelling procedures
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCSP2001*	Handle solid plastering materials
CPCCSP2002*	Use solid plastering tools and equipment
CPCCSP2003*	Prepare surfaces for plastering
CPCCSP3001*	Apply float and render to straight and curved surfaces
CPCCSP3002*	Apply set coats
CPCCSP3003*	Apply trowelled texture coat finishes
CPCCSP3004*	Restore and renovate solid plasterwork
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
BSBESB301	Investigate business opportunities
BSBESB407	Manage finances for new business ventures
CPCCCM2007*	Use explosive power tools
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms to 11 metres
CPCCCO2013*	Carry out concreting to simple forms
CPCCPB3015*	Install acoustic and thermal environmental protection systems
CPCCPB3026*	Erect and maintain trestle and plank systems

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCSP3005 *	Install pre-cast decorative mouldings
CPCCSP3006 *	Install cast plaster blockwork and wall panels
CPCCSP3007 *	Apply plaster by projection machine
CPCCSP3008 *	Carry out conite construction and wall sheet panelling

CPC31220 Certificate III in Wall and Ceiling Lining

Modification History

Release	Comments
5	Updated reference to general construction induction training program.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Prerequisite requirement asterisk removed from CPCCPB3027 Install ceiling insulation products in packaging rules.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Unit CPCCOM2001 Read and interpret plans and specifications marked with an asterisk as a prerequisite requirement must be met.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.1. Unit code corrected in elective list: CPCSHP3007 Install prefabricated internal shopfitting units to CPCSHP3007 Install prefabricated internal shopfitting units.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides a trade outcome in wall and ceiling lining for residential and commercial construction work. The qualification has core unit of competency requirements that cover common skills for the construction industry, as well as the specialist field of work wall and ceiling liner. Wall and ceiling liners apply and fix linings for non-structural walls and ceilings.

Occupational titles may include:

- Wall and ceiling liner
- Drywaller

© Commonwealth of Australia, 2026 BuildSkills Australia

- Plasterer.

State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 29 units of competency:
    - 22 core units
    - 7 elective units.

Electives must be selected as follows:

- all seven units from the electives listed below, or
- five units from the electives listed below, plus two units selected from any current training package or accredited course as long as they contribute to a valid, industry-supported vocational outcome, maintain the integrity of the AQF level of this qualification and do not duplicate the outcome of another unit used to achieve this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCA3014 *	Construct and install bulkheads

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCA3026*	Assemble partitions
CPCCCM2012*	Work safely at heights
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCPB3001*	Fix standard plasterboard wall sheets
CPCCPB3002*	Fix standard plasterboard ceiling sheets
CPCCPB3003*	Fix battens
CPCCPB3004*	Fix wet area sheets
CPCCPB3005*	Fix ceiling sheets to external protected areas
CPCCPB3006*	Fix fibre cement board
CPCCPB3007*	Apply levels of finish standards to planning and inspection of own work
CPCCPB3008*	Mix plastering compounds
CPCCPB3009*	Finish plasterboard joints manually

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCPB3010*	Manually sand plaster work
CPCCPB3012*	Cut and fix paper-faced cornices
CPCCWC3003*	Install dry wall passive fire-rated systems
CPCCWC3004*	Install suspended ceilings
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
BSBESB301	Investigate business opportunities
BSBESB407	Manage finances for new business ventures
CPCCCA3001*	Carry out general demolition of minor building structures
CPCCCA3010*	Install windows and doors
CPCCCM2006	Apply basic levelling procedures
CPCCCM2007*	Use explosive power tools
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCPB3014*	Install bulk insulation and pliable membrane products
CPCCPB3015*	Install acoustic and thermal environmental protection systems
CPCCPB3016*	Install and finish columns

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCPB3017*	Rectify faults in drywall applications
CPCCPB3018*	Use vacuum and electric sanding equipment to finish plaster work
CPCCPB3019*	Inspect equipment for serviceability
CPCCPB3020*	Match, mitre and install cast ornamental cornices
CPCCPB3021*	Install and fix residential acoustic plaster products
CPCCPB3022*	Use mechanical jointing equipment to finish joints
CPCCPB3027	Install ceiling insulation products
CPCCSP3003*	Apply trowelled texture coat finishes
CPCCSP3005*	Install pre-cast decorative mouldings
CPCCWC2001*	Complete penetrations and flashings
CPCCWC3001*	Install and finish plasterboard and fibre cement sheeting to curved wall and ceiling substrates
CPCCWC3002*	Install and finish plasterboard and fibre cement sheeting to arch substrates
CPCSHP3007*	Install prefabricated internal shopfitting units

CPC31320 Certificate III in Wall and Floor Tiling

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Core unit CPCCOM2001 Read and interpret plans and specifications marked with an asterisk as a prerequisite requirement must be met.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides a trade outcome in wall and floor tiling for residential and commercial construction work. The qualification has core unit of competency requirements that cover common skills for the construction industry, as well as the specialist field of work, wall and floor tiling. Tilers work with materials like ceramic, glass, slate, marble and clay. They cut these materials and lay tiles on walls and floors, both interior and exterior. They may also add decorative touches to their basic work.

Occupational titles may include:

- Tiler
- Wall and Floor tiler.

State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

This qualification is suitable for an Australian apprenticeship pathway.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 20 units of competency:
  - 17 core units
  - 3 elective units.

Electives must be selected as follows:

- all three units from the electives listed below, or
- two units from the electives listed below, plus one unit selected from any current training package or accredited course as long as it contributes to a valid, industry-supported vocational outcome, maintains the integrity of the AQF level of this qualification and does not duplicate the outcome of another unit used to achieve this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCCM2006	Apply basic levelling procedures
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCWF2001*	Handle wall and floor tiling materials

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCWF2002*	Use wall and floor tiling tools and equipment
CPCCWF3001*	Prepare surfaces for tiling application
CPCCWF3002*	Install floor tiles
CPCCWF3003*	Install wall tiles
CPCCWF3004*	Repair wall and floor tiling
CPCCWF3005*	Install decorative tiling
CPCCWF3006*	Install mosaic tiling
CPCCWF3007*	Tile curved surfaces
CPCCWF3009*	Apply waterproofing for wall and floor tiling
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
Elective units	
BSBESB301	Investigate business opportunities
BSBESB407	Manage finances for new business ventures
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2009*	Carry out basic demolition
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms up to 11 metres

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCO2013 *	Carry out concreting to simple forms
CPCCPB3004	Fix wet area sheets
CPCCWF3008	Tile pools and spas

CPC31420 Certificate III in Construction Waterproofing

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. • Unit CPCCOM2001 Read and interpret plans and specifications marked with an asterisk as a prerequisite requirement must be met. • Unit CPCCCM2012 Work safely at heights added to the metadata unit grid.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification is designed to meet the needs of workers who undertake waterproofing for residential and commercial construction work. The qualification has core unit of competency requirements that cover common skills for the construction industry, as well as the specialist field of work, construction waterproofing. Waterproofers apply membranes and special coatings to protect contents and the structural integrity of buildings.

Occupational titles may include:

- Waterproofer.

State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

Core units	
CPCCCA2002*	Use carpentry tools and equipment
CPCCCA2011*	Handle carpentry materials
CPCCCA3010*	Install windows and doors
CPCCCM2006	Apply basic levelling procedures
CPCCCM2012*	Work safely at heights
CPCCCM3004	Identify and apply information in construction plans, drawings and specifications
CPCCJN2003*	Package manufactured products for transport
CPCCJN3002*	Use computer-controlled machinery
CPCCJN3004*	Manufacture and assemble joinery components
CPCCJN3100*	Process materials to produce components using static machines
CPCCJS3002*	Manufacture stair components for straight flighted stairs
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCOM3001	Perform construction calculations to determine carpentry material requirements
MSFFM3011	Measure and draw site layout for manufactured furniture products
Group A - Specialist electives	
CPCCCA3012*	Frame and fit wet area fixtures
CPCCCA3016*	Construct, assemble and install timber external stairs
CPCCCA3024*	Install lining, panelling and moulding
CPCCJN3003*	Manufacture components for doors, windows and frames
CPCCJS3003*	Assemble and install stairs
CPCCJS3004*	Manufacture and install continuous handrailing and special stair components
CPCCJS3005*	Manufacture stair components for curved and geometric stairs
CPCCJS3006*	Construct, assemble and install composite external stairs
CPCCJS3011*	Design and set out stairs
Group B - General electives	
CPCCCA3001*	Carry out general demolition of minor building structures
CPCCCA3003*	Install flooring systems
CPCCCA3004*	Construct and erect wall frames
CPCCCA3006*	Erect roof trusses

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCA3011 *	Refurbish timber sashes to window frames
CPCCCA3014 *	Construct and install bulkheads
CPCCCA3026 *	Assemble partitions
CPCCCM3005	Calculate costs of construction work
CPCCJN2001 *	Assemble components
CPCCJN3005 *	Cut and install glass
CPCCPD3021 *	Prepare existing coated surface for painting
CPCCSH2003 *	Apply and install sealant and sealant devices
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCSHP3001	Fabricate shopfitting components using CNC machines
CPCSHP3005	Apply and trim decorative additions to shopfittings and components
CPCSHP3006	Prepare shopfittings and surfaces and apply liquid finishes
CPCWHS3001	Identify construction work hazards and select risk control strategies
MSFFM3009	Produce manual and computer-aided production drawings
MSFFM3020	Fabricate synthetic solid surface products

Pre-requisite Requirements

1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification is designed to meet the needs of stonemasons working with sandstone, limestone, marble and other types of stone and stone products to produce stone monuments, buildings (heritage and new) and building components, such as walls, floors, arches, chimneys, stairs, windows, decorative mouldings, fireplaces and benchtops.

Occupational titles may include:

- Architectural stonemason
- Monumental stonemason
- Heritage stonemason
- Finisher
- Bench-top mason
- Stonemason.

This qualification is suitable for an Australian Apprenticeship pathway.

Licensing/Regulatory Information

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Additional Licensing, legislative, regulatory or certification requirements may apply in some states and territories. For further information, check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

This qualification has core and elective units of competency that cover the skills and knowledge of four specialist groups and general electives:

- Group A - Architectural heritage, conservation and restoration stonemasonry
- Group B - New and contemporary works (building stonemasonry)
- Group C - Monumental stonemasonry
- Group D - Bench-tops

To achieve this qualification, competency must be demonstrated in:

- 30 units of competency:

© Commonwealth of Australia, 2026 BuildSkills Australia

- 21 core units
- 9 electives

The electives are to be chosen as follows:

- all 8 units within Group A - Heritage, conservation and restoration stonemasonry

or

- all 7 units within Group B - New and contemporary works (building stonemasonry)

or

- all 5 units within Group C - Monumental stonemasonry

or

- all 4 units within Group D - Bench-tops
- the remaining units can be selected from any elective group or the general electives as long as the units have not previously been selected
- up to two elective units can be selected from any Training Package or accredited course, as long as they contribute to a valid, industry-supported vocational outcome and supports the AQF level of this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for more information. All prerequisite requirements are packaged in the qualification.

Core units

CPCCCA3002*	Carry out setting out
CPCCCM2006	Apply basic levelling procedures
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2012*	Work safely at heights
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCST2003*	Finish stone
CPCCST2004*	Lay stone

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCST2006*	Identify and use stone products
CPCCST2007*	Use stonemasonry tools, plant and equipment
CPCCST3001*	Dress and mould stone
CPCCST3002*	Shape solid stone
CPCCST3003*	Split stone manually
CPCCST3004*	Dress stone manually
CPCCST3006*	Machine stone
CPCCST3010*	Set out and cut letters in stone
CPCCST3022*	Carry out profile work
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry

Elective units

Group A – Architectural heritage, conservation and restoration stonemasonry

CPCCBL3016*	Construct battered masonry walls and piers
CPCCBL3017*	Carry out tuck pointing and repointing to masonry
CPCCST3017*	Construct stone arches
CPCCST3019*	Lay stonemasonry stairs
CPCCST3021*	Restore stone work
CPCCST3023	Apply drawing principles to stonemasonry
CPCCST3024*	Apply conservation principles and practices to heritage stonework
CPCCST3025*	Carry out basic stonemasonry demolition

Group B – Architectural new and contemporary works

CPCCBL3016*	Construct battered masonry walls and piers
CPCCPA3001*	Prepare subgrade, base and bedding course for segmental paving
CPCCST3012*	Build stone veneer walls
CPCCST3016*	Build solid stonemasonry walls

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCST3017*	Construct stone arches
CPCCST3019*	Lay stonemasonry stairs
CPCCST3020*	Produce reconstituted stone

Group C – Monumental

CPCCCM2002*	Carry out hand excavation
CPCCST3011*	Plan monument construction
CPCCST3013*	Carry out cemetery monument fixing
CPCCST3015*	Apply gilding to stone
CPCCST3018*	Inlay lead to stone

Group D – Bench-tops

CPCCCM2005*	Use construction tools and equipment
CPCCJN2001*	Assemble components
CPCCJN2003*	Package manufactured products for transport
CPCCST3009*	Use computer-controlled static machinery to produce stone components

General electives

BSBESB301	Investigate business opportunities
BSBESB407	Manage finances for new business ventures
CPCCCO2013*	Carry out concreting to simple forms
CPCCPA3002*	Lay segmental paving
CPCCPA3003*	Cut segmental paving
CPCCSC2002*	Erect and dismantle basic scaffolding
CPCCST2001*	Prepare for stonemasonry construction process
CPCCST2005*	Carry out load slinging of off-site materials
CPCCST3007*	Turn stone
CPCCST3009*	Use computer-controlled static machinery to produce stone components

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCST3014*	Set and anchor stone facades
CPCCST3016*	Build solid stonemasonry walls
CPCCST4001	Prepare to undertake the heritage restoration process
CPCCST4002	Undertake the heritage restoration process
CPCCST4003	Undertake preparations for refractory work
CPCCST4004	Initiate the heritage works process
CPCCST4005	Prepare drawings for heritage works
CPCCST4006	Prepare report for heritage restoration work
CPCCST4007	Construct a fire brick wall and arch using refractory materials
CPCSIL1001	Identify products and materials containing crystalline silica
CPCSIL2002*	Use and maintain respiratory protective equipment
CPCSIL3002*	Work with products and materials containing crystalline silica

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCBL3016 Construct battered masonry walls and piers	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

CPC32420 Certificate III in Plumbing

Modification History

Release	Comments
8	New unit of competency *CPCPGS3026 Assess operational risk when working with hydrogen* added to Group A electives. Superseded imported units updated.
7	Updated reference to general construction induction training program.
6	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. Typographical correction made to title of HLTAID011 Provide First Aid.
5	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. In the Packaging Rules, Option 3: General Plumber - Mechancial, changed to read Option 3: General Plumbing - Mechancial.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Rectified elective unit wording from 'An additional 4 elective units may be selected...' to read 'Up to 4 elective units may be replaced by units from any...'.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2. Addition of CPCPCM2052 Weld mild steel using oxy-acetylene equipment and CPCPCM2055 Work safely on roofs to unit grid.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

© Commonwealth of Australia, 2026 BuildSkills Australia

	Addition of CPCPRF2024 Fabricate roof coverings for curved structures to Group D Elective units.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This is a trade qualification for plumbers in residential, industrial and commercial workplaces who are responsible for assembling, installing and maintaining water services, sanitary plumbing and sanitary drainage, gas, roofing and mechanical services in both existing and new constructions.

Occupational titles could include:

- Plumber
- Plumber and drainer
- Plumber and gasfitter
- Gasfitter
- Roof plumber
- Mechanical services plumber.

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

This qualification is suitable for an Australian Apprenticeship pathway.

Licensing/Regulatory Information

This is a licensed occupation. State and territory jurisdictions may have different licensing, legislative, regulatory or certification requirements. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2026 BuildSkills Australia

Packaging Rules

To be awarded this qualification, competency in one of the four occupational options must be achieved.

OPTION 1: General Plumbing

For the award of the Certificate III in Plumbing (General Plumber) a minimum of 58 units are to be completed as follows:

- 43 core units
- 15 elective units

Electives are to be selected as followed:

- 8 units from Group A and
- 4 units from Group B and
- 3 units from Group C

Up to 4 elective units may be replaced by units from any other group or from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

OPTION 2: General Plumbing – Roofing

For the award of the Certificate III in Plumbing (General Plumber and Roofing) a minimum of 62 units are to be completed as follows:

- 43 core units
- 19 elective units.

Electives are to be selected as followed:

- 8 units from Group A and
- 4 units from Group B and
- 3 units from Group C and
- 4 units from Group D

Up to 4 elective units may be replaced by units from any other group or from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

OPTION 3: General Plumbing – Mechanical

For the award of the Certificate III in Plumbing (General Plumbing and Mechanical) a minimum of 73 units are to be completed as follows:

- 43 core units
- 30 electives

Electives are to be selected as followed:

- 8 units from Group A and

© Commonwealth of Australia, 2026 BuildSkills Australia

- 4 units from Group B and
- 3 units from Group C and
- 7 units from Group E and
- 8 units from Group F

Up to 4 elective units may be replaced by units from any other group or from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

OPTION 4: General Plumbing – Roofing and Mechanical

For the award of the *Certificate III in Plumbing (General Plumber Roofing and Mechanical) a minimum of 77* units are to be completed as follows:

- 43 core units
- 34 electives

Electives are to be selected as followed:

- 8 units from Group A and
- 4 units from Group B and
- 3 units from Group C and
- 4 units from Group D and
- 7 units from Group E and
- 8 units from Group F

Up to 4 elective units may be replaced by units from any other group or from any relevant nationally endorsed Training Package or accredited course. The units must contribute to the vocational outcomes of the qualification.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core Units	
CPCCCM2012*	Work safely at heights
CPCPCM2039	Carry out interactive workplace communication
CPCPCM2040*	Read plans, calculate quantities and mark out materials
CPCPCM2041	Work effectively in the plumbing services sector
CPCPCM2043	Carry out WHS requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPCM2045*	Handle and store plumbing materials
CPCPCM2046*	Use plumbing hand and power tools
CPCPCM2047*	Carry out levelling
CPCPCM2048*	Cut and join sheet metal
CPCPCM2054*	Carry out simple concreting and rendering
CPCPCM2055*	Work safely on roofs
CPCPCM3021*	Flash penetrations through roofs and walls
CPCPCM3022*	Weld polymer pipes using fusion method
CPCPCM3023*	Fabricate and install non-ferrous pressure piping
CPCPCM3024*	Prepare simple drawings
CPCPCM3025*	Install trench support
CPCPDR2021*	Locate and clear blockages
CPCPDR2025*	Install stormwater and sub-soil drainage systems and drain work site
CPCPDR2026*	Install prefabricated inspection openings and inspection chambers
CPCPDR3021*	Plan layout and install below ground sanitary drainage systems
CPCPDR3023*	Install on-site domestic wastewater treatment plants and disposal systems
CPCPFS3031*	Fabricate and install fire hydrant and hose reel systems
CPCPGS3048*	Install gas pressure control equipment
CPCPGS3049*	Install gas appliance flues
CPCPGS3051*	Purge consumer piping

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPGS3053*	Disconnect and reconnect Type A gas appliances
CPCPGS3054*	Calculate and install natural ventilation for Type A gas appliances
CPCPGS3056*	Size and install consumer gas piping systems
CPCPGS3059*	Install LPG storage of aggregate storage capacity up to 500 litres
CPCPGS3061*	Install and commission Type A gas appliances
CPCPSN3011*	Plan the layout of a residential sanitary plumbing system and fabricate and install sanitary stacks
CPCPSN3022*	Install discharge pipes
CPCPWT3020*	Connect and install storage tanks to a domestic water supply
CPCPWT3021*	Set out and install water services
CPCPWT3022*	Install and commission water heating systems and adjust controls and devices
CPCPWT3025*	Install water pumpsets
CPCPWT3026*	Install and fit off sanitary fixtures, water services and adjust water service controls
CPCPWT3027*	Install backflow prevention devices
CPCPRF2023*	Collect and store roof water
CPCPRF3022*	Fabricate and install roof drainage systems
CPCPRF3023*	Fabricate and install external flashings
CPCPRF3024*	Install roof components
HLTAID011	Provide First Aid

© Commonwealth of Australia, 2026 BuildSkills Australia

Electives Units **Group A**	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCPCM2049*	Cut using oxy-acetylene equipment
CPCPCM2052*	Weld mild steel using oxy-acetylene equipment
CPCPFS3037*	Install residential life safety sprinkler systems
CPCPFS3038*	Test and maintain fire hydrant and hose reel installations
CPCPGS3026	Assess operational risk when working with hydrogen
CPCPIG2021*	Design domestic urban irrigation systems
CPCPIG3021*	Set out, install and commission irrigation systems
CPCPIG3022*	Install and commission domestic irrigation pumps
CPCPWT3024*	Install and maintain domestic water treatment equipment
CPCPWT3028*	Install property service
CPCPWT3029*	Install water pipe systems
CPCPWT3030*	Install home fire sprinkler systems
MEM11011*	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006*	Organise and communicate information
MEM05049*	Perform routine gas tungsten arc welding

© Commonwealth of Australia, 2026 BuildSkills Australia

MEM05050*	Perform routine gas metal arc welding
RIIWHS202	Enter and work in confined spaces
Group B	
CPCPCM2053*	Weld using metal arc welding equipment
CPCPGS3046*	Install LPG systems in caravans, mobile homes and mobile workplaces
CPCPGS3052*	Maintain Type A gas appliances
CPCPGS3055*	Install gas sub-meters
CPCPGS3060*	Install LPG storage of aggregate storage capacity exceeding 500 litres and less than 8 kl
CPCPGS3047*	Install LPG systems in marine craft
Group C	
CPCPDR3025*	Plan layout and install vacuum drainage systems
CPCPSN3025*	Install pre-treatment facilities
CPCPSN3026*	Install sewerage pumpsets
RIIWHS202	Enter and work in confined spaces
RIICTT306E	Install cure in-place linings for existing pipeline systems
Group D	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM3001	Operate elevated work platforms up to 11 metres

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPRF2022*	Select and install roof sheeting and wall cladding
CPCPRF2024*	Fabricate roof coverings for curved structures
CPCPRF3021*	Receive roofing materials
CPCPRF3025*	Install roof coverings to curved roof structures
CPCPRF3026*	Install roof sheets, wall cladding and complex flashings
CPCPRF3027*	Select and install a heritage roof system
Group E	
CPCPMS2021*	Assemble mechanical services components
CPCPMS3031*	Fabricate and install steel pressure piping
CPCPMS3032*	Select and fit insulation and sheathing
CPCPMS3035*	Install and test ducting systems
CPCPMS3036*	Install air handling units
CPCPMS3038*	Install air conditioning control equipment
CPCPMS3039*	Maintain mechanical services equipment
Group F	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCWC2001*	Complete penetrations and flashings

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCPCM2053*	Weld using metal arc welding equipment
CPCPMS3033*	Install small bore heating systems
CPCPMS3034*	Install and test medical gas pipeline systems
CPCPMS3037*	Install and commission a single head split system air conditioning
CPCPMS3040*	Install and commission evaporative air cooling systems
CPCPMS3041*	Install domestic solid fuel burning appliances
UEECD0007	Apply work health and safety regulations, codes and practices in the workplace
UEERA0049*	Install and start up single head split air conditioning and water heating heat pump systems
UEERA0059*	Prepare and connect refrigerant tubing and fittings
UEERA0064*	Recover, pressure test, evacuate, charge and leak test refrigerants - split systems

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCCM2008 Erect and dismantle restricted height scaffolding	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCCCM2012 Work safely at heights	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCWC2001 Complete penetrations and flashings	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCPCM2040 Read plans, calculate quantities and mark out materials	CPCPCM2043 Carry out WHS requirements CPCPCM3024 Prepare simple drawings
CPCPCM2045 Handle and store plumbing materials	CPCPCM2043 Carry out WHS requirements
CPCPCM2046 Use plumbing hand and power tools	CPCPCM2043 Carry out WHS requirements
CPCPCM2047 Carry out levelling	CPCPCM2043 Carry out WHS requirements
CPCPCM2048 Cut and join sheet metal	CPCPCM2043 Carry out WHS requirements
CPCPCM2049 Cut using oxy-acetylene equipment	CPCPCM2043 Carry out WHS requirements
CPCPCM2052 Weld mild steel using oxy-acetylene equipment	CPCPCM2043 Carry out WHS requirements
CPCPCM2053 Weld using metal arc welding equipment	CPCPCM2043 Carry out WHS requirements
CPCPCM2054 Carry out simple concreting and rendering	CPCPCM2043 Carry out WHS requirements
CPCPCM2055 Work safely on roofs	CPCPCM2043 Carry out WHS requirements
CPCPCM3021 Flash penetrations through roofs and walls	CPCPCM2043 Carry out WHS requirements
CPCPCM3022 Weld polymer pipes using fusion method	CPCPCM2043 Carry out WHS requirements
CPCPCM3023 Fabricate and install non-ferrous pressure piping	CPCPCM2043 Carry out WHS requirements
CPCPCM3024 Prepare simple drawings	CPCPCM2043 Carry out WHS requirements
CPCPCM3025 Install trench support	CPCPCM2043 Carry out WHS requirements
CPCPDR2021 Locate and clear blockages	CPCPCM2043 Carry out WHS requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPDR2025 Install stormwater and sub-soil drainage systems and drain work site	CPCPCM2043 Carry out WHS requirements
CPCPDR2026 Install prefabricated inspection openings and inspection chambers	CPCPCM2043 Carry out WHS requirements
CPCPDR3021 Plan layout and install below ground sanitary drainage systems	CPCPCM2043 Carry out WHS requirements CPCPCM3024 Prepare simple drawings
CPCPDR3023 Install on-site domestic wastewater treatment plants and disposal systems	CPCPCM2043 Carry out WHS requirements
CPCPDR3025 Plan layout and install vacuum drainage systems	CPCPCM2043 Carry out WHS requirements
CPCPFS3031 Fabricate and install fire hydrant and hose reel systems	CPCPCM2043 Carry out WHS requirements CPCPCM3023 Fabricate and install non-ferrous pressure piping
CPCPFS3037 Install residential life safety sprinkler systems	CPCPCM2043 Carry out WHS requirements
CPCPFS3038 Test and maintain fire hydrant and hose reel installations	CPCPCM2043 Carry out WHS requirements
CPCPGS3046 Install LPG systems in caravans, mobile homes and mobile workplaces	CPCPCM2043 Carry out WHS requirements
CPCPGS3047 Install LPG systems in marine craft	CPCPCM2043 Carry out WHS requirements
CPCPGS3048 Install gas pressure control equipment	CPCPCM2043 Carry out WHS requirements
CPCPGS3049 Install gas appliance flues	CPCPCM2043 Carry out WHS requirements CPCPCM3021 Flash penetrations through roofs and walls
CPCPGS3051 Purge consumer piping	CPCPCM2043 Carry out WHS requirements
CPCPGS3052 Maintain Type A gas appliances	CPCPCM2043 Carry out WHS requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

	CPCPGS3054 Calculate and install natural ventilation for Type A gas appliances
CPCPGS3053 Disconnect and reconnect Type A gas appliances	CPCPCM2043 Carry out WHS requirements

1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of a person installing, maintaining and repairing flashings, metal roof and wall claddings and rainwater products such as gutters and downpipes, and other accessories on residential, industrial and commercial buildings.

Occupational titles could include:

- Roof plumber

This qualification includes units of competency common to other qualifications in the plumbing industry as well as roof plumbing specialist units of competency and can provide a pathway to further learning and work in the plumbing industry.

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *CPCWHS1001 Prepare to work* safely in *the construction industry* meets this requirement.

This is a licenced occupation. Licensing, legislative, regulatory and certification requirements may vary between states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded this qualification, competency must be achieved in:

- 23 units of competency:
    - 20 core units
    - 3 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- 2 elective units must be chosen from units listed below

© Commonwealth of Australia, 2026 BuildSkills Australia

- Up to 1 elective unit may be selected from any other group or from any relevant nationally endorsed Training Package or accredited course.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCPCM2040*	Read plans, calculate quantities and mark out materials
CPCPCM2041	Work effectively in the plumbing services sector
CPCPCM2043	Carry out WHS requirements
CPCPCM2047*	Carry out levelling
CPCPCM2048*	Cut and join sheet metal
CPCPCM2055*	Work safely on roofs
CPCPCM3021*	Flash penetrations through roofs and walls
CPCPCM3024*	Prepare simple drawings
CPCPRF2022*	Select and install roof sheeting and wall cladding
CPCPRF2023*	Collect and store roof water
CPCPRF3022*	Fabricate and install roof drainage systems

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPRF3023 *	Fabricate and install external flashings
CPCPRF3024 *	Install roof components
CPCPRF3025 *	Install roof coverings to curved roof structures
CPCPRF3026 *	Install roof sheets, wall cladding and complex flashings
HLTAID011	Provide First Aid
Elective units	
CPCCPB3015 *	Install acoustic and thermal environmental protection systems
CPCCRI3001	Operate personnel and materials hoists
CPCCST2005 *	Carry out load slinging of off-site materials
CPCPCM2049 *	Cut mild steel using oxy-acetylene equipment
CPCPCM3022 *	Weld polymer pipes using fusion method
CPCPCM4013	Produce 2-D architectural drawings using design software
CPCPRF2024 *	Fabricate roof coverings for curved structures
CPCPRF3027 *	Select and install a heritage roof system
CPCPRF4011 *	Design and size roof drainage systems
MEM05049*	Perform routine gas tungsten arc welding
MEM05050 *	Perform routine gas metal arc welding
MEM11011*	Undertake manual handling

© Commonwealth of Australia, 2026 BuildSkills Australia

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006*	Organise and communicate information

CPC32720 Certificate III in Gas Fitting

Modification History

Release	Comments
6	New unit of competency *CPCPGS3026 Assess operational risk when working with hydrogen* added to elective bank.
5	Updated reference to general construction induction training program.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. Typographical correction made to title of HLTAID011 Provide First Aid.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. Core unit CPCPCM2055 Work safely of roofs added to the metadata.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Title changed for CPCPCM3022 and an asterisk added to MEM11011 and MEM16006 for clarity.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects role of a person installing, testing, maintaining and repairing gas lines, meters, regulators and piping systems downstream of the billing meter, and appliances and ancillary equipment such as hot water systems, gas heaters and heat pumps associated with the use of fuel gases, including liquefied petroleum gas (LPG) systems.

Occupational titles could include:

© Commonwealth of Australia, 2026 BuildSkills Australia

- Gas fitter.

This qualification includes units of competency common to other qualifications in the plumbing industry as well as gas fitting specialist units of competency and can provide a pathway to further learning and work in the plumbing industry.

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *Prepare to work* safely in *the construction industry* meets this requirement.

Licensing/Regulatory Information

This is a licenced occupation. Licensing, legislative, regulatory and certification requirements may vary between states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To be awarded this qualification, competency must be achieved in:

- 31 units of competency:
    - 26 core units
    - 5 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- 3 elective units must be chosen from listed below,
- 2 elective units can be selected from the list below or may be replaced by units from any relevant nationally endorsed Training Package or accredited course.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
CPCCCM2012*	Work safely at heights
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPCM2039	Carry out interactive workplace communication
CPCPCM2040*	Read plans, calculate quantities and mark out materials
CPCPCM2041	Work effectively in the plumbing services sector
CPCPCM2043	Carry out WHS requirements
CPCPCM2045*	Handle and store plumbing materials
CPCPCM2046*	Use plumbing hand and power tools
CPCPCM2047*	Carry out levelling
CPCPCM2048*	Cut and join sheet metal
CPCPCM2055*	Work safely on roofs
CPCPCM3021*	Flash penetrations through roofs and walls
CPCPCM3022*	Weld polymer pipes using fusion method
CPCPCM3023*	Fabricate and install non-ferrous pressure piping
CPCPGS3046*	Install LPG systems in caravans, mobile homes and mobile workplaces
CPCPGS3047*	Install LPG systems in marine craft
CPCPGS3048*	Install gas pressure control equipment
CPCPGS3051*	Purge consumer piping
CPCPGS3052*	Maintain Type A gas appliances
CPCPGS3053*	Disconnect and reconnect Type A gas appliances
CPCPGS3054*	Calculate and install natural ventilation for Type A gas appliances
CPCPGS3056*	Size and install consumer gas piping systems

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPGS3059*	Install LPG storage of aggregate storage capacity up to 500 litres
CPCPGS3061*	Install and commission Type A gas appliances
CPCPGS3049*	Install gas appliance flues
HLTAID011	Provide First Aid
Elective units	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM3001	Operate elevated work platforms up to 11 meters
CPCCRI3001*	Operate personnel and materials hoists
CPCCST2005*	Carry out load slinging of off-site materials
CPCPCM2049*	Cut using oxy-acetylene equipment
CPCPCM2053*	Weld using metal arc welding equipment
CPCPCM2054*	Carry out simple concreting and rendering
CPCPCM3024*	Prepare simple drawings
CPCPCM3025	Install trench support
CPCPCM4013	Produce 2-D architectural drawings using design software
CPCPGS3026	Assess operational risk when working with hydrogen
CPCPGS3055*	Install gas sub-meters
CPCPGS3060*	Install LPG storage of aggregate storage capacity exceeding 500 litres and less than 8 kl

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPGS4011*	Design and size consumer gas installations
CPCPMS3031*	Fabricate and install steel pressure piping
CPCPMS3033 *	Install small bore heating systems
MEM05049*	Perform routine gas tungsten arc welding
MEM05050 *	Perform routine gas metal arc welding
MEM11011*	Undertake manual handling
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006*	Organise and communicate information
UEERL0004	Disconnect - reconnect electrical equipment connected to low voltage (LV) installation wiring

Pre-requisite Requirements

Unit of competency	Prerequisite requirement

CPC32820 Certificate III in Fire Protection

Modification History

Release	Comments
5	Updated reference to general construction induction training program.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. • Typographical correction made to title of HLTAID011 Provide First Aid. • Addition of unit CPCPCM3024 Prepare simple drawings in elective bank and metadata unit grid.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.1. Unit code corrected in core unit list: CPCPCM2019 Carry out interactive workplace communication to CPCPCM2039 Carry out interactive workplace communication.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Correction to unit title CPCPCM3022 in Elective units.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the trade qualified role of a person installing, testing, maintaining, routine service and repairing a range of fire protection systems.

Occupational titles could include:

- Fire sprinkler fitter tradesperson
- Fire sprinkler fitter.

© Commonwealth of Australia, 2026 BuildSkills Australia

This qualification includes units of competency common to other qualifications in the plumbing industry as well as specialist fire protection units and can provide a pathway to further learning and work in the fire protection industry.

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *CPCWHS1001 Prepare to work* safely in *the construction industry* meets this requirement.

This is a licenced occupation. Licensing, legislative, regulatory and certification requirements may vary between states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 37 units of competency:
    - 32 core units
    - 5 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- a minimum of 3 elective units must be chosen from those listed below,
- up to 2 units may be chosen from the elective units listed below or from any Training Package or accredited course.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
CPCPCM2045 *	Handle and store plumbing materials

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPCM2046 *	Use plumbing hand and power tools
CPCPCM2039	Carry out interactive workplace communication
CPCPCM2041	Work effectively in the plumbing and services sector
CPCPCM2040 *	Read plans, calculate quantities and mark out materials
CPCPCM2043	Carry out WHS requirements
CPCPCM2047 *	Carry out levelling
CPCPCM2049 *	Cut using oxy-LPG-acetylene equipment
CPCPCM2052 *	Weld using oxy-acetylene equipment
CPCPCM2053 *	Weld using metal arc welding equipment
CPCPCM3023 *	Fabricate and install non-ferrous pressure piping
CPCPFS2021 *	Connect static storage tanks for fixed fire protection systems
CPCPFS3030	Design fire sprinkler systems using pre-calculated charts and tables
CPCPFS3031 *	Fabricate and install fire hydrant and hose reel systems
CPCPFS3034 *	Install control valve assemblies, actuating devices and local alarms
CPCPFS3036 *	Install special hazard systems
CPCPFS3037 *	Install residential life safety sprinkler systems
CPCPFS3038 *	Test and maintain fire hydrant and hose reel installations
CPCPFS3040	Conduct basic functional testing of water-based fire-suppression systems

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPFS3041	Inspect and test fire pumpsets
CPCPFS3042*	Conduct annual routine service of complex water-based fire-suppression systems
CPCPFS3043*	Conduct functional water flow testing
CPCPFS3044*	Install distribution and range pipes
CPCPFS3045*	Fit off sprinkler heads, controls and ancillary equipment
CPCPFS3046*	Test the integrity of water-based fire protection systems using pressure
CPCPFS3047*	Test and maintain automatic fire sprinklers
CPCPFS3048*	Install fixed fire pumpsets
CPCPMS3031*	Fabricate and install steel pressure piping
CPCPWT3028*	Install property service
CPPFES2025A	Inspect, test and maintain gaseous fire-suppression systems
CPPFES2043A	Prevent ozone depleting substance and synthetic greenhouse gas emissions
CPPFES2047A	Inspect and test control and indicating equipment
General electives	
CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2012*	Work safely at heights

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCM3001	Operate elevated work platforms
CPCCPB3015*	Install acoustic and thermal environmental protection systems
CPCCRI3001	Operate personnel and materials hoists
CPCCST2005*	Carry out load slinging of off-site materials
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCPCM2054*	Carry out simple concreting and rendering
CPCPCM3021*	Flash penetrations through roofs and walls
CPCPCM3022*	Weld polymer pipes using fusion method
CPCPCM3024	Prepare simple drawings
CPCPCM2048*	Cut and join sheet metal
CPCPFS2022*	Install portable fire equipment
CPCPFS3049*	Conduct preventive maintenance on fixed fire pumpsets
CPCPWT3025*	Install water pumpsets
CPCPWT3029*	Install water pipe systems
CPPCMN2002	Participate in workplace safety arrangements
HLTAID011	Provide First Aid

CPC32920 Certificate III in Construction Crane Operations

Modification History

Release	Comments
5	Updated reference to general construction induction training program.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 7.0. The following imported units have been updated to their latest release: • TLILIC0022 Licence to operate a slewing mobile crane (up to 20 tonnes) supersedes and is equivalent to TLILIC0010 Licence to operate a slewing mobile crane (up to 20 tonnes) • TLILIC0023 Licence to operate a slewing mobile crane (up to 60 tonnes) supersedes and is equivalent to TLILIC0013 Licence to operate a slewing mobile crane (up to 60 tonnes).
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. • Typographical correction made to title of HLTAID011 Provide First Aid. • CPCCLRG3001 Licence to perform rigging basic level to metadata (Group B Electives).
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Typographical error in unit code corrected for clarity.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification provides reflects the role of individuals working in the area of crane operations in the construction industry.

Occupational titles include licensed crane operator.

© Commonwealth of Australia, 2026 BuildSkills Australia

The qualification has core units of competency that cover common skills and knowledge for the building and construction industry, a choice of units for specific crane licences, and elective units that include additional licensing options. Due to the high-risk nature of the job role, the qualification provides a strong focus on safety.

This is a licensed occupation. Users should check requirements with their relevant licensing authority.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 23 units of competency:
    - 16 core units
    - 7 elective units.

Elective units must be selected as follows:

- 1 unit must be selected from the Group A list of elective units below
- at least 4 units must be selected from the remaining Group A list of elective units or Group B list of elective units
- up to 2 units can be selected from the list of elective units below or from any current training package or accredited course where the unit contributes to a valid, industry-supported vocational outcome, maintains the integrity of the Australian Qualifications Framework (AQF) level of this qualification, and does not duplicate the outcomes of another unit used to achieve this qualification.

Prerequisite units of competency

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit/s must be assessed before assessment of any unit of competency with an asterisk. All prerequisite requirements are packaged in the qualification.

Core units	
BSBOPS304	Deliver and monitor a service to customers

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCM2004*	Handle construction materials
CPCCCM2012*	Work safely at heights
CPCCCM3001	Operate elevated work platforms up to 11 metres
CPCCCM3003	Work safely around electrical sources, services and assets
CPCCLDG3001	Licence to perform dogging
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
TLIB3015	Undertake site inspection
TLIF2006	Apply accident-emergency procedures
TLIF2010	Apply fatigue management strategies
TLILIC0008	Licence to operate a non-slewing mobile crane (greater than 3 tonnes capacity)
Elective units	
Group A	
TLILIC0022	Licence to operate a slewing mobile crane (up to 20 tonnes)

© Commonwealth of Australia, 2026 BuildSkills Australia

TLILIC0023	Licence to operate a slewing mobile crane (up to 60 tonnes)
Group B	
CPCCDO3012*	Perform crane scheduling
CPCCLHS3001	Licence to operate a personnel and materials hoist
CPCCLRG3001*	Licence to perform rigging basic level
CPCCLRG3002*	Licence to perform rigging intermediate level
CPCCLTC4001	Licence to operate a tower crane
CPCCLTC4002	Licence to operate a self-erecting tower crane have been added to elective Group B
HLTAID011	Provide First Aid
TLIB3011	Set up and rig crane for lift
TLIB3013	Maintain mobile cranes
TLIF3084	Follow mobile crane safety procedures
TLILIC0003	Licence to operate a forklift truck
TLILIC0005	Licence to operate a boom-type elevated work platform (boom length 11 metres or more)
TLILIC2016	Licence to drive a heavy rigid vehicle

CPC33020 Certificate III in Bricklaying and Blocklaying

Modification History

Release	Comments
5	Updated reference to general construction induction training program.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. Imported unit AHCLSC307 Implement a retaining wall project updated to the latest, equivalent release, AHCLSC319 Implement a retaining wall project.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Removal of prerequisite asterisks from units: • CPCCOM1012 Work effectively and sustainably in the construction industry • CPCCOM1013 Plan and organise work • CPCCOM1014 Conduct workplace communication. Unit CPCCOM2001 Read and interpret plans and specifications marked with an asterisk as a prerequisite requirement must be met.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Title change in unit list for CPCCBL3017 Carry out tuck pointing brickwork.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the trade qualified role of a bricklayer, blocklayer or paver who may have responsibility for undertaking heritage bricklaying, refractory bricklaying,

© Commonwealth of Australia, 2026 BuildSkills Australia

bricklaying, blocklaying and paving work in residential, industrial and commercial contexts, in both existing and new constructions.

Occupational titles could include:

- Bricklayer
- Blocklayer
- Paver.

The bricklaying, blocklaying and paving industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Licensing, legislative, regulatory and certification requirements vary between states. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

This qualification has core units and elective units of competency that cover the skills and knowledge of three specialist groups, and general electives:

- Group A - Traditional and heritage bricklaying
- Group B - Refractory Bricklaying
- Group C - Paving

To achieve this qualification, competency must be demonstrated in:

- 28 units of competency:
    - 20 core units
    - 8 elective units.
- the elective units can be selected, once only, from any of the groups listed below.

© Commonwealth of Australia, 2026 BuildSkills Australia

- up to two elective units can be selected from any Training Package and or accredited course, as long as they contribute to a valid, industry-supported vocational outcome and support the AQF level of this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCBL2001 *	Handle and prepare bricklaying and blocklaying materials
CPCCBL2002 *	Use bricklaying and blocklaying tools and equipment
CPCCBL3002 *	Carry out masonry veneer construction
CPCCBL3003 *	Carry out cavity brick construction
CPCCBL3005 *	Lay masonry walls and corners
CPCCBL3006 *	Lay multi-thickness walls and piers
CPCCBL3009 *	Install flashings and damp proof course
CPCCBL3010 *	Construct masonry arches
CPCCBL3011 *	Construct curved walls
CPCCBL3013 *	Construct masonry structural systems
CPCCCA3002 *	Carry out setting out
CPCCCM2006	Apply basic levelling procedures

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCM2008*	Erect and dismantle restricted height scaffolding
CPCCCM2012*	Work safely at heights
CPCCOM1012	Work effectively and sustainably in the construction industry
CPCCOM1013	Plan and organise work
CPCCOM1014	Conduct workplace communication
CPCCOM1015	Carry out measurements and calculations
CPCCOM2001*	Read and interpret plans and specifications
CPCCWHS2001	Apply WHS requirements, policies, and procedures in the construction industry
Elective units **Group A - Traditional and heritage bricklaying**	
CPCCST4001	Prepare to undertake the heritage restoration process
CPCCST4002	Undertake the heritage restoration process
CPCCBL3004*	Construct masonry steps and stairs
CPCCBL3012*	Construct fireplaces and chimneys
CPCCBL3015*	Construct decorative brickwork
CPCCBL3016*	Construct battered masonry walls and piers
CPCCBL3017*	Carry out tuck pointing and repointing to masonry

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCO2013*	Carry out concreting to simple forms
CPCCSF2004*	Place and fix reinforcement materials
Group B – Refractory Bricklaying	
CPCCST4003	Undertake preparations for refractory work
CPCCST4007	Construct a fire brick wall and arch using refractory materials
CPCCBL3004*	Construct masonry steps and stairs
CPCCBL3012*	Construct fireplaces and chimneys
CPCCBL3016*	Construct battered masonry walls and piers
CPCCCM2009*	Carry out basic demolition
CPCCCO2013*	Carry out concreting to simple forms
CPCCSF2004*	Place and fix reinforcement materials
Group C - Paving	
CPCCCO2013*	Carry out concreting to simple forms
CPCCPA3001*	Prepare subgrade, base and bedding course for segmental paving
CPCCPA3002*	Lay segmental paving
CPCCPA3003*	Cut segmental paving

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCPA3004 *	Finish segmental paving
CPCCPA3005 *	Maintain and repair segmental paving
CPCCSF2004 *	Place and fix reinforcement materials
General Electives	
AHCLSC319	Implement a retaining wall project
CPCCBC4003	Select, prepare and administer a construction contract
CPCCST4003	Undertake preparations for refractory work
CPCCBL3001 *	Lay paving
CPCCBL3004 *	Construct masonry steps and stairs
CPCCBL3007 *	Install glass blockwork
CPCCBL3012 *	Construct fireplaces and chimneys
CPCCBL3014 *	Install fire-rated masonry construction
CPCCBL3015 *	Construct decorative brickwork
CPCCBL3016 *	Construct battered masonry walls and piers
CPCCBL3017 *	Carry out tuck pointing and repointing to masonry
CPCCBL3018 *	Install aerated autoclaved concrete products
CPCCCM2009*	Carry out basic demolition

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCCO2013 *	Carry out concreting to simple forms
CPCCPA3001 *	Prepare subgrade, base and bedding course for segmental paving
CPCCPA3002 *	Lay segmental paving
CPCCPA3003 *	Cut segmental paving
CPCCPA3004 *	Finish segmental paving
CPCCPA3005 *	Maintain and repair segmental paving
CPCCSF2004 *	Place and fix reinforcement materials

CPC33226 Certificate III in Utility Locating

Modification History

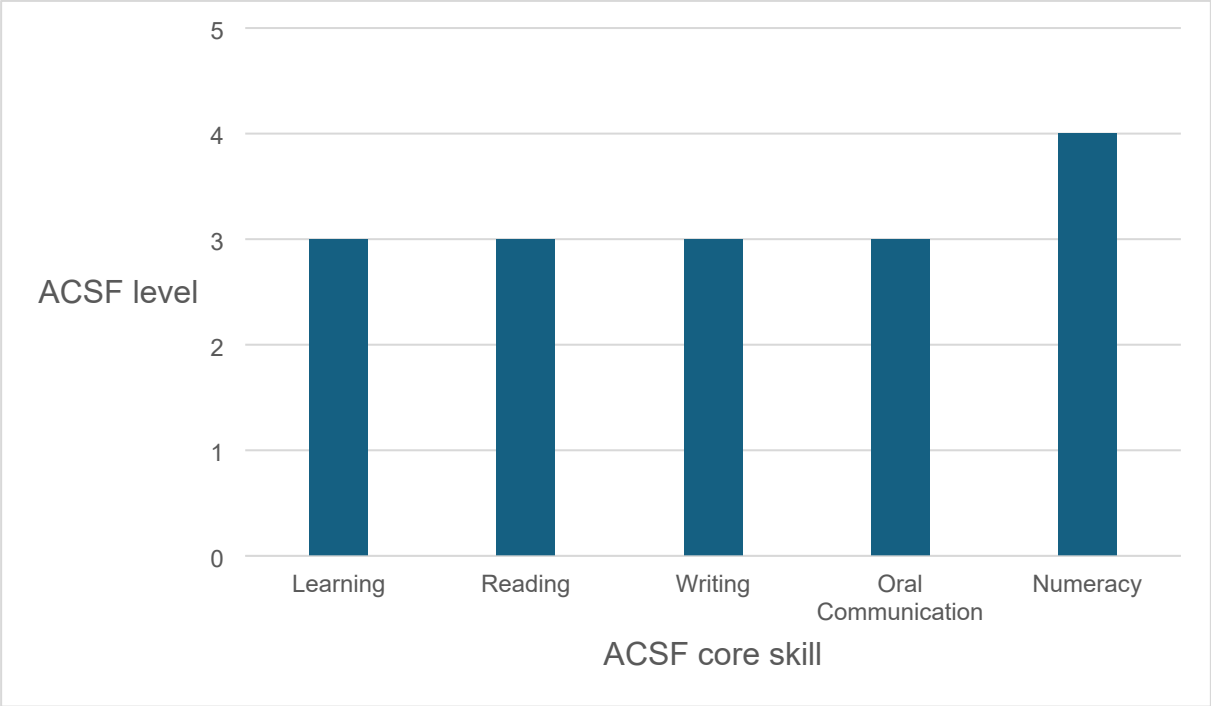
Release	Comments
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 11.0.

Qualification Description

This qualification has been created for utility locating occupations.

This qualification allows individuals who are working in the industry to develop skills and knowledge in order to fulfil utility locating service roles. Utility locating service roles involve using specialised equipment to locate, mark and protect underground assets such as pipes and cables. These roles include using technology such as ground penetrating radar (GPR) and electromagnetic field (EMF) detectors, interpreting utility plans; and marking locate sites. This entails performing tasks with a broad range of skilled applications applied in a wide variety of contexts. It may also include the application of some discretion and judgement in selecting equipment to locate utility services.

Licensing, legislative and certification requirements that apply to this qualification can vary between states, territories and utility operators. It is a requirement to check with the relevant body before applying this qualification.



Licensing/Regulatory Information

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction work*, is required by anyone carrying out construction work.

Foundation Skills Outcomes

The foundation skills outcomes in this qualification are outlined below.

© Commonwealth of Australia, 2026 BuildSkills Australia

Entry Requirements

This qualification has no entry requirements.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 14 units of competency:
  - 9 core units
  - 5 elective units.

Elective units must ensure the integrity of the qualification's Australian Qualifications Framework (AQF) alignment and contribute to a valid, industry-supported vocational outcome. The electives are to be chosen as follows:

- at least 4 units from the electives listed below
- up to 1 unit from any currently endorsed Training Package or accredited course.

Prerequisite units

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units

CPCLOC3001	Apply safety practices when utility locating

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCLOC3002	Interpret plans and apply markings for underground services on a locate site
CPCLOC3003	Locate using ground penetrating radar (GPR)
CPCLOC3004	Locate using electromagnetic field (EMF) locator and auxiliary locating equipment
CPCLOC3006	Prepare for ground disturbance activity
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
MSMWHS217	Gas test atmospheres
RIIRIS301E	Apply risk management processes
RIIWHS202E	Enter and work in confined spaces

Elective units

CPCLOC3005	Locate and manage the utility locating worksite
CPCLOC3007*	Control excavations in the vicinity of utility assets
CPCCCM2012*	Work safely at heights
CPPSSI3015	Collect basic surveying data
CPPSSI3020	Perform simple surveying and spatial computations
CPPSSI4030	Operate surveying equipment
CPPSSI5061	Survey subsurface utility information
MEM30031	Operate computer-aided design (CAD) system to produce basic drawing elements
RIICCM202E	Identify, locate and protect underground services
RIICCM205F	Carry out manual excavation
RIICCM303	Conduct vacuum excavations
RIISAM204E	Operate small plant and equipment

© Commonwealth of Australia, 2026 BuildSkills Australia

UETDREL006	Work safely in the vicinity of live electrical apparatus as a non-electrical worker
UETDRDU017	Locate faults in underground power cables

Pre-requisite Requirements

Unit of competency	Pre-requisite requirement
CPCCCM2012 Work safely at heights	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCLOC3007 Control excavations in the vicinity of utility assets	CPCLOC3006 Prepare for ground disturbance activity
UETDRDU017 Locate faults in underground power cables	UEECD0007 Apply work health and safety regulations, codes and practices in the workplace UEECD0044 Solve problems in multiple path circuits UEECD0046 Solve problems in single path circuits UEECD0051 Use drawings, diagrams, schedules, standards, codes and specifications UEEEL0020 Solve problems in low voltage a.c. circuits UEEEL0021 Solve problems in magnetic and electromagnetic devices UETDREL005 Work safely in the vicinity of live electrical apparatus

Mandatory Workplace Requirements

There are no mandatory workplace requirements associated with units packaged in this qualification.

CPC40120 Certificate IV in Building and Construction

Modification History

Release	Comments
8	Updated reference to general construction induction training program.
7	This version first released with CPC Construction, Plumbing and Services Training Package Release 9.0. Addition of unit CPCPRE4001 Inspect the erection of prefabricated concrete elements to the elective group.
6	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Unit BSBPMG426 Apply project risk management techniques added to metadata.
5	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. Unit CPCCBC4052 Lead and manage teams in the building and construction industry added to metadata.
4	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2. Imported Elective unit BSBWOR501 Manage personal work priorities and professional development updated to BSBPEF501 Manage personal and professional development.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.1. Addition of 3 units of competency to the General Electives: • CPCBIM4001 Plan to comply with BIM requirements for construction work. • CPCBIM4002 Use BIM processes to carry out construction work

© Commonwealth of Australia, 2026 BuildSkills Australia

	• CPCBIM4003 Contribute to BIM deliverables for construction work
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Imported unit
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of builders, site managers and managers of small to medium-sized building businesses who apply knowledge of structural principles, codes, standards and legal requirements to Class 1 and 10, to a maximum of two storeys and Class 2 to 9 Type C constructions, and who plan and supervise safe building and construction work, prepare and administer contracts, and who apply quality principles to building and construction projects.

Building relates to construction and Site Management is about managing the factors around construction, such as the deployment of crews with specialised skills (including builders), product compliance, deployment of contract specialised skills, weather and site location.

Occupational titles depending on packaging options selected may include:

- Builder
- Construction Supervisor
- Site Manager
- Site Supervisor
- Leading Hand

The qualification is designed to enable two specialised occupational outcome pathways depending on elective options which will be reflected as:

- Certificate IV in Building and Construction (Building) or
- Certificate IV in Building and Construction (Site Management)

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit CPCWHS1001 *Prepare to work safely in the construction industry* meets this requirement.

Builder and Site Supervisor licensing varies across States and Territories and requirements additional to the attainment of this qualification may be required.

© Commonwealth of Australia, 2026 BuildSkills Australia

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 19 units of competency:
    - 11 core units
    - 8 elective units.

To achieve the occupational outcome of **Builder** electives must include:

- All Group A elective units
- Up to two elective units from either Group B or general electives.
- One elective unit may be from any training package or accredited course as long as it ensures the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contributes to a valid, industry supported vocational outcome

To achieve the occupation outcome of **Site Manager** electives must include:

- All Group B electives
- Up to four elective units from either Group A or general electives.
- One unit may be from any training package or accredited course as long as it ensures the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contributes to a valid, industry supported vocational outcome

Prerequisite units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Prerequisite requirements

Unit of competency	Prerequisite requirement
CPCCBC4010 Apply structural principles to residential and commercial constructions.	CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings. CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings.

© Commonwealth of Australia, 2026 BuildSkills Australia

Core Units	
CPCCBC4001	Apply building codes and standards to the construction process for Class 1 and 10 Buildings
CPCCBC4002	Manage work health and safety in the building and construction workplace
CPCCBC4007	Plan building and construction work
CPCCBC4008	Supervise site communication and administration processes for building and construction projects
CPCCBC4009	Apply legal requirements to building and construction projects
CPCCBC4010*	Apply structural principles to residential and commercial constructions
CPCCBC4012	Read and interpret plans and specifications
CPCCBC4014	Prepare simple building sketches and drawings
CPCCBC4018	Apply site surveys and set-out procedures to building and construction projects
CPCCBC4021	Minimise waste on the building and construction site
CPCCBC4053	Apply building codes and standards to the construction process for Class 2 to 9 Type C Buildings
Elective Units Group A - Building	
BSBPMG422	Apply project quality management techniques
CPCCBC4003	Select, prepare and administer a construction contract

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBC4004	Identify and produce estimated costs for building and construction projects
CPCCBC4005	Produce labour and material schedules for ordering
CPCCBC4006	Select, procure and store construction materials for building and construction projects
CPCSUS4002	Use building science principles to construct energy efficient buildings
Elective Units Group B – Site Manager	
CPCCBC4013	Prepare and evaluate tender documentation
CPCCBC4017	Arrange resources and prepare for the building and construction project
CPCCBC4052	Lead and manage teams in the building and construction industry
CPCCCO4001	Supervise concreting work
General Electives	
BSBESB402	Establish legal and risk management requirements of new business ventures
BSBESB406	Establish operational strategies and procedures for new business ventures
BSBESB407	Manage finances for new business ventures
BSBLDR413	Lead effective workplace relationships
BSBPEF501	Manage personal and professional development

© Commonwealth of Australia, 2026 BuildSkills Australia

BSBPMG426	Apply project risk management techniques
BSBPMG430	Undertake project work
BSBWRT411	Write complex documents
CPCBIM4001	Plan to comply with BIM requirements for construction work
CPCBIM4002	Use BIM processes to carry out construction work
CPCBIM4003	Contribute to BIM deliverables for construction work
CPCCBC4015	Prepare specifications for all construction works
CPCCBC4019	Apply sustainable building design principles to water management systems
CPCCBC4020	Build thermally efficient and sustainable structures
CPCCBC4022	Supervise tilt-up work
CPCCBC4024	Resolve business disputes
CPCCBC4026	Arrange building applications and approvals
CPCCBC4028	Prepare design brief for construction works
CPCCBC5019	Manage building and construction business finances
CPCPRE4001	Inspect the erection of prefabricated concrete elements
CPCSUS4001	Implement and monitor environmentally sustainable work practices

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCSUS4003	Maximise energy efficiency through applied trade skills

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCBC4010 Apply structural principles to residential and commercial constructions	CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings

CPC40320 Certificate IV in Building Project Support

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. Correction to unit title BSBPEF501 from Manage personal professional development in Group C - General Electives to Manage personal **and** professional development.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Imported unit *BSBPMG522 Undertake project work* replaced by *BSBPMG430 Undertakeproject work.*
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification is designed to meet the needs of estimators and schedulers and or contract administrators in the building and construction field who may have responsibility for the preparation of estimates from predetermined rates, processing of subcontractor claims and preparation of head and subcontracts for building and construction works.

Occupational titles may include:

- Building estimator
- Building scheduler
- Contract administrator

The qualification packaging enables two specialised occupational outcomes depending on elective options which will be reflected as:

- Certificate IV in Building Project Support (Estimator)
- Certificate IV in Building Project Support (Contract Administrator)

© Commonwealth of Australia, 2026 BuildSkills Australia

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001* Prepare *to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 15 units of competency:
    - 2 core units
    - 13 elective units.

To achieve the occupational outcome of Contract Administrator electives must include:

- all Group A elective units
- minimum of three units from Group B elective units
- remaining units from general electives
- a maximum of two units may be from any training package or accredited course as long as they ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry supported vocational outcome

To achieve the occupation outcome of Estimator electives must include:

- all Group B elective units
- minimum of two units from Group A electives
- remaining units from general electives
- a maximum of two units may be from any training package or accredited course as long as they ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry supported vocational outcome

CPC40820 Certificate IV in Swimming Pool and Spa Building

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. Correction to unit code in Group B: Business skills elective units for Lead team effectiveness from BSBLDR4014 to BSBLDR414.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects work undertaken by individuals who build and install swimming pools and spas. The work covers a range of trade-related skills associated with in-ground and above-ground pools and spas, as well as planning and project management skills.

Completion of the general induction training program specified by the National Code of Practice for Induction Training for Construction Work (ASCC 2007) is required before entering a construction work site. Achievement of the unit *CPCWHS1001* Prepare to work safely in the construction industry covers this requirement.

Licensing, legislative, regulatory and certification requirements will vary across states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 18 units of competency:

© Commonwealth of Australia, 2026 BuildSkills Australia

- 8 core units
- 10 elective units

The elective units must be selected as follows:

- 6 units must be selected from Group A
- up to 4 units can be selected from Group B
- 1 unit can be selected from any current training package or accredited course if it maintains the integrity of the AQF level of this qualification, contributes to a valid, industry-supported vocational outcome and does not duplicate the outcome of another unit used to achieve this qualification.

Core units	
CPCCBC4002	Manage work health and safety in the building and construction workplace
CPCCBC4004	Identify and produce estimated costs for building and construction projects
CPCCBC4005	Produce labour and material schedules for ordering
CPCCBC4007	Plan building and construction work
CPCCBC4012	Read and interpret plans and specifications
CPCCBC4021	Minimise waste on the building and construction site
CPCSPS4001	Investigate and prepare swimming pool site
CPCSPS4002	Select, procure and store construction materials for swimming pool and spa projects
Group A: Specialist trade skills elective units	
CPCCCM3005	Calculate costs of construction work
CPCCON3046	Repair and rectify concrete
CPCCCO4001	Supervise concreting work
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCCWF3008	Tile pools and spas

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCSPS4003	Install swimming pool and spa subsoil drainage
CPCSPS4004	Install swimming pool and spa circulation systems and components
CPCSPS4005	Install prefabricated fibreglass swimming pools
CPCSPS4006	Apply sprayed concrete to shape and finish swimming pools and spas
CPCSPS4007	Commission ancillary swimming pool and spa systems and hand over to client
CPCSPS4008	Install above-ground swimming pools
CPCSPS4009	Undertake interior finishing of swimming pools and spas
CPCSPS4010	Lay swimming pool and spa coping
CPCSPS4011	Install precast concrete swimming pools
CPPSPS4017	Detect leaks in swimming pools and spas
Group B: Business skills elective units	
BSBOPS304	Deliver and monitor a service to customers
BSBPMG422	Apply project quality management techniques
BSBPMG430	Undertake project work
BSBESB305	Address compliance requirements for new business ventures
BSBESB402	Establish legal and risk management requirements of new business ventures
BSBLDR414	Lead team effectiveness
BSBESB406	Establish operational strategies and procedures for new business ventures
BSBESB407	Manage finances for new business ventures
BSBSUS411	Implement and monitor environmentally sustainable work practices
CPCCBC4003	Select, prepare and administer a construction contract
CPCCBC4024	Resolve business disputes

CPC40920 Certificate IV in Plumbing and Services

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2. Change of unit title CPCPWT3027 Connect irrigation systems from drinking water service in Group B electives to CPCPWT3027 Install backflow prevention devices.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.0. Typographical error rectified in unit CPCPWT4023. Removed word ‘test’ from unit title in Group B electives.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of an experienced plumbing service operator with advanced technical skills and/or responsibility for project design and supervision; or a hydraulic consultant responsible for designing hydraulic components and systems that meet client requirements and help in effective water management in domestic, commercial and industry contexts.

Occupational titles could include:

- Plumbing contractor
- Hydraulic designer

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *CPCWHS1001 Prepare to work* safely in *the construction industry* meets this requirement.

© Commonwealth of Australia, 2026 BuildSkills Australia

This is a licenced occupation in some jurisdictions. Licensing, legislative, regulatory and certification requirements may vary between states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

For the operations stream, a candidate must hold a Certificate III in Plumbing or be authorised to undertake plumbing work by an Australian regulator/licensing body.

There are no entry requirements for the hydraulic services design pathway.

Packaging Rules

To be awarded this qualification, competency must be achieved in:

- 15 units of competency:
    - 10 core units
    - 5 elective units.

For the award of the ***CPC40920 Certificate IV in Plumbing and Services (Hydraulic services design)*** electives are to be selected as follows:

- 15 units of competency:
    - 10 core units
    - 5 elective units from Group A
    - 2 units may be replaced by units from other Training Packages or nationally accredited courses at Certificate IV level and above, provided they do not duplicate the outcome of another unit chosen for the qualification.
    - Electives cannot be selected from Group B.

For the award of the ***CPC40920 Certificate IV in Plumbing and Services (Operations)*** electives are to be completed as follows:

- 15 units of competency:
    - 10 core units
    - at least 1 elective from Group B
    - the remaining 4 elective units from Group A or Group B
    - 2 units may be replaced by units from other Training Packages or nationally accredited courses at Certificate IV level and above, provided they do not duplicate the outcome of another unit chosen for the qualification.

© Commonwealth of Australia, 2026 BuildSkills Australia

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
BSBESB402	Establish legal and risk management requirements of new business ventures
CPCCBC4012	Read and interpret plans and specifications
CPCPCM4011	Carry out work-based risk control processes
CPCPCM4012	Estimate and cost work
CPCPCM4015	Access and interpret regulatory requirements for the plumbing and services industry
CPCPDR4011	Design and size sanitary drainage systems
CPCPDR4012	Design and size stormwater drainage systems
CPCPGS4011	Design and size consumer gas installations
CPCPSN4011	Design and size sanitary plumbing systems
CPCPWT4011	Design and size heated and cold-water services and systems
Group A	
BSBESB403	Plan finances for new business ventures
CPCCBC4002	Manage work health and safety in the building and construction workplace
CPCCBC4019	Apply sustainable building design principles to water management systems
CPCCBC4024	Resolve business disputes
CPCPCM4013	Produce 2-D architectural drawings using design software
CPCPDR4013	Design and size domestic treatment plant disposal systems
CPCPPS5033*	Design vacuum sewerage systems

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCPFS4024*	Design residential fire sprinkler systems
CPCPMS4011	Design, size and lay out heating and cooling systems
CPCPMS4023	Design compressed air systems
CPCPRF4011	Design and size roof drainage systems
Group B	
CPCPCM2043	Carry out WHS requirements
CPCPDR3023*	Install on-site domestic wastewater treatment plants and disposal systems
CPCPFS3037*	Install residential life safety sprinkler systems
CPCPFS4021	Commission domestic and residential fire suppression sprinkler systems
CPCPGS3053	Disconnect and reconnect Type A gas appliances
CPCPGS4022*	Service Type A gas appliances
CPCPGS4023*	Install, commission and service Type B gas appliances
CPCPMS4022*	Commission air and water systems
CPCPWT3022*	Install and commission water heating systems and adjust controls and devices
CPCPWT3027*	Install backflow prevention devices
CPCPWT4022*	Commission and maintain backflow prevention devices
CPCPWT4023*	Commission and maintain hot and heated water temperature control devices
UEERL0004	Disconnect-reconnect electrical equipment connected to low voltage (LV) installation wiring

2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Inclusion of CPCCWH2001 Apply WHS requirements, policies and procedures in the construction industry to the General Elective units.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification is designed to meet the needs of project engineers, project managers, demolition supervisors and leading hands responsible for the oversight of a team of demolition workers undertaking specialist demolition work on large public, commercial, industrial or residential buildings, structures and installations, including chemical processing plants.

Occupational titles could include:

- Demolition supervisor
- Demolition project manager

Licensing/Regulatory Information

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Additional Licensing, legislative, regulatory or certification requirements may apply in some states and territories. For further information, check with the relevant regulatory authority.

Entry Requirements

This qualification has no entry requirements.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 15 units of competency:
    - 8 core units
    - 7 elective units.

Elective units are to be selected as follows:

- all 7 elective units can be selected from the electives below
- up to 2 units can be selected from any training package or accredited course, as long as they contribute to a valid, industry-supported vocational outcome and support the AQF level of this qualification.

Prerequisite units

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for more information. All prerequisites are packaged in the qualification.

Core units

© Commonwealth of Australia, 2026 BuildSkills Australia

BSBLDR414	Lead team effectiveness
CPCCBC4002	Manage work health and safety in the building and construction workplace
CPCCBC4012	Read and interpret plans and specifications
CPCCDE4001	Plan and prepare for activities on demolition sites
CPCCDE4002	Plan demolition work to minimise risk to health, safety and environment
CPCCDE4003	Supervise operational activities on demolition sites
CPCCDE4004	Finalise demolition activities and supervise property handover
CPCCDE4005	Apply structural principles to the planning of the demolition of a structure

Elective units

BSBCMM411	Make presentations
BSBPEF501	Manage personal and professional development
CPCCBC4004	Identify and produce estimated costs for building and construction projects
CPCCBC4008	Supervise communication and administration processes for building and construction projects site
CPCCBC4009	Apply legal requirements to building and construction projects
CPCCBC4024	Resolve business disputes
CPCCBC4053	Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings
CPCCBC5001	Apply building codes and standards to the construction process for Type B construction
CPCCBC5018*	Apply structural principles to the construction of buildings up to three storeys
CPCCBC6014	Apply structural principles to the construction of large, high-rise and complex buildings
CPCCDE3027	Read and interpret demolition site plans and drawings
CPCCDE3028*	Remove non-friable asbestos
CPCCDE3029*	Remove friable asbestos

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCDE4006*	Demolish stressed panel structure and pre-cast panel structure
CPCCDE4007	Manage waste streams
CPCCDE4009*	Supervise asbestos removal
CPCCDE5001	Conduct air monitoring and clearance inspections for asbestos removal work
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCSIL4002	Supervise and manage work with products and materials generating respirable crystalline silica
CPCWHS1001	Prepare to work safely in the construction industry
PUAFER004	Respond to facility emergencies
RIICWD503E	Prepare traffic management plans and traffic guidance schemes
RIIWHS301E	Conduct safety and health investigations

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCBC5018 Apply structural principles to the construction of buildings up to three storeys	CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings CPCCBC5001 Apply building codes and standards to the construction process for Type B construction

CPC50220 Diploma of Building and Construction (Building)

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. The following imported unit has been updated to its latest release: • CPPDSM5022 Develop and Implement asset management plan supersedes and is equivalent to CPPDSM5022A Implement asset management plan.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. Correction to unit title in Packaging Rules for Core unit BSBOPS504 from Manage risk to Manage business risk.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of building professionals who apply knowledge of structural principles, risk and financial management, estimating, preparing and administering building and construction contracts, selecting contractors, overseeing the work and its quality and managing construction work in building projects including residential and commercial with the following limitations:

- Residential construction limited to National Construction Code Class 1 and 10 buildings to a maximum of 3 storeys.
- Commercial construction limited to National Construction Code Class 2 to 9 buildings, Type C and B construction.

Occupational titles may include:

- Builder
- General Foreperson

© Commonwealth of Australia, 2026 BuildSkills Australia

- Building Inspector

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment. To achieve this qualification, the candidate must have access to a live building and construction workplace to meet the requirements detailed in the Assessment Requirements of core unit *CPCCBC4008 Supervise communication and administration processes for building and construction projects.*

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Builder licensing varies across States and Territories and requirements additional to the attainment of this qualification may be required.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 27 units of competency:
  - 24 core units
  - 3 elective units
- a maximum of one unit may be from any training package or accredited course as long as it ensures the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contributes to a valid, industry supported vocational outcome.

Prerequisite units

An asterisk (*) next to the unit code indicates that there are prerequisite requirements which must be met when packaging the qualification. Please refer to the Prerequisite requirements table for details.

Core Units	
BSBOPS504	Manage business risk
BSBWHS513	Lead WHS risk management

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBC4001	Apply building codes and standards to the construction process for Class 1 and 10 buildings
CPCCBC4003	Select, prepare and administer a construction contract
CPCCBC4004	Identify and produce estimated costs for building and construction projects
CPCCBC4005	Produce labour and material schedules for ordering
CPCCBC4008	Supervise site communication and administration processes for building and construction projects
CPCCBC4009	Apply legal requirements to building and construction projects
CPCCBC4010*	Apply structural principles to residential and commercial constructions
CPCCBC4012	Read and interpret plans and specifications
CPCCBC4013	Prepare and evaluate tender documentation
CPCCBC4014	Prepare simple building sketches and drawings
CPCCBC4018	Apply site surveys and set-out procedures to building and construction projects
CPCCBC4053	Apply building codes and standards to the construction process for Class 2 to 9, Type C buildings
CPCCBC5001	Apply building codes and standards to the construction process for Type B construction
CPCCBC5002	Monitor costing systems on complex building and construction projects
CPCCBC5003	Supervise the planning of onsite building and construction work
CPCCBC5005	Select and manage building and construction contractors

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBC5007	Administer the legal obligations of a building and construction contractor
CPCCBC5010	Manage construction work
CPCCBC5011	Manage environmental management practices and processes in building and construction
CPCCBC5013	Manage professional technical and legal reports on building and construction projects
CPCCBC5018*	Apply structural principles to the construction of buildings up to 3 storeys
CPCCBC5019	Manage building and construction business finances
Elective Units	
BSBPMG532	Manage project quality
BSBPMG538	Manage project stakeholder engagement
CPCCBC4052	Lead and manage teams in the building and construction industry
CPCCBC5004	Supervise and apply quality standards to the selection of building and construction materials
CPCCBC5006	Apply site surveys and set-out procedures to building projects up to three storeys
CPCCBC5009	Identify services layout and connection methods for Type C and B construction
CPCCBC5012	Manage the application and monitoring of energy conservation and management practices and processes
CPCCBC6001	Apply building codes and standards to the construction process for large building projects
CPCCDE5001	Conduct air monitoring and clearance inspections for asbestos removal work

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCSUS5001	Develop workplace policies and procedures for sustainability
CPCSUS5002	Develop action plans to retrofit existing buildings for energy efficiency
CPCSUS5003	Manage energy efficient building methods and strategies
CPPDSM5022	Develop and implement asset management plans

Prerequisite requirements

Unit of competency	Prerequisite requirement
CPCCBC5018 Apply structural principles to the construction of buildings up to 3 storeys	CPCCBC5001 Apply building codes and standards to the construction process for Type B construction CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9, Type C buildings

Qualification Description

This qualification is designed to meet the needs of senior managers within building and construction firms.

Occupational titles may include:

- Project manager
- Construction manager
- Estimating manager
- Sales manager.

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001* Prepare to work safely in the construction industry meets this requirement.

Additional units of competency may be required to meet builder or project manager registration requirements in various States and Territories.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 15 units of competency:
    - 8 core units
    - 7 elective units.

The elective units are to be chosen as follows:

- up to 7 units from general elective units
- a maximum of two units may be from any training package or accredited course as long as they ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry supported vocational outcome

CPC50520 Diploma of Fire Systems Design

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Unit CPCSFS5008 Create detailed designs for fire detection and warning systems added to metadata unit grid.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

The Diploma of Fire Systems Design reflects and supports the role of fire systems designers who prepare detailed technical designs and documentation for water-based fire suppression systems and/or fire detection and occupant warning systems.

The Diploma of Fire Systems Design also includes a stream qualification for the annual certifier of fire systems.

Fire systems designers may enter the industry from a diverse range of occupations and sectors. They may choose to extend their careers by seeking to undertake subsequent higher education qualifications in related disciplines, including mechanical engineering and fire engineering.

The qualification has common core and elective unit of competency requirements that cover common skills for fire systems designers and certifiers, as well as specialist streams for:

- water-based systems
- detection and warning systems
- annual certifiers.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2026 BuildSkills Australia

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in 12 units of competency:

- 4 core units
- 8 elective units.

The elective units are to be chosen as follows.

All units from one of the specialisations (Group A, B or C) must be completed. That is:

- all 8 units from *Group A Water-based systems*, or
- all 5 units from *Group B Detection and warning systems* plus 3 additional electives, or
- all 4 units from *Group C Annual certifier* plus 4 additional electives.

The additional electives must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome. Of these, 1 unit can be selected from any endorsed Training Package or accredited course at a Diploma or higher AQF level. One unit can be selected from Group A in the Certificate IV in Plumbing and Services. The remainder are to come from groups A, B, C or D listed below.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCSFS5001	Define scope and hazard level of fire systems design projects
CPCSFS5002	Research and interpret detailed fire systems design project requirements
CPCSFS5005	Research and evaluate fire system technologies and components
Group - a water-based systems elective unit	
CPCPCM4013	Produce 2D architectural drawings using design software
CPCSFS5003	Develop plans and methodology for fire systems design projects
CPCSFS5006	Create detailed designs for fire sprinkler systems
CPCSFS5007	Create detailed designs for hydrant and hose reel systems
CPCSFS5009	Create detailed designs for fire systems’ water supplies

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCSFS5010	Provide documentation and support for fabrication of fire sprinkler systems
CPCSFS5011	Provide design documentation and review and support fire system installation processes
CPCSFS5013	Support commissioning processes and finalise fire systems design projects
Group B - Detection and warning systems elective units	
CPCPCM4013	Produce 2-D architectural drawings using design software
CPCSFS5003	Develop plans and methodology for fire systems design projects
CPCSFS5008	Create detailed designs for fire detection and warning systems
CPCSFS5011	Provide design documentation and review and support fire system installation processes
CPCSFS5013	Support commissioning processes and finalise fire systems design projects
Group C - Annual certifier elective units	
BSBAUD513	Report on a quality audit
CPCCBC4012	Read and interpret plans and specifications
CPCSFS5014	Conduct annual fire systems certification inspections
CPCSFS5015	Assess documentation for annual fire systems certification inspections
Group D - General elective units	
BSBOPS404	Implement customer service stratgies
BSBOPS505	Manage organisational customer services
BSBPMG535	Manage project information and communication
BSBPMG430	Undertake project work

© Commonwealth of Australia, 2026 BuildSkills Australia

BSBWHS513	Lead WHS risk management
CHCDIV001	Work with diverse people
CPCCBC4012	Read and interpret plans and specifications
CPCCBC5009	Identify services layout and connection methods to medium rise construction projects
CPCCSV5009 *	Assess the impact of fire on building materials
CPCPCM3024	Prepare simple sketches and drawings
CPCPCM4013	Produce 2-D architectural drawings using design software

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCSV5009 Assess the impact of fire on building materials	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCPCM3024 Prepare simple drawings	CPCPCM2043 Carry out WHS requirements
CPCSFS5015 Prepare documentation for annual fire systems inspections	CPCSFS5014 Conduct annual fire systems inspections

CPC50620 Diploma of Hydraulic Services Design

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Qualification Description

This qualification reflects the role of a specialist hydraulic design consultant who designs plumbing and services systems in domestic, commercial and industrial contexts. The qualification includes the skills and knowledge to design complex hydraulic systems.

Occupational titles could include:

- Hydraulic design consultant.

The plumbing industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or closely simulated workplace environment and this qualification requires all units of competency to be delivered and assessed in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required before entering a construction work site. Achievement of *CPCWHS1001 Prepare to work* safely in *the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this qualification at the time of publication. This qualification does not meet competency requirements for plumbing licencing or registration.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

CPC40920 Certificate IV in Plumbing and Services or

CPC40912 Certificate IV in Plumbing and Services and CPCPCM4015 Access and interpret regulatory requirements for the plumbing and services industry

© Commonwealth of Australia, 2026 BuildSkills Australia

Packaging Rules

To be awarded this qualification, competency must be achieved in:

- 18 units of competency:
  - 14 core units
  - 4 elective units.

The elective units must ensure the integrity of the AQF alignment and contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- 3 elective units must be chosen from the elective units listed below
- 1 elective unit may be selected from any other group or from any relevant nationally endorsed Training Package or accredited course.

An asterisk (*) against a unit code below indicates that the unit has a prerequisite. Please check the unit for information on this. All prerequisites are packaged in the qualification.

Core units	
CPCPCM5010	Design complex sanitary plumbing and drainage systems
CPCPCM5011	Design complex cold water systems
CPCPCM5012	Design complex stormwater and roof drainage systems
CPCPCM5013	Design complex (non-solar) heated water systems
CPCPPS5002	Design gas reticulation systems
CPCPPS5023	Design solar water heating systems
CPCPPS5024	Conduct a water audit and identify water-saving initiatives
CPCPPS5025	Design grey water re-use systems
CPCPPS5026	Design rainwater collection, storage, distribution and re-use systems
CPCPPS5028	Design trade waste pre-treatment systems
CPCPPS5030	Design pump systems
CPCPPS5032	Design siphonic stormwater drainage systems
CPCSFS5001	Define scope and hazard level of fire systems design projects

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCSFS5007	Create detailed designs for hydrant and hose reel systems
Elective units	
BSBTEC201	Use business software applications
BSBWRT411	Write complex documents
CPCPCM2043	Carry out WHS requirements
CPCPCM3024	Prepare simple drawings
CPCPCM4013	Produce 2-D architectural drawings using design software
CPCPDR3025*	Plan layout and install vacuum drainage systems
CPCPFS5011	Design fire sprinkler systems
CPCPMS5010	Design steam generation and distribution systems
CPCPMS5011	Design air conditioning and ventilation systems
CPCPMS5012	Design sound attenuated hydraulic services
CPCPMS5013	Design hydronic heating and cooling systems
CPCPPS5014	Locate and maintain piping systems
CPCPPS5015	Inspect plumbing and drainage systems
CPCPPS5027	Design irrigation systems
CPCPPS5033*	Design vacuum drainage systems
CPCSUS5001	Develop workplace policies and procedures for sustainability

© Commonwealth of Australia, 2026 BuildSkills Australia

CPC50722 Diploma of Construction Waterproofing Design and Survey

Modification History

Release	Comments
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 9.0.

Qualification Description

This qualification reflects the role of construction waterproofing design and survey specialists who apply knowledge of construction methods, compliance requirements and materials to implement waterproofing services for professional and statutory requirements.

The scope of work undertaken varies across jurisdictions and can include:

- conducting waterproofing inspections:
- at point of construction
- on existing building to identify issues and remediation requirements
- designing waterproofing for new construction
- designing remedial waterproofing solutions for existing buildings.

Waterproofing specialists require an understanding of relevant compliance requirements as well as of traditional, new and emerging construction methods and materials. They make a significant contribution to the development and construction of the built environment, often working in collaboration with other specialist consultants to assess and verify that proposed and actual building works are compliant and to ensure the safety of building occupants in support of principal designer and principal certifier.

Legislative, regulatory or certification requirements apply to waterproofing as a regulated design in some states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

© Commonwealth of Australia, 2026 BuildSkills Australia

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
  - 11 core units
  - 5 elective units.

The elective units must ensure the integrity of the Australian Qualifications Framework (AQF) qualification alignment, contribute to a valid, industry-supported vocational outcome and are to be chosen as follows:

- one (1) or more units must be chosen from elective Group A – Building Codes
- the remaining elective units may be chosen from elective Group B - General Electives.

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
BSBAUD513	Report on quality audits
CPCCBC4003	Select, prepare and administer a construction contract
CPCCBC4012	Read and interpret plans and specifications
CPCCBC4014	Prepare simple building sketches and drawings
CPCCWP5001	Design below ground waterproofing
CPCCWP5002	Design external above ground waterproofing
CPCCWP5003	Design waterproofing to internal wet areas
CPCCWP5004*	Determine origin of water and moisture ingress into buildings
CPCCWP5005*	Prepare a scope of works for remedial waterproofing
CPCCWP5006	Survey waterproofing systems
CPPBDN5110	Inspect and assess sites to inform the design process

© Commonwealth of Australia, 2026 BuildSkills Australia

Elective units Elective group A – Building codes	
CPCCBC4001	Apply building codes to Class 1 and 10 buildings
CPCCBC4053	Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings
CPCCBC6001	Apply building codes and standards to the construction process for large building projects
Elective group B – General electives	
BSBOPS505	Manage organisational customer services
BSBPMG532	Manage project quality
BSBWRT411	Write complex documents
CPCCBC4008	Supervise site communication and administration processes for building and construction projects
CPCCBC4015	Prepare specifications for all construction works
CPCCBC4024	Resolve business disputes
CPCCBC4026	Arrange building applications and approvals
CPCCBC4028	Prepare design brief for construction works
CPCCBC4052	Lead and manage teams in the building and construction industry
CPCCBC5002	Monitor costing systems on complex building and construction projects
CPCCBC5004	Supervise and apply quality standards to the selection of building and construction materials
CPCCBC5019	Manage building and construction business finances
CPCCBS6101	Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys
CPCCBS6102	Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys
CPCCBS6116 *	Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBS6118*	Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCCWP3005*	Assess construction waterproofing processes
CPCPCM4013	Produce 2D architectural drawings using design software
CPCSUS5001	Develop workplace policies and procedures for sustainability
CPCWHS1001	Prepare to work safely in the construction industry

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCBS6116 Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys	CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys
CPCCBS6118 Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys	CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store
CPCCWP3005 Assess construction waterproofing processes	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCCWP5004 Determine origin of water and moisture ingress into buildings	CPCWHS1001 Prepare to work safely in the construction industry
CPCCWP5005 Prepare a scope of works for remedial waterproofing	CPCCWP5004 Determine origin of water and moisture ingress into buildings

CPC60121 Advanced Diploma of Building Surveying

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. The following imported units have been updated to their latest release: • CPPACC6002 Apply performance-based codes and risk management principles when assessing buildings for access supersedes and is equivalent to CPPACC6002A Apply performance-based codes and risk management principles to assessing buildings for access • CPPACC6003 Apply unjustifiable hardship principles to assess solutions for access supersedes and is equivalent to CPPACC6003A Apply unjustifiable hardship principles to Alternative Building Solutions for access.
1	This qualification was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Qualification Description

This is a qualification for building surveyors or certifiers who apply knowledge of compliance requirements and construction methods and materials to the implementation of statutory building surveying requirements or to the provision of advisory building surveying services.

The scope of work undertaken by building surveyors applies to all Classes of residential and commercial buildings as defined in the National Construction Code (NCC), up to three storeys and not exceeding 2,000 square metres in floor area.

Building surveyors work in a highly regulated environment and require an understanding of relevant compliance requirements as well as traditional, new and emerging construction methods and materials. They make a significant contribution to the development and construction of the built environment, often working in collaboration with specialist consultants to assess and verify that proposed and actual building works are compliant and to ensure the safety of building occupants.

Licensing, legislative, regulatory or certification requirements apply to building surveying in some states and territories. For further information, check with the relevant regulatory authority.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 22 units of competency:
  - 19 core units
  - 3 elective units.

For the elective units:

- up to 3 units may be selected from the elective units listed below
- up to 2 units may be selected from any currently endorsed Training Package or accredited course at Advanced Diploma, Graduate Certificate or Graduate Diploma level.

An asterisk (*) against a unit code below indicates that there is a prerequisite requirement that must be met. Prerequisite unit(s) must be assessed before assessment of any unit of competency with an asterisk. Check the unit of competency for information on specific prerequisite requirements. All prerequisite requirements are packaged in the qualification.

Core units	
CPCCBC4001	Apply building codes and standards to the construction process for Class 1 and 10 buildings
CPCCBC4010*	Apply structural principles to residential and commercial constructions
CPCCBC4012	Read and interpret plans and specifications
CPCCBC4053	Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings
CPCCBS6101	Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys
CPCCBS6102	Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBS6103	Identify and apply legal and ethical requirements to building surveying functions
CPCCBS6104*	Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storeys
CPCCBS6105*	Assess and advise on compliance of design documentation for Class 2 to 9 buildings to three storeys
CPCCBS6107	Prepare planning and development applications for buildings to three storeys
CPCCBS6108*	Process building applications for Class 1 and 10 buildings to three storeys
CPCCBS6109*	Process building applications for Class 2 to 9 buildings to three storeys
CPCCBS6110*	Conduct and report on building surveying audits of Class 1 and 10 buildings to three storeys
CPCCBS6112*	Conduct and report on initial construction inspections of Class 1 and 10 buildings to three storeys
CPCCBS6113*	Conduct and report on initial construction inspections of Class 2 to 9 buildings to three storeys
CPCCBS6114*	Conduct and report on advanced and final inspections of Class 1 and 10 buildings to three storeys
CPCCBS6115*	Conduct and report on advanced and final inspections of Class 2 to 9 buildings to three storeys
CPCCBS6116*	Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys
CPCCBS6118*	Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys
Elective units	
CPCCBS6111*	Conduct and report on building surveying audits of Class 2 to 9 buildings to three storeys
CPCCBS6117*	Monitor and advise on construction and compliance upgrade work on buildings to three storeys

© Commonwealth of Australia, 2026 BuildSkills Australia

CPPACC6002	Apply performance-based codes and risk management principles to assessing buildings for access
CPPACC6003	Apply unjustifiable hardship principles to Alternative Building Solutions for access
CPPHES4005	Assess household energy use and efficiency improvements
CPPHES4007	Assess thermal performance of existing residential buildings
PUAFIR518	Conduct and record a Bushfire Attack Level (BAL) assessment

Qualification Description

This qualification is designed to meet the needs of builders or senior managers within the building and construction industry who apply knowledge of building, construction and sustainability systems and processes, structural principles, codes, standards and legal obligations to construction projects including high rise.

Occupational titles may include:

- Construction manager.

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all included units of competency to be delivered in this context.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001* Prepare *to work safely in the construction industry* meets this requirement.

Builder licensing varies across States and Territories and requirements additional to the attainment of this qualification may be required. Additional or prescribed units of competency may also be required to meet builder registration requirements in various States and Territories.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, the candidate must demonstrate competency in:

- 10 units of competency:
    - 4 core units
    - 6 elective units.

The elective units are to be chosen as follows:

- up to 6 units from general elective units
- a maximum of two units may be from any training package or accredited course as long as they ensure the integrity of the qualification's Australian Qualification Framework (AQF) alignment and contribute to a valid, industry supported vocational outcome.

Core units

© Commonwealth of Australia, 2026 BuildSkills Australia

BSBWHS516	Contribute to developing, implementing and maintaining an organisation's WHS management system
CPCCBC6001	Apply building codes and standards to the construction process for large building projects
CPCCBC6003	Establish, maintain and review contract administration procedures and frameworks
CPCCBC6018	Manage processes for complying with legal obligations of a building and construction contractor
Elective units	
BSBMKG623	Develop marketing plans
BSBOPS504	Manage business risk
BSBOPS601	Develop and implement business plans
CPCCBC6002	Generate and direct the development of new projects
CPCCBC6005	Manage tender developments for major projects
CPCCBC6006	Manage the procurement and acquisition of resources for building and construction projects
CPCCBC6007	Develop, plan and implement building and construction environmental management processes
CPCCBC6008	Develop and implement an estimating and tendering system
CPCCBC6009	Develop, plan and implement a building and construction planning process
CPCCBC6010	Plan, develop and implement building and construction energy conservation and management processes
CPCCBC6011	Establish systems to develop and monitor building and construction costs

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBC6012	Manage and administer development of documentation for building and construction projects
CPCCBC6013	Evaluate concrete performance for multi-storey buildings
CPCCBC6014	Apply structural principles to the construction of large, high-rise and complex buildings
CPCCBC6015	Apply building surveying procedures
CPCCBC6016	Assess construction faults in large building projects
CPCCBC6017	Evaluate services layout and connection methods for the planning of large building projects
CPCSUS5001	Develop workplace policies and procedures for sustainability
CPPDSM6002	Conduct property investment feasibility study
CPPDSM6008	Develop and implement strategic facilities management plans

Pre-requisite Requirements

There are no prerequisites requirements for this qualification.

CPCSS00005 Provide Building Surveying Services for Residential Buildings up to Three Storeys

Modification History

Release	Comments
1	This skill set was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Description

This skill set covers the competencies required by restricted building surveyors or certifiers who implement statutory building surveying requirements or provide advisory building surveying services limited to Class 1 and 10 buildings as defined in the National Construction Code (NCC), up to three storeys and not exceeding 2,000 square metres in floor area.

Pathways Information

Completion of this skill set provides credit towards CPC60120 Advanced Diploma of Building Surveying.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this Skill Set at the time of publication.

Skill Set Requirements

Code	Title
CPCCBS6101	Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store
CPCCBS6103	Identify and apply legal and ethical requirements to building surveying functions
CPCCBS6104	Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storey
CPCCBS6107	Prepare planning and development applications for buildings to three storeys

© Commonwealth of Australia, 2026 BuildSkills Australia

CPCCBS6108	Process building applications for Class 1 and 10 buildings to three storeys
CPCCBS6110	Conduct and report on building surveying audits of Class 1 and 10 buildings to three storeys
CPCCBS6112	Conduct and report on initial construction inspections of Class 1 and 10 buildings to three storeys
CPCCBS6114	Conduct and report on advanced and final inspections of Class 1 and 10 buildings to three storeys
CPCCBS6118	Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCCBS6104 Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storey	CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store

CPCSS00006 Apply BIM Processes to Construction Work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This skill set was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Description

This Skill Set addresses the skills and knowledge required to apply Building Information Modelling (BIM) processes when conducting construction work on a BIM project.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare* to *work safely in the construction industry* meets this requirement.

Pathways Information

Units from this Skill Set can contribute to credit towards CPC40120 Certificate IV in Building and Construction and CPC50320 Diploma of Building and Construction (Management).

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this Skill Set at the time of publication.

Skill Set Requirements

Code	Title
CPCBIM4001	Plan to comply with BIM requirements for construction work
CPCBIM4002	Use BIM processes to carry out construction work
CPCBIM4003	Contribute to BIM deliverables for construction work

© Commonwealth of Australia, 2026 BuildSkills Australia

Pre-requisite Requirements

There are no prerequisites requirements for this skillset.

Target Group

This Skill Set is for builders, tradespersons, project and site managers who work on projects that incorporate BIM interaction, collaboration and deliverables.

CPCSS00007 Prefabricated Concrete Element Installation General Skill Set

Modification History

Release	Comments
1	This skill set was first released in CPC Construction, Plumbing and Services Training Package Release 9.0.

Description

This skill set describes the skills and knowledge required to perform activities relating to the installation of prefabricated concrete elements.

Pathways Information

Completion of this skill set provides credit towards CPC30720 Certificate III in Rigging and CPC20822 Certificate II in Prefabricated Concrete Element Installation.

Licensing/Regulatory Information

Legislative, regulatory or certification requirements apply to waterproofing as a regulated design in some states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Skill Set Requirements

Code	Title
CPCPRE2001	Brace and prop prefabricated concrete elements
CPCPRE2002	Remove temporary supports from prefabricated concrete elements
CPCPRE2003	Grout prefabricated concrete elements
CPCPRE2004	Caulk prefabricated concrete elements
CPCPRE3001	Patch prefabricated components of concrete elements

© Commonwealth of Australia, 2026 BuildSkills Australia

Pre-requisite Requirements

Unit of competency	Prerequisite requirement
CPCPRE2001 Brace and prop prefabricated concrete elements	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCPRE2002 Remove temporary supports from prefabricated concrete elements	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCPRE2003 Grout prefabricated concrete elements	CPCCCM2012 Work safely at heights CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCPRE2004 Caulk prefabricated concrete elements	CPCCCM2012 Work safely at heights CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCPRE3001 Patch prefabricated components of concrete elements	CPCCCM2012 Work safely at heights CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Target Group

This skill set is suitable for a range of trades and professionals such as labourers who are responsible for installing prefabricated concrete elements.

CPCSS00008 Lift and Place Prefabricated Concrete Elements Skill Set

Modification History

Release	Comments
1	This skill set was first released in CPC Construction, Plumbing and Services Training Package Release 9.0.

Description

This skill set describes the skills and knowledge required to lift and place prefabricated elements.

Pathways Information

Completion of this skill set provides credit towards CPC30720 Certificate III in Rigging.

Licensing/Regulatory Information

Legislative, regulatory or certification requirements apply to waterproofing as a regulated design in some states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Skill Set Requirements

Code	Title

CPCSS00010 Design Waterproofing Skill Set

Modification History

Release	Comments
1	This skill set was first released in CPC Construction, Plumbing and Services Training Package Release 9.0.

Description

This skill set describes the skills and knowledge required to design waterproofing for planned construction to comply with relevant codes and standards.

Pathways Information

Completion of this skill set provides credit towards CPCCWP5005 – Survey Waterproofing and/or CPC50722 Diploma of Construction Waterproofing Design and Survey.

Licensing/Regulatory Information

Legislative, regulatory or certification requirements apply to waterproofing as a regulated design in some states and territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Skill Set Requirements

Code	Title
CPCCWP5001	Design below ground waterproofing
CPCCWP5002	Design external above ground waterproofing
CPCCWP5003	Design waterproofing to internal wet area

Pre-requisite Requirements

There are no prerequisites requirements for this skillset.

Target Group

This skill set is suitable for a range of trades and professionals such as building designers, waterproofing design specialists, architects, and engineers who are responsible for designing waterproofing for a range of applications.

© Commonwealth of Australia, 2026 BuildSkills Australia

This skill set is for people currently working as, or intending to work as, waterproofing consultants and specialists for Class 1 and 10 buildings, and Class 2 to 9 buildings, as defined in the National Construction Code (NCC).

CPCSS00012 Ground Disturbance Skill Set

Modification History

Release	Comments
1	This skill set was first released in CPC Construction, Plumbing and Services Training Package Release 11.0.

Description

This skill set addresses the skills and knowledge required to disturb the ground for any trade or labouring purpose. The purpose of this skill set is to enable candidates to avoid danger and protect subsurface utilities when disturbing the ground.

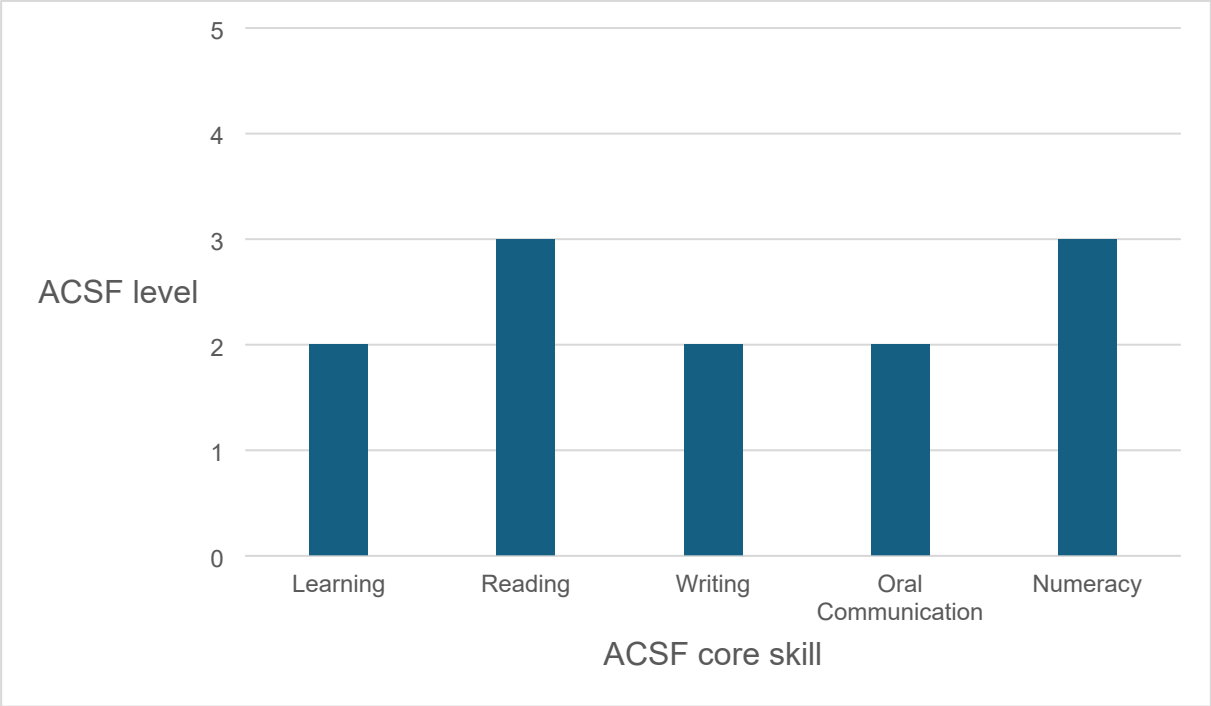
Licensing, legislative and certification requirements that apply to this skill set can vary between states, territories and utility operations users must check requirements with relevant bodies before applying this skill set.

Licensing/Regulatory Information

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction work*, is required by anyone carrying out construction work.

Pathways Information

These units of competency provide credit towards *CPC33226 Certificate III in Utility Locating.*



Entry Requirements

There are no entry requirements for this skill set.

Foundation Skills Outcomes

The foundation skills outcomes in this skill set are outlined below.

AHCLSC319 Implement a retaining wall project

Modification History

Release	Comments
1	This unit of competency was first released in AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 7.0.

Application

This unit of competency describes the skills and knowledge required to install and construct a retaining wall, including preparing for work, marking out and constructing retaining wall, and checking and cleaning up site.

The unit applies to individuals who implement a retaining wall project under broad direction, and take responsibility for their own work and for the quality of the work of others.

State/territory licensing, legislative or certification requirements apply in some jurisdictions. Users are advised to check with the relevant regulatory authority.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil

Competency field(s)

N/A

Unit sector(s)

Landscape (LSC)

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Skills Insight

1. Prepare for retaining wall project	1.1 Interpret plans and specifications 1.2 Check if council permits or permissions are required 1.3 Identify potential hazards and risks, and implement safe working practices to manage risks 1.4 Identify equipment and material resource requirements according to scope of construction work 1.5 Select tools and equipment required to implement a retaining wall project and check for safe operation 1.6 Identify environmental impacts of proposed works and implement appropriate controls if required 1.7 Select, fit, use and maintain personal protective equipment (PPE) applicable to task 1.8 Organise delivery of materials to site according to workplace priorities
2. Set out and prepare the site	2.1 Erect site bunting and place safety signage 2.2 Determine, locate and mark out services from site plan 2.3 Mark out position of the retaining wall 2.4 Establish survey benchmarks 2.5 Determine location and depth of excavations from construction plans 2.6 Establish profiles to conform to designated tolerances
3. Construct retaining wall	3.1 Check relevant tool and equipment specifications to ensure they are used safely 3.2 Assemble or install retaining wall components according to plans and specifications 3.3 Install appropriate drainage in accordance with plans and specifications
4. Check quality of work and clean-up site	4.1 Inspect quality of finished works to ensure standard of finished retaining wall is in accordance with design drawings and specifications 4.2 Clean up site, removed unused material and dispose of or recycle waste material from site 4.3 Clean, maintain and store tools and equipment 4.4 Identify and report unserviceable tools and equipment according to workplace procedures

© Commonwealth of Australia, 2026 Skills Insight

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	• Use clear language and industry standard terminology to report tool and equipment unserviceability
Numeracy	• Calculate quantities of material, take measurements, interpret and use scale, interpret and calculate levels • Set out geometric shapes

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for AHCLSC319 Implement a retaining wall project

Modification History

Release	Comments
1	This unit of competency was first released in AHC Agriculture, Horticulture and Conservation and Land Management Training Package Release 7.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has implemented a retaining wall project on at least one occasion and has:

- interpreted site plans and specifications
- applied workplace health and safety requirements, including fitted and used personal protective equipment (PPE)
- selected, used and maintained tools and equipment required for implementing a retaining wall project
- calculated material and resource requirements
- established survey benchmarks
- excavated to specified soil levels
- used tools and equipment to construct retaining wall projects
- checked quality of work and cleaned up site
- reported unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- principles and practices for implementing retaining wall projects, including:
    - environmental impacts of landscape works
    - landscape retaining wall materials and construction techniques
    - legislative requirements and codes of practice relevant to implementing a retaining wall project

© Commonwealth of Australia, 2026 Skills Insight

    - local council permit requirements relevant to implementing a retaining wall project
    - materials, equipment and machinery that may be required for the project
    - methods and practices for maintaining and repairing retaining walls
    - set out techniques
- workplace requirements applicable to health and safety in the workplace for implementing a retaining wall project, including appropriate use of PPE.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
    - a workplace setting or an environment that accurately represent workplace conditions
- resources, equipment and materials:
    - workplace procedures applicable to implementing a retaining wall project
    - materials, tools and equipment applicable to implementing a retaining wall project
    - PPE applicable to implementing a retaining wall project
- specifications:
    - workplace requirements applicable to health and safety in the workplace for implementing a retaining wall project
    - tool and equipment specifications
    - site plans, design drawings and specifications applicable to implementing a retaining wall project
    - legislative requirements and codes of practice applicable to implementing a retaining wall project
    - local council permit requirements applicable to implementing a retaining wall project
- timeframes:
    - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

AURVTP109 Apply vehicle body film wrapping

Modification History

Release	Comments
1	This unit of competency was first released in AUR Automotive Retail, Service and Repair Training Package Release 6.0.

Application

This unit describes the skills and knowledge required to prepare vehicle body surfaces and apply vinyl film wrapping materials. This unit involves preparing for the task, selecting and using specialist tools, selecting vinyl film materials, checking vinyl film quality, and completing workplace processes and documentation.

The unit applies to those working in the automotive paint refinishing repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

N/A

Unit sector(s)

Vehicle Body Technical - Paint

Elements and Performance Criteria

Elements	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Mining and Automotive Skills Alliance

• 1. Prepare to apply vehicle body film wrapping	• 1.1 Determine job requirements from workplace instructions • 1.2 Access and interpret workplace procedures and vinyl film supplier recommended application methods • 1.3 Select and inspect vinyl film wrapping materials for quality • 1.4 Identify hazards associated with the work and manage risks • 1.5 Select and check tools and equipment for serviceability • 1.6 Assess vehicle panel surface for quality • 1.7 Plan work to apply body film wrapping, minimise waste, and prevent damage to vehicle
• 2. Measure, cut and apply vinyl film	• 2.1 Measure surface area and produce patterns • 2.2 Cut vinyl film material according to vinyl pattern specifications and safety and environmental requirements • 2.3 Prepare body surface using vinyl film supplier approved methods, materials and equipment • 2.4 Apply vinyl film wrapping materials according to vinyl film supplier specifications and workplace procedures, and without causing damage to body surface
• 3. Complete work processes	• 3.1 Conduct final inspection according to workplace procedures and confirm vehicle is ready for use • 3.2 Clear work area and dispose of or recycle materials according to workplace procedures • 3.3 Complete documentation according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

S KILL	DESCRIPTION
Learning	• Locates required sources of information efficiently.

© Commonwealth of Australia, 2026 Mining and Automotive Skills Alliance

Numeracy	• Uses basic mathematical operations, including addition, subtraction, multiplication and division to: o measure surface areas and vinyl film patterns • Calculates vinyl film wrapping material requirements.
Oral communication	• Clarifies instructions and procedures • Reports quality issues and job outcomes clearly.
Technology	• Uses specialist tools.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for AURVTP109 Apply vehicle body film wrapping

Modification History

Release	Comments
1	This unit of competency was first released in AUR Automotive Retail, Service and Repair Training Package Release 6.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- apply vinyl film wrapping on at least three different vehicles.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to locate and interpret information required to apply vehicle body film wrapping, including:
    - information provided by customer and supervisors
    - manufacturer specifications and procedures or equivalent documentation
- workplace procedures required to apply vehicle body film wrapping, including:
    - establishing serviceability of tools and equipment
    - documentation procedures
    - housekeeping procedures, including:
        - examination of tools and equipment
        - storage of equipment
        - identification, tagging and isolation of faulty equipment
        - disposal of excess materials
        - recycling procedures
- work health and safety (WHS) requirements relating to applying vehicle body film wrapping, including procedures for:
    - selecting and using personal protective equipment (PPE)
    - using specialist tools
- environmental requirements, including procedures for trapping, storing and disposing of waste material

© Commonwealth of Australia, 2026 Mining and Automotive Skills Alliance

- types and uses of vinyl film wrapping materials and tools, including:
    - vinyl film wrapping requirements
    - patterns
    - application tools
    - cleaning agents
- vinyl film supplier recommended methods and techniques for applying vinyl film wrapping, including:
    - surface preparation
    - surface measurements and pattern development
    - quality requirements relating to vinyl film wrapping
- procedures for protecting vehicle and components when applying film wrapping
- procedures for final inspection of vehicle vinyl film wrapping.

Assessment Conditions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of task.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the body film wrapping they have applied to vehicles, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive workplace or simulated workplace
- workplace instructions
- PPE to apply vinyl film wrapping
- vinyl film supplier specifications and application methods
- three different vehicles requiring the application of vinyl film materials
- vinyl film wrapping material
- tools, equipment and materials appropriate for applying vehicle body film wrapping.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBAUD513 Report on quality audits

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills and knowledge required to report on the outcomes of quality audits and take appropriate follow up actions. It covers compiling audit results, preparing reports for relevant stakeholders, and negotiating follow up actions with relevant stakeholders.

The unit applies to individuals who have an established knowledge of quality auditing and are proficient in using a range of quality auditing techniques. It addresses the function performed by either an auditor having sole responsibility for the audit or an auditor required to report on quality audits as part of a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Technical Skills - Audit and Compliance

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Prepare to report audit results	• 1.1 Compile audit results • 1.2 Analyse compiled audit results against agreed audit plan and identify non-compliances • 1.3 Consult with team members, if required
• 2. Prepare final audit report	• 2.1 Produce draft audit report according to audit plan • 2.2 Provide draft report to relevant stakeholders and seek feedback • 2.3 Finalise audit report, integrating stakeholder feedback, as required • 2.4 Present final audit report to auditee and other relevant stakeholders
• 3. Agree on follow up process with auditee	• 3.1 Determine timeframes for any corrective action required to deal with non-conformance, in consultation relevant stakeholders, including the auditee • 3.2 Confirm corrective action follow-up procedures are agreed with relevant stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Interprets and analyses information from a complex range of organisational documentation
Writing	• Develops a variety of complex documents using relevant structure, tone and vocabulary appropriate to audience, context and purpose
Oral Communication	• Participates in spoken exchanges using clear language, tone and pace • Uses questioning and listening techniques to clarify understanding
Numeracy	• Collects, represents, summarises and interprets a range of statistical data
Self-management	• Monitors adherence to organisational policy/ies and procedure/s

© Commonwealth of Australia, 2026 Future Skills Organisation

	• Organises, plans and sequences own workload according to timelines and organisational requirements • Analyses outcomes of decisions to identify opportunities for improvement
Teamwork	• Collaborates with others to negotiate joint outcomes, playing an active role in facilitating team understanding
Problem solving	• Recognises a range of familiar problems, their symptoms and causes, actively looking for suitable corrective actions
Initiative and enterprise	• Makes a range of decisions in complex situations, taking a range of factors into account
Technology	• Uses digital tools and systems to develop reports in an effective way

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBAUD513 Report on quality audits

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- interpret audit results and produce a detailed audit report containing detailed analysis according to specified organisational requirements on at least two different occasions.

In the course of the above, the candidate must:

- negotiate follow-up actions with relevant stakeholders
- use terminology relating to quality auditing.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- quality auditing principles, methods and techniques
- requirements of auditing regulations
- key features of technology required for producing quality auditing results and reports according to organisational requirements
- presentation of corrective action requirements.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation including quality audit reports, checklists, and audit plans
- technology required for quality auditing reporting.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Social Competence - Verbal Communication

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
• 1. Prepare presentation	• 1.1 Plan presentation approach and intended outcomes

© Commonwealth of Australia, 2026 Future Skills Organisation

	• 1.2 Identify target audience, location and resources requirements • 1.3 Select presentation strategies, format and delivery methods according to presentation requirements • 1.4 Select techniques to evaluate presentation effectiveness
• 2. Deliver presentation	• 2.1 Summarise key concepts and ideas and present to target audience • 2.2 Provide opportunity for audience to seek clarification on presentation information • 2.3 Confirm target audience understand key concepts and ideas, and that identified presentation objectives have been achieved
• 3. Review presentation	• 3.1 Evaluate effectiveness of the presentation • 3.2 Seek and discuss feedback and any reactions to the presentation from participants and relevant stakeholders • 3.3 Make changes to presentation based on feedback received

•

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Reviews and analyses documents to identify information relevant to a specific presentation
Writing	• Develops material to convey ideas and information to target audience in an engaging way
Oral Communication	• Presents information using words and non-verbal features appropriate to the audience and context • Uses listening and questioning techniques to gather information required to develop and modify presentations
Problem solving	• Interprets audience reactions and changes words and non-verbal features accordingly

© Commonwealth of Australia, 2026 Future Skills Organisation

Planning and organising	• Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals
Initiative and enterprise	• Selects and uses appropriate conventions and protocols to encourage interaction and to present information • Recognises the need to alter personal communication style in response to the needs and expectations of others
Self-management	• Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes
Technology	• Uses the main features and functions of digital tools to complete work tasks

1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and deliver at least two different presentations.

In the course of the above, the candidate must:

- use aids and materials to support the presentation
- select and implement methods to review the effectiveness of presentation and document suggested improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- information collection methods that support review and feedback of presentations
- organisational and legislative obligations and requirements relevant to presentations
- structure of presentations according to intended outcomes
- principles of effective communication including:
    - persuasive communication techniques
    - verbal and non-verbal communication
- presentation methods
- different aids, materials and techniques that can be used for presentations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, materials and business software packages for making a presentation.

BSBESB301 Investigate business opportunities

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills and knowledge required to identify a business opportunity and its key components. This requires undertaking research to determine the viability of the opportunity, with reference to the legislative frameworks affecting the business.

The unit applies to those establishing or operating a business providing self-employment, as well as those establishing a new venture as part of a larger organisation. The business opportunities may relate to products and/or services offered by the business.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Competency field(s)

Unit sector(s)

Business Competence - Entrepreneurship and Small Business

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Identify potential opportunities for business	• 1.1 Source and analyse market information for potential opportunities • 1.2 Analyse information and list details of business ideas and opportunities • 1.3 Identify and describe products and/or services that match business ideas • 1.4 Identify and analyse available business, financial, digital technology and technical factors related to the potential opportunities • 1.5 Identify customers for the products and/or services
• 2. Investigate market needs and factors affecting market	• 2.1 Collect, investigate and analyse business and market information, trends and developments from primary and secondary sources to identify market needs related to business opportunities • 2.2 Identify ethical and cultural requirements of the market • 2.3 Identify projected changes in population, economic activity and other macro external factors that may impact business opportunities • 2.4 Review identified needs and factors and identify their potential impact on business opportunities • 2.5 Investigate marketing and promotion activities and strategies for identified products and/or services
• 3. Finalise investigation into business opportunities	• 3.1 Review personal factors against business opportunities and identify their impact on opportunities • 3.2 Examine options to address and minimise negative impact and strengthen positive impact of personal factors • 3.3 Document outcomes of investigation into business opportunity

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2026 Future Skills Organisation

Reading	• Analyses and evaluates information and integrates facts and ideas
Writing	• Uses information and industry-related terminology to develop required documentation
Numeracy	• Extracts, evaluates and compares numerical information to determine resources and identify trends
Technology	• Uses a range of digitally based technology and applications to access and filter data, and then extract, organise and integrate relevant information

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBESB301 Investigate business opportunities

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify and investigate at least one business opportunity and assess the probability of success.

In the course of the above, the candidate must:

- research and analyse information from a range of sources for its potential impact on the market, products and/or services, and customers
- match personal factors to business opportunities.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sources of business and market information on business ideas and potential business opportunities, including:
    - potential clients and past leads
    - competitor activities, products and services
    - industry trends and insights
    - legislative and regulatory requirements relevant to opportunities being investigated
- market information, trends and developments, including:
    - new and emerging markets and their features
    - expected market growth or decline and associated risk factors
    - economic activity, including projected or potential movements in prices
    - projected changes in availability of resources
- personal factors involved in choosing preferred opportunity include:
    - own skills and aspirations

© Commonwealth of Australia, 2026 Future Skills Organisation

    - own commitments, expectations and capabilities
- criteria for determining the viability of a business opportunity, including:
    - market size, potential, needs and trends
    - financial considerations
    - benefits and challenges of digital technologies relevant to opportunities
    - resource availability
- business research methods and data collection tools and software
- impact of ethical and cultural requirements of market on opportunities and products.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- internet access for research
- source of information on potential business opportunities, including customer or supplier information
- data collection tools and software
- legislative and regulatory information relating to business opportunities
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBESB402 Establish legal and risk management requirements of new business ventures

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish legal and risk management requirements for at least one business or new business venture, and implement procedures for meeting them
- create at least one contract with a supplier of goods or services to business or new business venture
- identify, assess and treat at least three different risks specific to business or new business venture and prioritise risks with highest probability of occurrence and greatest negative impact.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory requirements relating to operation of new business ventures, including:
    - consumer legislation
    - environmental requirements and responsibilities
    - registration and licensing
    - industry codes of practice and standards
    - work health and safety (WHS) requirements and responsibilities
    - insurance products and requirements, including adequate coverage
- workplace procedures for:
    - negotiating, creating and terminating contractual arrangements, including seeking legal advice
    - investigating and securing procurement rights relating to products and/or services
    - identifying options for leasing or owning business premises

© Commonwealth of Australia, 2026 Future Skills Organisation

- legal rights and obligations of alternative ownership structures
- key features of workplace record-keeping processes and procedures that:
    - meet minimum legal and taxation requirements
    - maintain records in a secure and accessible manner
- key components of compliance procedures:
    - following taxation and industrial relations principles and requirements
    - updating and maintaining legal documents
    - investigating areas of non-compliance
    - monitoring provision of products and/or services
    - taking corrective action where necessary
- key steps in risk management process, including procedures for developing and implementing business risk treatment plan.

Assessment Conditions

Assessment Requirements for BSBESB406 Establish operational strategies and procedures for new business ventures

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop strategies and procedures to manage operations for at least one new business or new business venture, including:
    - an operational plan
    - risk management procedures
    - a quality assurance process
    - performance measures.

In the course of the above, the candidate must:

- use existing, new and emerging digital technologies to optimise business performance
- research and record business improvements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislation, regulations, industry codes of practice and standards specific to small business described in performance evidence
- key features of methods for implementing operation and revenue control systems, including for controlling stock and expenditure
- methods for evaluating performance and implementing improvements, including:
    - identifying and meeting staffing requirements
    - analysing and correcting business problems
    - reviewing and adjusting the business plan
- work health and safety (WHS) responsibilities and procedures for managing hazards and assessing risks associated with business described in performance evidence
- principles of risk management, including risk assessment

© Commonwealth of Australia, 2026 Future Skills Organisation

- quality assurance system principles and methods
- role of digital technologies and innovation in modern business
- key features of systems to manage staff, stock, expenditure, services and customer service
- key features of required technical or specialist skills relevant to business operations
- workplace procedures for implementing new and emerging digital technologies into business operations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business equipment and resources, including business technology
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Unit sector(s)

Business Competence - Entrepreneurship and Small Business

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
• 1. Implement financial strategy	• 1.1 Identify financial information requirements and obtain specialist services, as required

© Commonwealth of Australia, 2026 Future Skills Organisation

	• 1.2 Produce financial budgets or projections for each forward period, and distribute to required people according to legal requirements and workplace procedures • 1.3 Develop a plan to negotiate and manage business capital to best enable implementation of the business plan • 1.4 Develop and maintain strategies and enable adequate financial provision for taxation according to legal requirements • 1.5 Develop, monitor and maintain client credit policies to maximise cash flow • 1.6 Select key performance indicators (KPIs) to enable ongoing monitoring of financial performance in line with business plan • 1.7 Record and communicate financial procedures to required personnel to facilitate implementation of business plan according to workplace procedures
• 2. Monitor financial performance	• 2.1 Use available systems to monitor and report on financial performance targets, and analyse data to establish extent to which financial goals have been met • 2.2 Monitor marketing and operational strategies for their effects on financial goals • 2.3 Calculate and evaluate financial ratios according to own business and/or industry benchmarks
• 3. Review financial performance	• 3.1 Assess financial strategy to determine whether variations or alternative plans are needed according to workplace procedures, and change as required • 3.2 Research and implement, with relevant personnel, new and emerging digital technologies to boost business profitability according to business plan

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Evaluates complex text to determine legislative, regulatory and workplace documentation

© Commonwealth of Australia, 2026 Future Skills Organisation

Writing	• Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral communication	• Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding
Numeracy	• Interprets numerical information to calculate required financial information
Self-management	• Identifies implications of legal and regulatory responsibilities for own work • Selects appropriate form, channel and mode of communication for a specific purpose relevant to own role
Initiative and enterprise	• Uses formal and informal processes to monitor implementation of ideas and analyse outcomes
Planning and organising	• Develops plans to manage relatively complex, non-routine tasks that may contribute to longer-term operational and strategic goals

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement a financial strategy for at least one business or new business venture according to business plan and goals.

In the course of the above, the candidate must:

- adhere to legal requirements
- produce financial projections, including cash flow estimates
- develop a plan to negotiate and manage business assets and financial capital
- define strategies for debt collection and contingencies for debtors
- manage cash flow
- define key indicators for financial performance
- communicate with required people
- seek specialist services, where required
- monitor the financial performance of the business and make changes to strategy as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory financial requirements that apply to new business venture described in performance evidence
- key purposes of financial reports
- components of financial budgets or projections, including cash flow estimates

© Commonwealth of Australia, 2026 Future Skills Organisation

- workplace procedures for:
    - recording and communicating financial procedures to required personnel
    - distributing financial budgets and projections
    - using digital technologies to monitor and report on financial performance targets and analyse data
    - assessing and changing financial plan
- forms, channels and modes of communication used in relation to managing business finances
- key features of business and industry benchmarking used to evaluate financial ratios
- key features of financial decision-making relevant to the business, including:
    - strategies that enable adequate financial provision for taxation
- components of client credit policies, including contingencies for debtors in default
- key features of significant financial indicators
- key features of balance sheet preparation and interpretation
- key features of debt collection procedures and strategies
- key features of profit and loss statement preparation and interpretation
- key features of stock records and stock control relevant to the business.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- coordinate the recruitment and onboarding of two candidates.

In the course of the above, the candidate must:

- demonstrate the process for screening and interviewing a candidate
- communicate effectively with clients and successful and unsuccessful candidates
- review job descriptions and use them to support sourcing, selecting and appointing suitable staff
- consult with relevant stakeholders to gain approvals
- develop selection criteria and interview questions in consultation with relevant stakeholders
- obtain referees' reports
- provide a written report or demonstration of an assessment of a candidate's skills and selection recommendation
- secure preferred candidate's agreement and provide an employment contract.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of relevant legislation, regulations, standards and codes of practice that affect employment agencies and organisation's recruiting processes
- common interview techniques and recruitment sourcing methods
- common methods of attracting candidates
- methods to assess and report on candidates according to organisational procedures
- strategies to provide feedback to candidates according to organisational procedures.

BSBLDR414 Lead team effectiveness

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must ‘manage up’ as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop one marketing plan according to organisational objectives, including:
    - researching information
    - consulting with stakeholders
    - developing marketing objectives, strategies, budget and a marketing performance review strategy according to task requirements
    - seeking approval for marketing plan from relevant stakeholders
    - adjusting and disseminating final marketing plan according to feedback and organisational policy and procedures.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational structure, products and services and strategic and marketing objectives
- components of a marketing plan including:
    - environmental analysis
    - segmentation, target market and positioning
    - market objectives
    - marketing strategy or marketing mix
    - budget
    - implementation plan
    - monitor or evaluation control plan including risk contingency plan
- common marketing opportunities including:
    - strategic alliances and cooperative business models

© Commonwealth of Australia, 2026 Future Skills Organisation

    - new products or services that target specific markets
    - greater market penetration with existing products or services
    - take-overs
    - new businesses and franchising
- common marketing strategies and marketing approaches
- processes to ensure marketing strategies, approaches and marketing mix align to organisation's objectives and are legal, ethical and achievable
- legislative and regulatory context of the organisation as relevant to the marketing plan.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relevant to developing marketing plans
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Unit sector(s)

Business Competence - Business Operations

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Identify customer needs	• 1.1 Identify and clarify customer needs and expectations • 1.2 Evaluate customer needs and determine priorities for service delivery according to organisational requirements • 1.3 Inform customers about available choices for meeting their needs and assist selection of preferred options • 1.4 Identify limitations in addressing customer needs and seek assistance from designated individuals, where required
• 2. Deliver a service to customers	• 2.1 Provide service to meet identified customer needs according to organisational and legislative requirements • 2.2 Establish and maintain rapport with customers • 2.3 Manage customer complaints according to organisational and legislative requirements • 2.4 Provide assistance and respond to customers with specific needs according to organisational and legislative requirements • 2.5 Identify and use available opportunities to promote and enhance services and products to customers
• 3. Evaluate customer service delivery	• 3.1 Review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements • 3.2 Seek and respond to customer feedback according to organisational policies and procedures • 3.3 Identify opportunities to enhance the quality of customer service • 3.4 Document recommendations for customer service improvements • 3.5 Submit recommendations to relevant personnel according to organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

© Commonwealth of Australia, 2026 Future Skills Organisation

Skill	Description
Learning	• Identifies and follows up on opportunities to improve work practices and outcomes
Oral communication	• Provides information or advice using structure and language to suit the audience • Asks questions and listens to gain information or confirm understanding
Reading	• Evaluates textual information to determine customer service requirements • Proofreads texts for clarity of meaning and accuracy of grammar and punctuation
Writing	• Completes responses to customer complaints in required format • Prepares reports using sequencing, format and words to communicate recommendations clearly and effectively
Planning and organising	• Complies with organisational policies and procedures relevant to role • Plans and implements systems to gather and organise information
Problem-solving	• Uses problem solving skills to analyse and respond to customer complaints or enquiries
Teamwork	• Selects and uses appropriate communication conventions to establish connections, build rapport, seek information and develop professional working relationships • Adjusts personal communication style in response to the opinions, values and particular needs of others

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBOPS304 Deliver and monitor a service to customers

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- deliver a service to at least three different customers, including:
    - using communication skills to establish rapport and build relationships with customers according to organisational requirements
    - identifying customer needs using appropriate questioning and active listening skills
    - providing customer service according to organisational requirements
    - responding to and recording customer feedback and action taken according to organisational standards, policies and procedures
    - producing a report which identifies and recommends ways to improve service delivery.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of customer service legislation and consumer law
- organisational policies and procedures relating to customer service, including complaints handling
- common forms of verifiable evidence that could be used to review customer satisfaction
- customer service standards and protocols for serving customers, including customers with specific needs.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2026 Future Skills Organisation

This includes access to:

- technology required to gather and provide information and assistance to customers
- workplace documents, and organisational policies and procedures relating to customer service
- examples of customer complaints and feedback.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBOPS505 Manage organisational customer service

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and review strategy for delivering and monitoring quality customer service for an organisation or work area.

In the course of the above, the candidate must:

- implement quality customer service policies and procedures
- identify and resolve system problems relating to poor customer service
- assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory frameworks governing customer service
- elements of effective customer service including quality, time and cost
- organisational policies and procedures for customer service and handling customer complaints
- relevant service standards and best practice models
- key principles of public relations and product promotion
- common techniques for solving complaints
- principles and techniques involved in managing:
    - customer behaviour
    - specific customer needs
    - customer research

© Commonwealth of Australia, 2026 Future Skills Organisation

    - customer relations
    - ongoing product and service quality
    - problem identification and resolution
    - quality customer service delivery
    - record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations and codes of practice related to customer service
- workplace documentation and resources
- complex customer complaints.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Establish business plan	• 1.1 Identify organisational and legislative frameworks relevant to development of a business plan • 1.2 Review market requirements for the organisation's products and service • 1.3 Identify and assess business requirements, objectives, competitors and established plans • 1.4 Develop performance objectives and measures for business plan, in consultation with relevant stakeholders • 1.5 Identify financial, human and physical resource requirements for the business • 1.6 Develop business plan
• 2. Implement business plan	• 2.1 Communicate business plan to all relevant stakeholders • 2.2 Confirm skilled labour is available to implement plan • 2.3 Test performance measurement systems and refine, where required • 2.4 Prepare reports on key aspects of the business • 2.5 Report system failures, product and service failures and variances to the business plan as they occur
• 3. Respond to performance data	• 3.1 Analyse performance reports against planned objectives • 3.2 Review performance indicators and refine, where required • 3.3 Identify and coach under-performing staff • 3.4 Establish ongoing review processes

•

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Description

© Commonwealth of Australia, 2026 Future Skills Organisation

Reading	• Gathers, interprets and analyses textual information when developing the business plan and monitoring operational performance
Writing	• Communicates relationships between ideas and information, matching style of writing to purpose and audience • Researches, plans and prepares business plan for relevant stakeholders
Oral communication	• Presents information and seeks advice using language and features appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	• Extracts and evaluates mathematical information to review the market, research competitors and review pricing structures
Enterprise and initiative	• Takes full responsibility for identifying and complying with legislative requirements applicable to self and the organisation
Teamwork	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role • Provides support in field of expertise to colleagues, as required
Planning and organising	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Systematically gathers and analyses all relevant information and evaluates options in order to monitor performance and identify opportunities for improvement

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBOPS601 Develop and implement business plans

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least one business plan.

In the course of the above, the candidate must:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements and marketing approaches
- write a business plan, including:
    - description of the business
    - products and services
    - financial, physical and human resource requirements
    - regulatory requirements
    - marketing strategy
    - financial indicators
    - productivity and performance targets for key result areas
- monitor and respond to business performance including evaluation of performance against key results indicators
- consult, communicate with and report to relevant stakeholders
- provide analysis of the strengths and weaknesses of a business plan.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and legislative frameworks required for the development of business plans, including:
    - pre-existing strategic, business and operational plans

© Commonwealth of Australia, 2026 Future Skills Organisation

    - business vision, mission, values and objectives
    - permits or licences that may be required for new activity
- processes for developing and monitoring business plans
- customer needs and budgeting information
- performance objectives and measures, including key results indicators
- stakeholders involved in the development of business plans.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business information and data relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Unit sector(s)

Critical Thinking & Problem Solving - Personal Effectiveness

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
• 1. Manage work goal development	• 1.1 Document team member responsibilities and identify organisational framework for development of work goals

© Commonwealth of Australia, 2026 Future Skills Organisation

	• 1.2 Support others to develop work goals, plans and activities that align with their responsibilities • 1.3 Assess others' work goals, plans and activities for alignment with organisational goals and provide feedback to team members • 1.4 Facilitate access to personal and professional development opportunities that align to team member goals, plans and activities
• 2. Facilitate achievement of work priorities	• 2.1 Assess and prioritise personal, team and organisational demands • 2.2 Use technology to manage work priorities of the team • 2.3 Identify and implement techniques to manage team health and wellbeing in the workplace
• 3. Develop and maintain professional competence	• 3.1 Document own development needs, priorities and plans using applicable competency standards, where required • 3.2 Seek feedback from relevant personnel on own development needs • 3.3 Participate in personal and professional development activities that address identified needs, priorities and plans

•

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	• Investigates and uses a range of strategies to develop personal competence
Reading	• Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	• Uses feedback to prepare reports that summarise ways to improve competence

© Commonwealth of Australia, 2026 Future Skills Organisation

Oral communication	• Uses active listening and questioning to seek and receive feedback
Enterprise and Initiative	• Identifies how own role contributes to broader organisational goals • Considers organisational protocols when planning career development of self and others
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders • Uses interpersonal skills to establish and build positive working relationships with others
Planning and organising	• Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare • Identifies and uses appropriate technology to improve work efficiency
Technology	• Uses technology to manage and prioritise work tasks

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement a plan for own personal and professional development
- manage personal and professional development of at least two other individuals.

In the course of the above, the candidate must:

- identify roles and responsibilities of team members
- support two different individuals to develop work goals that align with their role and responsibilities
- facilitate team member access to relevant personal and professional development activities
- use technology to organise and prioritise tasks and commitments of a team or work area
- research and implement techniques for maintaining health and wellbeing of self and others
- develop personal work goals, plans and activities to meet work goals
- measure personal work performance, including assessing competency against competency standards
- participate in personal and professional development activities to develop professional competence.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- roles and responsibilities of team members
- principles and techniques involved in the management or organisation of:
    - performance measurement

© Commonwealth of Australia, 2026 Future Skills Organisation

    - personal behaviour, self-awareness and personality traits identification
    - personal development plans
    - personal goal setting
    - task prioritisation
- common personal and professional development activities relevant to the industry
- technology to plan and prioritise work tasks
- techniques to manage health and wellbeing in the workplace
- organisation's human resources policies and procedures relevant to professional development.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to challenges and situations to demonstrate the application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills and knowledge required to manage quality within projects. It involves determining quality requirements, implementing quality control and assurance processes, and using review and evaluation to make quality improvements in current and future projects.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

No prerequisite units.

Business Competence - Project Management

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Determine quality requirements	• 1.1 Identify quality objectives and standards with input from relevant stakeholders • 1.2 Develop quality metrics for the project and any product output in a quality management plan • 1.3 Select quality management methods and tools for resolving quality issues • 1.4 Consult with project team and stakeholders on quality requirements
• 2. Implement quality processes	• 2.1 Perform quality assurance audit of project processes for compliance with agreed plans • 2.2 Assess quality control of project and product output according to agreed quality specifications • 2.3 Identify causes of variance to quality metrics and undertake remedial action • 2.4 Maintain a quality management system for timely recording of quality audit data
• 3. Implement project quality improvements	• 3.1 Review processes and implement agreed changes continually throughout the project life cycle • 3.2 Review project outcomes against performance requirements • 3.3 Identify and document lessons learned and recommended improvements

•

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Identifies, analyses and assesses textual information obtained from a range of sources and determines how content may be applied to requirements
Writing	• Develops and documents quality requirements for project plan • Records results of quality audits according to organisational requirements

© Commonwealth of Australia, 2026 Future Skills Organisation

Oral Communication	• Participates in verbal exchanges using clear language and appropriate non-verbal features to provide and seek relevant information • Uses active listening and questioning techniques to elicit views and opinions of others
Numeracy	• Interprets information to determine measurable objectives • Interprets numerical information to measure outcomes against objectives • Uses analytical skills to review and evaluate process and decide on future improvements
Self-management	• Takes responsibility for identifying and following policies, procedures and standards
Teamwork	• Selects and uses appropriate communication practices in a range of work contexts • Collaborates with others to foster shared understanding of quality requirements
Planning and organising	• Sequences and schedules complex activities, monitors actions against goals, adjusting plans and resources where necessary
Technology	• Uses digital applications to access, organise, integrate and share relevant information in effective ways

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBPMG532 Manage project quality

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project quality on at least two occasions.

In the course of the above, the candidate must:

- document a quality-management plan
- implement quality control and assurance processes for a defined project using a range of tools and methodologies.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- quality management theory
- relevant project quality standards that apply in the organisation
- quality assurance and control techniques, key tools and methodologies
- roles and responsibilities of quality management personnel
- methods for managing continuous improvement.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project documentation including quality criteria, evidence of quality monitoring and improvement practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBPMG535 Manage project information and communication

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills and knowledge required to link people, ideas and information at all stages in the project life cycle. Project communication management ensures timely and appropriate generation, collection, dissemination, storage and disposal of project information through formal structures and processes.

The unit applies to individuals responsible for managing and leading a project in an organisation, business, or as a consultant.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Plan information and communication processes	• 1.1 Identify and analyse information requirements of the project • 1.2 Develop a communication management plan according to project objectives • 1.3 Establish a designated project-management information system
• 2. Implement project information and communication processes	• 2.1 Manage generation, gathering, storage, retrieval, analysis and dissemination of information by project staff and stakeholders • 2.2 Implement, modify, monitor and control designated information-validation processes • 2.3 Implement and maintain communication networks • 2.4 Identify and resolve communication and information-management system issues
• 3. Assess information and communication outcomes	• 3.1 Finalise and archive records according to agreed project information ownership and control requirements • 3.2 Review project outcomes for effectiveness of management information and communication processes and procedures • 3.3 Develop and document recommended improvements for application in future projects

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Identifies and analyses complex texts from a range of sources
Writing	• Develops project documents using vocabulary, structure and conventions appropriate to text
Oral Communication	• Participates in verbal exchanges using clear language and appropriate non-verbal features • Uses active listening and questioning to confirm understanding and agreement

© Commonwealth of Australia, 2026 Future Skills Organisation

Initiative and enterprise	• Identifies responsibilities and boundaries of own role
Teamwork	• Identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience
Planning and organising	• Sequences and schedules complex activities, monitors implementation and manages relevant communication • Uses problem-solving techniques to analyse and resolve issues • Evaluates outcomes of decisions to identify opportunities for improvement • Uses digital tools to access, organise and analyse complex data

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project information and communication on at least two occasions.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- alternative communication methods and media and their application on various projects
- effective project-management information systems and their various applications
- methods used to evaluate information systems and communication processes.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- project communication and information management documentation
- examples of how communication was managed on projects.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
• 1. Identify project risks	• 1.1 Identify risk objectives and standards, with input from stakeholders

© Commonwealth of Australia, 2026 Future Skills Organisation

	• 1.2 Identify project risk context to inform risk management processes • 1.3 Identify project risks using valid and reliable risk identification methods
• 2. Analyse project risks	• 2.1 Identify risk analysis classification criteria and apply to agreed risk ranking system • 2.2 Use risk analysis processes, within delegated authority, to analyse and qualify any risks, threats and opportunities • 2.3 Identify risk priorities in agreement with project client and other stakeholders • 2.4 Document risk analysis outcomes for inclusion in risk register and risk management plan
• 3. Establish risk treatments and controls	• 3.1 Identify and document existing risk controls • 3.2 Analyse risk treatment options using agreed consultative methods • 3.3 Record and implement agreed risk treatments • 3.4 Update risk plans and allocate risk responsibilities to project team members
• 4. Monitor and control project risks	• 4.1 Establish risk review processes • 4.2 Monitor risk environment and identify changed circumstances impacting project risks • 4.3 Evaluate risk responses to changed environment • 4.4 Implement agreed risk responses and modify plans
• 5. Assess risk management outcomes	• 5.1 Review project outcomes for effectiveness of risk-management processes and procedures • 5.2 Develop recommended improvements for application in future projects • 5.3 Identify and document risk management issues and recommended improvements for application to future projects

•

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage project risk on at least two occasions.

In the course of the above, the candidate must:

- conduct effective risk management processes for a project of sufficient complexity
- apply risk management techniques, strategies and tools.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project risks in a range of risk categories
- key components of a risk management plan
- relevant project risk controls
- industry sector risk classifications and different risk contexts
- organisational and industry standard risk frameworks
- project risk-management processes and procedures
- characteristics, techniques and applications of quantitative and qualitative risk management techniques and approaches.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources
- feedback from project stakeholders about how risks were managed.

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
• 1. Assess stakeholder interests	• 1.1 Identify project objectives and relevant stakeholders

© Commonwealth of Australia, 2026 Future Skills Organisation

	• 1.2 Establish stakeholder interests and expectations and determine forms of engagement • 1.3 Determine and agree with relevant stakeholders on forms of engagement, communication methods, project content, budget and timelines • 1.4 Identify and apply actions to address differing interests • 1.5 Consider and advise stakeholders on project management issues
• 2. Monitor stakeholder engagement	• 2.1 Assign roles and responsibilities to team members according to interests and expectations and confirm defined project roles are followed • 2.2 Develop knowledge management systems to capture team progress, insights and experiences • 2.3 Conduct and lead stakeholder performance reviews • 2.4 Identify and address team member development needs and opportunities • 2.5 Support development of interpersonal skills of the team for stakeholder engagement
• 3.Review and manage stakeholder engagement	• 3.1 Communicate information as planned and according to authority levels, identifying and addressing variances • 3.2 Seek and respond to feedback from relevant stakeholders on management of stakeholder engagement • 3.3 Document identified improvements and feedback received for future management of stakeholder engagements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Identifies and interprets workplace documentation to determine relevant information

© Commonwealth of Australia, 2026 Future Skills Organisation

Writing	• Documents information about stakeholder interests and communication needs using appropriate vocabulary and formats
Oral Communication	• Participates in verbal exchanges using clear and detailed language to provide and seek information • Uses active listening and questioning to confirm understanding
Self-management	• Identifies and works according to role parameters
Teamwork	• Identifies requirements of important communication exchanges, selecting appropriate channels, format and content to suit purpose and audience • Collaborates with others to achieve joint outcomes, playing an active role in facilitating and leading activities
Planning and organising	• Takes responsibility for decisions in complex situations involving multiple variables and constraints • Uses analytical skills to identify and address problems

Range of conditions

No conditions apply to this unit of competency at the time of publication.

BSBSUS211 Participate in sustainable work practices

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills and knowledge required to measure, support and find opportunities to improve the sustainability of work practices.

The unit applies to individuals, working under supervision or guidance, who are required to follow workplace procedures and instructions. These individuals work in an environmentally sustainable manner within scope of competency, authority and own level of responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
• 1. Measure sustainable work practices	• 1.1 Identify sustainable work practices in own work role

© Commonwealth of Australia, 2026 Future Skills Organisation

	• 1.2 Measure current usage of resources in own work role • 1.3 Record and file resource usage documents • 1.4 Identify resource inefficiencies from gathered information
• 2. Support sustainable work practices	• 2.1 Identify and comply with workplace sustainability procedures • 2.2 Identify workplace environmental hazards according to environmental regulations and standards • 2.3 Report any breaches and potential breaches to organisational personnel
• 3. Seek opportunities to improve sustainable work practices	• 3.1 Identify areas of improvement to work practices in own work area • 3.2 Consult with colleagues and management to assess potential to improve sustainability of identified work practices • 3.3 Make suggestions for improvements to workplace practices in own work area

•

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Numeracy	• Calculates basic metric measurements to determine resource usage
Reading	• Recognises and interprets textual information to establish job requirements
Writing	• Completes documents using required formats
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with co-workers in range of work contexts • Collaborates and cooperates with others to achieve joint outcomes

© Commonwealth of Australia, 2026 Future Skills Organisation

Initiative and enterprise	• Implements actions according to requirements, taking some responsibility for sequencing and timing of tasks • Analyses current practices to identify opportunities for improvement
Self-management	• Understands and adheres to legal and regulatory responsibilities related to own work
Technology	• Uses main features and functions of digital tools to complete work tasks and access information

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBSUS211 Participate in sustainable work practices

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- participate in at least three sustainable work practices.

In the course of the above, the candidate must:

- identify benefits of sustainable work practices and areas of improvement for sustainable practices in the workplace
- identify and apply sustainability legislation and organisational sustainability policies and procedures
- participate in and support discussions for improved resource efficiency processes
- identify, measure and document usage of resources
- collaborate with team members to develop suggestions for improving workplace sustainability practices.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- environmental and resource hazards and risks
- Australian and international standards for corporate social sustainability
- sustainability regulations and codes of practice applicable to own role
- organisational sustainability policies and procedures
- reporting channels and procedures to report breaches and potential issues
- advantages of sustainable practices in the workplace.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

© Commonwealth of Australia, 2026 Future Skills Organisation

This includes access to:

- documentation, information and resources on workplace environmental and resource efficiency
- sustainability legislation, regulations and standards.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Establish sustainable work contexts	• 1.1 Identify and assess organisational compliance against environmental legislation, regulations and standards • 1.2 Collect data on environmental efficiency in organisational systems and processes • 1.3 Analyse data on environmental efficiency and current purchasing strategies and identify areas for improvement • 1.4 Consult stakeholders and external data sources on sustainability best practice • 1.5 Develop efficiency targets and methods to monitor outcomes
• 2. Implement sustainable work practices	• 2.1 Identify and source tools to set efficiency targets • 2.2 Implement and integrate efficiency targets with other operational activities • 2.3 Support team members to identify possible areas for improved resource efficiency in work areas • 2.4 Seek and act on feedback from stakeholders on implementation
• 3. Monitor performance of sustainable work practices	• 3.1 Assess outcomes using monitoring method developed • 3.2 Document and communicate outcomes to key personnel and stakeholders • 3.3 Identify changes required to targets and tools from strategies and improvement plans • 3.4 Promote successful strategies in development of new efficiency targets

•

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description

© Commonwealth of Australia, 2026 Future Skills Organisation

Numeracy	• Analyses numerical information to measure usage and calculates metric measurements, quantities and ratios and financial data using appropriate tools
Oral communication	• Presents information and seeks advice using structure and language appropriate to audience • Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Reading	• Identifies and analyses texts to determine legislative and regulatory requirements relevant to work area • Reviews reported information to evaluate workplace strategies and improvement practices
Writing	• Documents findings of investigations from written and oral sources according to organisational requirements • Provides updates about progress using formats and language appropriate to the audience and context
Initiative and Enterprise	• Identifies and follows legislative requirements and organisational policies and procedures associated with own role
Teamwork	• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information • Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Planning and organising	• Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation • Uses systematic, analytical processes to set environmental targets, gather relevant information, identify and evaluate alternative approaches • Evaluates outcomes of decisions to identify opportunities for improvement
Technology	• Uses the main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBSUS411 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement and monitor at least three environmentally sustainable work practices.

In the course of the above, the candidate must:

- identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability in the workplace
- engage and consult with relevant stakeholders to develop and implement sustainability improvements, encourage feedback and to report on outcomes
- plan and organise work group activities to:
    - measure current resource usage
    - evaluate alternative solutions to workplace environmental issues
    - resolve workplace sustainability issues and generate ideas for improvements
    - evaluate and implement strategies to improve resource usage
    - comply with environmental requirements
- apply continuous improvement approaches to enhance organisation’s sustainability performance
- apply change management techniques to support sustainability performance.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and sustainability issues
- relevant internal and external sources of information for the development of efficiency targets

© Commonwealth of Australia, 2026 Future Skills Organisation

- benchmarks for environmental and resource sustainability relevant to organisation
- Australian and international standards for corporate social sustainability
- continuous improvement approaches for workplace practices
- resources for monitoring sustainable work practices including:
    - questionnaires and surveys
    - visual calculations
    - supply records and invoices
    - previous internal and external audit documents
- organisational systems and procedures that relate to environmental and resource sustainability improvements, including:
    - supply chain, procurement and costing strategies
    - quality assurance
    - recommendation development and seeking approvals
    - sales strategies and operations.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- environmental sustainability legislation, regulations, standards and codes
- workplace reference materials for environmental sustainability and practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBTEC201 Use business software applications

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Application

This unit describes the skills and knowledge required to select and use software and organise electronic information and data.

The unit applies to those who use a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Digital Competence - Technology Use

Elements and Performance Criteria

Element	**Performance criteria**
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*

© Commonwealth of Australia, 2026 Future Skills Organisation

• 1. Select and prepare to use technology	• 1.1 Identify task purpose, audience, format and presentation requirements, and clarify with relevant personnel, where required • 1.2 Select relevant technology and software applications to achieve requirements of the task • 1.3 Adjust workspace, furniture and equipment to suit own ergonomic requirements
• 2. Input and process information or data	• 2.1 Identify and open application, according to task and organisational requirements • 2.2 Enter information or data into application according to organisational requirements • 2.3 Ensure information or data is checked and amended according to organisational and task requirements • 2.4 Format information or data using appropriate application functions according to organisational and task requirements • 2.5 Use relevant help functions to overcome simple issues
• 3. Finalise and store document	• 3.1 Review and edit final information or data, and prepare for storage in accordance with organisational and task requirements • 3.2 Name and store document and exit application

•

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

SKILL	DESCRIPTION
Reading	• Recognises and interprets information from familiar sources to determine job role and task requirements
Writing	• Produces and amends files to meet task and organisational requirements • Completes required documentation using organisational formats

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- select and use at least three business software applications on two occasions each.

In the course of the above, the candidate must:

- select and use technology safely and according to organisational requirements
- identify and address faults according to requirements.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of:
    - organisation's work health and safety requirements relevant to own role
    - organisation's requirements for file naming and storage
    - applications used for organising electronic information and data.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- electronic files, information and data
- workplace documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS513 Lead WHS risk management

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 5.0.

Application

This unit describes the skills and knowledge required to lead the management of work health and safety (WHS) risks in an organisation. The unit includes facilitating the identification of hazards and potential hazards, leading the assessment of associated risks, selecting and implementing suitable risk controls, and evaluating the overall effectiveness of the organisational WHS risk management process. It involves communicating with stakeholders throughout the process.

The unit applies to those in an organisation who provide specialised knowledge and guidance to a range of personnel when leading the management of WHS risks.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Regulation licensing and risk - Work Health & Safety

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Facilitate identification of WHS risk management requirements	1.1 Identify and review internal and external sources of WHS information and data that apply to risk management processes 1.2 Identify legislative requirements for WHS risk management 1.3 Identify duty holders, individuals and/or parties to consult about and participate in risk management processes, according to organisational and legislative requirements 1.4 Identify and communicate roles and responsibilities of individuals and/or parties that impact on risk management 1.5 Identify organisation-specific factors that will impact on hazard identification, risk assessment and risk controls 1.6 Confirm that risk management scope is clearly defined according to organisational policies and procedures
2. Lead risk assessment	2.1 Lead hazard identification process according to organisational policies and procedures 2.2 Identify and document risk factors as they apply to identified hazards according to organisational policies and procedures 2.3 Apply knowledge of WHS laws, workplace WHS information and data, and identified hazards and risk factors to analyse and assess risk 2.4 Document risk assessment according to organisational policies and procedures, and legislative requirements 2.5 Communicate outcomes of risk assessment to required personnel according to organisational and legislative requirements
3. Lead risk control	3.1 Identify organisational risk control policies and procedures appropriate to identified hazards

© Commonwealth of Australia, 2026 Future Skills Organisation

	3.2 Select suitable risk controls according to assessed level of risk, organisational WHS hazard and risk control policies and procedures, and WHS laws 3.3 Plan to implement selected risk controls according to organisation's WHS management system (WHSMS) and WHS information system (WHSIS) 3.4 Implement selected risk controls according to organisational policies and procedures 3.5 Document and communicate selected risk controls to required personnel, according to organisational and legislative requirements
4. Evaluate effectiveness of WHS risk management process	4.1 Establish nature and scope of evaluation process and key performance indicators 4.2 Review effectiveness of implemented risk management process according to organisation's WHSMS and legislative requirements 4.3 Modify risk management process as required in response to evaluation 4.4 Document risk management process according to WHSIS requirements 4.5 Communicate evaluation findings according to organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Organises, analyses and integrates information from a range of sources
Writing	• Documents results of investigations using clear and comprehensible language and layout
Oral Communication	• Uses listening and questioning techniques to clarify understanding of others' views • Presents information with varying level of technical vocabulary to suit audience
Numeracy	• Collates, interprets and compares mathematical and statistical information relevant to requirements

© Commonwealth of Australia, 2026 Future Skills Organisation

Navigate the world of work	• Considers legal and regulatory responsibilities when implementing, monitoring or reviewing risk-management processes • Leads effective consultation and participation during all stages of WHS risk-management process
Interact with others	• Identifies and uses appropriate conventions and protocols when communicating with others • Plays a lead role in situations requiring effective collaboration skills, demonstrating the ability to guide discussions and outcomes
Get the work done	• Develops plans or processes to manage WHS risk management tasks, with an awareness of how they contribute to operational and strategic goals • Determines whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Applies problem-solving processes to determine solutions to WHS risk management issues • Uses analytical and lateral thinking to review practices and suggest improvements • Uses a range of digitally-based technology and applications to access, organise and share relevant information in effective ways

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for BSBWHS513 Lead WHS risk management

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- plan, implement and evaluate a systematic process for managing work health and safety (WHS) risk in a work area.

During the above, the candidate must:

- identify, interpret and apply information from a range of sources, including organisational and legislative requirements
- review WHS risk-management process according to established scope and key performance indicators
- consult effectively with required stakeholders using appropriate interpersonal communication skills.

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- commonwealth and state/territory WHS laws relating to WHS risk management, including WHS Acts, regulations, codes of practice and standards
- WHS information and data that applies to WHS risk-management process, including:
    - organisational and duty holder legal requirements
    - organisational policies and procedures relating to identifying hazards, assessing risks and implementing risk controls
    - key components of the work health and safety management system (WHSMS)
- internal and external sources of WHS information and data, and procedures for accessing them
- organisational behaviour and culture in relation to WHS risk management activities and their impact on WHS and the work team, including organisation’s risk appetite
- key components of effective consultation and participation strategies

© Commonwealth of Australia, 2026 Future Skills Organisation

- tools and techniques to:
    - identify health and safety hazards
    - assess risks, taking into account nature and impact of risk, and likelihood of risk arising
    - identify and select suitable risk controls
    - facilitate effective communication and consultation processes, and identify key personnel related to communication
- application and limitations of techniques and tools for identifying hazards, and analysing and assessing risks
- hierarchy of control measures:
    - its use in establishing level of risk
    - factors limiting effectiveness of types of controls
    - role and limitations of procedural controls
    - use of personal protective equipment
- other functional areas in the organisation that impact on the management of WHS-related risks
- impact of workforce characteristics and composition on WHS risk and its management, including:
    - cultural background/diversity
    - gender
    - labour market changes
    - levels of language, literacy and numeracy skills in the workforce
    - workforce structure and organisation, including part-time, casual and contract workers, shift rosters and geographical location
    - workers with specific support needs and limitations
    - workplace cultural attitudes towards alcohol and other drug use
- principles of decision-making.

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- case studies and, where possible, real situations

© Commonwealth of Australia, 2026 Future Skills Organisation

- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS516 Contribute to developing, implementing and maintaining an organisation's WHS management system

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 5.0.

Application

This unit describes the skills and knowledge required to contribute to the development, implementation and maintenance of elements of a work health and safety management system (WHSMS). WHSMSs support organisations in systematically managing work health and safety (WHS) in the workplace. WHSMSs consist of a documented set of plans, actions and procedures that target improvements.

The unit applies to those with organisational responsibilities for contributing to tasks in relation to elements of a WHSMS appropriate to the nature and scale of the organisation and its WHS risks. These people will have supervisory responsibilities, work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements	Performance criteria
Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element.*
1. Contribute to developing WHSMS	1.1 Access and analyse sources of information to determine required form, content, purposes and functions of WHSMS 1.2 Identify duty holders and their roles and responsibilities in WHSMS, according to WHS laws 1.3 Document organisational WHSMS that meets legal and organisational requirements 1.4 Consult with individuals and parties about what the WHSMS should include and integrate their feedback as required 1.5 Communicate information about WHSMS to required personnel
2. Contribute to developing WHSMS implementation plan	2.1 Identify key components of plan that meet legal and organisational requirements 2.2 Facilitate and support consultation with, and participation of, required personnel in plan development 2.3 Contribute to developing draft plan according to organisational policies and procedures 2.4 Seek feedback on draft plan 2.5 Finalise and record plan according to organisational policies and procedures
3. Support implementation of WHSMS	3.1 Consult with colleagues on WHSMS implementation and agree on required timeframe and resources 3.2 Communicate benefits of WHSMS and agree on management roles and responsibilities in supporting its implementation

© Commonwealth of Australia, 2026 Future Skills Organisation

	3.3 Identify and address potential barriers to WHSMS implementation according to organisational policies and procedures
4. Contribute to measuring and evaluating WHSMS performance	4.1 Communicate requirements for measuring and evaluating WHSMS performance to required personnel according to organisational requirements 4.2 Facilitate and support consultation with, and participation of, required personnel in measuring and evaluating WHSMS performance 4.3 Evaluate WHSMS performance outcomes according to established protocols 4.4 Analyse and document outcomes of evaluation process
5. Contribute to review of WHSMS	5.1 Gather and analyse required review documentation according to organisational policies and procedures 5.2 Facilitate and support consultation with, and participation of, required personnel to identify opportunities to improve WHSMS 5.3 Contribute to identifying required changes to WHSMS 5.4 Contribute to adjusting WHSMS as required according to organisational policies and procedures 5.5 Seek approval of updated WHSMS from required personnel 5.6 Distribute information about approved updated WHSMS according to organisational policies and procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	• Identifies, interprets and critically analyses texts in relation to WHSMS information and WHSMS review documentation
Writing	• Matches style of writing to purpose and audience in consulting, developing and communicating WHSMS and WHS policy

© Commonwealth of Australia, 2026 Future Skills Organisation

	• Uses appropriate layout, vocabulary, grammatical structure and conventions in consulting, developing and communicating WHSMS and WHS policy
Oral communication	• Presents information about WHSMS and WHS policy using structure and language appropriate to the audience • Uses questions and active listening to extract main ideas, gather information and feedback, and seek and offer opinions
Numeracy	• Selects from and applies an expanding range of mathematical and problem-solving strategies in relation to WHSMS measurement and evaluation
Navigate the world of work	• Accepts responsibility for developing, implementing or modifying workplace policies and procedures applicable to WHSMS • Keeps up to date on changes to WHS laws and regulations relevant to own role and responsibilities, and considers their implications when negotiating, planning and undertaking work
Interact with others	• Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	• Sequences and schedules activities, monitors implementation and manages relevant communication in relation to WHSMS planning • Uses systematic and analytical processes in non-routine situations, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria in review and evaluation of WHSMS • Uses digital systems and tools in the context of plan implementation and measurement, and evaluation of WHS performance

Modification History

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- contribute to developing, implementing, reviewing and improving a work health and safety management system (WHSMS) for an organisation.

During the above, the candidate must:

- communicate and explain the WHSMS and associated implementation plan to others to facilitate their contribution and ensure their commitment to the system
- apply effective consultation and communications processes and protocols
- use suitable and sufficient tools to measure and evaluate WHSMS performance.

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- commonwealth and state/territory WHS laws, guidance material and publications relating to developing and implementing WHSMS
- organisational requirements for WHSMS:
    - commitment from line management and supervisors to provide leadership in WHS and prioritise WHS as part of operational planning and activity
    - compliance with required policies, procedures, processes, and tools
    - requirements for recordkeeping that address WHS, privacy and other relevant legislation
- elements of effective WHSMS with reference to required commonwealth and state/territory WHS Acts, regulations, codes of practice and standards, including:
    - policies and procedures
    - WHSMS certification standards

© Commonwealth of Australia, 2026
Future Skills Organisation

    - duty holders and their responsibilities
    - consultation and communication arrangements
    - required training and induction
    - WHS risk assessment, including risk controls
    - sources of information to determine required form, content, purposes and functions of WHSMS to be developed and implemented
- key components of WHSMS plan:
    - required resources to implement plan within set timeframes
    - management roles and responsibilities in supporting WHSMS implementation and operation
    - roles and responsibilities of individuals and parties under WHS laws
    - procedures, protocols and tools for measuring WHS performance, including WHS-related lead and lag key performance indicators (KPIs)
- barriers to implementing WHSMS, and strategies to address them
- benefits to an organisation of having a WHSMS, and an integrated return-to-work and injury management program
- instruments issued by WHS regulators and how they apply to the organisation
- duties, rights and obligations of individuals and parties under WHS laws.

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment and resources
- WHS laws, and organisational policies and procedures required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

Release	Comments
1	This unit of competency was first released in BSB Business Services Training Package Release 7.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, draft and finalise three different complex documents that convey the required information in a format suitable for the intended audience and purpose according to organisational policies and procedures for document production.

In the course of the above, the candidate must:

- review and analyse a range of information sources
- use business technology to apply formatting and incorporate graphics
- apply organisation style guide/house style.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisation style guide/house style
- format and its impact on readability, cohesion and appearance of document
- categories and logical sequences of information
- rules and conventions for written English
- key features of word processing software
- key features of written communication methods, including:
    - general emails
    - procedures
    - business letters
    - meeting agendas
- organisational policies and procedures relating to written communication
- process for checking:

Modification History

Release	Comments
1	This unit of competency was first released in CHC Community Services Release 2.0.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- undertaken a structured process to reflect on own perspectives on diversity
- recognised and respected the needs of people from diverse social and cultural backgrounds in at least 3 different situations:
    - selected and used appropriate verbal and non verbal communication
    - recognised situations where misunderstandings may arise from diversity and formed appropriate responses

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- concepts of cultural awareness, cultural safety and cultural competence and how these impact different work roles
- concepts and definitions of diversity
- own culture and the community attitudes, language, policies and structures of that culture and how they impact on different people and groups
- features of diversity in Australia and how this impacts different areas of work and life:
    - political
    - social
    - economic
    - cultural
- legal and ethical considerations (international, national, state/territory, local) for working with diversity, how these impact individual workers, and the consequences of breaches:

    - discrimination:
        - age
        - disability
        - racial
        - sex
    - human rights:
        - *Universal declaration of human rights*
        - relationship between human needs and human rights
        - frameworks, approaches and instruments used in the workplace
    - rights and responsibilities of workers, employers and clients, including appropriate action when rights are being infringed or responsibilities not being carried out
- key areas of diversity and their characteristics, including:
    - culture, race, ethnicity
    - disability
    - religious or spiritual beliefs
    - gender, including transgender
    - intersex
    - generational
    - sexual orientation/sexual identity - lesbian, gay, bisexual, heterosexual
- key aspects, and the diversity, of Australia's Aboriginal and/or Torres Strait Islander cultures, including:
    - social, political and economic issues affecting Aboriginal and/or Torres Strait Islander people
    - own culture, western systems and structures and how these impact on Aboriginal and/or Torres Strait Islander people and their engagement with services
- potential needs of marginalised groups, including:
    - protective factors
    - physical, mental and emotional health issues/care needs
    - consideration of impacts of discrimination, trauma, exclusion and negative attitudes
- resources that support individuals and organisations to embrace and respond to diversity
    - language and cultural interpreters
    - imagery

- influences and changing practices in Australia and their impact on the diverse communities that make up Australian society
- impact of diversity practices and experiences on personal behaviour, interpersonal relationships, perception and social expectations of others

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPCBIM4001 Plan to comply with BIM requirements for construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to recognise a project's Building Information Modelling (BIM) requirements and plan subsequent activities related to own construction work. It includes preparing the tools and technologies required to enable digital processes such as accessing and comparing 2D drawings and 3D models and related data.

The unit applies to builders, tradespersons, project and site managers who work on construction projects that incorporate BIM interaction, collaboration and deliverables. It requires digital literacy skills to use software via information and communication technology (ICT), including applications on mobile devices to find, retrieve and communicate information.

A person who has achieved this unit of competency is able to work with autonomy and take responsibility for applying BIM processes to construction work.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Business information modelling

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine BIM requirements for construction work activities.	1.1	Access and interpret BIM Execution Plan to clarify BIM uses for construction project, specific work standards and methodologies.
		1.2	Identify any gaps in the BIM Execution Plan relating to BIM activities required or already incorporated in the construction project.
		1.3	Access, interpret and clarify available drawings, data and models within Common Data Environment (CDE) for collaborative project requirements.
		1.4	Identify BIM tools and technologies required to comply with BIM Execution Plan.
		1.5	Clarify BIM-required communication methods, roles and responsibilities of self and other project participants detailed in BIM Execution Plan.
2	Prepare BIM tools and technologies.	2.1	Access tools and technologies required to fulfil the BIM uses, standards and methodologies according to BIM Execution Plan.
		2.2	Set up BIM tools and technologies according to project requirements.
		2.3	Review BIM tools and technologies to ensure correct operation and interoperability with BIM systems for construction work.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Access and compare 2D and 3D construction information.	3.1	Access 2D drawings, 3D model and data relevant to construction work.
		3.2	Use BIM tools and technologies to navigate and interpret 3D model and data, conduct measurements, enquire and extract data and quantities required for construction work.
		3.3	Compare 3D model and data against 2D drawings to clarify understanding of requirements for planned construction work.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- digital literacy skills to use software via ICT, including applications on mobile devices to find, retrieve and communicate information.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCBIM4001 Plan to comply with BIM requirements for construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by planning to ensure that construction work activities comply with Building Information Modelling (BIM) project requirements specified in a BIM Execution Plan and, in doing so:

- use at least two different BIM technologies (tools and software)
- identify own role and responsibilities and that of three other participants in the BIM workflow and detailed in the BIM Execution Plan, including their relationship to the identified BIM uses
- access one 3D model and associated data within a Common Data Environment (CDE) and relevant to planned construction work activities.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- definition and purpose of BIM and its benefits and limitations relating to the lifecycle management of built assets
- common BIM definitions and terminology
- common BIM tools and technologies
- BIM uses relevant to construction phases
- commonly understood meanings of 3D, 4D, 5D and 6D relating to BIM
- benefits of BIM in improving construction efficiency and safety:
    - planning, scheduling and sequencing
    - services and trades coordination
    - fabrication and assembly
    - resource procurement

© Commonwealth of Australia, 2026 BuildSkills Australia

    - accurate ordering of materials and quantities
- BIM maturity levels
- BIM adoption barriers
- BIM project delivery methods
- BIM standards relevant to planned construction work, including the BIM ISO 19650 *Organization and digitization of information about buildings and civil engineering works, including building information modelling (BIM)* - Information *management using building information modelling* (or its successor)
- graphical and data communication methods when working with BIM
- level of information need, incorporating definitions of level of development (LOD) and level of information (LOI) relevant to BIM project requirements
- meaning and benefits of visual communication and extended reality technologies during the construction phase of a BIM project
- meaning and purpose of 'digital twin', its relationship with BIM, and its context within the facets of the operations and maintenance phase
- meaning of open formats as distinct from proprietary formats and their role in interoperability and archiving of project information
- purpose and content of BIM Execution Plans and their relationship to project information requirements
- role of the CDE in managing project information
- roles and responsibilities of BIM project participants across multiple disciplines.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation and technologies required to achieve the performance criteria and performance evidence.

CPCBIM4002 Use BIM processes to carry out construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to use Building Information Modelling (BIM) processes to carry out construction work. It includes using 2D drawings and 3D models and related data to clarify construction work requirements, coordinate models and manage risks associated with planned construction work and schedule, and sequence work activities and resources.

The unit applies to builders, tradespersons, project and site managers who work on construction projects that incorporate BIM interaction, collaboration and deliverables. It requires digital literacy skills to use software via information and communication technology (ICT), including applications on mobile devices to find, retrieve and communicate information.

A person who has achieved this unit of competency is able to work with autonomy and take responsibility for applying BIM processes to construction work.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for construction work.	1.1	Identify reporting and documentation processes and protocols to comply with BIM Execution Plan and workplace requirements.
		1.2	Identify project participants and clarify roles and responsibilities relevant to planned construction work to meet BIM Execution Plan and workplace requirements.
		1.3	Interpret 2D drawings and 3D model and data to clarify scope of construction work and check information to confirm currency.
		1.4	Access and assess other documentation related to construction work to ensure full understanding of activities, timeframes and regulatory compliance requirements.
2	Manage risks associated with construction work.	2.1	Use BIM tools and technologies to create and test virtual construction models and detect coordination issues, including clashes associated with planned construction work.
		2.2	Use BIM tools and technologies to detect work health and safety (WHS) and regulatory compliance risks associated with planned construction work.
		2.3	Consult with project participants to discuss and agree strategies to resolve coordination issues and mitigate risks.
		2.4	Implement actions required to resolve coordination issues and mitigate risks associated with planned construction work in accordance with workplace requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Schedule and sequence construction work requirements.	3.1	Use BIM data to sequence construction work activities to achieve required efficiencies and compatibilities with other construction disciplines.
		3.2	Use BIM data to schedule equipment and resources to meet construction work timeframes in accordance with workplace requirements.
		3.3	Document and communicate construction work requirements to project participants to meet BIM Execution Plan and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- digital literacy skills to use software via ICT, including applications on mobile devices to find, retrieve and communicate information.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCBIM4002 Use BIM processes to carry out construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by using Building Information Modelling (BIM) processes, including at least two different BIM technologies (tools and software) to carry out construction work and, in doing so:

- create and test at least two virtual construction (design) models within the same federated space
- detect coordination and clashing in the federated model based on two different criteria
- detect two work health and safety (WHS) or regulatory compliance risks associated with planned construction work by using a 3D model and visual communication tools
- consult with two other project participants to discuss and agree strategies to resolve model coordination issues and mitigate risks
- analyse and communicate a construction activity using 4D modelling methods.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- BIM project delivery methods
- BIM standards relevant to planned construction work including the BIM ISO 19650 *Organization and digitization of information about buildings and civil engineering works, including building information modelling (BIM)* – Information *management using building information modelling* (or its successor)
- BIM uses relevant to construction phases
- common BIM tools and technologies
- graphical and data communication methods when working with BIM

© Commonwealth of Australia, 2026 BuildSkills Australia

- meaning and benefits of visual communication and extended reality technologies during the construction phase of a BIM project
- methods for confirming currency of construction documentation and data
- methods for scheduling equipment and resources for construction work
- methods for sequencing construction work to achieve efficiencies across multi-disciplinary construction projects
- purpose and content of BIM Execution Plans and their relationship to project information requirements
- purpose of virtual construction models and methods for detecting construction coordination issues and other project risks
- role of the Common Data Environment (CDE) in managing project information
- roles and responsibilities of BIM project participants across multiple disciplines
- types of drawings, models and documentation used when conducting construction work that is part of a BIM project
- 4D modelling techniques to record and represent information about the construction sequence
- workplace requirements for conducting construction work using BIM processes:
    - compliance with relevant regulations and standards
    - WHS
    - quality control procedures
    - reporting and documentation.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation, technologies, equipment and other resources required to achieve the performance criteria and performance evidence.

CPCBIM4003 Contribute to BIM deliverables for construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to contribute to Building Information Modelling (BIM) deliverables for construction work. It includes confirming handover requirements and deliverables, validating data for completed work, capturing data to record as-built conditions, and contributing information to enable a digital handover.

The unit applies to builders, tradespersons, project and site managers who work on construction projects that incorporate BIM interaction, collaboration and deliverables. It requires digital literacy skills to use software via information and communication technology (ICT), including applications on mobile devices to find, retrieve and communicate information.

A person who has achieved this unit of competency is able to work with autonomy and take responsibility for applying BIM processes to construction work.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Confirm deliverables and handover requirements.	1.1	Check plans and relevant documentation to clarify project deliverables and handover requirements to comply with BIM Execution Plan.
		1.2	Prepare documentation necessary to enable model-based collaboration between project participants.
		1.3	Consult with project participants to confirm project deliverables, including asset identifiers, tagging, classification and other requirements for digital handover.
2	Validate project information for completed construction work.	2.1	Check completed construction work to confirm compliance with plans, specifications and BIM Execution Plan.
		2.2	Input information and data required to complete asset register and comply with project requirements for model and data deliverables.
		2.3	Verify currency and format of Common Data Environment (CDE) information and data associated with completed construction work to meet requirements of BIM Execution Plan.
		2.4	Implement actions required to address problems with data capture, information currency or format to meet BIM Execution Plan.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Finalise handover for construction work.	3.1	Capture data to record ‘as-built’ conditions according to BIM Execution Plan and workplace requirements.
		3.2	Contribute information to enable digital handover to be finalised to meet BIM Execution Plan, performance, quality, commissioning, regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- digital literacy skills to use software and applications on mobile devices to find, retrieve and communicate information.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCBIM4003 Contribute to BIM deliverables for construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit contributing to Building Information Modelling (BIM) deliverables for completed construction work in compliance with project requirements specified in a BIM Execution Plan and, in doing so:

- use at least two different BIM technologies (tools and software)
- identify and correct two problems associated with data capture, information currency and/or format.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- BIM project delivery methods
- BIM standards relevant to planned construction work, including the BIM ISO 19650 *Organization and digitization of information about buildings and civil engineering works, including building information modelling (BIM)* - Information *management using building information modelling* (or its successor)
- BIM uses relevant to construction phases
- common BIM tools and technologies
- common methods for identifying assets in a BIM asset register
- documentation used to enable model-based collaboration between project participants
- graphical and data communication methods when working with BIM
- meaning and benefits of visual communication and extended reality technologies during the construction phase of a BIM project
- meaning and purpose of ‘digital twin’, its relationship with BIM, and its context within the facets of the operations and maintenance phase

© Commonwealth of Australia, 2026 BuildSkills Australia

- meaning of open formats as distinct from proprietary formats and their role in interoperability and archiving of project information
- methods for confirming currency of construction documentation and data
- purpose and content of BIM Execution Plans and their relationship to project information requirements
- purpose and components of the Project Information Model (PIM) that can be expected at handover from using BIM tools and workflows for construction projects
- purpose and identification and classification to elements of a BIM model
- role of the Common Data Environment (CDE) in managing project information
- roles and responsibilities of BIM project participants across multiple disciplines
- types of drawings, models and documentation used for a BIM handover
- workplace requirements for finalising construction work to comply with BIM project requirements:
    - compliance with relevant regulations and standards
    - documentation
    - quality control

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation, technologies, equipment and other resources required to achieve the performance criteria and performance evidence.

CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Typographical error corrected in the Knowledge Evidence. Word 'detects' corrected to read 'defects'.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to the National Construction Code (NCC) Classes 1 and 10 buildings, to a maximum of two storeys. It includes knowledge of the structure of the NCC, as well as the ability to access relevant information from the code as applicable to various building projects.

It applies to builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards related to residential construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Classify building.	1.1	Determine nature of building, its use and arrangement from construction plans and specifications.
		1.2	Access, read and interpret relevant Australian Standards and codes for residential building and construction projects.
		1.3	Define classification of building from the NCC.
		1.4	Identify and interpret multiple classifications from the NCC.
2	Determine construction compliance requirements.	2.1	Identify NCC Performance Requirements relevant to Class 1 and 10, up to two storeys, building projects.
		2.2	Determine range of criteria to ensure that construction methods comply with NCC Performance Requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Identify and document non-conforming construction methods against NCC Performance Requirements.
		2.4	Propose and discuss Performance Solution with design and building and construction professionals.
		2.5	Analyse and apply Assessment Methods to determine compliance with Performance Solution or Deem-to-Satisfy Solution (DTS).
		2.6	Meet the evidence of suitability requirements for building materials and products stated in the NCC.
		2.7	Complete relevant documentation to meet NCC requirements.
1	Determine fire protection requirements.	3.1	Identify NCC and other legislative requirements for passive and active fire control elements in buildings.
		3.2	Determine level of fire resistance required for the construction of various buildings.
		3.3	Check existing buildings for compliance with passive and active fire protection requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- problem-solving skills to:
  - analyse non-conforming construction methods, define key problem and produce appropriate solution
  - seek clarification of appropriate solution to meet construction method compliance
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others

© Commonwealth of Australia, 2026 BuildSkills Australia

- use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4001 Apply building codes and standards to the construction process for Class 1 and 10 buildings

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Typographical error corrected in the Knowledge Evidence. Word 'detects' corrected to read 'defects'.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying codes and standards to the construction process of one Class 1 or 10 building project, to a maximum of two storeys.

In doing this, the candidate must:

- determine type of construction and use of building from construction plans and specifications and class of building using National Construction Code (NCC) classifications
- identify current building and construction codes and Australian Standards relevant to the building project
- apply NCC Performance Requirements in relation to the design and construction of the building:
    - energy efficiency
    - damp and weatherproofing
    - fire safety
    - health and amenity
    - structure
    - safe movement and access

© Commonwealth of Australia, 2026
BuildSkills Australia

    - ancillary provisions
- apply Performance Solutions to ensure that construction complies with NCC Performance Requirements
- identify faults and problems and propose actions to rectify
- inspect a building to determine fire protection compliance with NCC and other legislative requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building legislation, codes and standards:
    - the NCC:
        - Performance Requirements and General Requirements
        - Performance Solutions and Assessment Methods
        - Performance Hierarchy
        - evidence of suitability for building materials and products
        - classes of building and types of construction
- organisational policies and procedures, quality systems and best practice approaches
- workplace safety requirements
- properties, characteristics and limitations of specified building materials and components
- processes, procedures and techniques of construction
- basic building design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- causes and implications of building defects related to failure of applying building codes and standards to residential and commercial buildings
- extent of remedial work required for various defects cause by inadequate design and application of building codes and practices
- environmental requirements and sustainability principles and concepts
- project plans, specifications, working drawings and structural details
- construction terminology.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

© Commonwealth of Australia, 2026 BuildSkills Australia

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction regulations
- current building and construction codes and standards
- NCC Volume 2
- construction drawings, site plans and specifications
- organisational policies and procedures and other quality documentation to undertake the performance criteria and assessment requirements
- digital technology devices, applications and software to source and document information.

CPCCBC4002 Manage work health and safety in the building and construction workplace

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Typographical error in Element and Performance Criteria 2.4 corrected.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to inspect workplaces for hazards and conduct work health and safety (WHS) risk analyses. It includes the development and implementation of appropriate responses to mitigate risks to meet government legislation and regulations.

This unit of competency applies to builders, site managers and forepersons who are responsible for the management of risk in building and construction workplaces.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Assess workplace risk.	1.1	Evaluate construction site safety and identify potential risk areas.
		1.2	Assess on site worker’s health and safety.
		1.3	Identify hazards and determine control measures that comply with legislative requirements and organisational policies.
		1.4	Consult with workers to evaluate effectiveness of existing control measures and WHS experts, as necessary, to contribute to an inspection report.
		1.5	Complete a workplace inspection report with recommended actions to minimise workplace incidents and mitigate risk.
2	Establish and implement safety plans.	2.1	Establish a workplace safety plan incorporating information from the workplace inspection report to raise safety awareness and support safe workplace practices.
		2.2	Implement processes to identify hazards, rate the risks and put control measures in place.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Establish educational programs specific to the building and construction workplace to ensure workers carry out safe work practices.
		2.4	Negotiate and resolve safety issues and conflicts.
3	Monitor workplace safety.	3.1	Monitor and audit workplace safety to ensure compliance with WHS regulations and workplace safety requirements.
		3.2	Record findings and recommend and implement actions to address non-compliance.
		3.3	Review effectiveness of educational programs to ensure all workers have been inducted and maintain safe work practices.
		3.4	Monitor, review and document effectiveness of control measures to determine changes and improvements as required.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4002 Manage work health and safety in the building and construction workplace

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Typographical error in Element and Performance Criteria 2.4 corrected.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting a workplace safety audit for a construction worksite.

In doing this, a candidate must:

- access and interpret relevant government work health and safety (WHS) legislation and regulations
- identify faults, problems and non-compliances and their impact on workplace safety
- introduce safety systems allowing for ease of reporting safety issues, controlling hazards and maintaining worker safety and competence.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- current WHS Acts and regulations
- relevant safety codes, standards and guidelines
- organisation’s workplace safety policies and procedures:
    - workplace safety and reporting requirements
- inspection, auditing and investigation processes
- hazards arising from:
    - high-risk construction work:

- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract, integrate and compile information.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

© Commonwealth of Australia, 2026 BuildSkills Australia

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- WHS legislation and regulations
- safety codes, standards and guidelines
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- workplace incident data and incident reports
- business equipment to collect and record data, and produce reports
- digital devices, applications and software to research, transmit and receive information electronically.

CPCCBC4003 Select, prepare and administer a construction contract

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Performance Criteria 3.1 updated to provide clarity.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Typographical error in Element and Performance Criteria 3.3 corrected.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to select, prepare and administer contracts for commercial and residential construction projects. It includes contract selection, administration of a range of documents related to the contract and identifying causes of breach of contract.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

It applies to builders, estimators and project and site managers who interpret complex documents and communicate clearly and succinctly during contract negotiations.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for selecting and preparing construction contracts.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

© Commonwealth of Australia, 2026 BuildSkills Australia

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
	Identify and analyse business contracts.	1.1	Recognise various types of building and construction contracts, their legal requirements and application.
		1.2	Analyse the importance of the intention to create legal relations.
		1.3	Read and interpret essential contract elements, terms, sections and clauses of a valid construction contract.
		1.4	Evaluate rights, obligations and liabilities of all parties.
		1.5	Identify and analyse circumstances that constitute a breach of contract.

© Commonwealth of Australia, 2026 BuildSkills Australia

		1.6	Identify factors involved in the termination of contracts.
		1.7	Identify legislative requirements and procedures.
2	Select appropriate contract.	2.1	Communicate clearly and directly with all parties to confirm the capacity to form a binding agreement.
		2.2	Prepare and compile the range of documents that collectively make up the contract.
		2.3	Establish factors and special conditions associated with the parties' consent to a contract.
		2.4	Recognise and apply the requirements associated with an offer and acceptance of a contract.
		2.5	Select a contract appropriate to the type of construction.
3	Prepare the contract.	3.1	Prepare selected contract draft with relevant details, in consultation with relevant personnel and in accordance with the accepted processes of the organisation and legal requirements.
		3.2	Assess and schedule progress payments, including processes for applying for extension of time.
		3.3	Ensure any discrepancies or disagreements are resolved prior to contract preparation.
		3.4	Ensure legality and validity of draft contract in consultation with relevant persons.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.5	Prepare final contract in accordance with the organisation's legal process.
4	Administer the contract.	4.1	Process progress payments accurately as due under the contract.
		4.2	Process applications for extension of time in accordance with organisational policies and contract conditions.
		4.3	Identify, negotiate and document variations to contract.
		4.4	Act to minimise liquidated damages or penalties nominated in the contract.
		4.5	Administer contract and resolve contractual disputes in accordance with contract and relevant legislation and regulations.
		4.6	Assess conditions for issuing a final certificate.
5	Finalise a contract.	5.1	Apply process for practical completion of contract.
		5.2	Finalise defects liability under a building or construction contract.
		5.3	Finalise contract in accordance with relevant legislation and contract provisions.
		5.4	Issue appropriate certificate upon completion of the contract work.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.5	Complete and secure documentation arising from finalisation of a contract for records purposes.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting, preparing and administering one contract for a construction project.

In doing this, the candidate must:

- select the correct contract by analysing identified legislative requirements and construction type
- prepare the construction contract specifying requirements for contract termination and special conditions agreed by all parties
- administer the contract following government legal and regulatory requirements and to the organisation’s standards
- monitor price and time variations and negotiate with various parties to resolve contract anomalies
- collect all related construction contract and final inspection documentation and issue completion certificate.

© Commonwealth of Australia, 2026 BuildSkills Australia

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian legal system and its relevance to contracts
- various types of housing and construction industry contracts and the circumstances they cover
- definitions and interpretations commonly applied to contracts
- Australian Standards
    - *AS2124 General conditions of contract,* and
    - *AS4000 General conditions off contract* series
- relationships between the organisation and its clients
- range of documents associated with a contract:
    - equipment, site accommodation and services information
    - human resource projections
    - materials lists
    - construction drawings and specifications
    - project timelines
    - schedules
- digital tools and devices to communicate and collaborate effectively with others
- range of digitally-based technology and applications to access, extract, integrate and compile information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction and contract legislation
- current building and construction codes and standards
- relevant construction industry contracts
- construction drawings and specifications
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements

CPCCBC4004 Identify and produce estimated costs for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to establish estimated costs associated with the acquisition of materials and labour for building and construction projects. It includes factoring in relevant overhead costs and margins.

This unit of competency applies to estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Establish project requirements.	1.1	Read and interpret construction drawings and specifications in conjunction with relevant building and construction regulations, codes and standards.
		1.2	Identify building site features, type of building and method of construction, and specified building materials.
		1.3	Establish site facilities, and communication and temporary boundary fencing requirements.
		1.4	Identify waste removal requirements and apply waste management site fees.
		1.5	Identify additional project-specific statutory, approvals or compliance costs.
2	Calculate materials and labour costs.	2.1	Produce a materials and consumables quantity list and obtain a price from supplier.
		2.2	Identify and estimate off-site production costs, including delivery.
		2.3	Identify numbers of contractors, sub-contractors and employees appropriate for the project and work rates.
		2.4	Estimate labour hours and calculate labour costs, including on-costs and worker insurance costs.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Identify type and cost of physical resources.	3.1	Identify physical resources required for the project.
		3.2	Determine limitations, conditions, operational costs and timeframes for hire of physical resources.
		3.3	Obtain supplier prices, including transport of physical resources.
		3.4	Identify, itemise and cost plant, equipment and machinery.
4	Produce estimated project costs.	4.1	Review and compile materials, consumables and off-site production costs and delivery charges.
		4.2	Compile labour costs inclusive of rates and entitlements.
		4.3	Compile costs of physical resources.
		4.4	Apply organisational overhead recovery and margins.
		4.5	Produce estimated project costs for inclusion in a tender or bill.
		4.6	Manage and mitigate risks associated with estimating project costs.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCBC4004 Identify and produce estimated costs for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by estimating the cost of one residential or commercial building and construction project.

In doing this, the candidate must:

- estimate project costing from construction drawings, specifications and written information
- list physical resources appropriate for the construction of the project
- produce project cost using an appropriate software program.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction regulations
- building and construction standards and codes
- the National Construction Code (NCC)
- organisational policies and procedures
- organisational scope, processes and requirements for using employee and subcontractor labour
- Environmental Protection Authority (EPA) regulations
- construction drawings and specifications
- relevant physical resources and requirements for their operations:
    - earth moving and excavation equipment
    - hoists and lifting equipment
    - mobile cranes

© Commonwealth of Australia, 2026 BuildSkills Australia

    - compressors
    - generators
    - pumps
- calculating unit costs:
    - construction cost per square metre
    - laying of foundation per metre
    - laying of slabs per square metre
    - masonry walls per square metre
    - laying of steel tray roofing per square metre
    - installation of pipes per metre
    - installation of sanitary ware per unit
    - tiling per square metre
    - painting per square metre
- a range of digitally-based technology and applications to estimate quantities, calculate costs and maintain records
- workplace procedures, workplace safety and environmental requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- building and construction standards and codes
- government building and construction regulations
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- calculating technology, online applications and software to produce building and construction costs.

CPCCBC4005 Produce labour and material schedules for ordering

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to produce schedules for physical and human resources and materials for residential or commercial projects. It includes monitoring project schedules and tracking and recording costs as they are incurred.

This unit of competency applies to site managers and forepersons, estimators, project managers and builders in the construction industry with responsibility for producing schedules for ordering materials and allocating labour.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Assess physical and human resource requirements.	1.1	Check conditions of approval from local government and regulatory bodies and project commencement dates.
		1.2	Identify variations to scope of works and contractual terms and arrangements by the client.
		1.3	Compile a list of nominated and approved suppliers and contractors and develop channels for effective communication.
		1.4	Confirm availability of materials with suppliers and labour with contractors.
		1.5	Enter critical project information into project schedule.
2	Produce schedules.	2.1	Prepare electronic call forward sheet and site files containing necessary site documentation.
		2.2	Break down project into stages and tasks and set milestones and timeframes for commencement and completion.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Itemise materials and labour required for the stages of construction.
		2.4	Sequence material delivery dates and commencement times for labour.
		2.5	Factor in unplanned delays.
1	Monitor project costs and maintain project files.	3.1	Monitor construction stage progression costs and approved variation costs against estimated project cost.
		3.2	Manage and monitor project progress against scheduled timelines.
		3.3	Record unscheduled and approved variations, changes to the approved plan and specifications and delays to the project.
		3.4	Resolve issues, within scope of responsibilities, and maintain a cost analysis against final estimated project cost.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital devices to communicate and collaborate effectively with suppliers, contractors and others
  - use equipment and programs to prepare and access electronic call forward sheets and files.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by producing a schedule for the ordering of materials and allocation of labour for a residential or commercial building and construction project.

In doing this, the candidate must:

- produce a labour and materials schedule across the life of the project
- develop and manage efficient communications between staff, contractors and suppliers
- monitor, maintain and record project progress and variations, estimated and increased costs and changes to construction drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation and regulations
- building and construction codes and standards
- construction drawings and specifications
- building and construction contractor and supplier contracts
- local authority building application processes, approval and conditions
- organisational policies and procedures:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - costing and ordering materials
    - selecting and engaging suppliers
    - approving and contacting contractors
- projects costs:
    - organisational and subcontractor labour
    - organisation overheads
    - public liability, professional indemnity and workers' compensation
    - temporary electrical, plumbing and draining services
    - temporary site facilities, storage facilities and boundary fencing
    - communications
    - project administration
- workplace procedures, workplace safety and environmental requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- relevant organisational policies and procedures
- various construction industry contracts
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to set up electronic call forward sheets, compile site files and create channels of communication with internal and external stakeholders.

CPCCBC4006 Select, procure and store construction materials for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to supervise the systems through which construction materials are typically selected, acquired and stored on site for residential and commercial building and construction projects. It includes knowledge of relevant building and construction materials and technologies, environmental effects on materials and identifying non-compliant materials to ensure the delivered construction materials meet National Construction Code (NCC) requirements and contract and service specifications.

It applies to NCC classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys and
- Commercial - Class 2 to 9, Type C only constructions.

It applies to builders, managers and industry professionals responsible for applying quality standards when procuring and supervising on-site storage of compliant construction materials.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify and evaluate building materials.	1.1	Identify and read current and relevant project plans, specifications, codes and construction requirements.
		1.2	Identify properties of specified materials and assess their suitability for the building project in the region.
		1.3	Evaluate materials based on their quality, compatibility and compliance.
		1.4	Establish environmental impacts of materials.
		1.5	Determine impact of allowable tolerances on the conversion of naturally occurring materials.
		1.6	Establish material assembly and installation tolerances to meet requirements of relevant construction industry standards.
2	Select and procure building material.	2.1	Select materials that are structurally adequate and appropriate for the building system specified in the contract.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Select materials for their safety, fire resistance rating, suitability, durability, serviceability and cost effectiveness.
		2.3	Consider short and long-term degradation of materials in relation to the building's proposed life cycle.
		2.4	Evaluate and consider alternative materials if specified materials are unavailable or unsuitable.
		2.5	Finalise selection of materials for use in accordance with contractual requirements and in consultation with relevant professionals and the client.
		2.6	Procure and order materials following organisation’s purchasing requirements.
		2.7	Collect evidence of suitability from suppliers or manufacturers to ensure non-compliant materials are not used.
1	Supervise on-site delivery and storage of materials.	3.1	Determine limitations and effects of transportation on materials and components and take action to limit potentially damaging circumstances.
		3.2	Check delivered materials are compliant with specifications, are not damaged and correspond with delivery order.
		3.3	Allocate on-site storage space, supervise safe handling of materials and ensure the security and protection of materials to meet manufacturer specifications.
		3.4	Implement processes for inspecting all materials delivered on site for quantity, quality, defects, or damage and store safely.
		3.5	Inform relevant persons of actions relating to quality and inconsistencies of delivered building materials.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.6	Instruct relevant persons of established workplace safety requirements when accepting and storing delivered materials.
		3.7	Maintain records of deliveries, damaged and inferior materials and variations to specified materials.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation
- communication skills to:
  - use written and verbal communication with manufactures and suppliers, and other building professionals.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4006 Select, procure and store construction materials for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting, procuring and supervising the delivery and on-site storage of materials for one construction project for a residential or commercial building up to a maximum of two storeys.

In doing this, the candidate must:

- analyse reports, manufacturer specifications and other reference material regarding material technologies, sustainability and environmental efficiency
- test and measure products against relevant industry standards
- develop, supervise and maintain systems to select, acquire and store project materials on site
- seek expert advice from manufacturers, architects, designers and engineers about selecting and procuring alternative materials.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction legislation
- relevant project plans, specifications, standards and codes
- the National Construction Code (NCC):
    - evidence of suitability relating to non-conforming building materials and products
- properties, applications and limitations of specified building materials, products and components:
    - cements

CPCCBC4007 Plan building and construction work

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Performance Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to plan on-site activities, employ human resources and obtain physical resources. It includes sequencing construction tasks, identifying appropriate skilled labour, physical resources and suppliers and assessing their availability, and developing documentation and advice for relevant authorities.

The unit of competency applies to those who decide on and arrange building and construction work for residential and commercial projects.

This unit of competency is suitable for builders, site managers, forepersons and other construction industry professionals using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify operational requirements.	1.1	Read contract documentation to identify any unusual aspects of construction, use of materials or penalties.
		1.2	Determine availability of selected subcontractors to suit the job requirements.
		1.3	Assess and confirm availability of materials with suppliers.
		1.4	Identify site access requirements and limitations and organise site entry.
		1.5	Determine project commencement date and prepare and submit documentation for authorities controlling construction work.
		1.6	Implement procedures for accepting and recording site deliveries.
		1.7	Identify and implement relevant work health and safety (WHS) requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Plan for construction operations.	2.1	Identify organisational strategies for implementing construction operations.
		2.2	Review procedures for recording the hire of plant and equipment.
		2.3	Review procedures for the removal of existing services and hazardous materials in accordance with Environment Protection Authority (EPA) requirements.
1	Prepare project schedule.	3.1	Sequence construction operations.
		3.2	Create project schedule using appropriate technology.
		3.3	Define critical path of the project and revise during the life of the project.
		3.4	Adjust project timeframes to account for anticipated delays.
4	Determine required resources.	4.1	Determine and document temporary services and site accommodation requirements.
		4.2	Determine and document materials and plant requirements and availability dates according to contract documentation.
		4.3	Determine and document on-site labour requirements according to contract documentation.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Prepare and submit condition reports.	5.1	Negotiate access to inspect condition of external structure and internal finishing of adjacent properties.
		5.2	Compile and complete reports on the condition of existing buildings and structures on adjacent site boundaries.
		5.3	Forward copies of condition reports to the owners of adjacent buildings prior to commencing construction.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant project schedules and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCCBC4007 Plan building and construction work

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Performance Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by planning construction work for one building and construction project.

In doing this, the candidate must:

- develop a project schedule and associated documentation for:
    - delivery of materials and plant and equipment
    - commencement dates for on site contractors
    - milestones and deliverables
    - project critical path and timeframes
    - contingencies for breakdown of activities.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction legislation, codes and standards
- types of building and construction industry contracts
- project plans and specifications
- sustainability and environmental requirements
- workplace safety:
    - work health and safety (WHS) Acts and regulations

© Commonwealth of Australia, 2026 BuildSkills Australia

    - hierarchy of control
- project management techniques
- organisation strategies and processes:
    - briefing internal personnel, external agencies and clients
    - calling for tenders for subcontractor operations
    - appointing project managers and construction supervisors
    - purchasing building supplies and construction materials
    - refining project critical path information
- building and construction industry subcontractor system
- internal documentation systems:
    - applications for permits and service connections
    - environmental applications
    - parking restriction applications
- project schedule:
    - human resource schedule
    - material delivery schedule
    - project critical path
    - project timeframes
    - scheduling plant and equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant government legislation
- current relevant building and construction codes and standards
- construction drawings, site plans and specifications
- organisational policies, procedures and other quality documentation to undertake the performance criteria and evidence requirements
- digital devices, applications and software to create project schedules and documentation.

Application

This unit of competency specifies the skills and knowledge required to supervise site communications, monitor and maintain compliance with codes and standards and implement project administration processes on a building and construction project.

It is strongly recommended that the site, as specified in the performance evidence, is 'live' (see Companion Volume for guidance).

This unit of competency specifies the skills and knowledge required to supervise the administration of quality control compliance and the use of site communications and record keeping systems; and conduct onsite inspections to complete the required project administration processes.

This unit applies to National Construction Code (NCC) classifications:

- Residential - Class 1 buildings to a maximum of two storeys
- Commercial - NCC Class 2 to 9, Type C only constructions.

This unit of competency is suitable for builders, site managers, forepersons and other construction industry professionals using specialised knowledge and skills to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program, specified in the model Code of Practice for Construction Work, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Supervise the administration of quality control compliance.	1.1	Identify project quality control compliance requirements.
		1.2	Communicate organisational quality control processes and industry requirements to relevant personnel.
		1.3	Develop processes to ensure onsite work performance meets industry regulatory framework, jurisdictional requirements and quality control standards.
		1.4	Confirm that regulatory, jurisdictional and organisational compliance and quality control requirements have been met.
		1.5	Access or develop schedules and checklists detailing specific inspections to be conducted at appropriate stages of construction.
2	Supervise the administration of projects.	2.1	Identify project administration requirements.
		2.2	Authorise payment of material and contractor invoices, drawing against contract allowances and back-charges, as required.
		2.3	Authorise variations to contracts and take corrective action as required.
		2.4	Process insurance claims for site loss or damage.
3	Supervise the use of site communications and record keeping systems.	3.1	Develop and implement systems for effective communication between onsite and offsite staff, contractors and suppliers that systematically gather onsite information.
		3.2	Develop and implement construction project recording systems to capture relevant project details.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Maintain a daily communications diary and key events.
		3.4	Record information relating to certifier inspections, union and legislative matters.
4	Conduct onsite project monitoring and inspection of work quality	4.1	Apply workplace safety requirements and project administration procedures during onsite visit.
		4.2	Conduct onsite project monitoring and inspection of work quality.
		4.3	Inspect and record quality of work, notify relevant people of defects and issue rectification notice.
		4.4	Develop systems to monitor rectified work to ensure compliance with organisational quality control requirements, building standards and client satisfaction.
5	Complete project administration processes.	5.1	Record work defects notified by external parties, establish liabilities and remedial action required, and develop inspection checklist.
		5.2	Notify client of rectification, and record client's response to completed work.
		5.3	Instigate procedures that will result in client approval and acceptance where this was not the client's initial response.
		5.4	Confirm contract requirements are fulfilled with relevant company personnel and client.
		5.5	Arrange for local authority completion inspection.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.6	Prepare certificates and appropriate client handover information, including all guarantees, warranties and termite protection forms.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria, including:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation

Range of conditions

No conditions apply to this unit of competency at the time of publication.

BuildSkills Australia

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by:

1.	Developing a plan to supervise the administration processes for one building and construction project which is either a:		
	• Class 1 to a maximum of two storeys, or		
	• Class 2 to 9, Type C building		
	In doing this, the candidate must: a. Create a plan to implement, administer, maintain and monitor site quality control. b. Read and understand thoroughly the Site Safety Plan used on site. c. Outline the communication systems that will be used on site. d. Outline how systematic gathering of onsite information will be recorded. e. Develop a progress inspection checklist for at least two trades for a section of building.		
2.	Conducting at least one site inspection to evaluate safety, project progress and work quality for at least one section of a building. This worksite must be for a building and construction project which is either a:		
	• Class 1 to a maximum of two storeys, or		
	• Class 2 to 9, Type C building		
	In doing this, the candidate must submit the following two documents:		
	a.	The inspection checklist used	
	b.	The rectification plan which outlines:	
		i.	What must be rectified
		ii.	Why it must be rectified (with reference to appropriate standard, code or plan specification, etc)
		iii.	The recommended order in which rectifications should be done

© Commonwealth of Australia, 2026
BuildSkills Australia

		iv.	Expected duration of each rectification and when they are expected to be rectified by
		v.	Who will carry out the rectification and how they will be notified
		vi.	Will any rectifications affect the work remaining schedule, if yes - who did you notify.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- construction methodologies
- workplace procedures
- work health and safety (WHS):
  - hierarchy of control
  - duty of care
  - risk assessment
- organisational quality management systems related to:
  - communicating with regulatory authorities
  - worker and contractor payment systems
  - issuing of completion certificates and appropriate documentation
  - finalising project contractual agreements
- onsite communication:
  - emails
  - face-to-face verbal communication
  - telephone contacts
  - site diaries
  - written reports and memoranda

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

© Commonwealth of Australia, 2026
BuildSkills Australia

A simulated workplace is one that fully replicates the resources, environment and any time and productivity pressures that exist in the actual workplace, and which meets industry standards for safety and environmental practices. The simulated workplace environment must be developed in consultation with industry stakeholders. (see Companion Volume for guidance).

Candidates must have access to:

- relevant jurisdictional safety legislation and regulations
- building and construction codes and standards
- relevant project plans and specifications
- organisational quality control documentation relevant to supervising the administration of quality control compliance, communications and recording systems, and work progress and quality
- business and safety equipment and materials to supervise administration processes for a building and construction project onsite.

CPCCBC4009 Apply legal requirements to building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply legal requirements to residential and commercial building and construction projects. It includes meeting licensing requirements, complying with financial and insurance laws and meeting the conditions of building contracts.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial --Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, forepersons, estimators and other construction industry personnel responsible for applying legal requirements to residential or commercial building and construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to legal requirements of building and construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency field(s)

N/A

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify legislation relating to the construction project.	1.1	Identify legal requirements from relevant government Acts and regulations appropriate to the type of building and construction project.
		1.2	Identify legal requirements for building contracts, construction insurance, industrial relations obligations and payroll systems.
		1.3	Determine class of building for the project and check for limitations of builder's registration and licence.
		1.4	Identify any construction activity restrictions, limitations and conditions from building approvals and permits for the project.
		1.5	Check licensing requirements or competencies for subcontractors, site supervisors and managers.
		1.6	Identify sustainability, environmental and waste management legislated requirements.
		1.7	Identify work health and safety (WHS) legislation and requirements of Construction work Code of Practice.

© Commonwealth of Australia, 2026 BuildSkills Australia

2	Apply site safety requirements.	2.1	Apply all the relevant requirements of WHS regulations that apply to the project.
		2.2	Adapt organisation's workplace procedures and workplace safety requirements to align with the project.
		2.3	Implement strategies to ensure all workers are inducted, informed and regularly updated of their on-site safety responsibilities.
3	Apply legal requirements.	3.1	Apply contract law in accordance with common law principles, relevant state or territory laws and regulations, and fair trading legislation.
		3.2	Apply the contract agreements and meet all the conditions during construction of the project.
		3.3	Confirm all mandatory building, subcontractor and worker's compensation insurances are current and applied to comply with legal requirements.
		3.4	Administer payroll system which incorporates employee and contractor payments, deduction of taxes, including goods and services tax (GST), tracking of transactions and calculating wages.
4	Apply industrial relations.	4.1	Apply workplace and subcontractor agreements and relevant awards to comply with industrial relations legislation.
		4.2	Identify and apply provisions for training agreements and make information available to all workers.
		4.3	Take proactive measures to ensure discrimination and harassment are not practiced in the workplace.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Resolve disputes and complaints.	5.1	Apply dispute resolution processes following organisational policies.
		5.2	Address complaints promptly, consult with complainant and resolve issue with the best solution for all.
		5.3	Record dispute outcome and maintain documentation.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCBC4009 Apply legal requirements to building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying legal requirements to one residential or commercial building and construction project.

In doing this, the candidate must:

- identify and apply relevant legislative requirements applicable to the building and construction project
- apply legal obligations for:
    - insurance covering workers, materials and building
    - industrial relations, financial transactions, payment of wages and payment of subcontractor and supplier invoices
    - contractual agreements
- apply building and construction standards and codes during construction.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- builder registration and licensing
- Construction work Code of Practice
- appropriate government legislation:
    - business registration and licensing
    - industrial relations
    - work health and safety (WHS)
    - taxation and financial transactions

CPCCBC4010 Apply structural principles to residential and commercial constructions

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Correction to mapping.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply structural principles to the construction of residential or commercial structures. This unit includes applying structural principles to footing, floor, wall and roof systems.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, forepersons and other managers in the building and construction industry who apply structural principles to the demolition or construction of structures.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to building application approvals.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
	Analyse the structural integrity of building project.	1.1	Determine the class of building, intended use of building and climate zone from the NCC.
		1.2	Analyse project for compliance with NCC bushfire, high wind, earthquake and alpine environment requirements.
		1.3	Analyse building design and structural integrity from project plans and specifications, building standards and codes.
		1.4	Determine the effect of section properties on various materials.
		1.5	Determine if structural performance meets the General Requirements and Performance Requirements of NCC.

© Commonwealth of Australia, 2026 BuildSkills Australia

		1.6	Confirm analysis with relevant industry professionals.
		1.7	Conduct pre-commencement site inspection to confirm analysis.
		1.8	Assess new and emerging building technologies for application to the construction process and their compliance with NCC requirements and relevant Australian Standards.
2	Plan, coordinate and manage the laying of footings.	2.1	Identify earthworks and footing or slab configuration from project plans and specifications.
		2.2	Establish cut and fill, excavation and compaction compliance with geotechnical report.
		2.3	Assess performance of reinforcement, concrete and other elements which contribute to structural integrity of specified footings.
		2.4	Determine compliance with building and construction regulations, standards and codes.
		2.5	Set out footings in accordance with project plans and specifications.
3	Plan, coordinate and manage laying of flooring systems.	3.1	Identify flooring systems materials, components and configuration from project plans and specifications.
		3.2	Establish footing type and tie-down details.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Assess suspended flooring system component sections' compliance with standards and codes' span requirements.
		3.4	Determine if floor framing and flooring is compliant with NCC Performance Requirements for climate zone, fire resistance and rising damp requirements.
		3.5	Supervise and check laying of specified floor system complies with project documentation.
4	Plan, coordinate and manage the building of wall systems.	4.1	Identify and analyse structural and non-structural wall systems used in the planning of the building and construction project.
		4.2	Determine materials used for timber and steel framing and structural steel members meet the Performance Requirements of the NCC and timber framing complies with *AS 1684 Residential timber-framed construction.*
		4.3	Identify, implement and check processes for erecting structural and non-structural wall systems comply with manufacturer's specifications and building and construction standards and codes.
		4.4	Plan, implement and check requirements for application of bracing, tie-downs, tolerances, allowances, and fixing and installation of wall frame components for compliance with relevant Australian Standards, codes and manufacturer specifications.
		4.5	Manage processes to ensure quality of the frame, whether factory pre-cut and pre-nailed, factory pre-cut and assembled on site, or cut and assembled on site.
		4.6	Identify and implement allowances for services to be installed.
		4.7	Check compliance of installation of windows and doors with building and construction standards and code and manufacturer's specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Plan, coordinate and manage the building of structural roof systems.	5.1	Identify type of structural roof system and components and determine compliance with Performance Requirements of NCC.
		5.2	Plan, implement and check erection of structural roof, roof trusses or hand cut roof members comply with building and construction standards and codes and accepted industry construction practices.
		5.3	Plan, implement and check installation of roof sarking and cladding, skylights, roof ventilators and service penetrations comply with building standards, codes and manufacturer specifications.
		5.4	Manage processes to ensure roof systems' quality finish.
6	Plan, coordinate and manage wall cladding.	6.1	Assess structural performance of cladding to be used for bracing in the frame construction for compliance with building and construction standards, codes and manufacturer specifications.
		6.2	Determine cladding, vapour permeable sarking or waterproof membrane and components meet the Performance Requirements of NCC.
		6.3	Supervise and check installation of specified cladding complies with building and construction standards, codes and industry-accepted industry practices.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCBC4010 Apply structural principles to residential and commercial constructions

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Correction to mapping.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying structural principles to the construction of one building project.

In doing this, the candidate must:

- assess the structural integrity of the construction project
- apply technical construction principles and concepts to the appropriate selection, integration and building of construction elements and components
- coordinate, plan, implement and check the construction of the structure
- plan and document the structural principles of the construction of a building.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction legislation and regulations
- industry building and construction standards and codes
- the NCC
- classes of buildings described in the NCC
- standards and codes for timber framing
- structural principles:
    - behaviour of structural materials

    - shakes and shingles
    - short and long run, various profile and metal sheeting
- AAC floor and wall systems
- causes and implications of structural detects related to failure of applying structural principles to residential and commercial buildings
- extent of remedial work required for various defects cause by inadequate design and application of structural principles.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction legislation
- current building and construction codes and standards
- the NCC
- material manufacturer’s specifications
- construction drawings and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to obtain and research information electronically and exchange information with other stakeholders.

CPCCBC4012 Read and interpret plans and specifications

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to read and interpret plans and specifications applicable to residential and commercial projects. It includes identifying site characteristics, features of the proposed building and details of the construction.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

The unit of competency applies to site managers, forepersons, estimators, builders, managers and other building and construction industry personnel who read and interpret plans and specifications for quantity surveying, costing and tendering and construction of building and construction projects.

This unit is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify types of plans.	1.1	Confirm plans, specifications and amendments are the current version.
		1.2	Identify types of plans and aspects of the drawings specific for the intended purpose.
		1.3	Confirm details on plans comply with the specifications.
2	Read and interpret the plan.	2.1	Distinguish key features on the plans.
		2.2	Identify building location from site plan.
		2.3	Identify building layout, spaces and dimensions from floor plan.
		2.4	Examine detail drawings to determine sizes, thickness and methods of construction.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Identify internal linings, external cladding and roof materials from plans and specifications.
1	Identify structural details.	3.1	Identify concrete footing and slab sizes and position and type of reinforcing.
		3.2	Identify load bearing points of the building.
		3.3	Identify wind bracing and tie-down requirements.
4	Identify non-structural details.	4.1	Identify provisional sum (PS) and prime cost (PC) items.
		4.2	Locate installation and connection points of services to the building.
		4.3	Identify location of fixtures from plans and details of finishes from specifications.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by identifying and interpreting building and construction information from a set of plans and specifications.

In doing this, the candidate must:

- identify orientation of structures, site contours, datum and reduced levels, and site features to be removed or retained
- identify structural load bearing information of the building and compare information from specification
- check wind bracing materials and tie-down methods for accuracy against the wind bracing table
- interpret essential elements from two-dimensional to three-dimensional format, and apply to estimation, planning and supervisory tasks.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- types of plans:
    - concept drawing/sketches
    - architectural
    - structural
    - civil
    - mechanical
    - electrical
    - plumbing and draining

© Commonwealth of Australia, 2026 BuildSkills Australia

- parts of a plan:
    - site plan
    - floor plan
    - elevations
    - sections
    - details
- drawing conventions:
    - datum and reduced levels (RL)
    - title block
    - scale
    - dimensions
    - abbreviations
- utilities and services plans and specifications
- isometric drawings, oblique drawings, perspective drawings and orthographic drawings
- computer-aided design (CAD) drawings
- building and construction regulations, standards and codes
- classes of buildings
- the NCC
- building information modelling (BIM)
- building and construction methods and terminology
- workplace processes, workplace safety and environmental requirements.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- plans and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- relevant government building and construction and contract legislation
- current building and construction codes and standards

CPCCBC4013 Prepare and evaluate tender documentation

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to evaluate project and contract requirements and prepare and formalise tender documentation in the building and construction industry. It includes interpreting, compiling and documenting essential project information and demands into a final tender document.

It applies to builders, estimators and managers in the building and construction industry who have a responsibility for evaluating and preparing tenders for residential and commercial projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Research project requirements.	1.1	Gather relevant information for tender preparation from current and approved project plans, specifications and project documentation.
		1.2	Select appropriate contracts and tender documents.
		1.3	Identify and record risks during evaluation of contracts and tender documents.
2	Prepare tender documentation.	2.1	Collate all information for tender preparation and check for accuracy.
		2.2	Prepare tender documentation to correspond with selected contracts and organisational processes and procedures.
3	Attach supporting documentation.	3.1	Select and accurately complete relevant documentation required to submit with the tender.
		3.2	Attach vital information, drawings, specifications or other supporting evidence to the tender document.
		3.3	Prepare and attach client acceptance forms and any amendments and conditions to the tender or contract.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Obtain tender approval or endorsement.	4.1	Conduct final evaluation of completed tender documentation.
		4.2	Complete appropriate client contract for the project.
		4.3	Provide tender documentation to the appropriate staff member for approval or endorsement.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to:
  - extract and comprehend relevant information from complex document text
- technology skills to:
  - use tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCCBC4013 Prepare and evaluate tender documentation

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing tender documents for two contracts, with one being for a residential project and one for a commercial project.

In doing this, the candidate must:

- source and check relevant plans, specifications and tender documentation for currency and amendments
- evaluate risk associated with the tender process.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction regulations, codes and standards
- structure and operations of the organisation's costing, tendering and contracting system
- tender documents and supporting documentation:
    - artist’s impressions
    - building information modelling (BIM)
    - product information
    - promotional materials
    - reports and findings beneficial to the organisation
- project risks associated with tendering:
    - breach of contract
    - project delays
    - payment disputes

© Commonwealth of Australia, 2026 BuildSkills Australia

    - delays in progress payments
    - circumstances, such as:
        - delivery delays that extend project completion dates
        - labour shortages
        - weather
        - exposure through clauses that work against the organisation
        - failure to adequately anticipate labour or materials costs
        - inappropriate funding levels and funding shortfalls
        - industrial disputes through misunderstandings or overt action
        - risk of default or non-performance of key players
- types of building and construction drawings and specifications
- types, scope and usage of labour through the employee and subcontractor systems
- using appropriate costing software programs.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant government legislation
- current relevant building and construction codes and standards
- construction contracts and associated tender documentation
- organisational policies, procedures and other quality documentation to undertake the performance criteria and evidence requirements
- business technology, applications and software to produce tender documentation.

CPCCBC4014 Prepare simple building sketches and drawings

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare sketches and drawings used for communicating ideas to clients and other parties. It includes capturing design concepts and options taken from architectural drawings to create simpler versions.

The unit of competency applies to builders, experienced tradespersons, project managers and estimators who prepare sketches and drawings for estimating, explaining details and showing measurements required for building and construction work.

It does not describe more complex drafting skills.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare to make sketches and drawings.	1.1	Identify and select relevant information from construction plans required for sketching or drawing.
		1.2	Confirm construction plan information complies with building and construction regulations, standards and codes.
		1.3	Consider purpose and presentation of drawings and sketches and the intended audience.
		1.4	Determine format of information and select and inspect equipment for serviceability.
2	Create simple sketches and drawings.	2.1	Establish and record measurements, information and details required for drawing and sketches.
		2.2	Transfer vital information into two-dimensional and three-dimensional drawing and sketches.
		2.3	Create sketches and drawings using standard drawing conventions to detail vital information.
		2.4	Produce sectional drawings to clearly identify and label elements and components.
3	Notate and process drawings.	3.1	Apply essential information to the drawing using dimension lines, symbols and abbreviations following standard drawing conventions.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Include drawing and job tile, date, scale and sheet number in the title block.
		3.3	Produce completed drawings in an appropriate form for presentation.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by drawing two components of the fabric of the building from a set of construction plans and prepare drawings for presentation.

In doing this, the candidate must:

- select one structural and one non-structural component and collate vital information required for the drawing
- prepare simple sketches of the structural and non-structural components
- produce clear and descriptive drawings with appropriate notations and labelling.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- types of building and construction plans:
    - presentation drawings
    - isometric drawings
    - orthographic drawings
    - perspective drawings
- drawing conventions:
    - sheet layout
    - title block
    - line types
    - symbols
    - dimensions and dimension lines
    - abbreviations

CPCCBC4015 Prepare specifications for all construction works

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare clearly understood specifications for construction works that may range from an outline to a more detailed specification. It includes establishing the level of detail required in inherent contractual obligations and developing the work specifications.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, estimators, forepersons and other construction industry personnel responsible for specifying materials, project timelines and quality of work for residential and commercial construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine specification requirements.	1.1	Read and identify prescriptive and performance requirements from development approval, project brief, working drawings, codes and other relevant documents.
		1.2	Determine suitability of information for adaptation into the current project.
		1.3	Identify scope of works.
		1.4	Ascertain contractual obligations and, where necessary, seek clarification and advice from specialists.
2	Assess the nature and scope of the work.	2.1	Conduct site inspection to establish and record site layout, details and features and preliminary site-work requirements.
		2.2	Evaluate the relevant details and level of quality necessary to carry out the nature and scope of work.
		2.3	Undertake research to establish appropriate schedules, using relevant data sources.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Tabulate and cross-reference details to ensure consistency between the design brief, working drawings and specifications.
		2.5	Provide details in the specification that conform to industry codes of practice, Australian Standards and relevant statutory requirements.
3	Prepare the specification document.	3.1	Identify the contractual obligations and rights of the parties involved in the specification.
		3.2	Collate and add relevant information requested from specialists, colleagues, suppliers, manufacturers and clients.
		3.3	Complete specification document, check and edit thoroughly for compliance with requirements.
		3.4	Present specification to the client in the required format and timeframe.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4015 Prepare specifications for all construction works

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing a works specification for one building and construction project.

In doing this, the candidate must:

- arrange researched work specification information into easily understood formats
- draft the specification free of any ambiguities
- structure the specification document using correct terminology and link to other relevant construction documentation
- attach evidence of suitability, as stated in the National Construction Code (NCC), from supplier or manufacturer to repudiate non-conforming building products
- complete the specification to meet National Specification System of Australia (NATSPEC) and other relevant standards applicable to the building project.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- NATSPEC and other relevant industry standard specifications and codes
- building project scope of work:
    - standards of work
    - work schedules
    - milestones
- prescriptive requirements:
    - performance requirements
    - detail relating to materials and quality of work
    - nominated subcontractors

© Commonwealth of Australia, 2026 BuildSkills Australia

    - provision and costs of site access and facilities
- contractual obligations:
    - expected performance levels
    - insurance requirements
    - work health and safety (WHS) issues
    - type of tender
- organisational quality assurance relating to works specifications
- relevant legislation:
    - contract law
    - consumer protection legislation
    - WHS
- requirements of evidence of suitability stated in the NCC
- documentation requirements arising from building information modelling (BIM).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government regulations, codes and standards
- current project plans, building specifications and manufacturer's product information
- organisational policies, procedures and other quality documentation to undertake the performance criteria and evidence requirements
- NATSPEC and other industry standard specifications
- digital devices, applications and software to prepare construction specifications.

CPCCBC4017 Arrange resources and prepare for the building and construction project

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to identify and procure the necessary on-site physical and human resources and systematically apply the supply process for a building and construction project. It includes notifying external agencies, employees and contractors and coordinating activities to meet scheduled timeframes.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers and forepersons, estimators and other building and construction industry professionals who are responsible for pre-construction preparation of residential and commercial construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Complete preliminary construction requirements.	1.1	Source, read and interpret relevant project documentation.
		1.2	Set site handover date with client once appropriate fees are confirmed paid with relevant persons.
		1.3	Establish and provide insurance and security requirements.
		1.4	Notify authorities of the commencement of scheduled works.
		1.5	Determine and advise relevant persons of work, parking and other restrictions.
2	Organise on-site services and facilities.	2.1	Identify requirements for on-site facilities and services.
		2.2	Arrange, receive and position site office, storage sheds and on-site toilets and facilities.
		2.3	Identify and develop processes to protect or utilise existing services at the site.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Arrange temporary power and water connections with service providers.
		2.5	Identify and meet council requirements for temporary site set-up.
3	Arrange public protection.	3.1	Follow work health and safety (WHS) and local authority authorisations for site setup.
		3.2	Erect compliant hoardings, fencing and signage.
		3.3	Arrange temporary site access and egress to meet local authority requirements.
		3.4	Organise waste facilities and waste removal.
4	Organise on-site delivery.	4.1	Confirm and order materials to meet scheduled delivery dates.
		4.2	Check availability of physical resources and schedule delivery as needed.
		4.3	Receive, secure and protect materials and plant and equipment.
5	Organise on- site human resources.	5.1	Address industrial relations and on-site safety matters that could impact on the preparation and human resourcing for building work.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.2	Identify and allocate on-site human resource requirements.
		5.3	Engage or appoint construction work supervisor.
		5.4	Engage appropriate employees or contractors as stated for project needs.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by identifying, planning and establishing the essential pre-construction infrastructure for a commercial or residential project.

In doing this, the candidate must:

- procure sufficient o- site facilities and materials to support the project requirements
- schedule temporary services and human resources
- sequence delivery of materials and equipment and allocation of human resources
- record and maintain information from local council, external authorities, employees and contractors.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- external service authorities, including:
    - electricity authorities
    - environmental protection agencies
    - local government agencies
    - road traffic authorities
    - water authorities
    - electronic communications
- relevant government building and construction regulations, codes and standards
- local council requirements:
    - consent matters
    - heritage protection

- organisational quality documentation:
    - resource procurement processes
    - policies and procedures
- workplace safety requirements
- relevant employee and contractor industrial relations and licensing requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and industrial relations legislation
- current relevant Building and Construction codes and standards
- current project plans, specifications and manufacturer's product information
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- business equipment and technology to facilitate arranging resources and preparing for a construction project.

CPCCBC4018 Apply site surveys and set-out procedures to building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to use technical instruments and levelling and surveying techniques to accurately set-out a building on site. It includes determining grid levels and developing contour plans.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions

This unit of competency applies to builders, site supervisors and related construction industry professionals responsible for ensuring accurate application of site surveys and set-out of a residential and/or commercial building.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for and conduct site set-out.	1.1	Source, read and follow current project plans and site set-out procedures.
		1.2	Select and use levelling devices in accordance with standard operating procedures (SOPs).
		1.3	Apply the ‘two peg test’ to check the amount of error present in the instrument.
		1.4	Carry out reduction in a closed level run by rise and fall method and by height of plane collimation (HPC) method.
		1.5	Calculate accurate staff readings to enable a specific reduced level (RL) set-out.
		1.6	Identify and explain errors in measured distances due to site characteristics and measurement methods.
2	Develop a contour grid.	2.1	Determine set-out grid and levels.
		2.2	Prepare contour plans from grid levels to specified tolerances and stated contour intervals.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Determine surface area being levelled and calculate cut and fill volumes.
		2.4	Calculate and record trigonometric and geometric calculations commonly used with grid lines, off sets and right-angle triangles without error.
1	Determine grades and levels.	3.1	Draw longitudinal sections from RLs.
		3.2	Determine levels and clearances from given grades and distances to specified tolerances.
		3.3	Express calculation angles, percentages and run ratios in grades.
		3.4	Determine calculations for batter levels from grades and distances.
		3.5	Construct longitudinal sections and determine associated grades and levels in typical drainage and pipeline situations.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require

- numeracy skills to:
  - extract, interpret and comprehend measurements and information from site and set-out plans
  - perform trigonometric and geometric calculations
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by surveying and setting out a residential or commercial building on site.

In doing this, the candidate must:

- select and operate one surveying and one levelling device
- develop a topographic contour plan
- calculate cut and fill quantities:
    - area and volume of land to be levelled
    - area of land to be filled
    - volume of fill required.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- working drawings, specifications and design principles
- relevant building codes and specifications
- linear and angular measurements, geometry and trigonometry
- principles of surveying and set-out
- operational and functional features of levelling and surveying devices:
    - electronic distance measuring (EDM) equipment
    - laser
    - optical level
    - water level
    - theodolite.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current project and site plans and specifications
- organisational surveying, set-out and associated documents
- relevant computer software packages and technology applicable to survey and set-out practices
- levelling devices and survey equipment to enable site survey and set-out for a building and construction project.

CPCCBC4019 Apply sustainable building design principles to water management systems

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply sound water management principles as part of the implementation of sustainable building and construction processes.

It covers legislative and planning requirements, identifying and applying opportunities for improved water management, and promoting best practice in water management to meet the demand for sustainable buildings and environmentally friendly developments.

This unit of competency applies to builders, site supervisors and related construction industry professionals who apply sustainable water management systems to residential or commercial building.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C constructions.

This unit of competency is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify legislative and planning requirements.	1.1	Identify government legislation and local council requirements for sustainable water systems as part of the building and construction design process.
		1.2	Confirm design and use of water management systems requirements with client.
		1.3	Seek expert plumbing advice as part of the planning process.
		1.4	Consult the National Construction Code (NCC), Australian Standards and other codes and standards to identify the implications for the building project.
		1.5	Identify and address environmental and resource efficiency issues.
2	Identify and apply opportunities for improved water management.	2.1	Identify and appraise the impact of client and resident behaviour on effective water management and use.
		2.2	Identify, evaluate and apply opportunities to select efficient water management fixtures and appliances as part of the building design.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Calculate and communicate installation and ongoing usage costs of efficient water management fixtures and appliances to the client.
		2.4	Select efficient water management fixtures and appliances as negotiated.
3	Apply sound water management principles to the site and its landscaping.	3.1	Contain soil and sediment as part of site preparation and management.
		3.2	Apply sound waste management practices on site.
		3.3	Put in place and use effective sediment control barriers.
		3.4	Stockpile and retain topsoil and local rocks for later reuse.
		3.5	Optimise reuse and recycling of water in the landscape design.
4	Promote best practice in water management.	4.1	Select, locate and install tanks to optimise the reuse of roof water.
		4.2	Identify costs for construction of reuse of grey water facilities and negotiate with the client.
		4.3	Identify costs and performance characteristics of various materials used in the installation of water management systems and negotiate selection of materials with client.

© Commonwealth of Australia, 2026 BuildSkills Australia

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
    - use digital tools and devices to communicate and collaborate effectively with others
    - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4019 Apply sustainable building design principles to water management systems

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying sustainable building design principles to the water management system of one Class 1 or 10 building, up to two storey or one Class 2 to 9, Type C building project.

In doing this, the candidate must:

- source and analyse legislative and planning requirements for water management design
- apply the principles of effective water use, recycling and reusing in the planning process
- calculate costs and savings of implementing an alternative water management system
- produce work plans that reflect effective water management.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- building and construction codes and standards
- the National Construction Code (NCC)
- government building and construction legislation
- environmental requirements
- sustainability principles and concepts
- building and construction industry contracts
- construction plans and specifications
- water management systems:
    - grey water recycling
    - roof water reuse

© Commonwealth of Australia, 2026 BuildSkills Australia

- fixtures and appliances:
    - dishwashers
    - showerheads (low flow and maxi flow)
    - spas
    - taps
    - toilets
    - washing machines
- waste management practices:
    - run-off from the cleaning up of equipment:
        - painting
        - concreting
        - plastering
        - brickwork
    - on-site waste management
- workplace safety requirements
- workplace procedures.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

- relevant government building and construction regulations
- current building and construction codes and standards
- the NCC
- construction plans, site plans and specifications
- policies and procedures
- environmental, sustainability and other quality documentation to undertake the performance criteria and evidence requirements
- digital technology devices, applications and software to source and document information.

CPCCBC4020 Build thermally efficient and sustainable structures

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Element 1.2 changed to allow for continuing compliance with NCC.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply sound principles of thermal efficiency as part of the implementation of sustainable building and construction processes in response to the need to respond to growing consumer demand for sustainable buildings and environmentally friendly developments.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

This unit of competency supports the needs of builders, site managers and forepersons, and estimators in the building and construction industry.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
	Apply legislative and planning requirements for thermal efficiency to the building process.	1.1	Identify current relevant state, territory and council requirements for building thermally efficient structures.
		1.2	Identify factors that contribute to the construction of a star rated dwelling identified within the NCC and assess the impact of regional climate differences.
		1.3	Identify and negotiate client needs and expectations for the design and construction of thermally efficient structures.
		1.4	Gather expert design and other advice as part of the planning and construction process.
		1.5	Consult relevant Australian Standards to identify the implications for the conduct of the building project.
2	Review design solutions for effectiveness and compliance.	2.1	Identify impact of radiation, convection, conduction and evaporation on the thermal comfort of residents.
		2.2	Evaluate orientation of the building, location and size of glazing, and use of thermal mass as design features for effectiveness and compliance with planning and other regulatory requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Evaluate, cost and communicate effective strategies for insulating the structure to the client.
		2.4	Assess building designs for their compliance with the energy efficiency requirements of the NCC.
		2.5	Consult designers and clients to ensure final construction plans are effective, efficient and compliant.
1	Manage the building process to ensure an effective outcome.	3.1	Establish effective communications between designers, architects and clients to ensure effective thermal performance is embedded from the design to construction phase.
		3.2	Confirm effective quality assurance processes are in place to evaluate and implement the building of a five-star dwelling.
		3.3	Assess and communicate to client, cost-effective strategies to achieve desired level of thermal performance.
		3.4	Assess and negotiate life cycle costs of various construction approaches with the client.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4020 Build thermally efficient and sustainable structures

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Element 1.2 changed to allow for continuing compliance with NCC.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by effectively applying mechanical services principles and concepts to the construction of a thermally efficient and sustainable building structure.

In doing this, the candidate must:

- sourcing and analysing legislative and planning requirements for thermal efficiency in the building process
- calculating costs and savings of implementing alternative thermally efficient systems
- applying principles of thermal efficiency to planning of a building project
- producing work plans that reflect effective thermal efficiency.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry processes for building sustainability
- requirements for building thermally efficient structures:
    - appropriate use of thermal mass (noting impact of climatic conditions)
    - glazing size and orientation
    - insulation
    - orientation of building

© Commonwealth of Australia, 2026 BuildSkills Australia

    - use of relevant construction methods
- regional climate differences areas:
    - cooling climates
    - hot arid climates
    - hot humid climates
    - mixed climates
- relevant state or territory building and construction codes, standards and government regulations
- underlying mathematics related to the calculation of thermal efficiency
- workplace safety requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

- relevant government building and construction regulations
- current building and construction codes and standards
- the NCC
- construction plans, site plans and specifications
- policies and procedures
- environmental, sustainability and other quality documentation to undertake the performance criteria and evidence requirements
- digital technology devices, applications and software to source and document information.

CPCCBC4021 Minimise waste on the building and construction site

Modification History

Release	Comments
3	--
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to support sustainable building practices by minimising waste removed from residential or commercial building and construction sites. It includes planning a waste minimisation strategy, calculating cost benefits and implementing alternative waste minimisation systems.

This unit of competency applies to builders, site managers and forepersons, and estimators in the building and construction industry responsible for managing compliance with waste regulations and minimising waste on construction sites.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan a waste management strategy.	1.1	Identify current government and council environmental requirements for managing and minimising building waste.
		1.2	Research environmental guidelines and standards and develop an alternative waste management strategy to support the building and construction project.
		1.3	Calculate costs, potential savings and advantages of a waste management strategy and negotiate with client.
		1.4	Establish effective communication with the architect, designer, engineer and other relevant professionals to ensure project plans incorporate waste minimisation strategies.
2	Manage materials procurement to minimise waste.	2.1	Evaluate building and construction materials to identify high quality and more durable materials that will extend the life of the structure and simplify its future extension and refurbishment.
		2.2	Use recycled materials where appropriate that meet regulatory and standards' restrictions.
		2.3	Develop procurement specifications that seek to minimise packaging waste.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Manage the building process to reduce waste.	3.1	Determine and use demolition practices to increase the recovery of materials for recycling and reuse.
		3.2	Adopt strategies to minimise the volume of site excavation and other materials that are disposed of in landfill.
		3.3	Adopt litter abatement strategies on site.
		3.4	Plan and implement safe and environmentally effective disposal of unavoidable waste.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4021 Minimise waste on the building and construction site

Modification History

Release	Comments
3	--
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by developing and implementing an alternative sustainable waste management strategy to minimise building and construction waste for one residential and one commercial building and construction site.

In doing this, the candidate must:

- include the principles of sustainable waste management appropriate to each project
- develop the waste management strategies to comply with environmental and sustainability regulations and guidelines.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction methods and principles
- government building and construction regulations
- building and construction standards and codes
- the National Construction Code (NCC)
- environmental and sustainability regulations
- minimising adverse environmental impacts and promoting sustainability by:
    - effective, efficient and economical procurement of materials and products

© Commonwealth of Australia, 2026 BuildSkills Australia

    - assessment of whole of life cycle of materials and products
    - engaging with environmentally responsible suppliers
    - managing resource demand and consumption
    - managing environmental risk
    - recycling, reclaiming and reusing materials
    - onsite litter abatement
    - packaging waste reduction
- workplace procedures and workplace safety requirements
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to research environmental guidelines and standards and compile information electronically.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government and council building and construction environmental and sustainability requirements
- current building and construction codes and standards
- construction drawings and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to access, extract and manipulate relevant information electronically to use and share with others.

CPCCBC4022 Supervise tilt-up work

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Weight corrected in Performance Evidence. Formatting corrected in the Knowledge Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to organise, coordinate and supervise tilt-up work on a construction site. It includes the application of safe work practices during the erection and temporary bracing of tilt-up pre-cast concrete panels.

This unit of competency applies to site supervisors and builders who have a sound understanding of licensing and competency requirements for crane operation, dogging and rigging and are responsible for planning, organising and supervising tilt-up work on a construction site.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Provide effective administration.	1.1	Read and interpret relevant project plans, details and specifications for tilt-up work.
		1.2	Store all structural and design documents, pre-cast panel shop drawings, layout plans and other required documents on site.
		1.3	Check licence and competency details of persons assigned to perform tilt-up work and ensure regulatory training requirements have been met.
		1.4	Check mandatory licences and approvals required for tilt-up work are obtained.
		1.5	Notify relevant regulatory authorities of work commencement and ensure the administration process is complete.
2	Plan work and set up site.	2.1	Prepare and implement a site-specific work health and safety (WHS) management plan and work plan and apply WHS risk control measures.
		2.2	Provide site security, amenities, services and emergency/first aid facilities and prepare site procedures.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Develop traffic management and public safety plans and procedures and plan exclusion zones for concrete panel delivery, casting and erection operations.
		2.4	Review and provide requirements for footings, structural elements, concrete slabs and site access roads for the tilt-up work.
		2.5	Determine suitable onsite crane operating positions in consultation with crane suppliers and operators.
		2.6	Identify ground conditions such as soak wells and drains likely to affect crane stability and check crane standing areas for strength and compaction.
1	Supervise and coordinate tilt-up work.	3.1	Check concrete panel inspection records to confirm design specifications have been followed during panel fabrication and manufacture.
		3.2	Coordinate delivery sequence for concrete panels cast off site or coordinate a casting and curing schedule and distribution of panels on site.
		3.3	Supervise placement and storage of concrete panels onsite and ensure it meets engineer's requirements.
		3.4	Put in place processes to ensure erection areas are cleared, exclusion zones set up, barriers erected, and site personnel advised of restricted access areas prior to erection of concrete panels.
		3.5	Check fixings and anchor bolts supplied for temporary bracing are compliant with designer and engineer specifications.
		3.6	Check correct type of braces, locating dowels and shims are correctly placed and components positioned and propped in accordance with shop drawings or as approved by the engineer.
		3.7	Supervise workers and contractors during the erection of the concrete panels and ensure that safe systems of work and safe work practices are enforced and followed.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.8	Use job safety and environmental analysis (JSEA) and other tools to identify hazards, assess risks and create safe systems in the event of unanticipated circumstances.
4	Confirm tilt-up stabilisation.	4.1	Check erected concrete panels for compliance with design and engineering specifications.
		4.2	Check compliance of structural steel elements being fixed to the temporarily braced panels are in accordance with designed engineering specifications.
		4.3	Inspect integrity of erected structure prior to removal of temporary bracing to ensure it meets engineer certification.
		4.4	Supervise the sequential removal of temporary bracing.
		4.5	Oversee the safe removal of temporary bracing, plant and equipment from site.
		4.6	Supervise the completion of the erection work and clearing and cleaning of work areas prior to other trades being permitted to enter work zones.
		4.7	Notify relevant personnel of work completion and maintain site records to company requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
    - use digital tools and devices to communicate and collaborate effectively with others
    - use equipment and programs to access and extract information and develop relevant documentation.

3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Weight corrected in Performance Evidence. Formatting corrected in the Knowledge Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by demonstrating the supervision on at least one occasion of the erection of:

- one multi-point pre-cast tilt slab or one cast in-situ tilt slab each of at least 6 tonnes.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction legislation, standards and codes
- National Standard for Construction Work and the Code of Practice for Construction Work
- relevant tilt-up construction codes and standards including current versions of AS3850.1:2015 Prefabricated concrete elements Part 1: General requirements and National Code of Practice for Precast Tilt-Up and Concrete Elements in Building Construction
- project plans, drawings and specifications for tilt-up work
- processes, procedures and techniques for:
    - lifting and placing tilt-up panels
    - securing panels to base
    - levelling and plumbing panels

© Commonwealth of Australia, 2026 BuildSkills Australia

    - temporary bracing panels
    - grouting, bracing, torquing, stabilisation and fixing of panels
- competency and licensing requirements to operate plant and equipment and carry out tilt-up panel work
- capacity and limitations of plant, lifting gear and equipment used in tilt-up work
- capacity and limitations of rigging and equipment
- workplace safety:
    - hierarchy of control
    - hazard identification
    - emergency first aid
    - emergency shutdown and stopping
    - working at heights
    - fall arrest equipment
    - scaffolding
    - access equipment
    - electrical hazards
    - overhead hazards
    - confined spaces.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction legislation
- current relevant building and construction industry codes and standards
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- project plans and specifications
- plant, equipment and qualified personnel necessary to supervise tilt-up work.

CPCCBC4024 Resolve business disputes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to advise on or resolve business disputes that may arise during activities in residential and commercial contracting projects. It includes the development and implementation of dispute resolution processes and procedures.

This unit of competency applies to builders, site supervisors and related construction industry professionals responsible for resolving business disputes in a positive manner.

This unit of competency is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Evaluate dispute information.	1.1	Review and evaluate information to identify the dispute issue, potential causes, circumstances and persons involved.
		1.2	Analyse and appraise contractual arrangements and agreements and relevant legislation.
		1.3	Identify risks and prepare contingency strategies.
		1.4	Obtain advice from senior managers and other professionals to develop a dispute resolution strategy.
		1.5	Follow dispute resolution procedure.
		1.6	Secure agreement for procedure from all parties.
2	Negotiate with parties.	2.1	Interview concerned parties individually to clarify reasons for dispute, issues and desired outcome.
		2.2	Conduct an inspection of work in dispute, as required, to determine compliance with the requirements.
		2.3	Develop solutions based on interview with parties, inspection of work and compliance with requirements to optimise likelihood of a favourable outcome.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Offer parties recommended solutions to resolve dispute equitably and advise parties of legal processes should resolution not occur.
		2.5	Record and maintain dispute process, information and outcome.
3	Identify opportunities for dispute resolution.	3.1	Identify and detail process to consult with external arbitrators or conciliators when disputes cannot be resolved internally.
		3.2	Implement procedures to settle dispute promptly following statutory law, professional and organisational requirements.
		3.3	Communicate with relevant parties to ensure client satisfaction or follow up actions.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- speaking and listening skills to:
    - actively listen and use observational and questioning techniques to identify different perspectives and confirm, clarify and revise understanding.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4024 Resolve business disputes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria of this unit by resolving one construction project dispute.

In doing this, the candidate must:

- identify the nature of the dispute and identify the parties in the dispute
- document dispute details accurately and in sufficient terms to eliminate any ambiguity
- follow established dispute resolution procedures and develop and implement dispute resolution procedures where none are established
- maintain impartiality throughout the dispute resolution process.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- contractual and business frameworks underpinning the building and construction industry
- legislation and other guidelines:
    - common law
    - consumer law
    - contract law
    - government dispute resolution guidelines
    - privacy
- dispute resolution and conflict theory
- risk assessment and evaluation strategies
- negotiating processes and strategies

© Commonwealth of Australia, 2026 BuildSkills Australia

- industry dispute resolution guidelines
- organisational policies and procedures
- values and attitudes of various groups in the community that should be accounted for in discussions
- possible reactions and behaviours from persons in a dispute situation
- dispute resolution procedures:
    - mutual resolution
    - on-site negotiations
    - reference to contractual obligations
    - arbitrated decisions
    - common law outcomes
    - litigated decisions
- causes of business disputes:
    - contract payment issues
    - different opinions about design, structural layout or dimensions
    - dissatisfaction with project progress
    - structural finish, quality, materials or construction methodology
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract integrate and compile information.

Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current building and construction codes and standards
- contracts, construction drawings and specifications
- relevant government legislation and other quality documentation to undertake the performance criteria and assessment requirements
- digital devices, applications and software to receive, record and save dispute information electronically.

CPCCBC4026 Arrange building applications and approvals

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare and submit building applications to appropriate authorities for approval and manage the submission through to its final approval. It includes communicating effectively with clients, building professionals and planning officers.

The unit of competency applies to builders, project managers and related construction industry professionals responsible for coordinating and managing the building approval process for residential and/or commercial projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to building application approvals.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan the application process.	1.1	Identify project stages requiring approvals and develop a submission plan.
		1.2	Determine level and type of information and documentation needed for each stage of approval.
		1.3	Consult with external specialists to facilitate document certification.
		1.4	Review submission plan to ensure client needs are addressed and met.
2	Prepare and lodge application.	2.1	Prepare documentation and supporting information for compliance with the requirements of the building approval authority.
		2.2	Adopt strategies to minimise impact on stakeholders and maintain their support for the application.
		2.3	Lodge application and supporting documentation with approval authority.
		2.4	Notify relevant person for payment of fees within the due dates and terms.
3	Manage application process.	3.1	Seek confirmation of application status at appropriate intervals to ensure continuing progress.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Assess building approval progress and inform stakeholders.
		3.3	Evaluate minor amendments to determine impact on project.
		3.4	Analyse course of action to maintain project continuity pending rejected submissions, resubmissions or appeals.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - liaise with clients, stakeholders, specialists and approval authorities to negotiate amendments, confirm requirements and share information
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4026 Arrange building applications and approvals

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing, submitting and managing one residential and one commercial building and construction application for approval.

In doing this, the candidate must:

- develop a submission plan, which includes:
    - stages and dates for submission of applications
    - forms, documents and supporting evidence required to be submitted
    - application fees, charges and costs.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation, codes and standards
- plans, specifications and contracts
- local authority building application processes:
    - full approval
    - staged approval
    - development applications
    - sustainability requirements
    - fees and levies
    - complaints and appeals
- documentation requirements of building approval submissions:
    - design briefs

CPCCBC4027 Establish a basis for sales consulting

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to establish a basis for sales consulting**.** It includes managing self-development to improve personal performance.

It applies to sales consultants and other professionals who are responsible for the marketing and sale of newly constructed residential and commercial structures.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for establishing a basis for sales consulting.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.

© Commonwealth of Australia, 2026 BuildSkills Australia

	Develop and apply industry knowledge.	1.1	Obtain, read and interpret organisational policies and procedures relating to sales consulting.
		1.2	Develop knowledge of organisation's products and services.
		1.3	Research and identify market segments within the industry sector.
		1.4	Provide customers with accurate and clear industry information.
2	Apply key attributes of an industry sales consultant.	2.1	Use appropriate body language, gestures, facial expressions and tone of voice to support the sales process.
		2.2	Determine customer type and needs by using open-ended questions and active listening.
		2.3	Apply persuasive communication techniques to secure buyer interest.
		2.4	Communicate other unique features to enhance buyer retention.
		2.5	Obtain and present proof of benefits through the product purchase process.
		2.6	Utilise sales aids to build buyer understanding of how the product is aligned with their needs.
3	Manage buyer resistance and complete documentation.	3.1	Determine customer interest from behaviour and cues.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Identify source of buyer resistance by using probing techniques.
		3.3	Identify buyer strengths and limitations and formulate a strategy to overcome resistance.
		3.4	Record customer sales information.
4	Manage self-evaluation and personal performance.	4.1	Identify self-development improvements and produce a plan that reflects individual and company goals and targets.
		4.2	Review, evaluate and modify personal performance.
		4.3	Establish processes to maintain personal mental and physical wellbeing.
5	Develop and maintain personal competence.	5.1	Identify and attend ongoing training and professional development programs that support competence.
		5.2	Participate in professional networks and associations to enhance knowledge, skills and relationships.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4027 Establish a basis for sales consulting

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by consulting a minimum of three customers.

In doing this the, the candidate must:

- explain sectors of the construction industry and range of products available in each sector
- convey information factually and accurately without overpowering the client
- adhere to organisational ethical and probity standards
- use technology skills and equipment to aid presentation
- manage and resolve customer dissatisfaction.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government legislation affecting business operations:
    - standards and codes of practice
    - anti-discrimination
    - consumer protection
    - contract law
    - ethical principles
    - privacy laws
    - Competition and Consumer Act
- government building and construction regulations, standards and codes
- legal and contractual requirements relating to building and construction
- types and classes of building as classified in the National Construction Code (NCC)
- market segments:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - first and subsequent home buyers
    - speculative and investor buyers
- sources of buyer resistance and dissatisfaction and strategies to overcome and resolve them
- characteristics of the marketplace which influence an individual's decision to invest in a building
- methods to improve personal performance and self and professional development
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract integrate and compile information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government sale legislation
- current building and construction codes and standards
- construction drawings and specifications
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to transmit and receive information electronically.

CPCCBC4028 Prepare design brief for construction works

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare a construction design brief for a client. It includes negotiating with the client, seeking feedback on the design and preparing a final design brief for client approval.

This unit of competency applies to builders, site managers, estimators, forepersons and other construction industry personnel who prepare residential and commercial project design briefs from client requests.

This unit of competency is suitable for those using specialised technical and creative skills to express ideas and perspectives and use their own judgement to deal with predictable and sometimes unpredictable problems relating to preparation of design briefs.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Gather client requirements.	1.1	Discuss project requirements with client and design team.
		1.2	Confirm financial expectations of the client.
		1.3	Discuss preliminary design notions with team members to ensure consistency with client's vision.
		1.4	Prepare a draft design brief.
		1.5	Clarify and confirm draft with client and team members.
2	Clarify stakeholder requirements.	2.1	Assess input from stakeholders to confirm the responsibilities, requirements and limitations of the design brief.
		2.2	Commission site survey analysis and gather and use all relevant information to inform development of the brief.
3	Negotiate engagement with the client.	3.1	Amend and formalise fee proposal and agreement.
		3.2	Detail scope of services to be undertaken within the contract and fee proposal with the client, either directly or by delegation to a team member.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Present draft proposals to the client and use client feedback to modify and improve the proposal.
		3.4	Finalise design brief in compliance with client and stakeholder satisfaction.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - listen and question to clarify and negotiate stakeholder and client requirements and share information
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

CPCCBC4029 Apply construction information to the sales process

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply construction information in the sales process to develop the customer's knowledge of construction processes and the effects on contract and building timelines. It includes communicating accurate construction information to the client to contribute to a positive relationship between the client and the organisation.

This unit of competency applies to sales consultants and other professionals within the building and construction industry responsible for the marketing and sale of new residential and commercial constructions.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify pre-construction approvals.	1.1	Obtain, read and apply organisational policies, procedures, client contractual and legal requirements relating to the construction process.
		1.2	Identify scope of works and scheduled timeframes.
		1.3	Identify nature and conditions of approvals, site establishment and facilities set-up and connection of temporary services.
2	Explain the construction sequence to the client.	2.1	Brief the client about construction public liability, indemnity and workers' compensation insurance.
		2.2	Describe the construction process, main stages and approximate duration of construction.
		2.3	Explain site establishment, set-up of facilities and connection of temporary services.
		2.4	Outline trade contractor, materials and product delivery and other personnel access to site.
		2.5	Give the client an overview of circumstances that affect progress and delays construction timeframes.
3	Provide construction information.	3.1	Provide information of long-term benefits of sustainable building solutions and other unique selling features.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Confirm accuracy of contractual requirements and construction information with client.
		3.3	Review and resolve identified issues with client.
		3.4	Follow organisational policies for recording and saving information.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - actively listen and respond accordingly to client questions
  - interpret non-verbal communication to reinforce or modify the interaction
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4029 Apply construction information to the sales process

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying construction information to the sales process for one building and construction project.

In doing this, the candidate must:

- provide accurate, timely and understandable information to the client
- identify the nature of building approvals and their limitations, conditions and duration
- explain circumstances that can contribute to delays and the impact of those delays on the building process
- provide information of all builder's insurances required for the duration of the building and construction project.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building approvals and permits:
    - building licence
    - electricity supply permits
    - water service and sewerage connection
    - drainage and water disposal
    - Local Government Acts and building provisions
- building construction process and sequence of events
- industry conditions:
    - availability of labour and materials
    - provisions for inclement weather

© Commonwealth of Australia, 2026 BuildSkills Australia

    - subcontracting structure
- insurance cover:
    - builder's all risk
    - indemnity
    - public liability
    - workers' compensation
- site establishment requirements:
    - access and egress
    - drainage
    - earthworks
    - electricity supply
    - protection for adjoining owners
    - rubbish and waste disposal
    - signage
    - site facilities
    - water connection
- building and construction standards and codes
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract integrate and compile information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant building and construction standards and codes
- building approvals and permits
- construction drawings, site plans and specifications
- construction contracts, organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements

CPCCBC4030 Analyse and communicate industry information

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to research, analyse and communicate information about the building and construction industry environment and opportunities. It includes identifying competition and informing clients of investment opportunities.

It applies to sales consultants and other professionals within the building and construction industry responsible for the marketing and sale of new residential or commercial constructions.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for analysing and communicating industry information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Review building industry environment.	1.1	Identify the internal and external operating factors of the building and construction operating environment.
		1.2	Identify economic factors impacting on the housing industry.
		1.3	Collate information on geographic location of new subdivisions and characteristics and availability of land.
		1.4	Research the impact of social factors affecting the building and construction industry.
		1.5	Recognise and note personal perceptions of potential clients.
2	Identify competition to building and investment.	2.1	Investigate financial factors that support and oppose investment.
		2.2	Identify strengths and weaknesses of other competitive markets which compete for investments.
		2.3	Analyse industry products or services to benefit the customer.
		2.4	Determine the capacity to meet potential client requirements.
3	Communicate industry information.	3.1	Use organisational operating structures and industry productivity information effectively to attract customers.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Interact and engage with the client to determine their needs.
		3.3	Explain the benefits of the industry's housing as a form of investment.
		3.4	Communicate the competitive nature of the industry marketplace as a strength benefiting the client.
		3.5	Explain alternative opportunities in speculative and project construction to the client.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - use appropriate protocols and conventions to communicate with a broad range people
- listening skills to:
  - process information and avoid misinterpretation of client requirements.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4030 Analyse and communicate industry information

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by researching, preparing and submitting a current market analysis for the local region.

In doing this, the candidate must:

- outline the external and internal operating environment of the building and construction industry
- identify and evaluate economic and social factors impacting the local area, and perceptions of potential clients
- analyse the strengths and weaknesses of competing investment markets and opportunities
- provide detailed information to effectively meet client requirements
- adhere to organisational ethical and probity standards.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- characteristics of the marketplace which influence an individual’s decision to invest in a building:
    - interest rate movements
    - perceptions about the investment value of the completed property
    - perceptions about the resale value of the property
    - perceptions about the value of the currency and possible movements
    - speculative ambitions
- economic factors, circumstances and seasonal factors that influence the volume of housing sales:
    - level of economic activity
    - availability of finance

© Commonwealth of Australia, 2026 BuildSkills Australia

  - current interest rates
  - competition for finance
  - share market
- effects of investments for rental properties
- investor's personal perceptions:
  - about the investment value of the completed property
  - about the resale value of the property
  - about the value of the currency and possible movements
  - of potential interest rate movements
  - speculative ambitions
- influences effecting the capacity to meet client requirements:
  - availability of labour and materials
  - current financial situation
  - current order levels
  - projects already committed
- industry market segments and product range:
  - apartments
  - duplexes and triplexes
  - existing real estate properties
  - high-rise apartments
  - high-rise construction
  - holiday homes and resorts
  - mobile homes
  - retirement villages
  - terrace housing
- purchasing patterns and other socioeconomic factors:
  - business confidence
  - job security or insecurity
  - level of socioeconomic activity
  - migration
- government building and construction regulations, standards and codes
- legal and contractual requirements relating to building and construction.

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction and contract legislation
- current building and construction codes and standards
- construction drawings and specifications
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to transmit and receive information electronically.

CPCCBC4031 Process client requirements

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to obtain, confirm and process client requirements from project inception through the contract and documentation development process.

It includes accurately conveying client requirements to those developing the contract and related documentation.

The unit of competency applies to sales consultants, site managers, forepersons, estimators and other professionals within the building and construction industry responsible for processing client requirements.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify client requirements.	1.1	Access, read and interpret relevant government construction legislation.
		1.2	Identify local government requirements, restrictive covenants, necessary permits and planning requirements.
		1.3	Provide correct legal, technical and product information to the client.
		1.4	Arrange site investigation and identify site features and factors that may contribute to and influence the building design.
		1.5	1Collate and discuss site and building information that may influence and effect the design requirements with client.
		1.6	Determine and confirm client requirements.
2	Prepare preliminary documentation.	2.1	Identify and follow organisational processes for preparing documentation.
		2.2	Identify and address documentation, design and copyright risks.
		2.3	Communicate requirements for sketch plans and drawings accurately to drafting personnel.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Prepare and complete preliminary contract, agreement and estimated processing costs.
		2.5	Submit documents to the relevant department or person for checking and recording.
3	Establish client satisfaction.	3.1	Forward plans, developed documentation and estimated costs to client for review, amendment and approval.
		3.2	Confirm client's understanding of extent and cost of required site works.
		3.3	Identify variations and problem areas and analyse and rectify issues in consultation with client.
		3.4	Verify accuracy of amended documentation and ensure client requirements are met.
4	Finalise contract requirements	4.1	Check all plans, documents and specifications sighted by client are signed or initialled.
		4.2	Compile signed documents and forward to relevant person for verification and processing for the next stage.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
    - use communication tools and devices to communicate and collaborate effectively with others
    - use equipment and programs to access and extract information and develop relevant project schedules and documentation.

Assessment Requirements for CPCCBC4031 Process client requirements

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing contract documentation, drawings and specifications for a construction project that meets client requirements.

In doing this, the candidate must:

- research current and relevant local government building design requirements and approval processes
- select, complete and present construction contract and related project documentation to client for approval and formal acceptance.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction legislation, codes and standards
- relevant sections of the National Construction Code (NCC)
- building and construction industry planning processes:
    - town planning and building application requirements
    - certifications from local authorities
    - building permits and approvals
- various types of building contracts and their application and legal requirements
- development of project plans and specifications:
    - site plans and sketches
    - design details
    - material specifications
- financial and business principles related to dealing with clients

© Commonwealth of Australia, 2026 BuildSkills Australia

- site evaluation and site works:
    - site location and suitability for intended use
    - site aspect, slope, drainage and surrounding sites
    - site access and egress during construction
    - site preparation, excavation and earthmoving.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

- government building legislation
- relevant building industry and local authority codes and standards
- site plans and project contracts
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- business equipment and technology, applications and software to prepare client contracts, drawings, costings and other documentation to meet client requirements.

CPCCBC4032 Apply contract law to sales processes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply contract law to the sales processes for construction of residential and commercial buildings. It includes selection and administration of contract and pre-contract agreements.

This unit of competency applies to builders, site supervisors and related construction industry professionals responsible for ensuring contract law is applied to the sales process of building.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify legislative requirements applying to the sales process.	1.1	Identify relevant government legislation relating to contract law.
		1.2	1Identify types and purposes of contracts employed within the building and construction industry.
		1.3	Identify pre-contract agreements that meet legal and organisational requirements.
		1.4	Identify pre-contract clauses within the agreement.
2	Apply contract law as it relates to the sales process.	2.1	Explain the importance of contract to sales process and implications of contract law to the client.
		2.2	Describe clauses in the contract to the client, the reasons for their inclusion and their impact.
		2.3	Explain the offer and acceptance element of a contract to the client.
		2.4	Apply common law principles, federal laws and contract standards and codes to the sales process.
		2.5	Apply cooling off periods, definitions of building work and provisional sum (PS) and prime cost (PC) allowances.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Explain to the client contract anomalies and appropriate measures to be taken in the rendering of the contract.
1	Finalise the pre-contract agreement with customer.	3.1	Ensure clauses that reflect client's requirements are included in pre-contract agreement.
		3.2	Ensure documents are signed in accordance with legal and organisational requirements.
		3.3	Receive payment or deposit from client in accordance with legal and contractual requirements.
		3.4	Process and save documents following organisational procedures.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - use contract terminology relevant to the context
  - use written and oral communication to clearly confirm client understanding and agreement with contract clauses
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4032 Apply contract law to sales processes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying contract law to the sales process for one building and construction project.

In doing this, the candidate must:

- select the correct contract for the building project
- select the appropriate clauses and conditions within the contract and explain the reasons and impacts to the client
- administer the contract to meet government legal and regulatory requirements
- follow organisational procedures to apply contract law to the sales process
- determine and explain to the client appropriate measures to be taken in the event of anomalies in rendering the contract
- communicate and finalise pre-contract agreements with client.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- contract types and the circumstances they cover
- contract law and related government legislation and regulations
- legal meanings of terms and clauses in building and construction contracts
- definitions and interpretations commonly applied to contracts
- definitions of building work
- pre-contract agreements:
    - offer and acceptance documentation
    - preliminary contracts

© Commonwealth of Australia, 2026 BuildSkills Australia

    - preparation of plan agreements
- clauses in construction contracts:
    - cost adjustments
    - extensions of time
    - offers and acceptances
    - payments
    - retention of moneys
    - scope of work
    - terms and representations
- pre-contract clauses:
    - conditions
    - scope of work
    - time for completion
- relationship between the organisation and its clients.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- variety of construction contracts
- government contract law legislation and regulation
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- digital technology to access information and software to process and save contract documentation
- relevant building industry and local authority codes and standards
- site plans and project contracts

CPCCBC4033 Maintain the sales environment

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to maintain the sales environment, providing a clean and attractive location in which to promote and sell the organisation's products and services. It includes establishing and maintaining an environment that features up-to-date displays where potential customers can gather accurate information and discuss their ideas and options.

The unit of competency is suitable for sales consultants and other professionals within the building and construction industry responsible for the marketing and sale of new residential and commercial constructions.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for maintaining the sales environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and organise the sales area.	1.1	Obtain, read and interpret the organisation's products and services range.
		1.2	Plan the design of the display or presentation area to accommodate staff and client requirements.
		1.3	Provide facilities to a professional standard that cater for the comfort and needs of diverse customers.
		1.4	Arrange display or presentation area ensuring safe and adequate access, noise reduction, privacy and adequate lighting.
2	Arrange product information.	2.1	Design and present window and external displays in a manner to attract prospective customer attention.
		2.2	Set up internal displays at an appropriate level, within reach, ensuring that traffic through the area is not impeded.
		2.3	Provide product information that is accurate, understandable and attractively presented.
		2.4	Identify and highlight product visual features, design, specifications and cost advantages.
		2.5	Make enterprise promotional campaign materials available to all sales consultants.
3	Implement housekeeping requirements.	3.1	Use displays, sales areas and offices in accordance with organisational policies.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Address housekeeping requirements, such as cleaning, lighting and room aesthetics, to maintain a pleasant and fresh environment.
		3.3	Develop a housekeeping schedule and notify organisation regarding maintenance requirements and costs.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCBC4033 Maintain the sales environment

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by maintaining a sales environment to market new residential or commercial constructions on at least three occasions.

In doing this, the candidate must:

- arrange the sales environment to cater for customer needs
- organise displays of product information without obstructing the movement of people.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- products and services offered by the organisation:
    - artist's impressions and sketches
    - brochures
    - colour charts
    - plans and drawings
    - price list
    - samples of materials and building products
- organisation's policies and procedures:
    - sales and promotions
    - management of display home or settings
    - diverse customer requirements
- work health and safety (WHS) legislation relating to public safety
- workplace safety:
    - risk assessment
    - lighting
    - electrical hazards

© Commonwealth of Australia, 2026 BuildSkills Australia

    - cleanliness and hygiene
- contemporary and effective interior and exterior design solutions:
    - promotional, display and presentation area
    - exhibition spaces
    - front of office
    - mobile display spaces
    - portable display areas and stands
- housekeeping:
    - general cleanliness and hygiene of display areas
    - maintaining adequate lighting
    - maintaining the cleanliness of display racks and spaces
    - regular dusting and vacuuming
    - rubbish and litter removal
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract integrate and compile information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a realistically simulated workplace environment.

Candidates must have access to:

- desks, chairs and office equipment required in a sales environment
- presentation drawings and specifications
- organisational policies and procedures
- current building and construction codes and standards
- promotional materials, banners, brochures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to transmit and receive information electronically.

CPCCBC4052 Lead and manage teams in the building and construction industry

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to lead, manage and engage with a variety of teams working in the building and construction industry. Building and construction industry work teams may include subcontractors and employees, with cultural, competency or other diversities, who are engaged on the project for different periods of time and at different times. It includes liaising with team supervisors or leading hands to establish team objectives, maintain team performance and progress and achieve project quality.

This unit of competency applies to builders, site supervisors and related construction industry professionals responsible for managing diverse work teams to complete projects to specifications and on time.

This unit is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify responsibilities of work teams.	1.1	Identify project timeframes, stages of construction and scheduled commencement dates for work teams.
		1.2	Interpret subcontractor and employee work obligations, conditions and limitations from contracts and associated documentation.
		1.3	Clearly define and communicate team roles, responsibilities and accountabilities.
		1.4	Develop effective communication systems to track team outcomes, progress, delays and any specific requirements.
		1.5	Identify, implement and manage workplace safety requirements that apply to various teams.
2	Liaise with supervisors of teams.	2.1	Identify diversities within teams and negotiate support requirements.
		2.2	Identify and resolve potential conflict within work teams, between other teams and between self and teams on a construction project.
		2.3	Consult with supervisors and provide constructive feedback, information and advice to support teams and individuals to work together on a project and achieve quality work outcomes.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Conduct regular meetings and assist team supervisors to plan and prioritise team tasks and workload.
		2.5	Actively encourage team members to participate in and take responsibility for team activities and communication processes.
		2.6	Resolve issues relating to access to workplace areas where multiple teams intend to carry out work.
		2.7	Issue improvement or safety breach notices to team supervisor or individuals.
1	Monitor and manage team performance and progress.	3.1	Monitor teams' effectiveness, progress and work quality.
		3.2	Delegate responsibilities to teams or team individuals to improve performance and productivity.
		3.3	Monitor skills level of individuals within a team, evaluate and address training requirements.
		3.4	Discuss barriers and issues that impact on performance and progress.
		3.5	Address and solve current and potential problems.
		3.6	Encourage active participation in work activities, innovation and initiative.
		3.7	Monitor resource utilisation.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.8	Record and save team information.

Foundation Skills

As well as the Foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - select and use appropriate conventions and protocols when communicating with different teams
  - adapt personal communication styles to model required behaviour, build trust and positive working relationships and to show respect for the opinions and values of others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4052 Lead and manage teams in the building and construction industry

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by leading and managing at least three different work teams on a building and construction project.

In doing this, the candidate must:

- manage teams with varying competency levels of workers
- work effectively and interact with team supervisors or leading hands to achieve quality work within set timeframes
- manage and support teams experiencing difficulties and take necessary action to rectify issues
- effectively manage communications with, and between diverse groups
- resolve negative interactions or problems between project teams.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- conditions and requirements of contracts and agreements
- government legislation relating to employment of employees and contractors
- delegation and work allocation
- workplace planning and performance measurement systems and processes
- diversity:
    - gender
    - culture
    - language
    - age

© Commonwealth of Australia, 2026 BuildSkills Australia

    - ability
- approaches to support teams and individuals and respond to diversity in the workplace
- cultural diversity and cultural values
- work teams:
    - trades
    - labourers
    - suppliers
    - administration support
    - sales
    - professionals
- team relationships and group dynamics
- duty of care when informing teams and allocating job tasks
- workplace procedures relating to on-site contractors
- workplace safety requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- industrial relations and work health and safety (WHS) legislation
- digital devices, applications and software to access, share and save information
- relevant building industry and local authority codes and standards
- workplace safety documentation.

CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings

Modification History

Release	Comments
2	--
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to National Construction Code (NCC) Class 2 to 9 Type C building projects. It includes knowledge of the structure of the NCC, as well as the ability to access relevant information from the code as applicable to various building projects.

It applies to builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards related to Class 2 to 9 Type C construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Classify buildings.	1.1	Determine nature of building, its use and arrangement from construction plans and specifications.
		1.2	Access, read and interpret relevant Australian Standards for commercial building and construction projects.
		1.3	Define classification of building from NCC.
		1.4	Identify and interpret multiple classifications from NCC.
2	Determine construction compliance requirements from NCC.	2.1	Identify NCC Performance Requirements relevant to Class 2 to 9 Type C building projects.
		2.2	Determine range of criteria to ensure that construction methods comply with NCC Performance Requirements.
		2.3	Identify and document non-conforming construction methods with NCC Performance Requirements.
		2.4	Propose and discuss Performance Solution with design and building and construction professionals.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Analyse and apply Assessment Methods to determine compliance with Performance Solution or Deem-to-Satisfy Solution.
		2.6	Meet the evidence of suitability requirements for building materials and products stated in the NCC.
		2.7	Complete relevant documentation to meet NCC requirements.
1	Determine fire protection requirements.	3.1	Identify NCC and other legislative requirements for passive and active fire control elements in buildings.
		3.2	Determine level of fire resistance required for the construction of various buildings.
		3.3	Check existing building for compliance with passive and active fire protection requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC4053 Apply building codes and standards to the construction process for Class 2 to 9 Type C buildings

Modification History

Release	Comments
2	--
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying codes and standards to the construction process of two Type C building projects:

- one Class 2, 3 or 9
- one Class 5 to 8.

In doing this, the candidate must:

- determine the type of construction and the use of the building from construction plans and specifications and class of building using National Construction Code (NCC) classifications
- identify current building and construction codes and Australian Standards relevant to the building project
- apply NCC Performance Requirements in relation to the design and construction of the building:
    - structure
    - fire protection
    - access and egress
    - services and equipment
    - health and amenities
    - ancillary provisions
    - energy efficiency
- apply Performance Solutions to ensure that construction complies with Performance Requirements
- identify faults and problems and propose actions to rectify

© Commonwealth of Australia, 2026
BuildSkills Australia

- inspect a building to determine fire protection compliance with NCC and other legislative requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building legislation, codes and standards
- the NCC:
    - Performance Requirements and General Requirements
    - Performance Solutions and Assessment Methods
    - Deem-to-Satisfy Solution (DTS)
    - Performance Hierarchy
    - evidence of suitability for building materials and products
    - classes of building and types of construction
- Assessment Methods stated in the NCC:
    - comparison with DTS provisions
    - evidence of suitability
    - Expert Judgement
    - Verification Method
- below ground construction:
    - methods
    - structural sufficiency
    - water ingress
    - water proofing
    - work health and safety (WHS)
- organisational policies and procedures, quality systems and best practice approaches
- workplace safety requirements
- properties, characteristics and limitations of specified building materials and components
- processes, procedures and techniques for construction of wide span and complex designed buildings
- basic commercial building design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- causes and implications of building defects related to failure of applying building codes and standards to residential and commercial buildings

© Commonwealth of Australia, 2026
BuildSkills Australia

- extent of remedial work required for various defects caused by inadequate design and application of building codes and practices
- environmental requirements and sustainability principles and concepts
- project plans, specifications and structural details
- construction terminology.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction regulations
- current building and construction codes and standards
- NCC Volume 1
- construction drawings, site plans and specifications
- organisational policies and procedures and other quality documentation to undertake the performance criteria and assessment requirements
- digital technology devices, applications and software to source and document information.

CPCCBC5001 Apply building codes and standards to the construction process for Type B construction

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards to the construction processes for Type B construction. It includes interpreting the National Construction Code (NCC) and other codes and standards related to a specific building.

It applies to NCC classifications:

- Commercial - Class 2 to 9, Type B

This unit of competency applies to builders, project managers and related construction industry professionals responsible for ensuring compliance with building codes and standards in the building and construction industry.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Classify buildings.	1.1	Determine the nature, use and arrangement of buildings.
		1.2	Apply NCC criteria to determine the defined building classification.
		1.3	Identify relevant Performance Requirements of the NCC that apply to a project.
		1.4	Identify compliance and assess non-compliance against the NCC Performance Requirements.
2	Determine compliance solutions within the NCC.	2.1	Determine Performance Solutions to meet the Performance Requirements.
		2.2	Discuss options with relevant persons to necessitate design or construction change.
		2.3	Apply Deem-to-Satisfy (DTS) solution with supporting evidence to comply with the Performance Requirements.
		2.4	Consider Performance Solutions and supporting evidence to achieve compliance with Performance Requirements.
		2.5	Document performance-based solutions in accordance with organisational quality procedures and processes.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Complete and compile relevant documentation and evidence that complies with NCC Performance Requirements.
1	Apply fire protection requirements.	3.1	Identify passive and active fire control elements required by relevant legislation.
		3.2	Determine level of fire resistance required for the construction of buildings up to three storeys.
		3.3	Apply NCC requirements with respect to passive and active fire protection to buildings up to three storeys.
		3.4	Check passive and active fire protection requirements are applied during and on completion of works.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use applications to access, extract and share information.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying building codes and standards to the construction of two Type B buildings:

- one Class 2, 3 or 9 and
- one Class 5 to 8.

In doing this, the candidate must:

- identify the National Construction Code (NCC) Performance Requirements of the project:
    - structure
    - fire resistance
    - access and egress
    - services and equipment
    - health and amenity
    - ancillary provisions
- determine Performance Solutions by applying performance based and Deem-to-Satisfy solutions or a combination of both to meet the Performance Requirements
- apply assessment methods, within the General Requirements of the NCC, to determine whether the solutions meet the relevant Performance Requirements
- apply evidence of suitability requirements, as stated in the National Construction Code (NCC), to repudiate non-conforming building products.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

© Commonwealth of Australia, 2026 BuildSkills Australia

- relevant government building and construction legislation, codes and standards
- contractual requirements
- the NCC:
    - building classification
    - Performance Requirements
    - Performance Solutions
    - Performance Hierarchy
    - Assessment Methods
    - Verification Methods
    - comparison with Deem-to-Satisfy provisions
    - evidence of suitability

CPCCBC5002 Monitor costing systems on complex building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to monitor costing systems for building and construction projects. It includes processes and practices involved in controlling costs, and the production and maintenance of expenditure schedules and other arrangements, to ensure contracts or projects remain on budget.

This unit of competency applies to builders, senior managers in building and construction firms, and other construction industry personnel who work independently and in groups to investigate, evaluate and report project costing.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare towork safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify and classify project costs.	1.1	Access, read and interpret current building codes of practice, standards, legislation and specifications.
		1.2	Identify construction costs and produce accurate estimations from project schedules.
		1.3	Define cost estimates appropriate to contract requirements and accurately translate into the correct cost centres.
		1.4	Identify cost centres and correctly incorporate into a planned project cost network.
		1.5	Undertake risk assessment and compare estimated cost with estimated risk.
2	Prepare schedules for project expenditure.	2.1	Identify project critical points and prepare draft schedules of project expenditure.
		2.2	Produce hard copies of prepared expenditure schedules in line with organisational processes.
		2.3	Identify critical financial phases of the project and match cash flows to expenditure.
3	Create curves for projected cash flow and payments.	3.1	Prepare interim payment claims and rise and fall calculations for contractors and subcontractors.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Prepare projected S curve to show cash flow and resource control.
		3.3	Prepare and compare projected cash flow and payments using time risk and cost risk.
		3.4	Compare cash flows using early start and late finish for pessimistic or optimistic outcomes.
		3.5	Calculate pessimistic overdraft requirements.
4	Monitor and maintain expenditure.	4.1	Monitor cash flow and creditor payments daily.
		4.2	Compare network budget cost to actual costs in the tender calculations.
		4.3	Calculate rise and fall expenditure and advise financial controller of variations.
		4.4	Identify and analyse reasons for any cost variations.
		4.5	Take necessary remedial action and record to retain contract financial compliance.
5	Prepare final cost report.	5.1	Compare actual costs with estimates at the completion of the job and compile a report detailing future actions.
		5.2	Adjust organisational rates as required, based on the final cost report and current movements in prices and rates.

© Commonwealth of Australia, 2026 BuildSkills Australia

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to:
  - use and apply graphical techniques to analyse and compile costing information
  - research and investigate statistical and numerical data to measure performance against cost estimations
- technology skills to:
  - use a range communication tools and devices to communicate and collaborate effectively with others
  - use specialised programs to access, extract and share information in effective ways.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCCBC5002 Monitor costing systems on complex building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by monitoring the costing systems for a Class 2 to 9 Type A building and construction project.

In doing this, the candidate must:

- produce schedules of expenditure from comparing the extent of actual costs to estimated cost
- produce accurate and timely financial reporting in the format required by the organisation
- plan and continuously revise the schedules of payments and cash flows to match contract performance and efficiency.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- advanced estimating and costing systems used in the building and construction industry
- relevant government standards, codes of practice, legislation and licensing requirement for medium-rise construction projects
- building and construction costs:
    - building or construction materials
    - temporary on-site services and permanent utilities
    - human resources and specialist services labour
    - plant and equipment purchase, lease and operating
    - pre-cast and off-site prefabricated materials
    - consumables

© Commonwealth of Australia, 2026 BuildSkills Australia

- project finance cost centre
- financial principles:
    - evaluating and eliminating or reducing risk
    - progress payments to maintain cash flow
    - expenditure evaluation and overhead costs
- project cost reporting:
    - cost-benefit analyses of overtime payments
    - detailed summaries of actual costs against estimates
    - details of cost over-runs and savings on labour and contracting out
    - details of savings or under-expenditure on materials or supplies
    - equipment performance information and efficiencies
    - variations in rates occurring through rise and fall clauses and effects
    - wages, salaries and penalties
    - insurances, including workers' compensation premiums
- project processes and timelines.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant and current project plans, specifications, codes, standards and regulations
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- organisational systems for cash flow and payments
- technology and applications to access, extract, integrate and compile information to facilitate monitoring costing systems on a construction project.

CPCCBC5003 Supervise the planning of on-site building and construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to supervise the planning process and organisation of on-site work for building and construction projects. It includes interpreting contract and planning requirements and developing strategies for scheduling human and physical resources effectively to comply with contractual obligations and meet planning timelines.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum three storeys
- Commercial - Class 2 to 9, Type B and C

This unit of competency applies to builders, related construction industry professionals and senior managers within building and construction firms who are self-directed and initiate and manage complex planning and scheduling.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Appraise project requirements.	1.1	Access, read and interpret copies of building approvals and conditions relating to the building and construction project.
		1.2	Review contracts to determine any unusual aspects of construction, conditions, use of materials or penalty provisions.
		1.3	Identify possible design problems and bring to the attention of project consultants.
		1.4	Review availability of subcontractors and their suitability to meet job requirements specific to a project.
		1.5	Review availability of materials and conditions of purchase and payment.
		1.6	Establish site access, temporary services and appropriate location of on-site facilities.
		1.7	Establish and maintain contact with relevant statutory building authorities.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Establish strategies and schedules.	2.1	Establish the project's critical path and sequence planned project operations.
		2.2	Develop project schedules incorporating delivery of physical resources and assignment of human resources.
		2.3	Plan and schedule for the removal of existing services and hazardous materials in accordance with regulatory and environmental requirements.
		2.4	Establish work health and safety (WHS) site requirements for rehabilitation procedures, hazard identification and risk management.
		2.5	Develop project contingency strategies to consider anticipated delays.
		2.6	Establish strategies for the control of multiple projects.
1	Supervise on site operations.	3.1	Inspect and record condition and structural integrity of on-site and surrounding buildings to be retained.
		3.2	Submit reports to owners and relevant stakeholders and retain copies.
		3.3	Supervise removal of unwanted structures, disconnection of unutilised services and site preparation.
		3.4	Direct location and positioning of on-site amenities and facilities and connection of temporary services.
		3.5	Coordinate delivery dates and on-site locations for physical resources and materials.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.6	Implement and maintain a resources control system for recording materials, equipment and personnel entering and leaving the site.
		3.7	Manage data entry into an appropriate scheduling system for analysis.
4	Delegate and supervise staff.	4.1	Employ effective human resources and implement practices and policies which maximise performance and productivity.
		4.2	Allocate staff to meet the demands of the project site or sites as stated in regulatory and organisational employment conditions.
		4.3	Delegate and manage staff to hire and record physical resource activity and authorise payments.
		4.4	Monitor activities against contractual requirements, facilitate adjustments to the project timeframe and advise management of cost-benefits and implications of providing overtime payments.
		4.5	Maintain a safe, effective and productive work environment.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- planning and organising skills to:
  - sequence and schedule complex activities
  - reassess priorities and apply contingencies, as circumstances change, to meet scheduled timeframes
- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use applications to access, extract and share information and data.

© Commonwealth of Australia, 2026 BuildSkills Australia

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC5003 Supervise the planning of on-site building and construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by supervising the planning of one on-site building and construction project for:

- a Class 1 and 10 building, to a maximum of three storeys, or
- a Class 2 to 9, Type B or C.

In doing this, the candidate must:

- translate contract requirements into construction plans and processes
- develop strategies that effectively maximise physical and human resource use
- apply construction planning processes that effect desired outcomes and meet proposed timeframes
- establish and maintain a workplace environment representative of good management practice.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction legislation, codes and standards for construction
- building and construction industry contracts
- building and construction industry subcontracting system:
    - organisational and subcontracted human resources
    - human resource principles and practices
    - subcontractor requirements and availability
    - relevant licensing arrangements
    - rates and costs related to payments and claims

© Commonwealth of Australia, 2026 BuildSkills Australia

- on-site and off-site management practices, including:
    - on-site facilities
    - plant and equipment
    - power, water, telephone and other temporary services
    - pre-cut or pre-cast components
    - raw materials
    - temporary site facilities
- construction planning process, including:
    - project scheduling
    - critical events and milestones
    - labour, materials and plant and equipment coordination
- workplace safety requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- relevant project plans, specifications, codes, standards and regulations for building class
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- technology and applications to access, extract, integrate and compile information
- national and state industrial relations legislation.

CPCCBC5004 Supervise and apply quality standards to the selection of building and construction materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply quality standards to the selection of building and construction materials. It includes supervising the selection of building materials that meet building standards, contract specifications and service requirements for the project.

This unit of competency applies to builders, related construction industry professionals and project managers within building and construction firms responsible for supervising systems through which compliant and quality materials are selected, acquired and stored on site for construction of building projects.

This unit of competency applies to those who are self-directed and have substantial depth of knowledge and skills to make independent judgements.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine the properties of building materials.	1.1	Access, read and interpret construction specifications and material standards.
		1.2	Identify suitability of materials commonly used in the region for a given building system.
		1.3	Determine properties of materials, their standards of quality and their compatibility and non-compatibility with different materials.
		1.4	Identify environmental impacts of different materials.
		1.5	Determine the impact of allowable tolerances on the conversion of naturally occurring materials.
		1.6	Identify and check tolerances for installing and assembling materials regarding the nature of the work being performed and the requirements of Australian Standards.
2	Select suitable building materials for application.	2.1	Select building materials regarding structural requirements and suitability for the building system specified in the contract.
		2.2	Select materials for their safety, required fire resistance rating, serviceability and cost effectiveness.
		2.3	Consider short and long-term degradation of materials in relation to the proposed life cycle of the building.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Select alternative materials if specified materials are unavailable or unsuitable.
		2.5	Arrange for expert advice as necessary to confirm or refute materials options.
		2.6	Apply evidence of suitability, as stated in the National Construction Code (NCC), for all building materials and products.
1	Supervise the acceptance, safe handling and storage of materials on site.	3.1	Identify and communicate organisational procedures for the acceptance, safe handling, storage and protection of materials on site.
		3.2	Instruct workers on the process to refuse acceptance of substandard or non-compliant materials.
		3.3	Determine limitations and effects of transportation on materials and components and take action in the case of potentially damaging circumstances.
		3.4	Handle materials correctly and safely on site using appropriate equipment and safe work practices.
		3.5	Store materials in accordance with manufacturer specifications and in compliance with the relevant standards.
		3.6	Implement systems for inspecting all materials delivered on site for naturally occurring and/or manufactured defects before installation.
		3.7	Ensure personnel are aware of actions to be taken in the case of defects caused by incorrect installation, application or placement.
		3.8	Preserve timber and protect ferrous and non-ferrous metals used in the construction process using established methods.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Supervise suitability and fit for purpose testing of materials.	4.1	Carry out testing of materials, including soil, filling, compacting, surfacing, concreting and welding, to specifications and analyse results on site before and during installation.
		4.2	Accurately identify samples of materials taken during placement or installation and send for laboratory testing.
		4.3	Visually check materials for suitability before building and send materials off site for testing, as required.
		4.4	Implement processes to ensure defective materials are identified and remedial action is recorded.
5	Establish, record and report findings.	5.1	Establish and maintain records of tests and testing procedures completed by the organisation in accordance with its quality management obligations.
		5.2	Evaluate test results and reports periodically to maintain integrity of organisational quality standards.
		5.3	Notify non-conforming on-site material tests immediately to the appropriate organisation officer for further action.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - liaise verbally and/or in writing with manufactures, suppliers and industry experts and regulators about materials and effectively resolve material quality or compliance issues
  - communicate organisational procedures to workers
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Assessment Requirements for CPCCBC5004 Supervise and apply quality standards to the selection of building and construction materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying quality standards to the selection of specified construction materials and supervising on-site processes for acquiring, receiving and storing materials for one building and construction project.

In doing this, the candidate must:

- identify and interpret building and construction materials specified in the project building specifications or contract documentation
- communicate effectively with manufacturers and suppliers to issue evidence of suitability for building materials and products
- supervise acceptance, handling and storage of materials
- confirm delivered material and products against delivery orders and compliance with project specifications
- conduct materials testing:
    - arranging external quality testing or inspections and receive results
    - arranging on-site quality and fit-for-purpose testing
    - taking remedial action for non-conforming test results
- provide advice and information to regulatory authorities as required by the organisation.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- determining and evaluating materials and products from project plans, specifications, codes and standards

© Commonwealth of Australia, 2026
BuildSkills Australia

- building and construction materials and technologies and alternative materials and products
- characteristics, applications and limitations of building material, products and components
- non-compliant building materials and products and the evidence of suitability requirements in the National Construction Code (NCC)
- environmental effects on building and construction materials
- construction supply processes
- processes for the selection of building materials:
    - identifying materials from specifications and drawings
    - identifying specifications and standards described in contract documents
    - selecting and ordering materials that meet those requirements
- maintaining records:
    - completing appropriate organisational records
    - distributing copies in accordance with organisational policy
    - following up reports that indicate departures from quality or manufacturing requirements
    - obtaining appropriate records and reports for review and analysis
- workplace safety:
    - hierarchy of control
    - hazardous manual handling tasks
    - safe use of mechanical lifting equipment
    - licensing and competency requirements to safely operate lifting equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- the NCC
- relevant and current project plans, specifications, codes, standards and regulations
- manufacturer’s product and equipment specifications and information

© Commonwealth of Australia, 2026 BuildSkills Australia

- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- technology, applications and software to access, extract and record information and develop relevant documentation.

CPCCBC5005 Select and manage building and construction contractors

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Performance Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to select and manage building and construction contractors. It includes identifying and quantifying project resource needs and engaging with contractors to determine contract conditions and evaluating their performance.

This unit of competency applies to builders and senior managers within building and construction firms and other construction industry personnel who engage and manage various contractors with diverse occupations.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Competency field(s)

N/A

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine subcontractor requirements.	1.1	Assess subcontractor resource requirements based on expected operations and reference to the business plan.
		1.2	Manage, prioritise and document subcontractor requirements based on expected work sequence and volume.
		1.3	Conduct and manage task analyses to identify competences from the nature of the work to be done and organisational structure.
		1.4	Determine the type and number of subcontractors and develop a formal subcontractor structure for the project.
		1.5	Research industrial relations legislation and contract legal matters to clarify workplace obligations and subcontractor rights that impact on operations.
2	Review subcontractor performance.	2.1	Build an operational profile for each subcontractor from reviewed and identified existing subcontractor areas of expertise.
		2.2	Examine existing subcontractor’s previous work profiles and history to gather information on their performance.
		2.3	Review subcontractor performance to identify strengths and weaknesses.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Develop a management plan for each subcontractor to enhance their ability to meet contractual obligations.
1	Establish terms and conditions for subcontractor engagement.	3.1	Develop or review subcontractor terms of engagement and scope of operations to ensure obligations can be met under the contract.
		3.2	Review subcontractor terms of engagement and periodically reinforce to ensure conditions are met.
4	Manage the selection and engagement of subcontractors.	4.1	Develop and facilitate subcontractor engagement strategies and processes to meet organisational timelines and contract dates.
		4.2	Manage processes for selection and engagement of subcontractors to ensure that equal opportunity principles apply to all applicants.
		4.3	Manage subcontractor short-listing and qualification checking to enable the selection and engagement of the most appropriate subcontractor.
		4.4	Notify successful and unsuccessful applicants about the outcomes of the selection process.
		4.5	Manage and implement processes for commencement, induction and any required pre-engagement training.
5	Evaluate subcontractor performance.	5.1	Develop and manage systems that evaluate subcontractor performance and compliance with contract requirements.
		5.2	Collect strategic information regarding subcontractor performance within the collection parameters and terms of confidentiality and security.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.3	Discuss performance review outcomes with subcontractors on a confidential and equitable basis.
		5.4	Introduce and manage feedback and appeal systems to ensure that subcontractors can challenge review outcomes.
		5.5	Undertake remedial or disciplinary action against the subcontractor in accordance with organisational policy and operational guidelines where appropriate.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- speaking skills to:
  - negotiate appropriate solutions when engaging with subcontractors during selection and performance reviews
  - question and confirm requirements and clarify any misinterpretations that may create issues
- listening skills to:
  - to interpret responses to understand other's perspectives
- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCCBC5005 Select and manage building and construction contractors

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Performance Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting and managing building and construction contractors for one building and construction project.

In doing this, the candidate must:

- identify subcontractor needs against current and projected workloads and contractual commitments and the business plan of the organisation
- manage the subcontractor selection, engagement and appointment process to meet project timeframes:
    - developing and managing terms of engagement for subcontracting opportunities
    - advising interviewees of the outcome of the selection process
    - undertaking referee and credit checks to determine subcontractor performance and financial viability
    - ensuring selection interviews with subcontractors meet the determined criteria
    - undertaking contractual arrangements between the organisation and successful subcontractors
- action and remediate below standard subcontractor performance.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

© Commonwealth of Australia, 2026 BuildSkills Australia

- industrial relations legislation, structures and processes
- organisational quality assurance requirements relating to contracts and contractors
- contracts, workplace agreements and relevant licensing arrangements
- industry subcontracting system and industry benchmarks for subcontractors
- subcontractor administration and performance management systems:
    - work sequence and nature of job roles
    - project timeframe from start to finish
    - quantum of hours required to perform the work
    - performance benchmarks within subcontracts
    - project meetings and provision of progress reports
    - performance monitoring against project timelines and objectives
    - performance management where performance is sub-standard or inappropriate:
        - anecdotal evidence, including input from project managers and administrators
        - examination of data provided by the subcontractor
        - input about subcontractor performance from other organisations
        - observation of the subcontractor on other project sites
        - using subcontractor performance records from previous associations.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

- industrial relations and privacy legislation and appropriate awards and workplace agreements
- construction project plans, specifications, codes and standards
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- technology, applications and software to access, extract, integrate and compile information and data, and securely retain documentation and records

CPCCBC5006 Apply site surveys and set-out procedures to building projects up to three storeys

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply site surveys and set-out procedures to building and construction projects up to three storeys. It includes the skills and practices required to set out building projects, measure, record and interpret data using measuring and levelling equipment.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum three storeys
- Commercial - Class 2 to 9, Type B and C.

This unit of competency supports builders, surveyors and related construction industry professionals who have responsibility for applying design concepts and principles to survey and site set-out on building and construction projects up to three storeys.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Assess and select levelling equipment.	1.1	Identify specialised levelling and surveying equipment available on large building projects for various set-out and levelling procedures.
		1.2	Research and record differences between types of specialised surveying equipment.
		1.3	Identify components of levelling devices.
2	Select, test and operate levelling devices.	2.1	Select levelling devices appropriate for the set-out
		2.2	Perform basic tests on levelling device accuracy in accordance with manufacturer specifications.
		2.3	Calculate and record effects of maladjustment in levelling devices using standard operating procedures (SOPs).
		2.4	Carry out temporary adjustments to set up levelling equipment in accordance with SOPs.
		2.5	Determine horizontal and vertical angles using levelling devices.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Conduct site set-out.	3.1	Obtain, read and identify site information and dimensions from project working drawings, site plan and surveyor’s plans.
		3.2	Access, read and follow relevant workplace safety requirements.
		3.3	Identify correct location of survey pegs prior to positioning pilot pegs.
		3.4	Locate profile pegs at a working distance from survey pegs and parallel to pilot line.
		3.5	Set out overall of building and load bearing members to plans and specifications.
		3.6	Check vertical accuracy of each survey to a tolerance of 10 mm using different levelling devices.
4	Compute grid distances and coordinates.	4.1	Calculate coordinates and bearings, distances related to grids and general set-out work.
		4.2	Demonstrate angular relationship between different bearings (whole circle).
		4.3	Calculate bearing and distance between coordinates.
		4.4	Calculate coordinates of a point given the bearing and distance from a point with known coordinates.
		4.5	Determine offsets from a coordinated point given the bearing and distance from a point with known coordinates.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.6	Determine information necessary to set-out a structure using a site plan.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to:
  - interpret, calculate and transfer project plan dimensions to on site set-out.
- technology skills to:
  - use a range of sophisticated levelling equipment to optimise set-out outcomes
  - use applications to access, extract and share information.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC5006 Apply site surveys and set-out procedures to building projects up to three storeys

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by site surveying and setting out one building project, up to three storeys.

In doing this, the candidate must:

- use two different surveying and levelling devices
- apply survey and levelling principles for site set-out
- perform calculations and conversions using collected survey data.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- design principles and work drawings and specifications
- the National Construction Code (NCC) and Australian Standards
- building systems and application to survey and site set-out
- level and grade checking used to perform survey control to accuracy criteria
- functional and operational features of surveying and levelling equipment:
    - electronic distance measuring (EDM) equipment
    - laser
    - optical levels
    - peg methods
    - theodolite
- workplace safety requirements.

CPCCBC5007 Administer the legal obligations of a building and construction contractor

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to administer the legal obligations of a building and construction contractor, as either party to a contract. It includes maintaining legal obligations, licensing and registration, and managing systems for ensuring compliance with legislation.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum three storeys
- Commercial - Class 2 to 9, Type B and C.

This unit of competency applies to builders, senior managers within building and construction organisations and other construction industry personnel responsible for administering and ensuring contractor obligations and responsibilities are fulfilled for building and construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Establish legal requirements of the business.	1.1	Secure business registration of the organisation in accordance with owner/operator preferences and legal requirements.
		1.2	Seek approval of licensing and registration as a contractor/supervisor from the appropriate government agency.
		1.3	Investigate and meet legal responsibilities of operating a construction business.
		1.4	Complete, submit and maintain accurate and secure legal documents and records.
2	Engage personnel for the project.	2.1	Identify and interpret relevant industrial awards for the hiring of staff or labour.
		2.2	Determine contracts of employment on a case-by-case basis and implement the principles and legalities of workplace agreements.
		2.3	Apply equal opportunity principles in all aspects of recruitment and selection of staff and other personnel.
		2.4	Follow procedures for employment termination and redundancy.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Establish, document and implement dispute resolution processes as necessary.
		2.6	Identify and implement workers compensation policies.
3	Meet work health and safety (WHS) requirements.	3.1	Comply with WHS legislation.
		3.2	Investigate and apply for necessary approvals or permits from WHS authority prior to work commencing.
		3.3	Inform workers of their rights and responsibilities and ensure a safe workplace that complies with legislative requirements.
		3.4	Adhere to regulations relating to noise abatement and working hours.
		3.5	Inform workers of personal and organisational obligations and ensure that workers have been inducted.
		3.6	Facilitate and implement rehabilitation arrangements for employees returning from injury or illness.
		3.7	Assist workers returning to work after injury or illness to regain full employment status as soon as practicable.
4	Administer business obligations.	4.1	Collect, record and make taxation and Goods and Services Tax (GST) payments in compliance with Australian Taxation Office (ATO) requirements.
		4.2	Calculate and contribute individual worker’s superannuation entitlements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.3	Evaluate and attain adequate personnel, property and project work insurance policies.
		4.4	Implement and maintain consumer fair trading practices ethically, effectively and efficiently.
5	Comply with environmental requirements.	5.1	Introduce and use renewable materials as a primary aim, wherever possible, over non-renewable materials.
		5.2	Minimise use of high energy materials and introduce low energy materials where practical.
		5.3	Implement processes to ensure compliance with environmental protection and sustainability requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- writing skills to:
  - complete legal documents and records
- communication skills to:
  - liaise verbally and in writing with government agencies
  - provide information to employees and other stakeholders
- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Assessment Requirements for CPCCBC5007 Administer the legal obligations of a building and construction contractor

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by administering the contactor's legal obligations of one building or construction project.

In doing this, the candidate must:

- advise appropriate authorities and gain the necessary approvals or responses
- establish and maintain good human relations with contracted employees, subcontractors and other stakeholders
- manage organisational taxation and insurance obligations

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Commonwealth and state/territory legislation and regulations appropriate to the operations of the business:
    - Building Code of Australia (BCA)
    - Australian Consumer Law (ACL)
    - Australian Securities and Investments Commission (ASIC)
    - public liability, workers compensation, property and project work insurance requirements
    - industrial relations Acts and regulations
    - privacy
    - superannuation contributions
    - work health and safety (WHS)
    - environmental and sustainability
- Australian Tax Office (ATO) requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

- builder's registration and licensing requirements
- return to work and rehabilitation arrangements
- employees and subcontractor's awards and agreements
- building industry codes of practice and standards
- Australian Business Licence and Information Service (ABLIS)
- local building authority regulations.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a realistically simulated workplace environment.

Candidates must have access to:

- current and relevant Commonwealth and state and territory legislation for businesses
- relevant codes, standards and regulations for operating a business
- copies of appropriate awards, workplace agreements and contracts
- business equipment and technology to access information, lodge documentation and records, securely store legal documentation and records and facilitate administration of legal obligations of a building or construction contractor.

CPCCBC5009 Identify services layout and connection methods for Type B and C constructions

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to identify services requirements, layouts and connections from project drawings and specifications for Type B and C construction projects. It includes identifying and evaluating differing layouts for services to comply with building codes, regulations and standards.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for determining services layouts using design concepts and principles relating to installations.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Evaluate layout for water storage supply.	1.1	Sketch layout for residential water supply and connection from a town supply or tank storage to comply with relevant building regulations and standards.
		1.2	Document single and two-stage pumping systems used to maintain water levels in storage tanks.
		1.3	Identify and address limitations of multi-function and single function services connected to water storage tanks.
2	Evaluate layout and methods of sewerage and drainage disposal.	2.1	Sketch sewerage connection and layout in accordance with relevant building regulations and standards.
		2.2	Assess number of fixtures and building type to determine stack type.
		2.3	Identify fixture units.
		2.4	Determine appropriate connection methods of main drains to local authority sewers against relevant building standards.
		2.5	Assess disposal of sewerage from fixtures situated below the level of the local authority sewer.
		2.6	Monitor collection, treatment and disposal of prohibited discharges for non-domestic buildings.

© Commonwealth of Australia, 2026 BuildSkills Australia

3	Assess layout of mechanical ventilation.	3.1	Identify and sketch methods of mechanical ventilation and air distribution.
		3.2	Check mechanical ventilation and air distribution system design layout is appropriate to the building design and complementary to other services.
4	Evaluate the range of hot water systems.	4.1	Evaluate operating principles of various types of hot water systems.
		4.2	Select suitable hot water system according to accepted and agreed requirements and specifications.
5	Evaluate lighting for a range of situations.	5.1	Identify roof construction used and outline methods for appropriate daylight transmission.
		5.2	Compare various service situations with methods of artificial lighting used.
6	Determine compliance of fire protection.	6.1	Identify authorities involved in plan perusal and site inspection for the various building classifications.
		6.2	Identify requirements for sprinkler systems and fire hoses for the various building classifications.
		6.3	Address fire detector and alarm systems and the application of fire doors.
		6.4	Identify extinguishing agents and their applications.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Plan installation of electrical and electronic services.	7.1	Identify electrical supply connection to site and comply with appropriate authority.
		7.2	Implement electrical design and provision for services.
		7.3	Identify and outline electronic cabling, type of service, categories of cabling, layout of equipment, safe guards, access for maintenance, repair and extensions.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC5009 Identify services layout and connection methods for Type B and C constructions

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by determining, documenting and conveying layout and connection methods to a range of services appropriate to Type B and C constructions, which may be undertaken over several projects and must include:

- water supply
- sewerage and drainage disposal
- mechanical ventilation and air distribution
- hot water systems
- natural and artificial lighting
- fire protection
- electrical and electronic.

In doing this, the candidate must:

- apply design concepts and principles relating to performance of service installations
- identify typical faults and problems and take remedial action
- comply with the National Construction Code (NCC) and Australian standards.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation, codes and standards
- the NCC
- project drawings, details and specifications
- organisational work practices and procedures

© Commonwealth of Australia, 2026 BuildSkills Australia

- manufacturer specifications and installation instructions
- properties, characteristics and limitations of specified materials, products and components
- service installation terminology and definitions
- water supply:
    - single and two-stage pumping for multi-function and single function
    - tank storage supply relative to the public water supply and reservoir heights
    - town supply
- sewage connection and layout:
    - graded or vertical discharge pipes
    - inspection shafts and overflow relief gullies (ORGs)
    - local authority sewerage drainage system
    - septic or biochemical treatment unit
- methods of mechanical ventilation:
    - air conditioning applications
    - air distribution, including mechanical ventilation requirements for enclosed car parks
    - air filtration, including air filters, ducting and main filter types
    - mechanical ventilation

        - power supplies
        - telecommunications
    - layout of equipment:
        - computers
        - telephones
    - safe guards
    - type of service.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant state and territory building legislation codes and standards
- the NCC
- manufacturer's specification and installation instructions
- project plans, details and specifications
- technology, equipment and applications to access, extract, integrate, compile and produce information and drawings necessary to identify services layout and methods of connection.

CPCCBC5010 Manage construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage on-site work for building and construction projects to meet commercial contractual obligations. It includes establishing effective communication processes, managing risks and work health and safety (WHS), managing processes for ordering materials and installing equipment, as well as management of on-site operations.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum three storeys
- Commercial - Class 2 to 9, Type B and C.

This unit of competency applies to builders, related construction industry professionals and senior managers within building and construction firms responsible for monitoring and measuring actions and coping with contingencies to meet scheduled timeframes on medium-rise construction work and/or commercial building projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of CPCWHS1001 *Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Establish site communication processes.	1.1	Read, interpret and follow organisational quality management requirements.
		1.2	Establish and manage site communication processes.
		1.3	Organise dates and times of-site meetings and notify relevant personnel.
2	Establish site safety procedures.	2.1	Establish and implement on site safety and welfare requirements to meet WHS legislation and make available to all workers on site.
		2.2	Identify plant and equipment that require operator licensing to comply with risk management procedures and state and territory licensing requirements.
		2.3	Establish and implement hazard management procedures and instigate precautionary measures.
		2.4	Address hazardous manual handling tasks and inform workers of their responsibilities.
		2.5	Establish construction safety procedures and identify key personnel.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Establish and manage safety induction procedures in the event of dangerous incidents, injuries and accidents.
		2.7	Develop and implement safety reporting processes and documentation in accordance with organisational and legislative requirements.
3	Manage supply of materials and equipment.	3.1	Establish and manage a timely and cost-effective process for ordering, receiving, checking and safely stacking and protecting materials.
		3.2	Establish, manage and monitor procedures for selecting, hiring and maintaining plant and equipment.
4	Manage on-site operations.	4.1	Maintain a safe and cost-effective work environment to achieve schedules and meet contractual obligations.
		4.2	Manage and coordinate human resources and subcontractor obligations to ensure compliance with company operations.
		4.3	Apply contingencies to deal with problems and delays affecting performance and project timelines.
		4.4	Manage industrial relations issues in accordance with established company policy and regulatory guidelines.
		4.5	Revise project schedules, as necessary, and document variations to assist with meeting of timeframes.
		4.6	Implement a quality management system to create a continuous improvement environment in which operational procedures are monitored, analysed and reported.
		4.7	Facilitate variations to approved project plan and specifications with contractual parties and statutory authorities.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.8	Implement multi-site management plans in accordance with organisational policy and site conditions.
5	Manage processing of progress payments.	5.1	Validate and approve progress claims and payments in accordance with contract requirements.
		5.2	Manage project expenditure and check claims against scheduled projected costs for accuracy.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - liaise with subcontractors, staff, clients and local or regulatory authorities
- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC5010 Manage construction work

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by managing on-site construction work of one Class 1 to 10, maximum of three storeys, or a Class 2 to 9, Type B or C building project.

In doing this, the candidate must:

- interpret project material specifications in design documentation and procure quality, compliant materials, products and components
- manage at least one variation to the contract
- manage project financials, with timely payments for completed work
- manage on-site safety, personnel and resources to achieve project outcomes.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- work health and safety (WHS) Acts and regulation
- on-site safety:
    - hierarchy of control
    - duty of care
    - hazardous manual handling
    - risk assessment
    - rehabilitation and return to work requirements
    - environmental management requirements and sustainability principles
- construction methodologies:
    - planned methods of construction
    - construction constraints

    - risks and opportunities
    - temporary and permanent works and services
    - electrical cabling
    - plumbing and gas piping systems
    - temporary lighting and power outlets
    - wastewater disposal systems
    - fire suppression systems
- government codes, standards and regulations
- the National Construction Code (NCC)
- Australian Business Licence and Information Service (ABLIS)
- organisational quality management processes and procedures:
    - building and construction industry contracts
    - managing expenditure
    - communicating with regulatory authorities to ensure compliance with their requirements
- allocation and management of human resources:
    - dispute resolution
- selection and hiring physical resources:
    - relevant licensing arrangements
    - lifting equipment
- on-site communication:
    - emails
    - face-to-face verbal communication
    - mobile and fixed telephone contact
    - site diaries
    - written reports and memoranda
- properties, characteristics and limitations of approved materials:
    - concrete and pre-formed concrete
    - raw construction materials, such as sand, aggregate, timber and cement
    - sarking, insulation, air conditioning ducting and roofing
    - production of materials and prefabrication of products off site.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant building, industrial relations and consumer legislation
- the NCC and other relevant codes and standards
- project plans and schedules, construction drawings, site plans and specifications
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- business equipment and technology, applications and software to facilitate effective management of construction work.

CPCCBC5011 Manage environmental management practices and processes in building and construction

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2. PC 2.4 has been amended to read: 'Evaluate a new project to determine its impact on existing environmental planning obligations.'
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to plan and implement effective environmental practices and processes and manage improvements of environmental issues. It includes determining and managing energy efficient systems, measuring and dealing with non-conforming practices and improving performance.

This unit of competency applies to builders, senior managers and other construction industry professionals responsible for developing effective environmental management plans and strategies to reduce environmental risk on building and construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare an organisational environmental management plan.	1.1	Analyse the potential impact on the organisation of current shifts in environmental legislation or regulations.
		1.2	Determine current environmental management performance using best practice and benchmarking methods.
		1.3	Analyse project requirements in relation to environmental obligations.
		1.4	Prepare an environmental management plan using available information.
		1.5	Seek senior management advice concerning implementation of the plan as required.
2	Manage environmental management plan implementation.	2.1	Inform staff and contractors of their obligations to comply with the environmental plan.
		2.2	Monitor staff and contractor compliance with implementing the environmental plan.
		2.3	Manage the effectiveness and accuracy of the environmental data gathering systems.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Evaluate a new project to determine its impact on existing environmental planning obligations.
		2.5	Contact local authorities and regulatory bodies where the plan requires ongoing external monitoring or overseeing.
		2.6	Communicate information to staff and stakeholders concerning updates to the environmental management plan.
		2.7	Manage and evaluate the environmental management plan and track changing circumstances to maintain organisation compliance.
1	Monitor organisational legal obligations.	3.1	Manage organisational feedback systems to assist with conformance of the plan.
		3.2	Seek regular feedback concerning the operations of the environmental management plan to assist the organisation to meet its legal obligations.
		3.3	Manage and maintain legally required auditing practices to ensure probity and accountability towards legislative requirements.
		3.4	Maintain contact with contractors and monitor their compliance with environmental management requirements.
		3.5	Implement emergency and remediation response strategies as necessary to assist compliance with the environmental management plan.
4	Review environmental management plan.	4.1	Review environmental management plan to identify areas that need actioning or improvement.
		4.2	Introduce measures to encourage staff to suggest innovations to improve the performance of the environmental management plan.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.3	Redraft plans to include improvements or address deficiencies found during the review process.
		4.4	Submit revised plans for endorsement by senior management and implement reviewed procedures.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Assessment Requirements for CPCCBC5011 Manage environmental management practices and processes in building and construction

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2. PC 2.4 has been amended to read: 'Evaluate a new project to determine its impact on existing environmental planning obligations.'
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by developing, implementing and managing an effective environmental management action plan for one building or construction project.

In doing this, the candidate must:

- determine the impact of environmental legislation on the project
- research current trends in environmental management and controls
- assess the recording and reporting system's effectiveness and efficiency
- manage organisational improvement processes to reduce environmental risk and non-conformance.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- current environmental legislative and regulatory requirements and obligations
- environmental management planning:
    - environmental management practices and methodologies
    - environmental prohibitions or restrictions applied within specific projects

© Commonwealth of Australia, 2026 BuildSkills Australia

    - formally or informally gathered information concerning environmental issues and requirements
    - key people to be consulted or included in decision making
    - specific forms of activity to be pursued or which are subject to monitoring or evaluation
    - timeframes and key environmental benchmarks to be achieved
    - current trends in environmental management and controls
    - benchmarking and the establishment of environmental goals
    - penalties for various breaches and non-conformity
- environmental data gathering and feedback systems
- statistical analysis methodologies.

Assessment Conditions

CPCCBC5012 Manage the application and monitoring of energy conservation and management practices and processes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to monitor energy conservation and manage practices and processes within the building and construction industry. It includes applying energy practices and methodologies, statistical analysis, current trends and factors in energy conservation, and legislative and regulatory requirements.

This unit of competency applies to builders, senior managers within building and construction firms and other industry professionals responsible for determining and recording the effectiveness and efficiency of energy conservation to meet organisational targets.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare the organisation energy conservation and management plan.	1.1	Review organisational policies and operational guidelines for energy conservation and management.
		1.2	Analyse the potential impact on the organisation of current shifts in environmental legislation or regulations.
		1.3	Use best practice and benchmarking methods to determine current energy conservation and management performance.
		1.4	Identify opportunities for energy conservation and savings within the immediate work area and on project sites.
		1.5	Consult with staff and contractors for ideas and suggestions concerning organisational energy conservation.
		1.6	Prepare an energy conservation and management plan based on available information.
		1.7	Seek advice from senior management, as required, concerning implementation of the plan.
		1.8	Develop an environmental management plan.
2	Manage the energy conservation plan.	2.1	Inform staff and contractors of their obligations in implementing the energy conservation and management plan.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Manage the energy data-gathering systems for maximum efficiency and accuracy and make changes as necessary.
		2.3	Determine the impact of new projects on existing energy conservation planning.
		2.4	Encourage staff and contractor participation to achieve the plan's objectives and monitor their compliance.
		2.5	Identify difficulties, obstructions or factors that impact on the achievement of the energy conservation plan and take measures to address them.
		2.6	Communicate information concerning updates of the plan to staff and stakeholders.
		2.7	Evaluate strategies to ensure that organisational objectives are achieved.
3	Monitor the energy conservation plan.	3.1	Use organisational feedback systems to assist with compliance and management of the plan.
		3.2	Obtain regular feedback on the efficiency and operations of the energy conservation and management plan from staff and contractors.
		3.3	Identify and promote energy savings throughout the organisation.
		3.4	Implement strategies to assist with compliance of the energy management plan regarding reported energy wastage.
4	Evaluate and recommend changes to the energy conservation and management plan.	4.1	Review and action identified areas of improvement to maintain compliance with plan.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.2	Introduce measures to encourage staff to suggest more efficient procedures and innovations to improve the performance of the energy conservation and management plan.
		4.3	Redraft plans to include improvements or address deficiencies identified during monitoring.
		4.4	Amend and submit revised plans to senior management for approval.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- analytical skills to:
  - assess variations in energy management performance and identify reasons for variations
- communication skills to:
  - enable clear and direct communication of environmental management plan requirements, and seek feedback on improvement initiatives
- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

CPCCBC5013 Manage professional technical and legal reports on building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage the development of technical and legal reports on buildings and commercial construction projects. It includes pre-property inspections and reports, building design and planning advice and reviewing and monitoring construction works.

This unit of competency applies to builders, senior managers, building consultants and other construction industry personnel who advise on building design processes and conduct inspections to develop building and construction reports.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Perform pre-purchase property inspections and assessments.	1.1	Inspect building and identify and document defects to the agreed level of detail requested by a client.
		1.2	Obtain engineers' certificates according to the state of repair or number and type of defects.
		1.3	Estimate rectification costs to the degree of accuracy required or recommend demolition of the structure.
		1.4	Conduct feasibility studies at the direction of government agencies, financial institutions or investment houses.
2	Advise and coordinate the design process and planning approval.	2.1	Prepare a project brief on behalf of client.
		2.2	Assess site conditions and structure.
		2.3	Produce or obtain preliminary design drawings and estimate probable costs.
		2.4	Coordinate a process through which final design documentation will be completed and approved by a client.
		2.5	Submit documentation to obtain authorised planning approval for the project.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Prepare and present planning appeals to the authority, as necessary.
1	Review building or construction works.	3.1	Check contract documentation to ensure client interests are protected.
		3.2	Monitor building or construction works regularly and provide reports on the progress and quality of work.
		3.3	Check variations and refer to contractors as required.
		3.4	Check and approve progress claims.
4	Provide advice on dispute resolution.	4.1	Negotiate disputes on behalf of the client.
		4.2	Provide impartial advice to the parties involved in a building related dispute for equitable settlement.
		4.3	Provide referrals for expert legal interpretation of contractual matters.
		4.4	Provide expert testimony and evidence in the event of disputes going to court.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to:
    - engage in oral negotiations and explore complex issues to reconcile and resolve disputes

© Commonwealth of Australia, 2026 BuildSkills Australia

- technology skills to:
    - use communication tools and devices to communicate and collaborate effectively with others
    - use equipment and programs to access and extract information and develop relevant documentation.

Assessment Requirements for CPCCBC5013 Manage professional technical and legal reports on building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing, from contract requirements, a construction project feasibility study, including advice on building, site use, plans and processes.

In doing this, the candidate must:

- maximise the effectiveness of resources, and oversee the building and construction works to effect contractual outcomes
- coordinate the design process and obtain planning approval
- address assessment of any controversy or doubts.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction legislative requirements:
    - construction industry contracts including quantities establishment, rates and costs related to payments and claims
    - building and construction industry subcontracting system
    - relevant licensing arrangements
    - human resource principles and practices
- work health and safety (WHS) Acts and regulations
- workplace safety requirements
- relevant state or territory building and construction codes, standards and regulations:
    - National Construction Code (NCC)
    - zoning and compliance with laws and by-laws by local authorities
- environmental and sustainability requirements:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - Environment Protection Authority (EPA)
- building and construction quality practices and processes:
    - planning
    - management of on and off-site operations technical and legal requirements
    - engineering approvals by architectural or design consultants
    - final design or specification client approvals
    - finance approvals by lending bodies
- feasibility studies, including related information from:
    - architectural or engineering practicalities
    - availability and quantum of finance
    - availability of services and conditions governing service provision
    - change of use for existing buildings
    - confirmation of ownership
    - development on vacant land
    - encumbrances or caveats on property
    - environmental factors or constraints
    - existing buildings/structures for a given purpose
    - most cost-effective method of building for a given site or location
    - refurbishment costs of buildings/structures
    - special conditions that may apply to developments
- identification of defects through property inspections:
    - adjoining properties
    - confirmation of boundaries
    - on-site inspections of buildings, structures or features
    - site access and egress
    - topographical and geological surveys.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

© Commonwealth of Australia, 2026 BuildSkills Australia

- relevant government building and environmental legislation
- current relevant codes and standards
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- business equipment and technology, applications and software to facilitate management of the development of technical and legal reports.

CPCCBC5018 Apply structural principles to the construction of buildings up to three storeys

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the outcomes required to apply structural principles to the construction of buildings up to three storeys. It includes applying structural principles that meet building codes and standards.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum three storeys
- Commercial - Class 2 to 9, Type B and C.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for ensuring the structural integrity of materials as well as building and construction work so that site safety and quality control measures are maintained during residential and commercial projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Apply structural principles to planning	1.1	Identify main structural principles that apply to the construction of residential and commercial buildings up to three storeys.
		1.2	Identify structural elements from project plans and specifications.
		1.3	Analyse and interpret performance characteristics of building materials and apply them to the planning of the construction work.
2	Coordinate and manage site and job set-up.	2.1	Implement processes to analyse the stability of soils and capacity of the site to support the construction loads.
		2.2	Identify structural requirements for retaining walls in conjunction with related industry professionals and apply them to the planning process.
		2.3	Analyse structural function and requirements for temporary structural elements and apply to the planning process.
3	Coordinate and manage construction of footing systems.	3.1	Check set-out of a building for compliance with documented building plans.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Assess structural performance of specified footings in the specifications for compliance with accepted construction principles and relevant building codes.
		3.3	Excavate, prepare and lay footings to meet compliance with relevant building codes and accepted industry construction principles.
		3.4	Check damp coursing, termite barriers and provisions for tie-down in accordance with building codes and standards.
4	Coordinate and manage structural elements of the construction process.	4.1	Identify and analyse technical construction principles and performance characteristics of construction materials in the project plan.
		4.2	Manage the installation of services in accordance with building plans with allowable tolerances stated in building codes and standards.
		4.3	Confirm compliance of the construction processes of structural elements in conjunction with specialist personnel and implement those processes.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC5018 Apply structural principles to the construction of buildings up to three storeys

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying structural design principles to one residential or commercial construction project up to three storeys, with below ground construction as specified by the National Construction Code (NCC) classification.

In doing this, the candidate must:

- accurately apply design principles relating to performance
- coordinate the support of the structural components by applying temporary structure elements
- identify typical faults and problems and rectify as required.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction legislation and regulations
- building codes, specifications and standards:
    - NCC
    - Australian Standards
    - project specifications
- design principles and behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- below ground construction:
    - methods
    - structural sufficiency
    - water ingress

© Commonwealth of Australia, 2026 BuildSkills Australia

    - water proofing
    - site safety requirements
- properties, characteristics and limitations of structural materials:
    - concrete, including reinforced, pre-stressed concrete and tilt-up panels
    - composite steel and concrete
    - masonry
    - steel (cold-formed steel) and aluminium
- applications of structural principles in buildings:
    - dead and live load calculations and characteristics
    - fire resistance of materials
    - impact of thermal effects
    - impact of time-dependent effects, including creep and shrinkage
    - impact of wind, snow, groundwater, earthquake, liquid pressure, rainwater and earth pressure actions
    - structural resistance of forms of construction
    - structural resistance of materials
- project working drawings and specifications
- work health and safety (WHS) and organisational quality procedures and processes
- temporary structural elements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant state and territory building and safety legislation, codes and standards
- environmental requirements and sustainability principles
- manufacturer’s specification and installation instructions for materials specified in a project
- project plans, work drawings and specifications
- business equipment and technology, applications and software to facilitate effective application of structural principles to the construction and demolition of a building.

CPCCBC5019 Manage building and construction business finances

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage and administer finances within a building and construction business. It includes managing business financial risks, revenue and expenditure and meeting statutory financial obligations.

This unit of competency applies to builders, site supervisors and related construction industry professionals responsible for managing organisational finance systems to ensure the financial viability of a building and construction business.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify requirements of the business.	1.1	Identify building and construction business legislation, regulations and operational and business requirements.
		1.2	Recognise areas of the business requiring expert advice and assistance to meet compliance.
		1.3	Establish business systems and programs to manage business financial requirements and remain up to date and compliant with industry and business changes.
		1.4	Conduct a risk assessment to determine adverse outcomes and consequences.
		1.5	Interpret obligations and responsibilities of managing building and construction finances.
2	Manage business finances.	2.1	Review project budgets and scheduled progress payments to schedule project expenses over the life of the project.
		2.2	Manage cash flow, pay supplier and contractor invoices and retain taxation records.
		2.3	Manage receipt of revenue and progress payments, and action processes for outstanding debt.
		2.4	Monitor financial health of the business regularly to identify potential problems and take appropriate action.
		2.5	Introduce options to improve the financial position of the business.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Maintain and save accurate financial records.
1	Process taxation, insurance and payments.	3.1	Lodge and pay taxes and employee liabilities that apply to a building and construction business.
		3.2	Review and adjust all insurance cover to accommodate business growth or changes to business operation.
		3.3	Process payments to employees on time and contractors and suppliers by the due date.
		3.4	Monitor loan and interest repayments.
		3.5	Review ongoing business finances against project budgets.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCCBC5019 Manage building and construction business finances

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by managing the business finances for a building and construction business over at least six months of business activity and including at least one building and construction project.

In doing this, the candidate must:

- manage business financial systems and processes
- schedule, monitor and process incoming and outgoing payments
- manage budgeting, cash flow and debt recovery
- lodge monthly, quarterly or annual statements and pay tax and workplace liabilities for the registered business
- conduct a business financial risk assessment.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- economic and industry trends
- financial concepts:
    - revenue streams
    - expenses
    - project costings
    - contingency planning
    - business overheads
    - profit
- key government sources for industry information

© Commonwealth of Australia, 2026 BuildSkills Australia

- Australian Consumer Law
- Competition and Consumer Act
- Australian Taxation Office (ATO) obligations for building and construction businesses:
    - income tax
    - capital gains tax
    - payroll tax
    - fringe benefits tax
    - pay as you go (PAYG) instalments
    - goods and services tax (GST)
    - tax differences between a sole trader and a company
    - registering for taxes
    - methods of paying taxes
    - maintaining business and taxation records
- accounting systems:
    - types of invoices
    - invoicing and collecting payments
    - budgeting and reporting
    - end of financial year
- payment methods:
    - credit and debit card
    - direct debit
    - cheque
    - cash
- analysing business finances:
    - financial health check
    - sales calculators
    - profit ratios
    - liquidity and finance ratios
- options to improve business financial position:
    - recover outstanding debt
    - reduce or rearrange expenses
    - sell assets
    - increase prices

© Commonwealth of Australia, 2026 BuildSkills Australia

    - consolidate debt
    - track and improve cash flow
- insurance policies:
    - public liability
    - builders' risk
    - income loss
    - workers compensation
    - commercial vehicles
- contractual financial arrangements:
    - payment subject to quality of work
    - product quality and compliance
    - terms and conditions of payment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- financial documentation and other quality documentation to undertake the performance criteria and assessment requirements
- digital devices, applications and software to monitor, manage and record business finances
- government business legislation.

CPCCBC6001 Apply building codes and standards to the construction process for large building projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to access, interpret and apply relevant building codes and standards applicable to the construction processes of large, high-rise and complex buildings. It includes ensuring building design and specifications comply with the National Construction Code (NCC) and related standards for large residential or commercial building projects.

This unit of competency applies to builders, project managers and related construction industry professionals who make a range of critical decisions in relatively complex situations and take responsibility for their actions.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Interpret relevant codes and standards' requirements.	1.1	Identify relevant clauses from the NCC that apply to individual open classification projects.
		1.2	Determine scope of works and prescriptive requirements relevant to the NCC.
		1.3	Access and interpret requirements of relevant Australian Standards referenced in the NCC.
2	Classify buildings.	2.1	Determine the nature of buildings according to use and arrangement.
		2.2	Apply NCC criteria to determine the defined classification.
		2.3	Identify and interpret NCC requirements for multiple classifications.
3	Apply solutions to construction problems.	3.1	Determine the range of NCC criteria required to ensure project compliance.
		3.2	Identify alternative, compliant solutions for construction problems to comply with NCC Performance Requirements.
		3.3	Meet the Performance Requirement of the NCC by applying a Performance Solution supported by one or a combination of the Assessment Methods.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.4	Use a Deem-to-Satisfy (DTS) solution supported by one or a combination of Assessment Methods to meet NCC compliance.
		3.5	Use a combination of Performance Solutions and DTS solutions to comply with the Performance Requirements of the NCC.
		3.6	Identify and complete relevant documentation to meet Performance Requirements of the NCC.
		3.7	Discuss compliance options with relevant construction personnel to ensure compliance with NCC Performance Requirements.
4	Apply fire protection requirements.	4.1	Determine fire resistance required for the construction of all classes and types of buildings.
		4.2	Identify and apply NCC requirements with respect to passive and active fire protection to all classes and types of buildings.
		4.3	Check existing buildings for compliance with passive and active fire protection requirements according to NCC requirements.
5	Implement strategy to manage construction compliance.	5.1	Establish strategies to manage construction compliance of large, complex and high-rise buildings with the NCC.
		5.2	Implement and coordinate the work of professionals involved in the development and management of the building process.
		5.3	Seek effective design solutions for buildings of more than three storeys to meet the needs of clients and ensure compliance with the NCC.
		5.4	Design and implement quality assurance processes to ensure effective and compliant management of the construction process.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.5	Detect non-conforming building materials and products and manage the evidence of suitability as required in the NCC.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - lead discussions to explore solutions to complex design problems
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

CPCCBC6002 Generate and direct the development of new projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to generate and direct the development of new projects in a building and construction organisation involved in either residential or commercial projects.

This unit of competency applies to builders, project managers and related construction industry professionals who collate, analyse and synthesise detailed information from a range of sources to create, supervise and control the development of new projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency field(s)

N/A

Unit sector(s)

Building and Construction

© Commonwealth of Australia, 2026 BuildSkills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify potential new projects.	1.1	Examine the organisation's project history to identify projects with successful or above average outcomes for characteristic evaluation.
		1.2	Review the property and construction market for available sites and buildings with development potential.
		1.3	Monitor new trends in development and construction.
		1.4	Analyse available statistical data on possible areas of project development.
		1.5	Use network contacts to source businesses requiring new or upgraded facilities.
		1.6	Short-list most promising projects and prepare preliminary costings and returns.
2	Formulate development proposals and feasibility studies.	2.1	Review short-listed projects to facilitate selection of preferred options for detailed design work.
		2.2	Develop project briefs.
		2.3	Review the environmental impact of projects and assess any existing environmental impact statements.
		2.4	Carry out feasibility studies on the project's commercial viability and ascertain the capacity to generate income through the various alternatives.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Generate accurate costings for each proposal.
		2.6	Hold discussions with potential clients and investors and explain the benefits and risks of each project.
		2.7	Decide to proceed once client and investor agreement is obtained.
3	Negotiate project approvals.	3.1	Submit project plans to relevant authorities to seek their reaction and identify any impediments to project approval.
		3.2	Revise project plan to comply with authorities' directives.
		3.3	Resubmit plans for formal planning approval as necessary.
4	Obtain project finance.	4.1	Approach finance institutions or investors for financial support.
		4.2	Obtain suitable finance package for the project from institutions or investors.
		4.3	Identify and approach possible joint partners for the project and determine interest.
5	Manage the commissioning of a project.	5.1	Appoint and retain project consultants.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.2	Prepare documentation for proposed project, check against the brief and send for formal building approval.
		5.3	Complete detailed costing of approved documentation.
		5.4	Make modifications to the project to bring it within or under budget if required.
		5.5	Make final decision to proceed with the project or defer to a future date.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- writing skills to:
  - prepare project briefs, plans and associated documentation for stakeholder /investor review, financial support and building approvals
- analytical skills to:
  - interpret statistical data and apply calculations
  - interpret strategic and often ambiguous information to develop logical, supportable and practical decisions
- planning and organising skills to:
  - sequence and schedule complex activities
  - utilise existing structures and systems to coordinate activities or design new processes as required
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6002 Generate and direct the development of new projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by generating and directing the development of one new building and construction project.

In doing this, the candidate must:

- select and deploy human and physical resources to enable new project to be developed
- conduct an in-depth analysis of collated information and data to inform a feasibility study
- identify possible financial constraints and investigate financial options and investors.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- appropriate sector of the building and construction industry and nature of the contracts upon which its activities are based
- factors to be considered in assessing the risk inherent in different types of building and construction projects
- business administration principles commensurate with organisational needs and financial options:
    - bank or finance company loans
    - customer or client funding
    - overdrafts
    - personal venture capital
    - speculative funds provided for investment
- industry industrial relations climate and practices

© Commonwealth of Australia, 2026 BuildSkills Australia

- legislative, regulatory, and administrative obligations incumbent on the building and construction industry:
    - work health and safety (WHS)
    - environmental requirements and sustainability principles and concepts
    - employment and financial practices
- feasibility studies:
    - detailed analyses of markets and opportunities
    - examination of possible extensions to existing projects
    - gathering data from government or private sector publications
    - personal investigation of opportunities
    - socioeconomic and urban studies.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current and relevant government building Acts and regulations, codes and standards
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- organisational financial reports and business data
- industrial relations legislation, awards and agreements
- technology, applications and software systems for accessing, researching, extracting, analysing and presenting information, interpreting data, calculating costs and developing documents and reports to facilitate development of new projects.

CPCCBC6003 Establish, maintain and review contract administration procedures and frameworks

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage organisational contract administration procedures and frameworks for building and construction projects. It includes establishing and maintaining a contract management system necessary to produce accurate and successful project outcomes in accordance with organisational guidelines.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for coordinating and managing building and construction projects.

This unit of competency is suitable for those using cognitive, technical and communication skills to analyse, plan, design and evaluate approaches to unpredictable problems and/or management requirements.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Establish contract administration procedures and frameworks.	1.1	Establish contract administration team comprising of persons with wide experience and knowledge in the building and construction industry.
		1.2	Develop overview of the organisation's current legal and administrative climate and communicate this to the contract administration team.
		1.3	Develop strategic plan for construction contract administration procedures and frameworks.
		1.4	Establish information gathering mechanisms that draw strategic performance advice from all parts of the organisation.
		1.5	Develop and implement quality assurance measures as part of the contract administration process.
		1.6	Develop and establish reporting and feedback structures through which advice and action instructions can be conveyed to employees and subcontractors.
		1.7	Establish benchmarks for contract performance and introduce a management framework for achieving, maintaining and exceeding those parameters.
		1.8	Develop and introduce measures through which contract defaulters can be managed back into contract compliance.
2	Maintain contract administration procedures and frameworks.	2.1	Introduce policy and administrative guideline documentation that supports the contract administration process.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Develop and implement evaluation and review methods to ensure administration procedures and frameworks are effective.
		2.3	Initiate internal feedback systems and methods to ensure that difficulties with administration of contracts are resolved within organisational guidelines.
		2.4	Introduce measures which ensure the safety and security of contract administration documentation.
		2.5	Maintain overall corporate contract administration framework comprising of employees, subcontractors, client and management.
1	Review contract administration procedures.	3.1	Develop, implement and manage review, recording and evaluation system to ensure probity and effectiveness of the contract administration system.
		3.2	Implement and manage regular scheduled and unscheduled reviews of contract administration procedures.
		3.3	Undertake formal evaluation of the contract and administration system regularly in consultation with organisation's legal advisors.
		3.4	Review and clarify operating procedures.
		3.5	Review contract documentation processes and provide feedback to those preparing contracts.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - consult with staff, stakeholders, clients and legal advisors
  - direct activities of personnel involved in contract administration processes
- technology skills to:

© Commonwealth of Australia, 2026 BuildSkills Australia

- use digital tools and devices to communicate and collaborate effectively with others
- use equipment and programs to access, extract information and complex data to analyse for strategic purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6003 Establish, maintain and review contract administration procedures and frameworks

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by establishing a contract administration framework and monitoring its effectiveness across two different building or civil construction projects.

In doing this, the candidate must:

- establish contract administration system quality assurance measures, processes and procedures to achieve organisational benchmarks for contract performance
- evaluate and review the compliance, effectiveness and probity of the framework.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- appropriate sector of the building and construction industry and nature of the contracts upon which its activities are based
- factors to be considered in assessing the risk inherent in different types of building and construction projects
- financial and business administration principles commensurate with organisational needs
- human resource practices and the industry's industrial relations climate and practices:
    - employment conditions
    - individual organisational contracts
    - enterprise agreements
    - subcontractor contractual arrangements
- legislative, regulatory, and administrative obligations incumbent on the building and construction industry:
    - work health and safety (WHS)

© Commonwealth of Australia, 2026 BuildSkills Australia

    - environmental requirements and sustainability principles and concepts
    - employment and financial practices
- contract administration procedures and frameworks:
    - authorised courses of action
    - dispute resolution
    - document and contract distribution
    - document preparation, completion and handling
    - internal and external communication models
    - progress and contract performance reviews
    - response times
    - staff roles and organisational procedures
- organisational policies and procedures:
    - safety and security measures
    - confidentiality in contract handling
    - documentation security identification
    - limitations on contract access
    - limitations on contract circulation
    - limitations on document distribution
    - security and protection of document filing and storage
- quality assurance measures:
    - distributing information
    - establishing performance benchmarks for system
    - maintaining a quality dialogue with all parties to the construction process
    - managing within organisational policy
    - monitoring internal expenditures and funding allocations
    - obtaining adequate feedback from clients, subcontractors and suppliers
    - providing feedback and developing remediation procedures
    - responding to external legislation and regulation requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

© Commonwealth of Australia, 2026 BuildSkills Australia

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current and relevant government building, privacy and consumer law Acts and regulations
- regulations, codes and standards relevant to contracts and contract administration
- construction contracts relevant to the projects
- business technology, applications and software systems for accessing, researching, extracting, analysing and presenting information, interpreting data and developing documents and reports.

CPCCBC6005 Manage tender developments for major projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage the development of tenders for major projects. It covers the facilitation, implementation and management of the tender development system in a building and construction organisation involved in residential and/or commercial projects.

This unit of competency applies to builders and senior managers in building, construction and services who use sound economic business and resource data to manage complex projects and processes and are responsible for managing tender developments for major projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Evaluate contract risk.	1.1	Review and analyse an invitation to tender.
		1.2	Obtain and examine in detail contract documents pertinent to the project.
		1.3	Examine and confirm conditions of contract in accordance with legislative and organisational requirements.
		1.4	Verify the organisation's current workload to determine capacity to meet contract timelines.
		1.5	Conduct risk analysis and investigate and establish the degree of risk in the project.
		1.6	Consult the management team in relation to likely construction approach and resources.
		1.7	Advise client of the intention or otherwise to submit a tender response.
2	Manage the tender process.	2.1	Allocate staff members to tender preparation process.
		2.2	Supervise staff contact with subcontractors and suppliers to obtain quotations for services or physical resources.
		2.3	Manage and supervise the development of pre-tender construction or project schedule.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Manage the development of human and physical resource costs.	3.1	Monitor determination of equipment and materials charge-out rates.
		3.2	Manage the establishment of labour rates for elements of work.
		3.3	Analyse project elements to ensure they conform to organisational contracting processes.
		3.4	Arbitrate on rates applied to elements of the work to ensure they compare to relevant existing records of costs.
		3.5	Supervise staff members to ensure appropriate rates are applied to the bill of quantities.
		3.6	Review and monitor extensions of human and physical resource costs to ensure their accurate translation into the estimate summary.
		3.7	Monitor extended values for preliminaries and overheads calculated by staff.
		3.8	Monitor staff to ensure they are calculating and including all supplementary costs.
4	Prepare complete tender documentation and operating margins.	4.1	Review and assess conditions of contract to ensure there are no variations to the tender.
		4.2	Review and assess subcontractor quotes to ensure there are no variations to the tender.
		4.3	Check and confirm availability of plant and equipment.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.4	Confirm delivery schedules and follow up material suppliers.
1	Evaluate tender documentation prior to submission.	5.1	Supervise and manage staff engaged in the preparation of the schedules which detail the sequence of work.
		5.2	Monitor progress of the tender development for timeliness and accuracy.
		5.3	Review documentation to ensure that the tender is finalised for the client in standard industry format.
		5.4	Appraise final tender documentation for completeness and allocation of critical rates and allowances prior to submission.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - direct the activities of personnel involved in the tender development process
  - delegate tasks
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract and share strategic information.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6005 Manage tender developments for major projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by managing the development of tenders for one building and construction project.

In doing this, the candidate must:

- develop a tender that comprehensively addresses project requirements
- implement management practices that result in a high level of strategic input and accuracy
- manage data acquisition from within and external to the organisation
- demonstrate conceptual and strategic problem solving
- comply with relevant legislative and regulatory requirements, standards and codes of practice.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- appropriate sector of the building and construction industry and conditions of the contracts upon which its activities are based:
    - contract clauses and intentions
    - dispute resolution
    - general conditions of contract
    - legislative and regulatory requirements
    - liabilities
    - parties' obligations under contracts
- factors to be considered in assessing the risk inherent in different types of building and construction projects

© Commonwealth of Australia, 2026 BuildSkills Australia

- conducting risk analysis:
    - analysis and revision of data
    - critical incident analysis and reporting
    - proposing solutions and recovery scenarios
    - risk management practices
    - scheduling and planning for contingencies
- financial and business administration principles commensurate with organisation's needs
- human resource processes:
    - accuracy and legitimacy of the tender process
    - management of material costs and availability
    - management of work practices, discipline and performance appraisal
    - staff selection and training in tender functions
- industry's industrial relations climate and practices:
    - costing methods and calculating standard time for activities
    - subcontractor contractual arrangements
    - independent workplace agreements
    - employment conditions
    - enterprise agreements
- relevant state or territory building and construction codes, standards and regulations
- socioeconomic and political factors which determine the climate in that sector of the building and construction industry.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must be provided with:

- current and relevant government building, industrial relations, privacy, consumer protection legislation, regulations, codes and standards
- technology, applications and software systems for accessing, researching, extracting, analysing and presenting information, interpreting data and developing tender and associated documentation

© Commonwealth of Australia, 2026 BuildSkills Australia

- copies of appropriate awards and workplace agreements
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements.

CPCCBC6006 Manage the procurement and acquisition of resources for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to establish and strategically manage the resource procurement process. It includes the evaluation and moderation of practices, resulting in generating appropriate information and activities to support and maintain the timely provision of supplies, equipment and people to residential and commercial projects.

This unit of competency applies to builders, project managers and related construction industry professionals who apply their knowledge and skills in contexts that are subject to change and demonstrate autonomy and judgement in their area of responsibility.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Direct the resource acquisition process.	1.1	Manage organisational strategic resource procurement and acquisition processes.
		1.2	Inform staff members responsible for procurement and acquisition of resources of organisational resource requirements.
		1.3	Apply financial and business principles to the resource acquisition process.
2	Maintain financial and administrative control over the resource acquisition process.	2.1	Monitor the effectiveness of the financial and administrative systems and controls through which resources are procured and acquired.
		2.2	Exercise financial and corporate responsibility over maintenance of the procurement and acquisition system.
		2.3	Evaluate procurement reports in preparation for management team meetings.
		2.4	Prepare schedules of staff duties for setting up of each site.
		2.5	Allocate staff to specific tasks within the procurement process.
		2.6	Facilitate and conduct regular meetings between team members and the client to report on progress.

© Commonwealth of Australia, 2026 BuildSkills Australia

3	Manage industrial relations matters.	3.1	Monitor industrial relations practices within the building and construction industry to ensure compliance.
		3.2	Address and resolve industrial relations disputes emanating from either the supply or delivery of physical resources in accordance with organisational policy.
		3.3	Maintain industrial relationships between the organisation's personnel, subcontractors and other workers.
4	Evaluate the procurement and acquisition process.	4.1	Develop and manage procurement process evaluation and moderation systems in accordance with company policy.
		4.2	Address and resolve industrial relations disputes from the supply or delivery of physical resources.
		4.3	Initiate and monitor evaluations of the resource procurement system and related processes to identify possible system improvements.
		4.4	Gather and evaluate strategic information relating to the procurement or acquisition of resources.
		4.5	Evaluate reports on trends in costs and quality of the resources provided to organisational worksites by suppliers.
		4.6	Scrutinise and evaluate orders for resources using approved company documentation and procedures to ensure compliance.
5	Administer the provision and withdrawal of resources from site.	5.1	Establish and maintain systems for the effective supply and withdrawal of resources from sites.
		5.2	Manage strategic information on the usage and movement of resources on site.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.3	Establish and maintain communications principles and policies between on-site personnel and providers of physical resources.
		5.4	Obtain and monitor feedback from sites at commencement, during and on completion of the project.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - address and resolve disputes
  - facilitate meetings
  - direct the activities of personnel
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and data to analyse for management purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6006 Manage the procurement and acquisition of resources for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by managing the procurement and acquisition of resources for at least one building and construction project.

In doing this, the candidate must:

- strategically focus on the procurement process and system to handle activities on more than one site
- overcome obstacles to procurement of human and physical resources to maintain project scheduled timeframes
- effectively deal with delays
- develop resource supply schedules and prioritise events, allowing for possible contingencies
- evaluate the system and recommend and implement remedial or improvement-based changes
- communicate information, including work health and safety (WHS) regulations applicable to the workplace.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- factors that contribute to the provision of physical and human resources in a construction environment
- financial and business principles as they apply to the building and construction industry:

© Commonwealth of Australia, 2026
BuildSkills Australia

    - accountability and integrity
    - accurate and timely development and maintenance of financial records
    - compliance with all legal and financial obligations
    - probity and honest dealing
    - transparency of financial processes
- financial and administrative controls over the procurement process:
    - agreements with subcontractors and material suppliers
    - authorising payment for services provided
    - generation of procurement documentation
    - managing the raising of purchase orders
- human resource and industrial relations practices within the building and construction industry:
    - associations and industrial relationships between the organisation and subcontractors
    - associations and industrial relationships between the organisation and material suppliers
    - dispute resolution between on-site personnel involved in the procurement process
    - dispute resolution involving disagreements between the organisation and subcontractors
    - engaging on-site labour
    - negotiating payments under awards, agreements and workplace agreements
    - proactive communication and incident avoidance
- relevant building and construction codes, standards and regulations
- organisational strategic and operational activities and the mechanisms through which they are addressed.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government construction legislation, regulations, codes and standards

CPCCBC6007 Develop, plan and implement building and construction environmental management processes

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. Typographical error corrected in Knowledge Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to develop, plan and implement systems designed to manage environmental practices and processes in either residential or commercial projects.

It includes establishing soundly based environmental management systems and strategic problem solving necessary to produce environmental outcomes that meet the legislative requirements of statutory authorities.

This unit of competency applies to builders, project managers and related construction industry professionals who use their technical and communication skills to analyse, plan, design and evaluate approaches to unpredictable problems and are responsible for managing environmental practices and processes on building or construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify environmental management plan factors.	1.1	Identify and quantify strategic factors impacting on the organisation's compliance with environmental obligations.
		1.2	Quantify range and scope of activities being undertaken by the organisation within environmental guidelines and obligations.
		1.3	Identify and maintain knowledge of environmental issues from information in government publications.
		1.4	Qualify and measure strategic and operational factors impinging on organisational environmental management processes.
2	Establish and implement the organisational environmental management system.	2.1	Direct and manage design and development of the organisational environmental planning system.
		2.2	Develop criteria for implementing and maintaining environmental management systems for construction sites.
		2.3	Develop methods to gather and monitor environmental management information essential to the construction process.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Evaluate environmental management processes regularly to ensure accuracy and compliance with policy.
1	Establish and implement an environment management control system.	3.1	Manage environmental control system quality in accordance with sound management principles and practices.
		3.2	Introduce methods for determining effectiveness of the major elements of the environmental management control system.
		3.3	Train and manage staff to ensure that quality assurance practices are applied to the environmental management process on a daily basis.
		3.4	Conduct routine monitoring of environmental benchmarks.
4	Facilitate the introduction of systems to manage organisational environmental management.	4.1	Develop and introduce organisational policies and procedures for environmental management.
		4.2	Document policies and routines for future reference.
		4.3	Circulate policy guidelines and obligations within the organisation and obtain sign-off by staff, employees and contractors.
		4.4	Monitor compliance of staff with environmental policy.
5	Implement an environmental conformance feedback system.	5.1	Develop and introduce processes to monitor and report on environmental issues and procedures.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.2	Develop, circulate and maintain feedback systems to ensure all stakeholders can support the environmental management process.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- writing skills to:
  - develop clear environmental management policies, procedures, guidelines and associated implementation and monitoring documentation
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and data to analyse for management purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6007 Develop, plan and implement building and construction environmental management processes

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6. Typographical error corrected in Knowledge Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by developing, implementing and maintaining an environmental management system for a building and construction organisation, or a specific project.

In doing this, the candidate must:

- develop an effective environmental conformance strategy
- develop identifiable roles and responsibilities for organisation personnel involved in the management control system
- implement management practices that result in a high level of conformance by the organisation to meet environmental obligations.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- environmental issues that impact on the organisation and its practices
- legislative, regulatory and administrative obligations incumbent on the building and construction industry for environmental practices
- environment management control system quality principles and practices:
    - ensuring availability of appropriately qualified personnel to deal with environmental issues

© Commonwealth of Australia, 2026 BuildSkills Australia

    - maintenance of agreed expenditure for environmental management compliance
    - obtaining timely and relevant expert advice as required by the project
    - organisational compliance with appropriate legislation and regulations
    - periodic review of environmental management practices and processes
    - preventative maintenance of environmental management practices and processes
    - public liabilities and exposure to risk
    - risk management strategies and policies
    - feedback systems
- financial and business administration principles commensurate with organisational needs
- factors to be considered in assessing the environmental risk inherent in different types of building and site utilisation projects
- key factors that influence decisions on environmental issues and decision making:
    - federal, state or territory environmental legislation
    - local authority by-laws, Acts or regulations concerning environmental issues
    - location and nature of the construction activity
    - scope of operations and activities of the organisation
    - types of licences and permits held or needing to be held by the organisation.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant national construction and environmental legislation, regulations, codes and standards
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- business equipment, technology, applications and software systems for accessing, researching, extracting, analysing and presenting information, securely storing documents and records, and developing documents and reports.

CPCCBC6008 Develop and implement an estimating and tendering system

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to develop and implement an appropriate estimating and tendering system. It includes the facilitation and maintenance of an estimating and tendering system in a building and construction organisation involved in residential and/or commercial projects and the establishment of the human resources and facilities necessary to produce accurate and successful tenders in accordance with contractual guidelines.

This unit of competency applies to builders and senior managers within larger building, construction and services organisations who are responsible for managing estimating and tendering systems on complex residential or commercial projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify tendering system inclusions.	1.1	Quantify and qualify strategic economic and social factors impacting on the organisation.
		1.2	Quantify and qualify range and scope of the organisation's activities and their impact.
		1.3	Review and qualify strategic operational and financial structures within the organisation and its information needs.
2	Establish and implement an organisational tendering system.	2.1	Facilitate and implement design and development of the organisational estimating and tendering system in accordance with legislative and organisational requirements.
		2.2	Establish and disseminate strategic criteria for personnel and processes concerned with estimating and tendering.
		2.3	Obtain endorsement of senior management for implementation of the system.
		2.4	Appoint staff with the necessary expertise and industry knowledge to excel at the tasks involved.
3	Establish and implement a tendering quality control system.	3.1	Identify and apply appropriate financial structures which underpin the tendering process.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Facilitate and implement review and feedback system using organisation project records and performance criteria.
4	Develop and implement a client feedback system.	4.1	Establish and implement a communication system to enable effective contact with clients.
		4.2	Plan and strategically implement a client feedback system based on price, performance, progress and other strategic factors.
5	Establish a recording and evaluation system.	5.1	Design and implement a tender recording system which meets organisational needs for ongoing evaluation of tender performance.
		5.2	Develop and implement strategic balances and checks which enable the ongoing maintenance of quality of the estimating and tendering system.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and complex data to analyse for strategic purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6008 Develop and implement an estimating and tendering system

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by developing and implementing an effective estimating and tendering system for a building and construction organisation appropriate to the organisation's business activities.

In doing this, the candidate must:

- comply with building, financial and industrial relations legislation, regulations, codes and standards
- develop conceptual and strategic problem-solving systems
- implement management practices which result in high level of staff productivity
- interact effectively with internal and external stakeholders.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- the appropriate building and construction industry sector and the nature of the contracts upon which its activities are based
- relevant state or territory building and construction codes, standards and regulations
- factors to be considered in assessing the risk inherent in different types of building and construction projects
- financial and business administration principles commensurate with organisational needs:
    - identifying and interpreting strategic information relating to financial viability
    - accounting methods and systems
    - calculating and apportioning of overheads and margins
    - subcontracting and organisational contracting rates

© Commonwealth of Australia, 2026 BuildSkills Australia

- human resource practices and the industry's industrial relations climate and practices
- socioeconomic and political factors which determine the climate in that sector of the building and construction industry
- factors impacting on the tender process:
    - legislative and regulatory requirements and codes of practice
    - market rates, trends and technological improvements and variations
    - materials and labour cost determination
    - range of contracts employed by the organisation
    - standard organisational documentation.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant legislation, codes and standards
- construction and subcontractor contracts
- organisational policies and procedures, including workplace safety requirements
- financial and tendering legislation, codes, standards and guidance information
- business equipment, technology, applications and software systems for accessing, researching, extracting and interpreting data, calculating costs, analysing and presenting information and developing documents and reports.

CPCCBC6009 Develop, plan and implement a building and construction planning process

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to develop, plan and implement a building and construction planning process. It includes the establishment of a construction planning system necessary to produce accurate and successful project outcomes in accordance with organisational guidelines and legislation, codes and standards governing project completion.

The unit of competency applies to the construction planning process of large organisations involved in residential and/or commercial projects of significant size and complexity.

This unit of competency applies to builders and senior managers responsible for managing staff and system performance and monitoring and reviewing planning systems within large building, construction and services organisations.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify factors for inclusion in the planning system.	1.1	Identify and quantify strategic factors impacting on the planning process in accordance with legislative, code, standard and organisational requirements.
		1.2	Quantify range and scope of activities to be undertaken by the organisation.
		1.3	Review and qualify strategic and operational planning structures and their information and data needs.
2	Establish and implement organisational construction planning system.	2.1	Facilitate design and development of the organisational construction project planning system.
		2.2	Establish criteria for personnel and processes concerned with construction planning.
		2.3	Facilitate and obtain endorsement of senior management for implementation of the system.
		2.4	Select and appoint senior project staff to meet organisational needs.
3	Establish a planning quality control system.	3.1	Identify and apply construction methodologies applicable to the type of construction project to the planning quality control process.
		3.2	Facilitate and direct the implementation of a review and feedback system using company project records and performance criteria.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Develop an organisational feedback system.	4.1	Establish and implement a means of effectively communicating planning information within the strategic and operational sectors of the organisation.
		4.2	Develop and strategically implement an organisational feedback system based on performance, progress and project outcomes and other strategic factors.
5	Establish a recording and evaluation system.	5.1	Institute and manage a documentation and recording system that meets organisational needs for ongoing recording and evaluation of the planning process.
		5.2	Develop and apply strategic balances and checks, which enable the ongoing maintenance of the quality of the planning system.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools, devices and programs to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and complex data to analyse for strategic purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6009 Develop, plan and implement a building and construction planning process

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by developing and implementing a building and construction planning process for the organisation, commensurate with the business activities of the organisation.

In doing this, the candidate must:

- develop a strategic focus on the mechanisms implemented to enable the construction planning process
- interpret organisational information and reporting requirements, which results in the establishment of mechanisms that demonstrate those needs are being met
- implement and maintain mechanisms and systems which enable demonstrable improvements to occur within the organisational construction planning process
- delegate effectively and oversee tasks
- communicate effectively both verbally and in writing with owners, senior management and employees.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- financial and business principles as they apply to the building and construction industry
- human resource and industrial relations practices within the building and construction industry:
    - appropriate experience and qualifications of workers
- organisational strategic and operational activities and mechanisms through which they are addressed:
    - correct and timely selection of key project supervisors and administrators

© Commonwealth of Australia, 2026 BuildSkills Australia

    - effective lines and methods of communication
    - suitability and timing of communication
    - suitability of documentation and reporting methods
    - suitability of work habits and timeliness of personnel
- relevant state or territory building and construction codes, standards and regulations
- the National Construction Code (NCC)
- socioeconomic and political factors which impact on the building and construction industry
- type, breadth and scope of building and construction industry contracts
- organisational quality assurance and policies and procedures
- planning quality control process:
    - documentation and graphical representation of data
    - establishment of performance benchmarks
    - evaluation and review methods and practices
    - feedback loops and information extraction
    - personnel and system information gathering and insert points
    - project review meetings and project progress reporting
- strategic factors that impact on the planning process:
    - clients and client needs
    - location of projects
    - logistics and location of personnel
    - market focus and structure of the organisation
    - organisation information needs and timelines
    - relevant legislative requirements, codes and standards
    - strategic organisational objectives
    - type of work being undertaken
- recording and evaluation systems that meet the organisation’s needs:
    - key point data availability and crisis flagging
    - maintenance and redevelopment of information recording systems
    - manual and electronic data recording processes
    - performance data entry and responsibility
    - programmed and crisis evaluation strategies.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- government building legislation, codes and standards
- project plans, specifications and manufacturer's product and material specifications and installation instructions
- organisational policies and procedures including workplace safety requirements
- business equipment, technology and software to access information and data, run costing programs, secure and store documentation and records, and produce and share documentation to facilitate the development and implementation of a building and construction planning process.

CPCCBC6010 Plan, develop and implement building and construction energy conservation and management processes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to develop, plan and implement practices and processes concerning energy conservation and management practices of organisations involved in either residential or commercial projects. It includes the establishment of management strategies focused on reducing energy waste through greater awareness and the implementation of practices which result in savings both within and external to the organisation.

This unit of competency applies to builders, project managers and related construction industry professionals who take responsibility for their own output when managing conservation practices and processes on construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Develop strategies for management of energy conservation.	1.1	Quantify and qualify factors to be included in the organisational energy conservation and management system.
		1.2	Evaluate strategic factors that impact on the organisation’s ability to improve energy conservation and management practices and processes.
		1.3	Quantify range and scope of activities being undertaken by the organisation in regard to energy conservation and management.
		1.4	Evaluate previous policies and operational factors contributing to energy conservation and management.
		1.5	Develop organisational energy conservation and management policy and strategy, with assessment of savings and benefits to be derived.
2	Scope the energy conservation management principles and processes.	2.1	Consult board and senior management concerning the introduction and implementation of the energy conservation and management policy and strategy.
		2.2	Develop organisational policy and management guidelines covering energy conservation and management within and external to the organisation.
		2.3	Develop and document strategic plans for the introduction of the policy and strategy.
		2.4	Brief staff on criteria for implementing and maintaining systems concerned with energy conservation and management.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Develop methods to gather and monitor energy conservation and management information essential to the management process.
		2.6	Develop methods to translate the policy into on-site and organisational practices.
3	Implement the energy conservation and management system.	3.1	Build energy conservation and management instructions into organisational operating procedures.
		3.2	Introduce a staff training program to ensure that energy conservation and management practices are applied to organisational activities on a daily basis.
		3.3	Introduce methods for determining effectiveness of the energy conservation and management system.
		3.4	Establish and maintain routine monitoring of energy benchmarks.
4	Manage the organisational energy conservation processes.	4.1	Add energy conservation and management issues to the process agenda at all levels of the organisation.
		4.2	Advise contractors and employees of the framework and monitor their performance within the framework.
		4.3	Circulate policy guidelines and obligations within the organisation and obtain sign-off by staff, employees and contractors.
		4.4	Monitor staff compliance with energy conservation and management policy.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Implement an energy management feedback system.	5.1	Develop and introduce processes to monitor and report on energy conservation and management achievements.
		5.2	Develop, circulate and maintain feedback systems to ensure all stakeholders can support the energy conservation and management process.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - explain technical concepts and explore solutions to complex energy and conservation management issues
  - brief and train staff, and consult with board members and senior management
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and complex data to analyse for strategic purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6010 Plan, develop and implement building and construction energy conservation and management processes

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by developing, implementing and maintaining an energy conservation and management system for a building and construction organisation.

In doing this, the candidate must:

- contribute to creating an energy conservation culture and an energy conservation management strategy which result in compliance with environmental guidelines and organisational objectives
- establish identifiable roles and responsibilities for organisation personnel involved in the strategy
- communicate verbally and in writing with senior management, employees, clients, regulatory authorities and legal representatives.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- operational issues and factors that may impact on energy conservation and practices:
    - public liabilities and exposure to risk
    - risk management strategies and policies
    - skills and experience of organisational personnel
    - structure of the management team and apportionment of responsibilities
    - timing of activities and project deadlines
    - types of materials and consumables being employed in the process
- energy conservation principles and practices:
    - qualified personnel to deal with energy issues

© Commonwealth of Australia, 2026
BuildSkills Australia

    - expenditures for energy management compliance
    - expert advice as required by the organisation or project
    - compliance with appropriate legislation and regulations
    - periodic review and preventative maintenance for energy conservation and management practices and processes
- financial and business administration principles commensurate with organisational needs
- key factors influencing decision making:
    - location and type of building/construction project
    - extent and types of equipment being operated
    - location and nature of the construction activity
    - organisational policy and practices
    - scope of operations and activities of an organisation
    - operational factors
- legislative, regulatory and administrative obligations incumbent on the building and construction industry for energy conservation and management practices.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant and current government building legislation, codes and standards
- environmental and sustainability legislation, regulations and guidelines
- project plans, specifications and manufacturer and supplier product and services specifications
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- business equipment and technology, applications and software to facilitate effective development, implementation and management of energy conservation management processes and practices.

CPCCBC6011 Establish systems to develop and monitor building and construction costs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to establish systems to develop and monitor building and construction costs for residential or commercial projects. It includes implementing and maintaining a construction costing system and recording outcomes.

It includes establishing the human resources and facilities necessary to produce accurate and successful costing information and providing a basis for accurate estimating and tendering processes in accordance with organisational guidelines.

This unit of competency supports builders, project managers and related construction industry professionals who integrate information from a broad range of sources to develop systems and take responsibility establishing and managing construction costing systems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Assessment Requirements for CPCCBC6011 Establish systems to develop and monitor building and construction costs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by developing and implementing a construction costing system for a building and construction organisation.

In doing this, the candidate must:

- incorporate monitoring processes to ensure continued financial viability of the organisation
- communicate effectively both verbally and in writing with senior management, employees, clients, regulatory authorities and legal representatives.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- appropriate sector of the building and construction industry and the nature of contracts upon which its activities are based
- factors to be considered in assessing the risk inherent in different types of building and construction projects
- financial and business administration principles commensurate with organisational processes:
    - establishing and maintaining accurate estimating practices
    - ability to gather specific information concerning actual versus estimated costs
    - relationships with financial management and construction management systems
- human resource practices and the industry's industrial relations climate and practices:
    - awards, agreements and work practices
    - entitlements, margins, allowances, rates and penalties

© Commonwealth of Australia, 2026 BuildSkills Australia

    - using the services of well-trained and experienced personnel
- socioeconomic and political factors which determine the climate in that sector of the building and construction industry
- quality assurance systems:
    - control procedures for maintaining costing
    - establishing performance benchmarks for system
    - monitoring internal expenditure and funding allocations
    - establishing and maintaining comprehensive records of bids
    - appropriate manual or electronic databases to assist performance comparisons
    - programmed and spontaneous reviews of success rates
    - providing secure and safe accommodation for costing information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant and current government building, safety, environmental and industrial relations legislation, codes and standards
- project plans, specifications and manufacturer instructions
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- relevant financial and consumer protection legislation
- business equipment and technology, applications and software to facilitate establishing costing systems to monitor building and construction costs.

CPCCBC6012 Manage and administer development of documentation for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage and administer the development of documentation for residential and/or commercial construction projects to produce accurate and successful project outcomes. It includes development of a quality document control and recording system.

It applies to those with a wide range of technical and management skills and knowledge to initiate alternative approaches to produce accurate and successful project outcomes in accordance with organisational guidelines.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for coordinating and managing building or construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify factors for inclusion in organisational documentation.	1.1	Identify and quantify organisational administrative and operational structures and processes.
		1.2	Identify legal and financial obligations that must be reflected in and conformed to in the development of documentation for building and construction projects.
		1.3	Quantify range and scope of activities to be undertaken by the organisation and types of documentation and documentation processes required to support building and construction projects.
		1.4	Review and qualify documentation requirements of strategic operational and project structures within and external to the organisation.
2	Implement and manage documentation system.	2.1	Facilitate and manage the design and development of a documentation system for construction organisation.
		2.2	Establish operational criteria for personnel and processes concerned with construction and project documentation.
		2.3	Obtain endorsement from senior management for implementation of system.
		2.4	Appoint staff members with necessary expertise and industry knowledge to excel at the work involved.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Establish a construction documentation quality control system.	3.1	Identify and develop appropriate corporate guidelines for a construction documentation quality control system which underpins the development and maintenance of construction or project documentation.
		3.2	Establish and manage organisation rules for the accurate and timely completion of construction and project documentation.
		3.3	Produce documentation impinging on or requiring adherence to Acts, regulations or local authority requirements, that meets the necessary legal and or financial obligations.
		3.4	Implement and facilitate a review and feedback system using internal and external advice about the usability of company documentation.
4	Establish a recording and evaluation system.	4.1	Institute a documentation recording system which fosters ongoing evaluation of construction or project performance.
		4.2	Apply strategic checks and balances which enable ongoing maintenance of the quality of construction and project documentation.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access and extract information and complex data to analyse for strategic purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6012 Manage and administer development of documentation for building and construction projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by managing and administrating the development of contractual, regulatory, financial and associated documentation for a building and construction project.

In doing this, the candidate must:

- manage practices that maintain confidentiality of information
- provide safe, secure and controlled access and storage of electronic and hard copy documents and records
- monitor documentation quality and manage documentation within an organisation's established documentation quality controls.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- appropriate sector of the building and construction industry and nature of the contracts upon which its activities are based
- processes, procedures and techniques of documentation development:
    - tenders, offers, contracts, drawings, specifications, schedules, materials list and variations
    - recording, tracking and security
    - quality control systems:
        - confidentiality in document handling
        - development by experienced personnel
        - limitations on document circulation, access and distribution
        - security in document filing, storage and identification

© Commonwealth of Australia, 2026 BuildSkills Australia

- factors to be considered in assessing the risk inherent in different types of building and construction projects
- financial and business administration principles commensurate with organisational needs
- human resource practices and the industry's industrial relations climate and practices
- legislative, regulatory and administrative obligations incumbent on the building and construction:
    - industry work health and safety (WHS)
    - environmental and sustainability requirements
    - employment and financial requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant and current government building, consumer protection, intellectual property, privacy and quality systems legislation, codes and standards
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- organisational templates and guidelines for documentation and control
- business equipment and technology, applications and software to facilitate managing and administering the development of documentation for building and construction projects.

CPCCBC6013 Evaluate concrete performance for multi-storey buildings

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Minor typographical error corrected in Foundation Skills.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to evaluate the performance of concrete for use in the construction of multi-storey buildings. It includes evaluating the properties and performance of concrete, impacts on concrete integrity and analysing the ability of concrete to withstand fire.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for evaluating and considering a range of factors vital to ensuring the integrity of concrete used in the construction of commercial and residential multi-storey buildings.

This unit of competency is suitable for those who have a broad range of cognitive, technical and communication skills to identify, analyse, evaluate and synthesise information from a range of sources.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Competency field(s)

N/A

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
	Identify and assess the application of concrete materials.	1.1	Identify the application of concrete from project plans and confirm details and specifications for different building and construction types.
		1.2	Determine distribution methods of concrete following analysis of site access.
		1.3	Manage correct distribution and placement methods of concrete.
		1.4	Identify reasons and effects of compaction on both plastic and hardened concrete.
		1.5	Compare immersion, surface and form vibration.
		1.6	Maintain accurate records relating to the application of concrete.
		1.7	Identify and record types of curing methods and detrimental effects on concrete of poor or no curing.

© Commonwealth of Australia, 2026 BuildSkills Australia

2	Assess the nature and performance of concrete.	2.1	Identify and record plastic and hardened concrete properties for building types.
		2.2	List sources of aggregate and detail the properties of each.
		2.3	Describe and record effects of impurities in concrete.
		2.4	Conduct testing of concrete in accordance with relevant Australian Standards.
3	Evaluate methods undertaken to repair concrete.	3.1	Identify live and dormant cracks.
		3.2	Describe and record causes of cracked concrete, concrete cancer and repair methods.
		3.3	Diagnose and record faults in concrete following organisational requirements.
4	Evaluate effects of fire and heat on concrete.	4.1	Test reinforced concrete for effects of fire and heat.
		4.2	Determine and apply methods of fire protection for concrete elements.
		4.3	Establish that fire resistance and stability meet the Performance Requirements of the National Construction Code (NCC).

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Monitor environmental impacts of concrete.	5.1	Confirm compliance of concrete used in buildings with the organisation's sustainability policies.
		5.2	Monitor and apply new technologies in concrete in the construction of multi-storey buildings.
		5.3	Apply performance requirements of concrete in fire resistance construction in accordance with the NCC.
		5.4	Identify cost-effectiveness of using recycled materials in accordance with acceptable standard construction practices.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- writing skills to:
  - record information and maintain records
  - communicate non-compliant products
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and complex data to analyse for strategic purposes.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6013 Evaluate concrete performance for multi-storey buildings

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Minor typographical error corrected in Foundation Skills.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by evaluating the nature and performance of concrete materials and products that form the structural components of a complex multi-storey building project.

In doing this, the candidate must:

- determine compliance with the National Construction Code (NCC)
- ensure the Performance Requirements within the NCC are satisfied.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- working drawings, details and specifications
- the NCC:
    - Performance Requirements
    - Performance Solutions
    - Deemed-to-Satisfy Solutions
    - Assessment Methods
- government building and construction legislation and regulations
- characteristics, applications and limitations of concrete:
    - alternative uses

© Commonwealth of Australia, 2026 BuildSkills Australia

    - cost effectiveness
    - hazard potential and environmental safety
    - installation requirements
    - need for use of cranes and hoists
    - recycling capacity
    - rubbish removal demands
    - transport problems and restrictions
- applications of structural principles in buildings
- building types:
    - bridge and pier construction
    - buildings with concrete skeleton and slabs
    - concrete column or wall 10 metres high
    - slab on ground floor
- design principles and behaviour of structural members undergoing stress, strain, compression, bending or combined actions
- work health and safety (WHS) Acts and regulations and workplace safety requirements
- type, nature and performance of concrete:
    - properties and uses of cement
    - reinforced concrete:
        - methods of pre-stressed concrete
        - principles of reinforced concrete using steel, wire, fibres, etc
    - types of curing methods:
        - accelerated curing
        - continuously wetting concrete
        - impermeable membrane curing
- records, including details of:
    - causes of surface defects during concrete placement
    - compaction of concrete
    - finishing processes and surface treatments to slab concrete.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

© Commonwealth of Australia, 2026 BuildSkills Australia

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- project working drawings, details and specifications
- government building and construction legislation
- current version of *AS 3600 Concrete structures* series of concrete standards
- the NCC
- concrete test results
- business equipment and technology to record sampling and testing data and to facilitate evaluation of concrete products for multi-storey buildings.

CPCCBC6014 Apply structural principles to the construction of large, high-rise and complex buildings

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply structural principles to the construction of large, high-rise and complex buildings.

The design and construction of large buildings requires the input of a range of skilled professionals, including architects and engineers. Building and construction professionals require the ability to identify a range of factors that impact on structural principles within the building design and collaborate with other professionals to reach consensus.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for ensuring the structural integrity of materials and building and construction work so that site safety and quality control measures are maintained during residential and commercial projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Apply structural principles to the planning of a construction project.	1.1	Identify main structural principles that apply to the construction of large, high-rise and complex structures.
		1.2	Identify, analyse and apply performance characteristics of structural elements.
		1.3	Apply the performance of materials in the building plan to the planning of the construction work.
2	Coordinate and manage the site assessment and job set-up.	2.1	Implement processes to analyse stability of soils and capacity of the site to support the construction loads.
		2.2	Identify and apply requirements for retaining walls to the planning process in conjunction with related industry professionals.
		2.3	Analyse and apply structural function and requirements for temporary structural elements to the planning process.
3	Coordinate and manage construction of footing systems.	3.1	Undertake coordination of the set-out of the building in accordance with documented building plans, following the full assessment of the site.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Assess structural performance of the footings specified in the building plan for compliance with relevant codes and accepted industry construction structural principles.
		3.3	Lay footings, as specified in the building plan, and check for compliance with standards and accepted industry construction principles.
		3.4	Plan, implement and check damp coursing and the provision of termite barriers and other relevant techniques in accordance with codes, standards and industry practice.
4	Coordinate and manage structural elements of the construction process.	4.1	Identify and analyse technical construction principles and performance characteristics of construction materials in the planning of project.
		4.2	Identify, implement and check processes for construction of all structural elements for compliance with manufacturer specifications and relevant Australian Standards and codes.
		4.3	Identify and implement building plans and relevant standards to ensure appropriate allowances have been made for plumbing, electrical conduits and other services to be installed.
5	Analyse and plan for structural integrity of buildings.	5.1	Consult relevant industry professionals to provide advice regarding the structural integrity of proposed buildings.
		5.2	Assess structural requirements and loads of the building design.
		5.3	Conduct analysis of the effects of force and movements on structural elements.
		5.4	Conduct analysis of properties and behaviours of structural materials.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.5	Conduct analysis of section properties of structural elements using standard industry formulas and performance comparisons.
		5.6	Evaluate performance characteristics of columns using standard industry techniques.
		5.7	Assess methods used for stress distribution in connections between structural elements.
		5.8	Assess impact of various loads on the building structure.
		5.9	Consider design impact of high-performance structural elements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- communication skills to:
  - consult effectively with industry professionals, and use relevant industry terminology and concepts
- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6014 Apply structural principles to the construction of large, high-rise and complex buildings

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying structural design principles to the construction planning for a large, high-rise, or complex building project.

In doing this, the candidate must:

- coordinate professional input to evaluate structural integrity of large and complex buildings
- select, position and size all structural members that form fixed or temporary building structures
- clearly analyse structural impact of design decisions
- apply design principles relating to performance
- identify typical faults and problems and the action required to rectify such faults.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building legislation and regulation
- building codes, specifications and standards:
    - the National Construction Code (NCC)
    - Australian Standards
    - project specifications
- design principles and behaviour of structural members undergoing stress, strain, tension, compression, bending or combined actions
- structural design:

    - impact of wind, snow, groundwater, earthquake, liquid pressure, rainwater and earth pressure actions
    - structural resistance of forms of construction
    - structural resistance of materials
- project working drawings and specifications
- work health and safety (WHS) and organisational quality procedures and processes
- temporary structural elements:
    - bracing
    - close sheeting
    - formwork props
    - pressure resistant formwork
    - scaffolding sole plates
    - shields
    - shoring collar sets
    - soldier sets
    - ties.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant current government building and construction and WHS legislation
- the NCC, and other relevant industry and Australian codes and standards
- environmental requirements and sustainability principles
- manufacturer's materials and product specifications and installation instructions for building materials in the project specifications
- project plans, design brief, working drawings and specifications.

CPCCBC6015 Apply building surveying procedures

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to conduct assessments on the construction of buildings up to 25 metres in height with a total floor area less than 2,000 square metres, for compliance with relevant building codes, standards, performance requirements and design principles.

It also includes examining and reporting on the general condition of existing buildings and their compliance with building and land use standards.

This unit of competency applies to builders, project managers and related construction industry professionals responsible for ensuring buildings comply with relevant building legislation and codes for residential and commercial projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Review building approval documentation.	1.1	Access and interpret project plans, specifications and engineering drawings for building.
		1.2	Interpret and apply legislative requirements to various building projects.
		1.3	Review submitted documents for building and land use approval for compliance with relevant legislation and codes.
		1.4	Identify and record building non-compliances.
2	Inspect building work.	2.1	Monitor progress of construction work for compliance with standard construction practice and organisational quality assurance procedures.
		2.2	Identify and record non-compliant work against the performance requirements.
		2.3	Resolve issues in conjunction with industry professionals and manage remedial work.
		2.4	Maintain ongoing communication with appropriate personnel to assist in monitoring compliant building work.
3	Prepare reports on various building types.	3.1	Prepare and report advice with respect to work on medium-rise buildings.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Document reports on suitability of existing buildings prior to purchase inspections.
		3.3	Document records of building safety inspections conducted on existing buildings.
		3.4	Document reports on construction work prior to occupancy inspection.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use tools, devices and programs to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6015 Apply building surveying procedures

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by conducting building inspections on two buildings: one during construction, and one an existing building.

Buildings must be up to 25 metres and not exceeding 2,000 square metres.

In doing this, the candidate must:

- confirm compliance with building codes and standards
- establish legal issues, permits and approvals are in place
- apply building survey procedures to assess all structural components that form a building project
- apply design concepts and principles.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government planning regulations
- building legislation, codes and standards
- the National Construction Code (NCC)
- project work drawings, details and specifications
- design principles and behaviour of structural members undergoing stress, strain, compression bending or combined actions
- performance requirements
- nature of materials and effects on performance.

CPCCBC6016 Assess construction faults in large building projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to identify construction faults in large, high-rise and complex buildings and define the problem. It includes analysing faults, determining alternative options and methods and deciding on a reasonable and compliant solution.

It applies to builders and other related construction industry professionals who identify the root cause of construction faults, clarify key issues and establish processes to remediate faults.

This unit of competency supports builders, project managers and related construction industry professionals responsible for assessing construction faults, addressing complex construction problems and seeking advice from relevant experts to eliminate potential future implications.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify and analyse construction faults.	1.1	Collect information relating to specific construction faults.
		1.2	Analyse original construction project plans and specifications to identify potential causes of construction problems.
		1.3	Document and communicate construction problems to relevant personnel following organisational work practices.
		1.4	Gather expert analysis and opinions as required from project team members and external professionals.
		1.5	Use problem-solving techniques to identify typical faults and problems.
		1.6	Develop a rectification action that meets the Performance Requirements of the National Construction Code (NCC).
2	Analyse construction techniques, methods and materials.	2.1	Use building terminology accurately in the communication of issues.
		2.2	Evaluate working drawings and specifications to identify any existing or designed-in construction problems.
		2.3	Prepare alternative methods and materials to meet the project specification objectives and comply with the NCC and relevant building legislation.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Evaluate alternative construction solutions.	3.1	Consider and evaluate commonly occurring on-site problems with building materials and their causes.
		3.2	Prepare reports identifying available alternative methods and materials available to meet the construction aims and objectives of the specifications.
		3.3	Prepare detailed sketches of available alternative methods and materials that meet the construction aims and objectives of the specification.
4	Resolve construction faults using alternative construction methods.	4.1	Evaluate solutions and recommend suitable alternative methods to resolve the problem and meet project aims and objectives and organisational processes.
		4.2	Integrate selected methods into the project construction works to align with construction schedules and timeframes.
		4.3	Manage and monitor alternative forms of construction to ensure compliance.
5	Communicate preferred solution to construction problem.	5.1	Document technical resolution in detail of identified problem.
		5.2	Lodge appropriate documentation and communicate with appropriate project and other construction professionals.
		5.3	Determine and implement strategies to monitor corrective action processes and procedures.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

CPCCBC6017 Evaluate services layout and connection methods for the planning of large building projects

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to evaluate the layout of services and connection methods in large, high-rise and complex buildings that comply with government building requirements and the National Construction Code (NCC). It includes cold and hot water supply, sewerage layout, electric and electronic installation, mechanical ventilation and air conditioning, smoke alarms and fire preventative systems.

This unit of competency applies to builders and other related construction industry professionals and senior managers who determine and manage services installation and connection and resolve issues relating to the planning of services layout and solving related problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Evaluate layout of water supply for general and firefighting use.	1.1	Identify, evaluate and record specified water supply layout and connection in project plans and specifications.
		1.2	Check water connection approvals and determine layout meets NCC performance requirements.
		1.3	Record installation of water services supplying fire hydrants, fire hose reels and fire sprinkler systems.
		1.4	Evaluate results of interconnected and non-return water tanks for fire services.
		1.5	Confirm plumbing systems for general water supply is detailed and compliant with the NCC.
2	Evaluate layout of sewerage and drainage disposal methods.	2.1	Check approval documentation from the sewerage and drainage authority for any conditions related to the project.
		2.2	Identify and evaluate planned sewerage layout and connect for compliance with NCC and authority requirements.
		2.3	Identify, evaluate and record connection methods of main drains to local authority sewers across open ground and within buildings for the whole site.
		2.4	Evaluate local authority requirements for disposal of sewerage from fixtures situated below the level of local authority sewer mains.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Evaluate and document the design and installation of stormwater drainage systems.
		2.6	Evaluate and document methods for disposal of stormwater drainage systems.
3	Evaluate mechanical services and ventilation layout and connection.	3.1	Establish mechanical ventilation control methods and use correct terminology to state how ventilation, volume, velocity and content is controlled.
		3.2	Identify, evaluate and record methods of air distribution and smoke hazard management and ensure compliance with the NCC.
		3.3	Identify, evaluate and record functions, application and basic elements of air conditioning and mechanical ventilation for various occupancy types in buildings.
4	Select hot water systems.	4.1	Identify and evaluate design factors, height of installation, area to be serviced, number of outlets and energy sources available to select appropriate hot water system.
		4.2	Evaluate and document operating principles of various types of hot water systems.
		4.3	Evaluate layout and connection for selected hot water system.
5	Evaluate natural and artificial lighting.	5.1	Determine the intent of natural lighting and aim of design from plans and specifications.
		5.2	Identify luminance requirements and compare artificial lighting types and sources for various service situations to meet relevant codes and standards.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.3	Evaluate layout and connection methods for lighting systems from plans and specifications.
	Evaluate firefighting and fire detection systems.	6.1	Identify building classification and relevant authorities responsible for fire safety regulations and inspection.
		6.2	Identify and evaluate requirements for sprinkler systems, fire hydrants and fire hoses for compliance with the building classifications and codes.
		6.3	Identify and evaluate fire detection and alarm systems for compliance with the building classification and codes.
		6.4	Evaluate layout and connection of fire detection and firefighting systems.
	Determine requirements for general electrical and electronic service installation.	7.1	Identify electrical design and requirements for service connection from electrical supply authorities.
		7.2	Evaluate layout and connection for general electrical supply and electronic services.
		7.3	Identify design and evaluate layout and connection of emergency warning systems, emergency lighting and exit signage systems.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- writing skills to:
  - articulate evaluations and apply organisational and industry protocols in the preparation and provision of reports to appropriate bodies or individuals
  - document evaluations, methods and requirements.
- technology skills to:

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by evaluating the layout of services and connection methods for the planning of one large building project.

In doing this, the candidate must:

- establish the class of building and determine that layout and connection of services meet the requirements of the National Construction Code (NCC) and other relevant standards
- identify any non-compliances, determine solutions and seek advice from relevant professional expertise to meet compliance.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction legislation
- the NCC:
    - evidence of suitability
- organisational quality assurance systems
- design concepts and principles in relation to service installations
- hot water system:
    - type of occupancy and area to be serviced
    - type of system
    - energy sources available
    - height of installation

© Commonwealth of Australia, 2026 BuildSkills Australia

- general electrical and electronic service systems:
    - cabling and equipment layout for data, lift controls, power supplies and telecommunications
    - switchroom and substations for electrical supply and distribution
    - emergency lighting and exit signage systems
    - emergency warning and intercommunication systems
    - fire stopping
    - service systems safeguards
    - service systems access for maintenance, repair and extension
- lighting system:
    - natural and artificial lighting
    - emergency and exit signage
    - terminology such as brightness, control of glare, installation of fire stopping, intensity, reflections, lifespan and locations for installation
- sewerage connections:
    - local authority sewerage drainage system
    - septic or bio-chemical treatment unit
    - graded or vertical discharge pipes
    - inspection shafts and overflow relief gullies (ORGs)
- stormwater:
    - design, installation and disposal
    - connection to local government water drains
    - use of soakage pits and on-site water detection systems
    - size, location and construction requirements for eaves and box gutters
- downpipes and underground or concealed piping
- water supply:
    - town supply
    - tank storage supply relative to public water supply and reservoir heights
    - single and two-stage pumping for multi-function and single function connected services
- mechanical ventilation and air conditioning:
    - air conditioning applications
    - air distribution, including mechanical ventilation requirements for enclosed car parks
    - air filtration, including air filters, ducting and main filter types

© Commonwealth of Australia, 2026 BuildSkills Australia

    - air intake systems
    - fire dampers
    - fume discharge systems
    - installation of fire stopping
    - smoke control and exhaust systems
    - warm water and cooling towers
- general services installation terminology, definitions and installation methods
- nature of materials and effect of performance
- processes for the interpretation of working drawings and specifications
- construction terminology relating to services installation
- research methods
- processes for the preparation of documentation
- workplace safety requirements.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building legislation codes and standards
- the NCC
- environmental and sustainability requirements
- manufacturer specifications and installation instructions
- project plans, working drawings and specifications
- business equipment and technology, applications and software to facilitate effective evaluation of services layout and connection methods.

CPCCBC6018 Manage processes for complying with legal obligations of a building and construction contractor

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to manage the processes to ensure the legal obligations of a building and construction contractor involved in either residential and/or commercial contracting projects are fully met.

It involves managing relationships with advisors and ensuring that the organisation meets the requirements of licensing, work health and safety (WHS), welfare, workers compensation, taxation, insurance, fair trading and environmental legislation.

This unit of competency supports builders, project managers and related construction industry professionals responsible for ensuring the legal obligations of a contractor are met.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare* to *work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil.

Unit sector(s)

Building and Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine contract compliance and licensing requirements.	1.1	Evaluate the type of building contract and identify provisions of the contract, terms, conditions, inclusions and variations.
		1.2	Determine building contractor licensing and contract requirements and communicate to company employees to ensure contract and licensing requirements are met.
		1.3	Identify changes to licensing arrangements in a timely manner.
		1.4	Apply for and take necessary steps to obtain the necessary building or construction licenses.
		1.5	Advise staff of the consequences of non-compliance with relevant legal obligations and licensing requirements.
2	Manage relationships on legal matters.	2.1	Identify areas of contract requiring professional legal advice and introduce and manage processes to enable the organisation to obtain such legal advice.
		2.2	Introduce and manage systems through which legal interpretations of contract or tender documents may be obtained before submission.
		2.3	Establish and maintain mechanisms to improve communications and dialogue between the organisation and the client to facilitate conciliation.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Administer organisation’s obligations.	3.1	Develop and manage administration systems that facilitate conforming with organisation’s obligations and meeting WHS and welfare, workers' compensation, noise abatement and working hours’ regulations.
		3.2	Maintain and manage records demonstrating organisational compliance with legal obligations.
		3.3	Establish and maintain administrative guidelines and facilities for the proper and secure storage of organisational legal documentation.
4	Manage compliance with government legislation.	4.1	Instigate and manage systems that support and maintain organisational capacity to meet legal obligations with regard to insurance and taxation.
		4.2	Arrange appropriate training and instruction for personnel in matters relating to insurance and taxation and make them aware of their responsibilities.
5	Apply and manage consumer protection practices.	5.1	Develop and implement practices and policies which facilitate the organisation meeting its obligations to its clients, subcontractors and employees.
		5.2	Establish and enforce codes of conduct for all employees and subcontractors.
		5.3	Take remedial action where evidence of non-compliance with consumer protection principles is identified.
6	Manage compliance with environmental legislation.	6.1	Establish and manage mechanisms to gather information in relation to the organisational environmental management plan.

© Commonwealth of Australia, 2026 BuildSkills Australia

		6.2	Manage supply and removal of subcontract works and materials and constantly scrutinise to ensure compliance with environmental standards.
		6.3	Record changes to legislation or environmental requirements and alter organisational activities and systems to ensure ongoing compliance.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBC6018 Manage processes for complying with legal obligations of a building and construction contractor

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by managing the processes to ensure the compliance of contactor's legal obligations for one building and construction project.

In doing this, the candidate must:

- develop policies, procedures and controls to ensure the contractor meets legal obligations
- manage the efficiency and performance of the contract management systems and individuals involved in the process
- investigate problems, symptoms and causes of non-compliance and recognise key issues and synthesise information to generate solutions.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government legislation and regulations relevant to building and construction contractors:
    - industrial relations
    - workers compensation and rehabilitation
    - taxation law
    - business and project insurance
    - consumer protection
- various types and nature of building and construction contracts appropriate to the building and construction industry

© Commonwealth of Australia, 2026
BuildSkills Australia

- factors to be considered in assessing the risk inherent in different types of building and construction projects
- financial and business administration principles commensurate with organisational needs
- human resource practices and the industry's industrial relations climate and practices
- legislative, regulatory, and administrative obligations incumbent on a building and construction contractor for licensing, work health and safety (WHS), welfare, workers compensation, noise abatement, working hours, taxation, insurance and fair work requirements
- environmental requirements
- Australian Business Licence and Information Service (ABLIS).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government legislation and regulations relating to building and construction contractors
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- building and construction contract for project
- environmental and sustainability requirements
- business equipment, technology, applications and software systems for accessing and researching legal obligations, extracting, analysing and interpreting information, and controlling access to and securely storing legal documentation and records.

CPCCBL2001 Handle and prepare bricklaying and blocklaying materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to safely handle bricklaying and blocklaying materials using manual and mechanical means. It includes sorting, stacking and protecting onsite materials.

This unit applies to those who carry out preparatory bricklaying and blocklaying work on new or existing structures. It is suitable for people with basic skills and knowledge who undertake routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Bricklaying and Blocklaying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read and interpret bricklaying and blocklaying requirements from current plans, specifications and codes.
		1.3	Follow relevant information from workplace procedures, workplace safety and environmental documentation.
		1.4	Calculate brick and block quantities and materials required for the task.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of tools and equipment and report damage or faults to appropriate person.
		1.8	Check materials against the delivery docket and report damage and inconsistencies to supervisor.
2	Handle, sort and stack materials.	2.1	Prepare work area for loading of materials.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Identify method of handling and moving onsite materials.
		2.3	Follow job instructions to prepare, sort and handle materials.
		2.4	Apply safe and effective manual handling techniques when unloading, lifting, moving and loading materials.
		2.5	Position materials for ease of access and clear of walkways.
3	Mix bricklaying and blocklaying mortar.	3.1	Set up, level and stabilise cement mixer.
		3.2	Conduct a pre-operation check on cement mixer.
		3.3	Mix mortar using correct ingredient ratios and process as instructed.
		3.4	Confirm the quality and consistency of the mortar with relevant person.
4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store, secure and protect tools, equipment and materials following workplace procedures.

© Commonwealth of Australia, 2026 BuildSkills Australia

Foundation Skills

Candidates require:

- oral communication skills to:
  - understand and follow spoken instructions
  - use suitable industry and workplace language
  - use questions to confirm instructions
- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBL2001 Handle and prepare bricklaying and blocklaying materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by preparing one bricklaying and one blocklaying project on ground level.

In doing this, the candidate must:

- use manual techniques to appropriately position a pallet of bricks and blocks to reflect the laying sequence of the project
- blend bricks and blocks from different pallets to achieve a balanced masonry finish
- produce consistent mortar mixes to a strength factor of M3 using the bucket gauging technique
- relocate a pallet of bricks using mechanical equipment
- stack bricks and blocks and load mortar boards on a raised platform.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- terminology relating to bricklaying and blocklaying
- relevant building and construction standards and codes
- environmental requirements for workplace processes and waste disposal
- characteristics, applications and limitations of specified materials for bricklaying and blocklaying:
    - clay bricks
    - solid and hollow blocks
    - pavers
    - refractory bricks and mortars
    - various natural and manufactured stone

© Commonwealth of Australia, 2026 BuildSkills Australia

    - aggregates, cement, lime, mortar additives
- processes and techniques for:
    - laying bricks and blocks
    - mixing mortar
    - manual handling
    - mechanical handling
- functional and operational features of plant, equipment and hand and power tools:
    - cement mixers
    - brick cutting saw
    - brick buggies
    - elevators
    - forklifts
    - materials hoists
    - pallet trolleys
    - scaffolds
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - hazardous manual tasks
    - exposure to silica
    - exposure to loud noise
    - electrical hazards and the use of earth leakage boxes.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan the work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read and interpret work plans and specifications.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Identify potential hazards and determine and implement control measures.
		1.5	Clarify job priorities and sequence tasks with others on site.
2	Prepare for work.	2.1	Select plant, equipment and tools for the task.
		2.2	Identify any limitations of plant, equipment and tools from manufacturer’s instructions.
		2.3	Check equipment and tools to ensure guards, guides, controls and switches are fitted and functional.
		2.4	Examine hoses for damage and check electrical leads and power tools are tagged.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Inspect clamps, guides, and equipment used for holding and supporting materials during operation, for faults.
		2.6	Set aside, tag and report damaged equipment and tools.
3	Use plant, equipment and tools.	3.1	Level and stabilise static equipment in appropriate location.
		3.2	Connect electrical tools to a residual current device (RCD).
		3.3	Use plant, equipment and tools safely and effectively and only for their intended purpose.
		3.4	Disconnect portable electrical equipment from source and place in a safe location when not in use.
4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
    - use digital tools and devices to source job information and communicate effectively with others.

Assessment Requirements for CPCCBL2002 Use bricklaying and blocklaying tools and equipment

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by assisting in at least one bricklaying or blocklaying project.

In doing this, the candidate must:

- conduct a pre-operation check on equipment
- set up and safely use the following tools and equipment:
    - wheelbarrow
    - hand brick grab to load the job
    - cement mixer to mix consistent mortar for the project
    - wet cut brick saw to cut bricks and blocks accurately to varying sizes and shapes
    - hand and power assisted tools and equipment appropriate for the project
- use hand tools to achieve three different joint finishes
- wear appropriate personal protective equipment:
    - hearing protection
    - mask or appropriate respirator for the cutting task/s.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- terminology relating to bricklaying and blocklaying tools and equipment
- basic construction terminology
- features and purpose of plans and specifications
- manufacturer’s specifications and instructions for tools and equipment:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - safety requirements during operation
    - location and purpose of parts
    - uses and limitations
    - cleanliness and maintenance
    - troubleshooting problems
- functional and operational features of plant, equipment and hand and power tools:
    - wheel barrow
    - spirit, pocket and water level
    - automatic and laser level
    - trowels and jointing tools
    - corner blocks and string lines
    - tingle plate
    - profiles and straight edges
    - bolster chisels
    - mash hammer/lump hammer
    - builder square and sliding bevels
    - power drills
    - battery operated tools
    - pallet trolleys
    - materials hoist
    - brick buggies
    - elevators
    - small petrol or diesel engines, compressors or mixers
    - forklifts
- the characteristics and application of specified materials for bricklaying and blocklaying
- processes and techniques for:
    - manual handling
    - mechanical handling
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - electrical safety
    - noise reduction
    - dust suppression

CPCCBL3001 Lay paving

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to pave external areas. It includes laying pavers to varying grades, substrates and patterns.

This unit applies to those who carry out paving on new or existing residential or commercial sites. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read and interpret paving requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Calculate material quantities required for the task.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify underground services and potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report any damage or faults to relevant person.
		1.8	Check conformity of materials against the specifications and place materials ready for the work.
2	Set out for paving.	2.1	Identify sub-soil, substrate types and compaction requirements.
		2.2	Identify paver thickness and bed thickness and determine excavation depth.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Set out paved area, levels, grades and finished height of pavers.
3	Prepare for paving	3.1	Excavate area to required depth, treat area for sub-soil drainage and dispose of spoil.
		3.2	Position and straighten screed rails.
		3.3	Spread, screed and compact bedding material to specified height.
		3.4	Grade surface evenly to avoid ponding.
4	Lay pavers	4.1	Determine specified pattern, starting point, and check measurements for parallel and square.
		4.2	Lay paving to specified pattern, cut segments and align joints.
		4.3	Compact pavers as specified, grout joints and clean pavers.
		4.4	Finish perimeters of pavers as specified.
5	Clean up.	5.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.2	Clean tools and equipment, check for serviceability and report damage or faults.
		5.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- numeracy skills to:
  - use measurements and formulas to calculate material quantities
  - apply measurements to set heights and paver patterns
- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBL3001 Lay paving

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by laying two different paving patterns onto two separate areas.

In doing this, the candidate must:

- prepare and lay pavers to a specified design to an area of a minimum of 3.0 m x 2.4 m on a sand bed and fill joints with sand:
    - set out paved area and excavate for a sand bed
    - compact the substrate and sand bed using a plate compactor
- prepare and lay butter and joint clay paving bricks to an area of a minimum of 1.2 m x 1.4 m on a cement bed
- apply the appropriate paving processes for the two paved areas.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of specified paving products and materials:
    - bedding materials
    - clay bricks and pavers
    - concrete blocks and pavers
    - mortar and sand
    - paving materials
    - slate
    - stone segments
    - waterproofing materials
    - mortar ingredients and consistency
    - paver sealing products

© Commonwealth of Australia, 2026 BuildSkills Australia

- processes and techniques for:
    - setting out paver levels and heights
    - manual and mechanical excavation
    - compacting subsoils, substrates and bedding
    - laying paving in various patterns
    - finishing paver surface evenly and free of water ponding
    - controlling surface water runoff and subsoil drainage
- construction terminology relating to paving
- functional and operational features of plant, equipment and hand and power tools:
    - plate compactors
    - cement mixers
    - wet cut saws
    - battery operated tools
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - noise reduction
    - dust suppression
    - hazardous manual tasks
    - exposure to silica
    - exposure to loud noise
- standards and codes relating to laying pavers
- features of working drawings and specifications
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBL3002 Carry out masonry veneer construction

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to construct masonry veneer buildings and structures. It includes structural, non-structural components and finishing of masonry veneer construction.

This unit applies to people who work on masonry veneer construction on new or existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read and interpret masonry veneer construction requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Calculate material quantities for the task.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage to relevant person.
		1.8	Check materials against the specifications and report non-conformities to relevant person.
2	Set out brickwork/blockwork.	2.1	Set out and mark base brickwork/blockwork.
		2.2	Set out brickwork/blockwork gauge and bond.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Set out and mark masonry veneer walls, load bearing brickwork, and corbelling.
1	Construct base brickwork/blockwork.	3.1	Place materials ready for the work.
		3.2	Mix mortar to specified consistency.
		3.3	Locate, prepare and install damp proof course and weepholes.
4	Construct veneer walls.	4.1	Check and ensure that structural frame is plumb and straight.
		4.2	Position and correctly fix wall ties to framework.
		4.3	Install specified lintels to openings.
		4.4	Install flashings to window and door openings.
		4.5	Construct brickwork/blockwork walls to eaves height.
		4.6	Construct veneer gable maintaining gauge, level, plumb and straightness.
		4.7	Locate and form control joints as specified.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.8	Cut and lay sill bricks to a line.
	Rake/rule joints and clean face.	5.1	Clean cavities of mortar droppings and bridging.
		5.2	Rake or rule joints to specified profile and depth.
		5.3	Clean face of brickwork/blockwork to remove unwanted mortar.
	Clean up.	6.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		6.2	Clean tools and equipment, check for serviceability and report damage or faults.
		6.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- numeracy skills to:
  - use measurements and formulas to calculate materials
  - set out brick gauge and bond
- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBL3002 Carry out masonry veneer construction

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing a minimum of 2.1 m long and 2.0 m high section of a masonry veneer building.

In doing this, the candidate must:

- install weepholes, damp proof course; frame ties, lintels and loadbearing components, window and door frame, roof tie-downs and spread of fire requirements.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of specified materials for masonry veneer construction:
    - aggregates, cement and lime
    - mortar ingredients and consistency
    - clay and masonry bricks
- construction terminology relating to masonry veneer construction
- processes and techniques for masonry veneer construction:
    - incorporating suspended floor
    - on concrete slab on ground
    - vermin control and anti-termite measures
    - damp-proofing, flashing and ventilation
    - fire control and separation requirements
    - frame tying components
    - lintels and load bearing components

© Commonwealth of Australia, 2026 BuildSkills Australia

    - timber, steel and aluminium windows
    - timber and steel door frames
    - gable and eaves construction
- brick bond patterns
- brick and block expansion and growth, control and articulation joints
- functional and operational features of plant, equipment and hand and power tools:
    - battery operated tools
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - work at heights
    - exposure to silica dust
    - exposure to loud noise
    - requirements to erect and dismantle restricted height scaffolds
- acceptable brickwork tolerances stated in Australian Standards and building codes
- fire resistance and stability
- key requirements of National Construction Code (NCC) relating to masonry veneer construction
- features of working drawing and specifications
- environmental requirements relating to workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBL3004 Construct masonry steps and stairs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to calculate and construct masonry steps, stairs and wing walls using various masonry products.

This unit applies to bricklayers and blocklayers who set out and construct steps and stairs on new or existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply masonry steps and stairs requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Calculate material quantities for the task.
		1.5	Identify potential hazards and determine and implement control measures.
		1.6	Select and check condition of plant, equipment and tools and report damage or faults to relevant person.
		1.7	Check conformity of materials against the specifications, blend masonry products and place materials in preparation for the work.
2	Set out brickwork/blockwork.	2.1	Calculate the total rise and going of the flight of stairs.
		2.2	Calculate tread, riser sizes and slope relationship rule.
		2.3	Set out position of stairs on a prepared footing to comply with plans, specifications and Australian Standards.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Set out parallel wing wall to maintain bond and gauge with treads and risers.
1	Lay steps and wing walls.	3.1	Mix mortar to consistency for job requirements.
		3.2	Construct base brickwork or blockwork accurately to set out marks.
		3.3	Lay stairs square and plumb to the specified bond.
		3.4	Construct parallel sloping wing wall to align with tread and riser bond and gauge.
		3.5	Finish joints to specified profile.
		3.6	Brush down face of brickwork/blockwork prior to drying to remove unwanted mortar.
4	Clean up.	4.1	Clear the work area, and dispose, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- numeracy skills to:

© Commonwealth of Australia, 2026 BuildSkills Australia

- use measurements and formulas to calculate quantities
- apply geometry to stair calculations and set out

- technology skills to:
  - use digital tools and devices to communicate and collaborate effectively with others.

Assessment Requirements for CPCCBL3004 Construct masonry steps and stairs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing two flights of stairs both with a parallel wing wall to one side.

In doing this, the candidate must construct:

- one flight with a minimum of three pre-cast concrete treads
- one flight with a minimum of three solid masonry treads
- all treads with a 3 mm slope for water run-off
- wing wall to match the slope of the stairs with symmetrically cut mitres and uniform joints
- both flights to comply with current and relevant Australian Standards, specifications and within the codes for brickwork tolerances.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- construction terminology relating to the construction of masonry steps and stairs:
    - total rise
    - total going
    - landing
    - nosing
    - wing wall
- current Australian Standards and codes for staircase construction:
    - min/max permitted riser size
    - min/max permitted tread size
    - slope calculation 2R + 1G rule

© Commonwealth of Australia, 2026 BuildSkills Australia

  - min height of a wing wall
  - max number of steps in one flight
  - step size tolerance _/+5 mm
  - max permitted deviation from level (10 mm in 10 m, or max of 15 mm)
  - max permitted bow of a masonry wall (+/_ 5 mm)
  - max lipping of materials (Max 2 mm)
  - max/min permitted perpend joint size (Min size 5 mm, +/- 10 mm from specified size)
  - max min permitted bed joint size (10 mm +/_ 3 mm)
  - vertical alignment of perpend joints (15 mm per 2 m height of wall, measured centre to centre)
- key features of National Construction Code (NCC) relevant to constructing masonry stairs and steps
- characteristics, applications and limitations of approved materials for step and stair construction
- brick bond patterns
- functional and operational features of plant, equipment and hand and power tools
- workplace safety:
  - job safety and environmental analysis (JSEA)
  - hazardous manual handling
  - exposure to silica
  - exposure to loud noise
- features of working drawings and specification
- processes and techniques for:
  - masonry steps and stairs construction
  - applying geometry to stair calculations and set out
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Assessment Requirements for CPCCBL3005 Lay masonry walls and corners

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by building one brick and one block wall to a minimum length of 2.3 m and a minimum height of 850 mm.

In doing this, the candidate must:

- construct both walls between a profile at one end and a hand built corner at the other
- incorporate an external and internal corner and a stopped end to both walls
- comply with allowable tolerances in Australian Standards and building codes for construction of both walls
- comply to the brickwork tolerances stated in the current Australian Standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- construction terminology relating to masonry wall and corner construction
- structural principles of loadbearing masonry walls
- building and construction regulations, codes and standards
- key features of National Construction Code (NCC) relating to laying masonry walls and corners
- brick and block expansion and growth, control and articulation joints
- characteristics, applications and limitations of specified materials for masonry wall and corner construction:
    - ingredients and additives to produce consistent mortar (M code)
    - acid for cleaning masonry work

© Commonwealth of Australia, 2026 BuildSkills Australia

- functional and operational features of plant, equipment and hand and power tools:
    - battery operated tools
- workplace safety:
    - hierarchy of control
    - working at heights
    - hazardous manual tasks
    - exposure to silica
    - exposure to loud noise
- features of working drawings and specifications
- fire control and separation codes and legislation
- processes and techniques for laying masonry walls and corners
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBL3006 Lay multi-thickness walls and piers

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to lay multi-thickness walls and piers. It includes laying masonry walls in different brick bonds and laying engaged and isolated piers.

This unit applies to bricklayers and blocklayers who work on a new or existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply multi-thickness wall and pier construction requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Use measurements and apply formulas to calculate material quantities.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults to relevant person.
		1.8	Check conformity of materials against the specifications and place materials in preparation for the work.
2	Set out brickwork.	2.1	Identify brick bond from plans and set out and mark position of brickwork on footing.
		2.2	Set out engaged and isolated piers to specified height and gauge.

© Commonwealth of Australia, 2026 BuildSkills Australia

3	Construct walls and piers.	3.1	Mix mortar quality and consistency to job requirements.
		3.2	Lay walls with engaged piers straight, level and plumb.
		3.3	Lay isolated piers square and plumb to the specified height maintaining gauge.
		3.4	Remove excess mortar prior to drying.
		3.5	Finish joints to specified profile and depth.
		3.6	Brush down and clean brickwork prior to mortar drying.
4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials in following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
    - use digital tools and devices to source job information and communicate effectively with others.

Assessment Requirements for CPCCBL3006 Lay multi-thickness walls and piers

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

- To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by laying three 230 mm thick brick walls, to a minimum height of 634 mm.

In doing this, the candidate must:

- lay one English bond wall to minimum length of 2100 mm with one 90^0 return external corner to the same height and a minimum length of 700 mm
- lay one Flemish bond wall to a minimum length of 1700 mm which incorporates a 590 mm (minimum) squint corner return; wall to be finished with a brick on edge capping finish with symmetrically mitred cuts over squint corner
- lay one wall in chosen bond (not stretcher) to a minimum length of 2100 mm with a ‘T’ junction with a minimum length of 600 mm
- engaged one pier to each wall at the same height of wall
- set out and lay one isolated pier in the same bond for each wall, to the set-out wall height
- comply to the brickwork tolerances stated in the current Australian Standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of approved materials used for multi-thickness walls and pier construction
- processes and techniques for:
    - multi-thickness brick and pier construction
    - installing specified reinforcing

© Commonwealth of Australia, 2026 BuildSkills Australia

    - laying bricks to specified bond to provide structural stability
    - damp-proofing, installing drainage pipes and weep holes
- construction terminology relating to multi-thickness wall and pier construction
- brick bond patterns:
    - Flemish
    - Flemish garden wall
    - English bond
    - English garden wall bond
    - Monk bond
    - Dutch
    - 1/3 bond
    - Stretcher
- functional and operational features of plant, equipment and hand and power tools
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - working at heights
    - hazardous manual tasks
    - dust suppression
    - exposure to silica
    - exposure to loud noise
- features of working drawings and specification
- relevant and current building, brick and block laying standards and codes
- key features of National Construction Code (NCC) relating to multi-thickness walls and piers
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBL3007 Install glass blockwork

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to install glass blocks into non-structural panels.

This unit applies to people who install fire rated or standard glass blocks using various fixing methods to new or existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Competency field(s)

N/A

Unit sector(s)

Bricklaying and Blocklaying

© Commonwealth of Australia, 2026 BuildSkills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply glass block installation requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Use measurements and apply formulas to calculate material quantities.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults to relevant person.
		1.8	Check conformity of glass bricks, adhesives and accessories and place materials in preparation for the work.
2	Set out for installation.	2.1	Check opening size, lintel and flashing to suit glass block installation.
		2.2	Check base and head for level and abutting surfaces for plumb.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Mix mortar to the correct consistency or use approved silicone product following manufacturer's instructions.
1	Install glass blocks.	3.1	Install expansion strips and reinforcements.
		3.2	Lay glass blocks level and plumb to the specified design.
		3.3	Remove excess mortar or silicone at completion and clean glass blocks.
		3.4	Use appropriate tool to achieve specified joint finish.
4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
    - use digital tools and devices to source job information and communicate effectively with others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by installing a minimum of 1.44 square metres of glass blocks into frame.

In doing this, the candidate must:

- apply the appropriate glass block installation processes
- use both mortar or recommended adhesive
- fix reinforcement, expansion joint and grouting
- comply with glass block installation standards, codes and manufacturer's instructions.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of specified materials and components for glass block installation:
    - aluminium frames
    - reinforcement
    - manufacturer's silicone products
    - mortar mixture
    - grouts
    - fire rated glass blocks
- processes and techniques for installing various systems and ranges of glass bricks
- construction terminology relating to installation of glass bricks
- functional and operational features of plant, equipment and hand and power tools:
    - battery operated tools

© Commonwealth of Australia, 2026 BuildSkills Australia

- workplace safety:
    - job safety and environmental analysis (JSEA)
    - working with hazardous substances
    - working at heights
    - exposure to silica
    - exposure to loud noise
- relevant and current standards and building codes
- features of working drawings and specification
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

Assessment Requirements for CPCCBL3009 Install flashings and damp proof course

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by installing moisture barriers and fixing flashings to masonry construction to provide moisture movement and ensure the effective diversion of collected moisture.

In doing this, the candidate must:

- install damp proof course (DPC) in a cavity brick or masonry veneer construction, which includes internal and external corners
- install window and door head and stile flashings to a cavity brick or masonry veneer construction
- install stepped and tray flashing to a masonry wall at roof abutment or to a chimney at the roof line
- install flashing to a masonry parapet
- comply with flashing and damp proof course standards, codes and manufacturer's specifications.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of specified materials used for flashing and damp proofing:
    - aluminium sheeting

© Commonwealth of Australia, 2026 BuildSkills Australia

    - copper
    - bituminous sheeting
    - emulsions
    - lead and polyurethane sheeting
    - polythene sheeting
- processes and techniques for:
    - damp-proofing to provide a barrier to moisture movement
    - flashing to divert the travel of moisture
    - stepped and level flashing for parapets and gables
    - dressing, fitting and building in various flashings
- construction terminology relating to flashing and damp proofing
- functional and operational features of plant, equipment and hand and power tools:
    - battery operated tools
- workplace safety:
    - working at heights
    - exposure to silica
    - exposure to loud noise
    - hazardous manual handling
    - hazardous materials
- current and relevant standards and building codes relating to flashings and DPC
- key requirements of the National Construction Code (NCC) relevant to installation of flashings and damp proof course
- features of working drawings and specifications
- environmental requirements for workplace processes and waste disposal.

Bricklaying and Blocklaying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply masonry arch construction requirements from current plans, specifications and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Calculate material quantities required for the task.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults to relevant person.

© Commonwealth of Australia, 2026 BuildSkills Australia

		1.8	Check conformity of materials against the specifications and place materials in preparation for the work.
2	Construct wall to springing line of arch.	2.1	Set out location of first course and determine span of arch.
		2.2	Lay abutting walls maintaining plumb, gauge and level up to springing line to comply with Australian standards tolerances.
3	Set up arch template.	3.1	Set out arch centre and curve and where appropriate produce a full-size drawing of arch.
		3.2	Transfer shape to template materials and cut to shape.
		3.3	Locate arch template to height of springing line and crown.
		3.4	Adjust toms and wedges or adjustable metal props to ensure arch centre and springing line is level.
4	Cut and lay voussoirs.	4.1	Use full size drawing to determine voussoir shape and size.
		4.2	Mark, cut and test voussoirs for parallel joints.
		4.3	Lay voussoirs around arch centre.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.4	Cut and lay spandrels maintaining even collar joints.
5	Clean up.	5.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		5.2	Clean tools and equipment, check for serviceability and report damage or faults.
		5.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- numeracy skills to:
  - use measurements and formulas to calculate material quantities
  - apply geometry to arch set out
- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
4	Updated reference to general construction induction training program.
3	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Changes to Performance Evidence.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Performance Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by:

- constructing a segmental arch using brick or block
- constructing three other brick or block arches from the following:
    - semicircular arch
    - multicentre arch
    - gothic arch
    - bull’s eye arch.

In doing this, the candidate must:

- calculate and develop a full-scale template for a gothic arch
- carry out calculations to determine voussoir size and shape for a guaged arch
- build abutments to the specified height maintaining gauge and bond
- fit the arch centre allowing for ease of stripping on completion

© Commonwealth of Australia, 2026 BuildSkills Australia

- comply to the brickwork tolerances stated in the current Australian Standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of materials used for masonry arch construction
- processes and techniques for:
    - setting out and constructing various types of arches
    - preparing voussoirs for an arch
    - setting out, cutting, assembling and fitting arch templates
- categories and terminologies relating to arches
- structural and load bearing forces applied to arches
- features of working drawings and specifications
- mortar ingredients and consistency
- functional and operational features of plant, equipment, hand and power tools:
    - battery operated tools
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - working safely at heights
    - erecting and dismantling work platforms
    - exposure to silica
    - exposure to loud noise
- key requirements of the National Construction Code (NCC) relevant to masonry arch construction
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply curved wall construction requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Calculate material quantities required for the task.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults.

© Commonwealth of Australia, 2026 BuildSkills Australia

		1.8	Check conformity of materials against the specifications and place materials in preparation for the work.
2	Set out and lay curved wall.	2.1	Identify wall shape from job drawings and calculate curve using geometry.
		2.2	Locate and set out curved wall using a trammel.
		2.3	Set out wall length and height maintaining brickwork gauge and bond.
		2.4	Mix mortar quality and consistency to job specifications.
		2.5	Lay first course level and in line with curve set out.
		2.6	Lay wall maintaining gauge, bond and alignment with vertical face maintaining a constant ‘V’ shape perpend joint.
		2.7	Remove excess mortar and rake or rule joints to specified profile and depth.
		2.8	Brush down face brickwork prior to mortar drying.
3	Set out and lay serpentine wall.	3.1	Identify wall shape from job drawings and calculate curves using geometry.
		3.2	Locate and set out serpentine wall curves using trammel heads and trammel arm.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Set out length and height of wall maintaining brickwork gauge and bond.
		3.4	Mark and cut required bricks to maintain equal perpend joints.
		3.5	Lay bricks to curve set out maintaining bond, gauge and alignment with vertical face.
		3.6	Remove excess mortar and finish jointing to meet the current Australian Standards.
4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by setting out and laying two curved masonry walls to height of 600 mm.

In doing this, the candidate must:

- construct one serpentine masonry wall to a minimum length of 4.0 m using the plotted points or template method and finished with appropriate capping
- construct one curved masonry wall with a minimum rise of 290 mm and radius of 2.4 m using the trammel technique
- comply with brickwork tolerances stated in the current Australian Standards.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of materials used for curved wall construction

© Commonwealth of Australia, 2026 BuildSkills Australia

- processes and techniques for:
    - calculating and setting out various size curves
    - curved wall construction
- using measurements and formulas to calculate quantities
- facets generated by curved walls
- aspects and factors relating to curved walls
- construction terminology relating to curved wall construction
- wall types, movement of joints and bonding patterns
- functional and operational features of plant, equipment, hand and power tools

CPCCBL3012 Construct fireplaces and chimneys

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to construct brick fireplaces and chimneys in various types and styles of buildings.

This unit applies to bricklayers and blocklayers who work on new and existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare* to *work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply fireplace and chimney construction requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Use measurements and apply formulas to calculate material quantities.
		1.5	Identify potential hazards and determine and implement control measures.
		1.6	Select appropriate plant, equipment and tools, check condition and report damage or faults to relevant person.
		1.7	Check conformity of materials against the specifications and place materials in preparation for the work.
2	Set out and construct base and hearth.	2.1	Locate and set out fireplace base to specified size.
		2.2	Mix mortar to quality and consistency specifications.
		2.3	Lay masonry base level, straight and plumb to the correct gauge and bond.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Construct firebox and inner hearth.	3.1	Set out the first course for fire box and jambs to specified dimensions.
		3.2	Set out gathering/curve of fireback on floor.
		3.3	Construct firebox maintaining gauge, level and plumb to allowable tolerances.
		3.4	Form gather with corbelled brickwork to provide the specified throat size.
		3.5	Install the lintel at the specified height to meet bearing rules and maintain bond.
4	Form smoke shelf and throat.	4.1	Form smoke shelf to the specified shape with mortar parging.
		4.2	Cover finished smoke shelf to protect from damage during construction.
		4.3	Check and alter throat size to meet the specified size.
5	Form smoke chamber.	5.1	Lay gathering over/corbelling to specified angle and correct bond.
		5.2	Parge smoke chamber to minimum thickness to achieve a smooth mortar finish.

© Commonwealth of Australia, 2026 BuildSkills Australia

6	Construction flue.	6.1	Lay gathering with directional change to break the light.
		6.2	Parge inside of flue.
7	Complete chimney stack.	7.1	Install lead chimney tray at the specified height.
		7.2	Extend chimney square and plumb to finished height.
		7.3	Lay chimney capping or sand cement flaunching to prevent water intrusion.
		7.4	Finish joints to specified profile and depth.
		7.5	Clean excess mortar and brush down face work.
		7.6	Lay brickwork hearth and complete to meet Australian Standards.
8	Clean up.	8.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		8.2	Clean tools and equipment, check for serviceability and report damage or faults
		8.3	Store and secure tools and equipment following workplace procedures.

Assessment Requirements for CPCCBL3012 Construct fireplaces and chimneys

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing a fireplace and chimney for a single storey building.

In doing this, the candidate must:

- install chimney flashing
- install weather proof chimney capping
- comply with fireplace and chimney standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- terminology relating to fireplace and chimney construction
- current and relevant standards and building codes:
    - minimum and maximum dimensions for components
    - allowable tolerances
    - flashing requirements
- key requirements of the National Construction Code (NCC) relevant to fireplaces and chimneys
- characteristics, applications and limitations of specified materials and products for fireplace and chimney construction:
    - mortar specifications (M code)
    - parging ingredients
    - refractory bricks
- processes and techniques for fireplace and chimney construction:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - brick bond patterns
    - roof flashing and weathering
- working drawing and specifications
- functional and operational features of plant, equipment and hand and power tools:
    - power assisted tools
- workplace safety:
    - erecting and dismantling work platforms
    - working at heights
    - job safety and environmental analysis (JSEA)
    - exposure to silica
    - exposure to loud noise
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBL3013 Construct masonry structural systems

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Change to Performance Criteria 4.1.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to construct masonry load bearing walls and engaged piers.

This unit applies to bricklayers and blocklayers who work on new and existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Competency field(s)

N/A

Unit sector(s)

Bricklaying and Blocklaying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, identify and apply masonry structural systems requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Use measurements and apply formulas to calculate material quantities.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults.
		1.8	Check conformity of materials against the specifications and place materials in preparation for the work.

© Commonwealth of Australia, 2026 BuildSkills Australia

2	Set out load bearing walls.	2.1	Set out and mark masonry wall and engaged piers.
		2.2	Set out blockwork bond and gauge and the location of horizontal reinforcing and articulated joints.
3	Construct load bearing walls with engaged piers.	3.1	Mix mortar to meet job requirements.
		3.2	Lay blocks to set out height between control joints, maintaining bond and centring starter bars.
		3.3	Install horizontal reinforcing to specified bed joints.
		3.4	Lay attached piers with reinforcing to set out height.
		3.5	Install and secure roof tie down, bracing and vertical support.
		3.6	Clean and prepare blockwork for formwork and core filling.
4	Clean and finish mortar joints.	4.1	Finish joints to specified profile and depth to meet current Australian Standards.
		4.2	Brush down face of blockwork prior to drying to remove unwanted mortar.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Clean up.	5.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		5.2	Clean tools and equipment, check for serviceability and report damage or faults.
		5.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.3. Change to Performance Criteria 4.1.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing a 2.1 m long x 2.0 m high load bearing block wall with one 390 mm x 390 mm engaged pier.

In doing this, the candidate must:

- install wall tie down and lateral reinforcing support system
- install a door jamb and bond beam lintel
- secure tie down for roof structures
- clean core in preparation for core filling
- comply with current masonry structural systems standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, application and limitation of approved materials for structural wall construction:
    - mortar ingredients and consistency
    - steel reinforcing and steel ties
- processes and techniques for structural wall construction:
    - methods of engaging piers

© Commonwealth of Australia, 2026 BuildSkills Australia

    - fixing of horizontal and vertical reinforcing

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply fire-rated masonry construction requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Identify fire resistance level (FRL), location and composition of masonry wall.
		1.5	Use measurements and apply formulas to calculate material quantities.
		1.6	Determine job priorities and sequence job tasks in consultation with others on site.
		1.7	Identify potential hazards and determine and implement control measures.
		1.8	Select and check condition of plant, equipment and tools and report damage or malfunction to relevant person.
		1.9	Check conformity of materials against the specifications and place materials in preparation for the work.
2	Construct masonry wall.	2.1	Set out and mark position, gauge and bond of masonry wall.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Mix mortar and check consistency with job requirements.
		2.3	Construct fire-rated masonry wall maintaining bond, gauge and level to the set-out height.
		2.4	Remove excess mortar, rake or rule joints to specified profile and depth.
		2.5	Clean and brush down face of brickwork prior to mortar drying.
1	Clean up.	3.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		3.2	Clean tools and equipment, check for serviceability and report damage or faults.
		3.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Assessment Requirements for CPCCBL3014 Install fire-rated masonry construction

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing a 2.1 m long x 2.0 m high fire-resistant masonry wall.

In doing this, the candidate must:

- install a fire-rated steel door jamb
- fire-proof two service penetrations of various sizes
- fit fire-rated insulation between brick wall and roof covering
- comply with fire control and separation requirements of National Construction Code (NCC) and other standards and legislation.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of materials used in fire-rated masonry construction:
    - mortar ingredients
    - fire-resistant masonry blocks and bricks
    - fire seals and insulation
- principles of heat and effects on materials
- fire control and separation required by the NCC and other legislation:
    - fire resistant levels (FRL) of materials used in fire-rated masonry requirements
- processes and techniques for:
    - installing fire-rated masonry
    - damp proofing and flashing

© Commonwealth of Australia, 2026 BuildSkills Australia

    - installing fire-rated steel door jambs
    - fitting continuous fire-rated seal between structure and roof cladding
- construction terminology relating to fire-rated masonry construction
- functional and operational features of plant, equipment, hand and power tools
- workplace safety:
    - job safety and environmental analysis (JSEA)
    - work at heights
    - hazardous manual handling
    - exposure to silica
    - exposure to loud noise
- acceptable brickwork tolerances stated in Australian Standards and building codes
- features of working drawings and specifications
- environmental requirements for workplace processes and waste disposal.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply decorative brick construction requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Use measurements and apply formulas to calculate material quantities.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or malfunction to relevant personnel.
		1.8	Check conformity of materials against the specifications and place materials in preparation for the work.
2	Set out and prepare for decorative brickwork.	2.1	Identify structural and design details of decorative brickwork and panels from plans and specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Locate position and set out specified design.
		2.3	Determine batch proportions, mortar colour, joint size and profile, method of tying and damp proofing.
		2.4	Select and sort bricks for appearance, dimensions, colour variations, durability and damage.
		2.5	Batch and mix mortar ensuring consistency with job requirements.
1	Lay decorative brickwork.	3.1	Lay corbel to form feature protrusions adhering to the overhang specifications and maintaining level, bond and gauge.
		3.2	Form a protruding plinth and sill using plinth bricks.
		3.3	Create a dentil course using standard bricks.
		3.4	Create a dogtooth pattern using standard bricks.
		3.5	Lay decorative brickwork panel using accurate cuts and maintaining bond and gauge consistency.
		3.6	Rake or rule joints to specified profile and depth.
		3.7	Brush down face of brickwork/blockwork prior to drying to remove unwanted mortar.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report damage or faults.
		4.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 9.0. Typographical errors corrected.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing a decorative brick wall to a minimum height of 1.5 m.

In doing this, the candidate must incorporate a 900 mm x 1200 mm minimum decorative masonry panel, which includes:

- two base plinth and sill courses using full bricks
- three courses of corbelling
- one dogtooth course pattern
- one dentil course pattern
- internal and external junctions neatly cut and flushed
- various finishes to mortar joints
- comply with tolerances stated in the current Australian Standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of decorative brick materials
- processes and techniques of:
    - setting out and constructing decorative brickwork
    - strengthening brickwork around openings

© Commonwealth of Australia, 2026 BuildSkills Australia

- terminology relating to decorative brickwork
- brick bond patterns
- functional and operational features of plant, equipment and hand and power tools
- workplace safety:
    - dust suppression
    - exposure to silica
    - exposure to loud noise
    - job safety and environmental analysis (JSEA)
    - working at height
- Australian Standards and building codes relating to acceptable brickwork tolerances
- architectural styles and masonry details
- architectural elements of buildings
- features of working drawings and specification
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessment Requirements for CPCCBL3016 Construct battered masonry walls and piers

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Changes to Performance Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by constructing a minimum 1.0 m high x 1.5 m long x 230 mm battered masonry wall at 90 degrees to an existing or constructed plumb wall.

In doing this, the candidate must:

- construct a 1.0 m long x 230 mm wide buttressed pier at 90 degrees and to the same height as the battered wall
- lay brick on edge capping to top of wall
- comply with battered masonry walls and piers standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of materials for battered wall construction:
    - mortar ingredients and consistency
    - waterproofing products
- designed concrete foundations to counteract overturning or sliding of battered walls
- processes and techniques for constructing various battered walls and piers:
    - installing drainage pipes
    - backfilling materials and aggregates

CPCCBL3017 Carry out tuck pointing and repointing to masonry

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to apply repointing and decorative tuck pointing for joint finishes to masonry on different types and styles of buildings.

This unit applies to bricklayers, and stonemasons who work on new, existing and heritage structures. It is suitable for people operating with some autonomy.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare for work.	1.1	Select, correctly fit and use personal protective equipment (PPE) appropriate for job.
		1.2	Read and interpret brickwork tuck pointing and repointing requirements from work instructions, standards and codes.
		1.3	Follow relevant information from work workplace safety, workplace procedures and environmental documentation.
		1.4	Use measurements and apply formulas to calculate material quantities.
		1.5	Determine job priorities and sequence job tasks in conjunction with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults to relevant person.
		1.8	Check conformity of materials against the specifications.
2	Prepare brickwork surfaces.	2.1	Remove individual loose or broken bricks.
		2.2	Match and replace broken bricks.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Scrap mortar joints to specified depth.
		2.4	Clean brickwork surface and joints in preparation for tuck pointing and repointing.
		2.5	Form an indent key to bond with joint finishing material.
		2.6	Prepare mortar/putty to required colour and mix.
3	Carry out tuck pointing and repointing.	3.1	Apply decorative tuck pointing to bed and perpendicular joints to specified depth and shape.
		3.2	Repoint masonry joints ensuring that bed and perpendicular joints are compacted and full.
		3.3	Remove excess putty/mortar.
		3.4	Repair any imperfections and lightly brush down brickwork.
4	Clean up.	4.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.
		4.2	Clean tools and equipment, check for serviceability and report any damage or faults.
		4.3	Store and secure tools and equipment.

Assessment Requirements for CPCCBL3017 Carry out tuck pointing and repointing to masonry

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by tuck pointing and repointing the bed and perpendicular joints of a masonry wall.

In doing this, the candidate must:

- apply decorative tuck pointing to a minimum of two square metres to a specified colour and finish
- apply repointing to a minimum of two square metres.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of materials for tuck pointing and repointing:
    - mortar ingredients and consistency
    - mortar adhesive ability, stability and durability
    - colouring agents and pigments
    - slaked rock lime
- processes and techniques for tuck pointing and repointing:
    - door and window reveals and sills
    - internal and external corners
    - maintaining consistent bed and perpend joints
- terminology relating to tuck pointing:
    - ribbon
    - struck
- functional and operational features of plant, equipment, hand and power tools

© Commonwealth of Australia, 2026 BuildSkills Australia

- workplace safety:
    - job safety and environmental analysis (JSEA)
    - work at heights
    - hazardous manual tasks
    - hazardous substances
    - exposure to silica
    - exposure to loud
- work instructions, standards, codes relating to tuck pointing and repointing
- environmental and waste management requirements:
    - disposal of waste material
    - recycling materials

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBL3018 Install aerated autoclaved concrete products

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to install aerated autoclaved concrete (AAC) products to walls and floors of different types and styles of buildings.

It includes installing AAC blockwork, lintels, floor panels and wall panels to buildings or structures.

The unit applies to bricklayers and block layers who work on new and existing structures. It is suitable for people operating with some autonomy. A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without needing close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Unit sector(s)

Bricklaying and Blocklaying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
	Prepare for work.	1.1	Select, fit correctly and use personal protective equipment (PPE) appropriate for job.
		1.2	Read, interpret and apply AAC installation requirements from current plans, specifications, standards and codes.
		1.3	Follow requirements in workplace safety and environmental documentation and workplace procedures.
		1.4	Use measurements and apply formulas to calculate material quantities from plans and specifications.
		1.5	Determine job priorities and sequence job tasks in consultation with others on site.
		1.6	Identify potential hazards and determine and implement control measures.
		1.7	Select and check condition of plant, equipment and tools and report damage or faults to relevant person.
		1.8	Check conformity of materials against the specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Set out AAC blocks.	2.1	Set out and mark base blockwork gauge and bond.
		2.2	Set position of damp-proof course (DPC) and wall ties.
		2.3	Set out and mark load bearing blockwork.
		2.4	Set out door and window positions.
1	Lay AAC blockwork.	3.1	Mix adhesive and check consistency with job and manufacturer's requirements and apply evenly to AAC blocks.
		3.2	Lay blocks level, plumb and to a straight line.
		3.3	Install damp proofing and all associated ties.
		3.4	Cut blocks accurately to maintain even bond at end of course and into openings.
		3.5	Install AAC lintels level, straight and maintain bond and gauge to openings.
		3.6	Fix all brackets for control joints for internal, external and wall junctions and roof tie down.
		3.7	Remove excess adhesive in preparation for wall finish.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Install AAC floor panels.	4.1	Check floor supports are level and prepared for the AAC floor panels.
		4.2	Check floor panel size, span for load design and install panels applying the manufacturer's fitting requirements.
		4.3	Place reinforcement rods between the panels and apply concrete grout to a solid and flat finish.
		4.4	Remove excess grout in preparation for floor finish.
5	Install AAC wall panels.	5.1	Check base is level and prepared for specified tie downs.
		5.2	Set out vertical panels for load bearing application and horizontal panels for cladding to manufacturer's specifications.
		5.3	Lay horizontal or vertical panels level, plumb and to a straight line using the recommended installation process.
		5.4	Fix specified brackets to panel joins, internal, external or T intersections, structural supports and roof tie downs.
		5.5	Install all damp proofing and sealants.
		5.6	Remove excess adhesive and repair any damaged panels in preparation for wall finish.
6	Clean up.	6.1	Clear the work area, and dispose of, reuse or recycle materials following workplace and environmental requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		6.2	Clean tools and equipment, check for serviceability and report damage or faults.
		6.3	Store and secure tools and equipment following workplace procedures.

Foundation Skills

Candidates require:

- technology skills to:
  - use digital tools and devices to source job information and communicate effectively with others.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the performance criteria of this unit by building an aerated autoclaved concrete (AAC) block wall to a minimum height 1.5 m and minimum length of 2.0 m.

In doing this, the candidate must:

- build an external corner into the wall
- install damp proof course
- install a door opening with lintel and flashing
- install roof tie down requirements
- install AAC vertical and horizontal wall panels, using the recommended fixing system, to a minimum of a four-square metre timber wall
- comply with ACC manufacturer’s specifications, standards and codes.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- characteristics, applications and limitations of materials for AAC construction:
    - mortar consistency and adhesives
    - AAC block and panel bond patterns
    - expansion and control and articulation joints

© Commonwealth of Australia, 2026 BuildSkills Australia

- fire control and separation required by the National Construction Code (NCC) and other legislation
- processes and techniques for AAC block and panel construction:
    - vermin control and anti-termite measures
    - damp proofing, flashing and ventilation
    - wall tying components
    - lintels and load bearing components
    - timber, steel and aluminium windows
    - timber and steel door frames
    - installing AAC flooring panels to suspended flooring system, using the recommended fixings
- construction terminology relating to AAC block and panel construction
- functional and operational features of plant, equipment and hand and power tools
- workplace safety requirements:
    - job safety and environmental analysis (JSEA)
    - work at heights
    - hazardous manual tasks
    - hazardous materials
    - exposure to silica
    - exposure to loud noise
- features of working drawings and specification
- key requirements of the National Construction Code (NCC) relevant to ACC installation
- environmental requirements for workplace processes and waste disposal.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to develop an understanding of traditional, new and emerging construction methods and materials, including systems and components for services, for Class 1 and 10 buildings as defined in the National Construction Code (NCC), and up to three storeys and not exceeding 2,000 square metres in floor area. It requires researching and evaluating construction industry information, including research papers, engineering reports, material specifications and performance data; and establishing information management procedures to maintain data currency, classify and store research information.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide advisory code-consulting services or authorised statutory services relating to planning or building permit application assessment or building audit and inspection services for Class 1 and 10 buildings.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Research and evaluate construction methods for Class 1 or 10 buildings.	1.1	Research information to identify traditional, new and emerging construction methods and conduct required checks to confirm the validity and reliability of gathered information.
		1.2	Investigate and evaluate methods for site investigation and preparation.
		1.3	Evaluate the application of different construction methods to structural elements, components or systems for Class 1 or 10 buildings.
2	Research and evaluate construction materials for Class 1 or 10 buildings.	2.1	Research information to identify traditional, new and emerging construction materials and conduct required checks to confirm the validity and reliability of gathered information.
		2.2	Evaluate the application of different construction materials to structural elements, components or systems for Class 1 or 10 buildings.
3	Research and evaluate service provisions for Class 1 or 10 buildings.	3.1	Research information to identify service requirements, compliance and installation methods, and conduct required checks to confirm the validity and reliability of gathered data.
		3.2	Evaluate options for energy supply and infrastructure, heating and cooling systems, fire protection and gas and hydraulic service supply and infrastructure.
		3.3	Evaluate service systems and components in relation to different user groups, geographical locations and climatic conditions, and note strengths and weaknesses of each context.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Report research and evaluation outcomes.	4.1	Prepare report containing research and evaluation findings, recommendations and supporting evidence for Class 1 or 10 building according to workplace requirements.
		4.2	Distribute research and evaluation report to relevant persons for feedback.
		4.3	Implement information management procedures to maintain data currency and classify and store research and evaluation information for easy retrieval.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to:
- interpret construction material characteristics and performance data using fractions, decimals, percentages, ratio, rates and proportions
- use mathematical language relating to properties of materials including fire ratings and load bearing capacities.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three store

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by researching and evaluating construction methods and materials to support building surveying services for three different buildings of less than 2,000 square metres in floor area, involving the following Classes as defined by the National Construction Code (NCC):

- two buildings in Class 1, each with three storeys
- one building in Class 1 and less than three storeys, or in Class 10.

Each building must be in a different geographical location/area selected from the following:

- high wind area
- highly corrosive area (within 1 kilometre of the ocean)
- bushfire-prone area
- cyclone area
- earthquake area
- alpine area
- metropolitan area.

For each building, the candidate must evaluate:

- construction methods and materials in relation to different geographical locations and climatic conditions and note strengths and weaknesses of each context
- the application of different construction methods to:
    - foundations and footings
    - structural and supporting systems
    - enclosing systems
    - fire safety
    - health and amenity
    - safe movement and access

BuildSkills Australia

    - energy efficiency
- construction processes in relation to trade sequencing
- the application of different construction materials to:
    - foundations and footings
    - structural and supporting systems
    - enclosing systems.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- characteristics and applications of materials suitable for structural elements and building envelope of Class 1 and 10 buildings:
    - construction materials in common use:
        - adhesives and sealants
        - admixtures
        - clay products
        - concrete and concrete products
        - glass
        - masonry
        - metal
        - mortar for load bearing walls
        - plaster and plasterboard
        - plastic
        - pre-stressed structural concrete components
        - protective and fire-rated protective coatings
        - timber and timber products
        - waterproofing
    - suitability of construction materials for different applications:
        - behaviour under stress
        - compatibility with other materials in use
        - cost-effectiveness
        - durability
        - energy efficiency
        - environmental impact
        - fire resistance

© Commonwealth of Australia, 2026
BuildSkills Australia

        - standards
        - structural suitability
        - sustainability
        - visual characteristics

        - stair construction
        - swimming pool access
    - energy efficiency:
        - air movement
        - building fabric
        - building sealing and insulation
        - external glazing
        - services
- information management procedures to maintain data currency, and classify and store information for easy retrieval
- NCC classifications and definitions for Class 1 and 10 buildings
- structural engineering principles sufficient to interpret and apply NCC requirements to work activities
- types and sources of reliable information on traditional, new and emerging uses of construction materials and methods.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to equipment, software, documentation and materials required to achieve the performance evidence.

Assessment Requirements for CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by researching and evaluating construction methods and materials to support building surveying services for three different projects involving the follow Classes of buildings as defined by the National Construction Code (NCC):

- one project incorporating Class 5 or Class 6
- one project incorporating Class 2 or Class 3 or Class 9c
- one project incorporating Class 7 or Class 8.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location/area selected from the following:

- high wind area
- highly corrosive area (within 1 kilometre of the ocean)
- bushfire-prone area
- cyclone area
- earthquake area
- alpine area
- metropolitan area.

For each building, the candidate must evaluate:

- construction methods and materials in relation to different geographical locations and climatic conditions and note strengths and weaknesses of each context
- the application of different construction methods to:
    - foundations and footings
    - structural and supporting systems
    - enclosing systems
    - installation of services

© Commonwealth of Australia, 2026
BuildSkills Australia

- construction processes in relation to trade sequencing
- the application of different construction materials to:
    - foundations and footings
    - structural and supporting systems
    - enclosing systems.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- characteristics, including fire resistance and applications of materials suitable for structural elements and building envelope of buildings included in Classes 2 to 9
- compliance requirements of construction materials and methods for buildings included in Classes 2 to 9 in different geographic locations and climate zones:
    - NCC
    - Australian Standards referenced by the NCC
- components and systems for services associated with buildings included in Classes 2 to 9:
    - compliance requirements
    - installation methods
- different construction methods and systems applicable to the structural elements and building envelope of buildings included in Classes 2 to 9:
    - methods for site investigation and preparation:
        - principles and practices of site establishment: underpinning, de-watering, ground stabilisation and demolition procedures
        - soil investigation, assessment and clarification
    - foundations and footings:
        - anchors, including grouted, mechanical or rock
        - basements
        - damp proof courses
        - footing systems
        - grillage
        - ground stabilisation
        - membranes
        - pest control
        - retaining walls
        - shoring

BuildSkills Australia

        - systems for earthquake zones
        - tanking
        - underpinning
        - water exclusion
    - structural and supporting systems:
        - forces
        - loads
        - openings
        - spatial relationships
        - stresses and strains applied to arches, beams, braces, columns, concrete floor slabs, load-bearing walls, masonry ties and anchors, roof frames (including trusses) and structural footings
        - structural materials and systems for floors, roofs, sub-floors and walls
        - systems for cyclonic areas and earthquake zones
    - enclosing systems, materials and fixings:
        - claddings and linings
        - coatings
        - finishes
        - flashings
        - linings, including acoustic system installations and fire-rated systems
        - partitioning
        - sarking and insulations
        - wet areas
- information management procedures to maintain data currency, and classify and store information for easy retrieval
- NCC classifications and definitions for buildings included in Classes 2 to 9
- structural engineering principles sufficient to interpret and apply NCC requirements to work activities
- types and sources of reliable information on traditional, new and emerging uses of construction materials and methods.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

CPCCBS6103 Identify and apply legal and ethical requirements to building surveying functions

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to identify and apply building control legislation, ethical standards and industry codes of practice to building surveying functions. It includes identifying and applying the requirements of particular geographic locations, climate zones, and local planning schemes and codes.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide building surveying services while operating in a highly regulated environment.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit sector(s)

Building surveying

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Identify and apply legal and ethical standards.	1.1	Review workplace code of conduct to clarify own responsibilities and apply to building surveying activities and client communications.
		1.2	Identify potential conflicts of interest prior to undertaking building surveying projects according to workplace code of conduct.
		1.3	Check client contractual arrangements to confirm compliance with legislative and regulatory requirements.
		1.4	Conduct research to confirm own authority, licence and insurances to undertake building surveying activities.
		1.5	Apply legal and ethical standards to building surveying activities including client and stakeholder communications.
2	Identify and apply building control legislative and regulatory requirements.	2.1	Research and identify relevant jurisdictional building control legislation and regulations and apply to building surveying activities.
		2.2	Identify relevant requirements of the National Construction Code (NCC) and Australian Standards and apply to building surveying activities.
		2.3	Research and identify relevant jurisdictional authority planning constraints and apply to building surveying activities.
3	Identify and apply relevant administrative requirements.	3.1	Identify and follow timelines, documentation and compliance requirements of relevant authorities according to the nature of building surveying tasks being undertaken.
		3.2	Submit exemption requests to relevant authorities according to legislative and regulatory procedures.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Anticipate, identify and manage problems in meeting administrative requirements of relevant authorities and seek advice as required from relevant persons.
		3.4	Identify and maintain record-keeping processes to meet legislative and regulatory requirements.
4	Communicate and manage building surveying legal requirements.	4.1	Advise client on the availability and scope of internal and external dispute resolution processes.
		4.2	Manage dispute or complaint about own building surveying services professionally and ethically to resolution according to workplace requirements and relevant codes of practice.
		4.3	Check and verify that building contractors hold appropriate licence, insurances and registration for building Class and type.
5	Identify and apply processes to enforce requirements of legislation.	5.1	Receive and process advice or complaints regarding non-compliant or unsafe building works according to workplace requirements.
		5.2	Arrange and conduct site inspection of properties and buildings to assess extent of non-compliance and risk to public health and safety and record detailed observations on site.
		5.3	Seek advice from relevant persons to clarify extent of non-compliance or risk to public health and safety.
		5.4	Prepare building orders or notices to relevant persons where properties or buildings are found to be non-compliant or posing a risk to public health and safety.
		5.5	Identify and apply statutory enforcement procedures to ensure required remedies to building works are completed within specified timeframes and to required compliance standards.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.6	Maintain and use accurate, detailed and current records to represent clients or other stakeholders according to workplace and regulatory requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use questioning, active listening, paraphrasing and summarising to seek advice and determine client or stakeholder needs
- reading skills to understand complex vocabulary used in the NCC and building control legislation and regulations.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6103 Identify and apply legal and ethical requirements to building surveying functions

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by identifying and applying the legal and ethical requirements of the applicable jurisdiction, workplace and industry codes of practice to building surveying functions for one building project.

In doing the above, the candidate must arrange and conduct a site inspection of a Class 1 building to assess the extent of non-compliance and risk to public health and safety noting the following while on site:

- details of inspection conducted:
    - date, location and time
    - names of those who conducted and participated in the inspection, including other specialist experts or consultants
    - property identification details
- documents sighted or provided at the inspection
- interviews or discussions held on site
- observations made during inspection.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- authorities, licences and insurances to undertake building surveying activities in relevant jurisdictions
- dispute-resolution procedures available to property owners and community members in relevant jurisdictions
- duty of care to clients and subsequent building owners
- legislative and regulatory compliance requirements for buildings in different climate zones and geographic locations:
    - building control legislation and regulations

© Commonwealth of Australia, 2026 BuildSkills Australia

    - National Construction Code (NCC) including referenced Australian Standards to meet deemed-to-satisfy provisions and/or performance solutions
- legislative and regulatory requirements for professional conduct in communications with clients and building contractors
- nature of admissible evidence that may be presented in arbitration hearings or court proceedings relating to building disputes
- principles of contract law that apply to building surveying contractual agreements with clients or applicants
- principles of negotiation and conflict resolution applicable to professional relationships
- processes for representing clients in arbitration hearings and court proceedings relating to building disputes
- requirements for documentation compliance in relevant jurisdictions
- scope and limitations of the statutory enforcement authority regulating building surveyors in relevant jurisdictions.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to equipment, software, documentation, properties and buildings required to achieve the performance evidence.

CPCCBS6104 Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storey

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to assess proposed design documentation during the design process for buildings included in National Construction Code (NCC) definitions for Class 1 and 10 up to three storeys and not exceeding 2,000 square metres in floor area. It includes providing client advice on the preparation of planning and building approval applications and the compliance of design documentation with the building and planning legislation, regulations, codes and standards that apply to the nature and location of each project.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide advisory code-consulting services to building and construction professionals involved in developing building design documentation up to the building approval application stage.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys.

Competency field(s)

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and manage code-consulting services.	1.1	Identify and confirm scope and nature of design project for Class 1 or 10 building, and timelines, fees and details of services to be offered at different project stages.
		1.2	Identify, engage and brief relevant persons to provide advice at different stages of project or on specialist areas of expertise.
		1.3	Advise and monitor project management processes to ensure accurate and timely advice is provided within the scope of specified service levels.
		1.4	Advise and monitor file management processes according to workplace requirements.
2	Confirm project compliance requirements for Class 1 or 10 building.	2.1	Conduct research to confirm jurisdictional building control legislation and regulations for the building and its location.
		2.2	Conduct research to confirm relevant requirements of the NCC and Australian Standards for Class 1 or 10 building and its location.
		2.3	Research planning constraints for building in consultation with relevant jurisdictional authority.
		2.4	Consult with relevant persons to ensure technically accurate interpretation and application of compliance requirements in relation to performance solutions.
		2.5	Explain compliance requirements for building to client and invite and address questions.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Advise on planning approval compliance of drawings and documentation for Class 1 or 10 building.	3.1	Advise client of drawings and documentation required for building planning approval process.
		3.2	Examine architectural drawings and documentation prepared for planning approval application to ensure completeness according to service agreement.
		3.3	Identify and record planning approval compliance issues and seek specialist advice as required to determine options for their resolution.
		3.4	Identify and document cost-effective and efficient design alternatives that meet planning approval compliance requirements and explain to client.
		3.5	Prepare compliance advisory report, present to client and invite and address questions.
4	Advise on building approval compliance of drawings and documentation for Class 1 or 10 building.	4.1	Advise client of drawings and documentation required for building approval process.
		4.2	Examine architectural drawings and documentation prepared for building approval application to ensure completeness according to service agreement.
		4.3	Identify and record building approval compliance issues and seek specialist advice as required to determine options for their resolution.
		4.4	Identify and document cost-effective and efficient design alternatives that meet building approval compliance requirements and explain to client.
		4.5	Prepare and present compliance advisory report to client and invite and address questions to explain content.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Respond to client enquiries.	5.1	Assess client requests for compliance information according to service agreement and negotiate and agree additional fees as required.
		5.2	Assess information request and research appropriate response in consultation with relevant persons as required.
		5.3	Present client advice in the required format and invite and address questions to explain content.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret ratios, rates and proportions when examining architectural drawings and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6104 Assess and advise on compliance of design documentation for Class 1 and 10 buildings to three storey

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by assessing and advising on the compliance of design documentation for three buildings involving the following Classes as defined by the National Construction Code (NCC):

- two types of Class 1 buildings in different geographical locations/areas selected from:
- high wind area
- highly corrosive area (within 1 kilometre of the ocean)
- bushfire-prone area
- cyclone area
- earthquake area
- alpine area
- metropolitan area
- one Class 10 building excluding sheds and swimming pools.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area.

While performing the above, the candidate must analyse complete sets of building design documentation for three related building approval applications and, for each application, provide advice on two cost-effective, energy efficient and compliant design alternatives.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- different compliance requirements of planning and building applications
- NCC classifications and definitions for Class 1 and 10 buildings:
    - building types
    - geographic and climate zones

© Commonwealth of Australia, 2026
BuildSkills Australia

- possible solutions to design documentation compliance issues for building and planning applications to meet the requirements of the NCC and:
    - insurers
    - jurisdictional legislation and regulations
    - statutory authorities governing the environment, fire protection and services
- project management strategies that ensure thorough and timely advice is delivered according to service level agreement
- regulatory and legislative compliance requirements for Class 1 and 10 buildings in different climate zones and geographic locations:
    - building control legislation and regulations
    - NCC including referenced Australian Standards to meet deemed-to-satisfy provisions and/or performance solutions
- regulatory constraints that govern the relationship between the advisory and statutory roles of building surveyors
- types of disciplines from which specialist advice may be sought.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to equipment, software, architectural drawings, documentation and materials required to achieve the performance evidence.

CPCCBS6107 Prepare planning and development applications for buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to prepare planning and development applications for buildings included in National Construction Code (NCC) definitions for all classes of buildings up to three storeys and not exceeding 2,000 square metres in floor area. It includes gathering and assessing documentation that supports the planning and development application process required to obtain planning permission.

The unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to carry out the statutory role of ensuring that proposed building projects meet requirements for issuing planning permits.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare to assess planning and development application.	1.1	Review scope and nature of planning and development application against jurisdictional planning legislation including local planning schemes and policies.
		1.2	Use geographical and aerial mapping to assess development site for suitability.
		1.3	Identify need for specialist expertise and engage relevant persons to provide advice throughout the planning application process.
2	Assess planning and development application documentation.	2.1	Review planning and development application documentation to ensure accuracy, currency and completeness according to local authority requirements, and request additional information from client as required.
		2.2	Confirm property ownership with reference to titles and other relevant documentation.
		2.3	Assess submitted documentation for compliance with current and relevant local planning scheme, codes and legislation, and document areas of non-compliance.
		2.4	Review site of proposed planning and development application for possible environmental protection laws and exclusions and note and document compliance requirements.
		2.5	Assess design plans for compliance with relevant legislation, codes and regulations, and document areas of non-compliance.
		2.6	Document required amendments to plans and proposed design alternatives to ensure compliance and communicate to client.
		2.7	Discuss non-compliances and proposed design alternatives with relevant persons to arrange re-submission of plans and documentation for planning approval.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Assess revised design plans and documentation.	3.1	Assess revised plans and documentation for planning approval compliance.
		3.2	Identify design features requiring clarification and discuss with relevant persons to ensure plans meet compliance requirements.
		3.3	Update client to provide updates on progress with planning and development application process.
		3.4	Arrange required public notices and advertising according to regulatory and workplace requirements.
		3.5	Document responses to objections according to regulatory and workplace requirements.

Foundation Skills

Assessment Requirements for CPCCBS6107 Prepare planning and development applications for buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by:

- preparing one planning and development application for a project involving a two or three-storey building.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and local planning requirements governing the issuing of planning and development approvals in the jurisdictions relevant to each building specified in the performance evidence
- legislative roles and responsibilities of those issuing planning permits in the relevant jurisdiction
- planning permit processes and submission requirements including triggers for planning and development approvals
- types of disciplines from which specialist advice may be sought
- types of plans and documentation submitted as part of planning and development approval applications as required under relevant jurisdictional planning legislation for buildings to three storeys:
    - concept drawings to scale, with relevant calculations, levels, notes and specifications
    - planning and development approval application forms
    - proof of building site ownership.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

© Commonwealth of Australia, 2026 BuildSkills Australia

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to equipment, software, drawings, documentation and materials required to achieve the performance evidence.

CPCCBS6108 Process building applications for Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to process building applications for buildings included in National Construction Code (NCC) definitions for Class 1 and 10 up to three storeys and not exceeding 2,000 square metres in floor area. It includes gathering and assessing documentation that supports the building application process required to obtain a building permit.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to carry out the statutory role of ensuring that proposed building projects meet relevant compliance requirements prior to commencement of construction.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare to assess building application.	1.1	Review scope and nature of building application for Class 1 or 10 building, and check to confirm compliance with relevant legislation, codes and local planning policies.
		1.2	Identify and clarify specific building approval timelines and administrative requirements of the relevant local authority.
		1.3	Inspect proposed development site to clarify nature of development and potential impact on surrounding environment and structures.
		1.4	Identify need for specialist expertise and engage relevant persons to provide advice throughout the building application process.
		1.5	Identify and initiate processes to achieve required consents or approvals from service authorities.
2	Assess building application documentation for Class 1 or 10 building.	2.1	Review building application documentation to ensure accuracy, currency and completeness according to local authority requirements, and request additional information from client as required.
		2.2	Confirm property ownership with reference to titles and other relevant documentation.
		2.3	Assess submitted documentation for compliance with current and relevant local planning scheme, codes and legislation, and document areas of non-compliance.
		2.4	Review site of proposed building application for possible environmental protection laws and exclusions and note and document compliance requirements.
		2.5	Assess design plans for compliance with relevant legislation, codes and regulations, and document areas of non-compliance.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Document required amendments to plans and proposed performance solutions to ensure compliance and communicate to client.
		2.7	Discuss non-compliances and proposed performance solutions with relevant persons to arrange re-submission of plans and documentation for building approval.
3	Assess revised design plans and documentation.	3.1	Assess revised plans and documentation for building approval compliance.
		3.2	Identify design features requiring clarification and discuss with relevant persons to ensure plans meet compliance requirements.
		3.3	Update client to provide updates on progress with building application process.
4	Finalise building permit.	4.1	Arrange required public notices and document and handle objections according to regulatory and workplace requirements.
		4.2	Process final building permit including relevant permission conditions that ensure the environment, adjacent structures and any heritage listed structures are protected.
		4.3	Submit copy of building permit to local authority and relevant persons according to regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret ratios, rates and proportions when examining drawings and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6108 Process building applications for Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by processing three building applications involving the following Classes of buildings as defined by the National Construction Code (NCC):

- two Class 1 buildings
- one Class 10 building excluding sheds and swimming pools.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building permit processes and submission requirements
- legislative and local planning and building requirements governing the issuing of building approval permits in the jurisdictions relevant to each building specified in the performance evidence
- legislative roles and responsibilities of those issuing building permits in the relevant jurisdiction
- NCC classifications and definitions for Class 1 and 10 buildings:
    - building types
    - geographic and climate zones
- processes for seeking and obtaining approval or consent from service authorities
- types of disciplines from which specialist advice may be sought
- types of plans and documentation submitted as part of building applications for Class 1 and 10 buildings:
    - building approval application form
    - concept drawings to scale, with relevant calculations, levels, notes and specifications

© Commonwealth of Australia, 2026 BuildSkills Australia

- documentation applicable to or as specified by the local authority
- proof of building site ownership.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations. Submission of building permits to local authorities may be simulated.

Candidates must have access to equipment, software, drawings, documentation and materials required to achieve the performance evidence.

CPCCBS6109 Process building applications for Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to process building applications for buildings included in the National Construction Code (NCC) definitions for Classes 2 to 9 up to three storeys and not exceeding 2,000 square metres in floor area. It includes gathering and assessing documentation that supports the building application process required to obtain a building permit.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to carry out the statutory role of ensuring that proposed building projects meet relevant compliance requirements prior to commencement of construction.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys.

Competency field(s)

N/A

Unit sector(s)

Building surveying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare to assess building application.	1.1	Review scope and nature of building application for building included in Classes 2 to 9, and check to confirm compliance with relevant legislation, codes and local planning policies.
		1.2	Identify and clarify specific building approval timelines and administrative requirements of the relevant local authority.
		1.3	Inspect proposed development site to clarify nature of development and potential impact on surrounding environment and structures.
		1.4	Identify need for specialist expertise and engage relevant persons to provide advice throughout the building application process.
		1.5	Identify and initiate processes to achieve required consents or approvals from service authorities.
2	Assess building application documentation for building included in Classes 2 to 9.	2.1	Review building application documentation to ensure accuracy, currency and completeness according to local authority requirements, and request additional information from client as required.
		2.2	Confirm property ownership with reference to titles and other relevant documentation.
		2.3	Assess submitted documentation for compliance with current and relevant local planning scheme, codes and legislation, and document areas of non-compliance.
		2.4	Review site of proposed building application for possible environmental protection laws and exclusions and note and document compliance requirements.
		2.5	Assess design plans for compliance with relevant legislation, codes and regulations, and document areas of non-compliance.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Document required amendments to plans and proposed performance solutions to ensure compliance and communicate to client.
		2.7	Discuss non-compliances and proposed performance solutions with relevant persons to arrange re-submission of plans and documentation for building approval.
3	Assess revised design plans and documentation.	3.1	Assess revised plans and documentation for building approval compliance.
		3.2	Identify design features requiring clarification and discuss with relevant persons to ensure plans meet compliance requirements.
		3.3	Update client to provide updates on progress with building application process.
4	Finalise building permit.	4.1	Arrange required public notices and document and handle objections according to regulatory and workplace requirements.
		4.2	Process final building permit including relevant permission conditions that ensure the environment, adjacent structures and any heritage listed structures are protected.
		4.3	Submit copy of building permit to local authority and relevant persons according to regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret ratios, rates and proportions when examining drawings and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6109 Process building applications for Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by processing building applications for three different projects involving the following Classes of buildings as defined by the National Construction Code (NCC):

- one project incorporating Class 5 or Class 6
- one project incorporating Class 2 or Class 3 or Class 9c
- one project incorporating Class 7 or Class 8.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building permit processes and submission requirements
- legislative and local planning and building requirements governing the issuing of building approval permits in the jurisdictions relevant to each building specified in the performance evidence
- legislative roles and responsibilities of those issuing building permits in the relevant jurisdiction
- NCC classifications and definitions for buildings included in Classes 2 to 9:
    - building types
    - geographic and climate zones
- processes for seeking and obtaining approval or consent from service authorities
- types of disciplines from which specialist advice may be sought
- types of plans and documentation submitted as part of building applications for buildings included in Classes 2 to 9:
    - building approval application form

CPCCBS6110 Conduct and report on building surveying audits of Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to audit Class 1 and 10 buildings against the current requirements of the National Construction Code (NCC) and local planning policies. These Class 1 and 10 buildings are as defined in the NCC up to three storeys and not exceeding 2,000 square metres in floor area. The unit includes planning and conducting audit activities including visual inspections, noting structural elements and taking photographic evidence, and reporting audit findings and recommendations.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide advisory code-consulting services, carry out building surveying audits and advise on building compliance. Building surveying audits are required as part of a sales process to inform planned works, including demolishing existing structures, or to inform planned upgrades to existing buildings.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys.

Competency field(s)

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Scope and plan building surveying audit.	1.1	Review building surveying audit application for Class 1 or 10 building and related documentation to clarify property details and audit purpose.
		1.2	Determine audit scope and limitations and negotiate agreed audit criteria with relevant persons.
		1.3	Review relevant building plans and documentation prior to and during building surveying audit.
		1.4	Confirm building ownership, classification and use, and contact owner or owner’s corporation to arrange access to the building.
		1.5	Research and identify compliance requirements for the building according to building classification, location and potential change of use.
		1.6	Obtain required equipment and apply work health and safety (WHS) requirements to audit activities according to workplace requirements.
		1.7	Identify need for expert advice and engage relevant specialist consultant.
		1.8	Consult with local planning authority and other relevant persons to confirm building compliance requirements and relevant planning permissions.
		1.9	Document audit plan outlining audit schedule, scope and limitations and audit compliance criteria.
2	Conduct building surveying audit for Class 1 or 10 building.	2.1	Carry out building surveying audit according to agreed audit criteria and workplace requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Visually inspect building interior and exterior, note and document construction elements and obtain required photographic evidence.
		2.3	Confirm and document actual use of building and check against compliance requirements.
		2.4	Evaluate agreed elements of building against agreed criteria according to audit scope and limitations, and document non-compliances.
		2.5	Note and document elements of the building that comply with NCC deemed-to-satisfy provisions.
		2.6	Document construction materials that pose a risk to health and safety and seek specialist advice to investigate and report on findings.
1	Produce building surveying audit report.	3.1	Prepare building surveying audit report specifying audit scope, purpose, limitations, assumptions and findings in the required format according to workplace requirements.
		3.2	Incorporate findings and recommendations obtained from specialist consultant.
		3.3	Incorporate details of any non-compliances, prioritised compliance strategies and associated cost estimates and timeframes to achieve compliance according to workplace requirements.
		3.4	Provide final building surveying audit report to relevant persons according to agreed compliance criteria and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use specialised construction industry vocabulary when providing explanations and using questions to seek advice
- numeracy skills to interpret ratios, rates and proportions when examining drawings and documentation.

CPCCBS6111 Conduct and report on building surveying audits of Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to audit buildings included in Classes 2 to 9 against the current requirements of the National Construction Code (NCC) and local planning policies. These Class 2 to 9 buildings are as defined in the NCC up to three storeys and not exceeding 2,000 square metres in floor area. The unit includes planning and conducting audit activities including visual inspections, noting structural elements and taking photographic evidence, and reporting audit findings and recommendations.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide advisory code-consulting services, carry out building surveying audits and advise on building compliance. Building surveying audits are required as part of a sales process to inform planned works or upgrades to existing commercial buildings, where advice on compliance requirements related to the proposed change of use of a commercial building or as part of an insurance assessment is required. The audit is primarily concerned with the compliance implications of the building.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

CPCCBS6112 Conduct and report on initial construction inspections of Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to conduct and report on initial construction inspections to verify the compliance of site preparation, foundations, footings, framing and wet areas of Class 1 and 10 buildings, as defined in the National Construction Code (NCC), up to three storeys and not exceeding 2,000 square metres in floor area. The unit includes planning and conducting inspections, reporting on issues of non-compliance, and preparing certificates of compliance according to legislative and regulatory requirements.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to conduct mandated inspections of Class 1 and 10 buildings at the initial stage of construction. The certificate of compliance must be completed and processed before the next stage of construction can commence.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys.

Competency field(s)

N/A

Unit sector(s)

Building surveying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify and interpret compliance requirements for Class 1 or 10 building.	1.1	Determine site classification and design wind speed for Class 1 or 10 building according to NCC definitions and building type, geographical location and climate zone.
		1.2	Access and interpret approved building design drawings and specifications and consult with relevant persons to confirm compliance of any variations from deemed-to-satisfy provisions.
		1.3	Identify and interpret compliance requirements for site preparation, foundations and footings, sub-floor ventilation, steel framing and structural steel members.
		1.4	Determine extreme weather events for the area and interpret compliance requirements for timber framing.
		1.5	Identify wall and substrate construction methods and materials and interpret compliance requirements for wet areas and waterproofing.
2	Plan building inspection.	2.1	Schedule inspection according to building and regulatory requirements and notify relevant persons.
		2.2	Record and report missed inspections as relevant according to regulatory requirements.
		2.3	Obtain equipment required for inspection according to workplace requirements.
		2.4	Apply work health and safety (WHS) requirements to planned inspection activities according to workplace requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Inspect and report compliance of Class 1 or 10 building.	3.1	Conduct initial construction inspection of building according to regulatory and workplace requirements.
		3.2	Determine soil type and characteristics, effects on site stability and any required soil testing.
		3.3	Assess building features against compliance requirements and approved drawings for site preparation, foundations and footings, framing and wet areas.
		3.4	Document and report details of non-compliant features according to regulatory and workplace requirements.
		3.5	Discuss non-compliant features of building with relevant persons and negotiate work required to remedy non-compliances according to workplace requirements.
		3.6	Negotiate timeframe for remedial action and further inspection and report any failure to comply according to regulatory and workplace requirements.
		3.7	Prepare and process certificate of compliance according to regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use specialised construction industry vocabulary when exchanging technical information and negotiating remedial work
- numeracy skills to measure and calculate dimensions.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6112 Conduct and report on initial construction inspections of Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by conducting and reporting on three initial construction inspections involving the following Classes of buildings as defined by the National Construction Code (NCC):

- two Class 1 buildings
- one Class 10 building excluding sheds and swimming pools.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory compliance requirements for site preparation, foundations, footings, framing and wet areas of Class 1 and 10 buildings at the initial stage of construction:
    - building control legislation and regulations
    - NCC including referenced Australian Standards to meet deemed-to-satisfy provisions and/or performance solutions:
        - stormwater drainage and connections to street gutter and easements
        - excavations, filling under concrete slabs and pest risk management
        - sub-floor ventilation
        - steel framing and structural steel members:
            - corrosion protection
            - National Association of Steel-Framed Housing (NASH) standards
            - service penetrations
        - timber framing:

© Commonwealth of Australia, 2026
BuildSkills Australia

        - high wind areas
        - specific requirements for use in conjunction with concrete floors, steel members and timber species scheduled for structural use
    - waterproofing.
- methods for determining site classification and design wind speed
- methods for identifying soil types and characteristics and effects on site stability including the potential for:
    - collapsing soil
    - ground movement due to moisture change
    - land slips
    - mine subsidence
    - soil erosion
- NCC classifications and definitions for Class 1 and 10 buildings:
    - building types
    - geographic and climate zones
- principles of negotiation and conflict resolution used to maintain professional relationships during building inspection and reporting processes
- workplace requirements for conducting and reporting on initial construction inspections of Class 1 and 10 buildings:
    - equipment, including personal protective equipment (PPE)
    - reporting
    - work health and safety (WHS).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to conduct and report on initial construction inspections to verify the compliance of site preparation, foundations, footings, structural provisions and wet areas of buildings included in Classes 2 to 9, as defined in the National Construction Code (NCC), up to three storeys and not exceeding 2,000 square metres in floor area. The unit includes planning and conducting inspections, reporting on issues of non-compliance, and preparing certificates of compliance according to legislative and regulatory requirements.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to conduct mandated inspections of buildings included in Class 2 to 9 at the initial stage of construction. The certificate of compliance must be completed and processed before the next stage of construction can commence.

At the time of publication, this unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify and interpret compliance requirements for building included in Classes 2 to 9.	1.1	Determine site classification and design wind speed for building included in Classes 2 to 9 according to NCC definitions and building type, geographical location and climate zone.
		1.2	Access and interpret approved building design drawings and specifications and consult with relevant persons to confirm compliance of any variations from deemed-to-satisfy provisions.
		1.3	Identify and interpret compliance requirements for site preparation, foundations and footings and structural provisions.
		1.4	Determine extreme weather events for the area and interpret compliance requirements for structural provisions.
		1.5	Identify wall and substrate construction methods and materials and interpret compliance requirements for wet areas and waterproofing.
		1.6	Identify wall and substrate construction methods and materials and interpret compliance requirements for wet areas and waterproofing.
2	Plan building inspection.	2.1	Schedule inspection according to building and regulatory requirements and notify relevant persons.
		2.2	Record and report missed inspections as relevant according to regulatory requirements.
		2.3	Obtain equipment required for inspection according to workplace requirements.
		2.4	Apply work health and safety (WHS) requirements to planned inspection activities according to workplace requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Inspect and report compliance of building included in Classes 2 to 9.	3.1	Conduct initial construction inspection of building according to regulatory and workplace requirements.
		3.2	Determine soil type and characteristics, effects on site stability and any required soil testing.
		3.3	Assess building features against compliance requirements and approved drawings for site preparation, foundations and footings, structural provisions and wet areas.
		3.4	Document and report details of non-compliant features according to regulatory and workplace requirements.
		3.5	Discuss non-compliant features of building with relevant persons and negotiate work required to remedy non-compliances according to workplace requirements.
		3.6	Negotiate timeframe for remedial action and further inspection and report any failure to comply according to regulatory and workplace requirements.
		3.7	Prepare and process certificate of compliance according to regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to use specialised construction industry vocabulary when exchanging technical information and negotiating remedial work
- numeracy skills to measure and calculate dimensions.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6113 Conduct and report on initial construction inspections of Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by conducting and reporting on initial construction inspections for three projects involving the following Classes of buildings as defined by the National Construction Code (NCC):

- one project incorporating Class 5 or Class 6
- one project incorporating Class 2 or Class 3 or Class 9c
- one project incorporating Class 7 or Class 8.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory compliance requirements for site preparation, foundations, footings, framing and wet areas of Class 2 to 9 buildings at the initial stage of construction:
    - building control legislation and regulations
    - NCC including referenced Australian Standards to meet deemed-to-satisfy provisions and/or performance solutions:
        - excavations, filling under concrete slabs and pest risk management
        - structural provisions:
            - aluminium
            - composite steel and concrete
            - concrete, including tilt-up panel construction
            - glazed assemblies
            - masonry

© Commonwealth of Australia, 2026 BuildSkills Australia

        - roofs
        - steel
        - timber
    - waterproofing
- methods for determining site classification and design wind speed
- methods for identifying soil types and characteristics and effects on site stability including the potential for:
    - collapsing soil
    - ground movement due to moisture change
    - land slips
    - mine subsidence
    - soil erosion
- NCC classifications and definitions for buildings included in Classes 2 to 9:
    - building types
    - geographic and climate zones
- principles of negotiation and conflict resolution used to maintain professional relationships during building inspection and reporting processes
- workplace requirements for conducting and reporting on initial construction inspections of Class 2 to 9 buildings:
    - equipment, including personal protective equipment (PPE)
    - reporting
    - work health and safety (WHS).

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to buildings, equipment, software, drawings, documentation and materials required to achieve the performance evidence.

CPCCBS6114 Conduct and report on advanced and final inspections of Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to conduct and report on advanced and final inspections that occur after constructing the structural elements of Class 1 and 10 buildings. Class 1 and 10 buildings are as defined in the National Construction Code (NCC) up to three storeys and not exceeding 2,000 square metres in floor area. The unit includes planning and conducting inspections, reporting on issues of non-compliance, preparing certificates of compliance and issuing occupancy permissions according to legislative and regulatory requirements.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to conduct mandated inspections of Class 1 and 10 buildings at the advanced and final stages of construction. Inspections are those specified in the building approval documentation for the project including the final inspection required prior to issuing occupancy permission.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by conducting and reporting on three advanced and final inspections involving the following Classes of buildings as defined by the National Construction Code (NCC):

- two Class 1 buildings
- one Class 10 building excluding sheds and swimming pools.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

For each building, the candidate must assess and confirm the compliance of the following building features against approved drawings, NCC and regulatory requirements:

- building roof and wall cladding
- glazing
- fire safety
- health and amenity
- safe movement and access
- energy efficiency.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory compliance requirements for roof and wall cladding, glazing, fire safety, health and amenity, safe movement and access, and energy efficiency of Class 1 and 10 buildings at the advanced and final stages of construction:
    - building control legislation and regulations
    - NCC including referenced Australian Standards to meet deemed-to-satisfy provisions and/or performance solutions:
        - roof and wall cladding including gutters and downpipes

CPCCBS6116 Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to advise on the application of National Construction Code (NCC) requirements for performance solutions for buildings in Classes 2 to 9 up to three storeys and not exceeding 2,000 square metres in floor area, and to apply approved assessment methods to determine whether a proposed solution is compliant. It includes assessing architectural drawings and specifications for performance solutions and analysing them in relation to the relevant sections of the NCC and the Plumbing Code of Australia (PCA).

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide advice to architects and building designers on compliance requirements and options for performance solutions, or act in the statutory role with responsibility for assessing and certifying compliance of performance solutions. Under legislation building surveyors are responsible for ensuring that there is no conflict of interest between the two roles. Building surveyors cannot advise on, and then certify, the same performance solution.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6102 Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys.

Unit sector(s)

Building surveying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine building surveying service requirements.	1.1	Obtain architectural drawings and specifications and identify performance solutions to be advised on or certified.
		1.2	Clarify requirement for performance solution in consultation with relevant persons.
		1.3	Negotiate and confirm building surveying services to advise on or certify performance solutions and agree on timelines and costs where relevant.
2	Analyse performance requirements of performance solution for building included in Classes 2 to 9.	2.1	Assess performance solution for building to clarify its regulatory intent.
		2.2	Identify performance requirements and confirm level of performance applied to the performance solution.
3	Determine assessment requirements for performance solution for building included in Classes 2 to 9.	3.1	Interpret NCC requirements and specifications for the material, form of construction or design of performance solution for building.
		3.2	Determine NCC assessment methods that may be applied to performance solution.
		3.3	Determine and negotiate requirements for services of technical experts qualified to provide evidence or expert judgement in relation to performance solution.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Analyse performance solution for building included in Classes 2 to 9.	4.1	Analyse compliance of performance solution in consultation with relevant persons.
		4.2	Apply principles of fire safety engineering to compliance analysis of performance solution for fire safety.
		4.3	Apply design principles to compliance analysis of performance solution for structural safety, health, amenity and sustainability.
		4.4	Determine and record strengths and weaknesses of performance solution.
5	Advise on performance solution.	5.1	Explain assessment requirements for performance solution to client and invite and address questions.
		5.2	Evaluate strengths and weaknesses of proposed performance solutions in consultation with client.
		5.3	Develop optional performance solutions in consultation with client.
		5.4	Assist client to select preferred performance solution.
		5.5	Evaluate verification methods and evidence or expertise to support performance solution and explain findings to client.
		5.6	Gather documentation for performance solution and prepare to submit for assessment.
6	Assess compliance of performance solution.	6.1	Review documentation for performance solution to ensure completeness and request further information as required.

© Commonwealth of Australia, 2026 BuildSkills Australia

		6.2	Analyse and evaluate verification information supplied to support performance solution.
		6.3	Analyse and evaluate evidence or expert judgment to support performance solution.
		6.4	Determine and document compliance of performance solution according to regulatory and workplace requirements.
		6.5	Process documentation and notify client of assessment outcome according to regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret ratios, rates and proportions when examining drawings and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6116 Assess and advise on performance solutions for Class 2 to 9 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by assessing, advising on, and certifying as compliant a total of three performance solutions for projects that include the following Classes of buildings as defined by the National Construction Code (NCC):

- one project incorporating Class 5 or Class 6
- one project incorporating Class 2 or Class 3 or Class 9c
- one project incorporating Class 7 or Class 8.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

Of the three performance solutions:

- one must be a performance solution for fire safety
- two must be performance solutions for structural safety, health, amenity and sustainability.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- design principles that are applied when analysing the compliance of performance solutions for structural safety, health, amenity and sustainability:
    - access and egress, including access for people with a disability
    - damp and weatherproofing
    - energy efficiency
    - light and ventilation
    - room heights
    - sanitary and other facilities
    - services and equipment
    - sound transmission and insulation

© Commonwealth of Australia, 2026 BuildSkills Australia

    - structural safety
- NCC classifications and definitions for buildings included in Classes 2 to 9:
    - building types
    - geographic and climate zones
- NCC requirements for assessing performance solutions relevant to buildings included in Classes 2 to 9
- principles of fire safety engineering relevant to buildings included in Classes 2 to 9:
    - characteristics of building materials in relation to fire
    - fire-modelling
    - fire science:
        - fire behaviour and dynamics
        - impact of fire on structures and materials
        - products of combustion
        - fire control strategies
        - fire retardants
        - fire detection technologies
        - fire suppression technologies
        - fire containment
    - human response to fire
    - interconnection of fire systems, including cause and effect matrix
    - interaction with other services
- project management strategies that ensure thorough and timely advice is delivered according to service level agreement
- regulatory intent of performance solutions
- scope and limitations of building surveyor role in relation to advising on or certifying performance solutions
- workplace requirements for assessing and advising on performance solutions for buildings included in Classes 2 to 9:
    - client service
    - documentation and reporting.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

© Commonwealth of Australia, 2026 BuildSkills Australia

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to equipment, software, drawings, documentation and materials required to achieve the performance evidence.

CPCCBS6117 Monitor and advise on construction and compliance upgrade work on buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to monitor construction work and provide advice to clients on meeting compliance requirements for construction work on both new and existing buildings of all classes as defined in the National Construction Code (NCC) up to three storeys. It involves arranging and conducting site visits during construction.

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide consultancy services during the construction phase of a project and who assist in finding solutions to problems, including construction faults and compliance issues.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6101	Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys
CPCCBS6102	Research and evaluate construction methods and materials for Class 2 to 9 buildings to three storeys.

Competency field(s)

N/A

Unit sector(s)

Building surveying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and manage construction monitoring and advisory services.	1.1	Identify and confirm scope and nature of construction monitoring services, required client advice, and timelines, fees and details of services to be offered at different project stages.
		1.2	Schedule site visits according to project and regulatory requirements and notify relevant persons.
		1.3	Obtain required equipment for site visit according to work health and safety (WHS) and workplace requirements.
		1.4	Plan and monitor project management processes to ensure accurate and timely advice is provided within the scope of specified service levels.
		1.5	Obtain project documentation and analyse approved designs, compliance requirements, construction methods and specified materials.
		1.6	Identify and monitor file management processes according to workplace requirements.
2	Identify and advise on construction faults.	2.1	Monitor construction work according to agreed schedule and assess against approved designs, specifications and compliance requirements.
		2.2	Identify and document faults in construction work in consultation with relevant persons according to project and workplace requirements.
		2.3	Develop and evaluate options for rectifying construction faults in consultation with relevant persons.
		2.4	Assess rectification work to ensure it meets compliance requirements, complete assessment documentation and provide to client according to project and workplace requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Advise on construction problems.	3.1	Provide advice to relevant persons to clarify interpretation of compliance requirements, working drawings and specifications according to agreed service levels.
		3.2	Analyse problems arising during construction work in consultation with relevant persons according to project and workplace requirements.
		3.3	Develop and evaluate solutions to construction problems in consultation with relevant persons.
		3.4	Develop detailed sketches and notes relating to solutions to construction problems and provide to relevant persons according to project and workplace requirements.
4	Report on construction and compliance upgrade work.	4.1	Collate and review drawings and documentation from different site visits to construction project site.
		4.2	Report details of monitoring and advisory services to the construction project including faults and problems addressed.
		4.3	Present report to client and invite and address questions to clarify findings.
		4.4	Report and process solutions to construction faults and problems relevant to future projects according to workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret ratios, rates and proportions when examining drawings and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6117 Monitor and advise on construction and compliance upgrade work on buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by monitoring and advising on construction and compliance upgrade work for three projects involving buildings up to three storeys in the following Classes as defined by the National Construction Code (NCC):

- one project incorporating a Class 1 building
- two projects selected from:
    - a project incorporating buildings in Class 5 or Class 6
    - a project incorporating buildings in Class 2 or Class 3 or Class 9c
    - a project incorporating buildings in Class 7 or Class 8.

For each project, the person must:

- develop and evaluate two options for rectifying a construction fault
- provide solutions for two different construction problems.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and regulatory compliance requirements for critical stage inspections relating to buildings at the site preparation, foundations and footings and framing stages of construction in different climate zones and geographic locations:
    - building control legislation and regulations
    - NCC including referenced Australian Standards to meet deemed-to-satisfy provisions and/or performance solutions
- NCC classifications and definitions for all Classes of buildings
- regulatory constraints that govern the relationship between the advisory and statutory roles of building surveyors

© Commonwealth of Australia, 2026 BuildSkills Australia

- workplace requirements for monitoring and advising on construction and compliance upgrade work on buildings:
    - equipment, including personal protective equipment (PPE)
    - file management
    - reporting
    - work health and safety (WHS) associated with site inspections.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to buildings, equipment, software, drawings, documentation and materials required to achieve the performance evidence.

CPCCBS6118 Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Application

This unit of competency specifies the skills and knowledge required to advise on the application of National Construction Code (NCC) requirements for performance solutions for Class 1 and 10 buildings up to three storeys and not exceeding 2,000 square metres in floor area, and to apply approved assessment methods to determine whether a proposed solution is compliant. It includes assessing architectural drawings and specifications for performance solutions and analysing them in relation to the relevant sections of the NCC and the Plumbing Code of Australia (PCA).

This unit is suitable for building surveyors who draw on their broad theoretical knowledge and technical skills to provide advice to architects and building designers on compliance requirements and options for performance solutions, or act in the statutory role with responsibility for assessing and certifying compliance of performance solutions. Under legislation building surveyors are responsible for ensuring that there is no conflict of interest between the two roles. Building surveyors cannot advise on, and then certify, the same performance solution.

This unit forms part of the licensing requirements for building surveying in some states and territories. Relevant state and territory regulatory authorities should be consulted to clarify these requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCBS6101 Research and evaluate construction methods and materials for Class 1 and 10 buildings to three storeys.

Building surveying

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine building surveying service requirements	1.1	Obtain architectural drawings and specifications and identify performance solutions to be advised on or certified.
		1.2	Clarify requirement for performance solution in consultation with relevant persons.
		1.3	Negotiate and confirm building surveying services to advise on or certify performance solutions and agree on timelines and costs where relevant.
2	Analyse performance requirements of performance solution for Class 1 or 10 building.	2.1	Assess performance solution for building to clarify its regulatory intent.
		2.2	Identify performance requirements and confirm level of performance applied to the performance solution.
3	Determine assessment requirements for performance solution for Class 1 or 10 building.	3.1	Interpret NCC requirements and specifications for the material, form of construction or design of performance solution for Class 1 or 10 building.
		3.2	Determine NCC assessment methods that may be applied to performance solution.
		3.3	Determine and negotiate requirements for services of technical experts qualified to provide evidence or expert judgement in relation to performance solution.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Analyse performance solution for Class 1 or 10 building.	4.1	Analyse compliance of performance solution in consultation with relevant persons.
		4.2	Apply principles of fire safety engineering to compliance analysis of performance solution for fire safety.
		4.3	Apply design principles to compliance analysis of performance solution for structural safety, health, amenity and sustainability.
		4.4	Determine and record strengths and weaknesses of performance solution.
5	Advise on performance solution.	5.1	Explain assessment requirements for performance solution to client and invite and address questions.
		5.2	Evaluate strengths and weaknesses of proposed performance solutions in consultation with client.
		5.3	Develop optional performance solutions in consultation with client.
		5.4	Assist client to select preferred performance solution.
		5.5	Evaluate verification methods and evidence or expertise to support performance solution and explain findings to client.
		5.6	Gather documentation for performance solution and prepare to submit for assessment.
6	Assess compliance of performance solution.	6.1	Review documentation for performance solution to ensure completeness and request further information as required.

© Commonwealth of Australia, 2026 BuildSkills Australia

		6.2	Analyse and evaluate verification information supplied to support performance solution.
		6.3	Analyse and evaluate evidence or expert judgment to support performance solution.
		6.4	Determine and document compliance of performance solution according to regulatory and workplace requirements.
		6.5	Process documentation and notify client of assessment outcome according to regulatory and workplace requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- numeracy skills to interpret ratios, rates and proportions when examining drawings and documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCBS6118 Assess and advise on performance solutions for Class 1 and 10 buildings to three storeys

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 6.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by assessing, advising on and certifying as compliant a total of three performance solutions involving the following Classes of buildings as defined by the National Construction Code (NCC):

- two Class 1 buildings
- one Class 10 building excluding sheds and swimming pools.

Each building must be up to three storeys and not exceeding 2,000 square metres in floor area, and in a different geographical location as defined by the NCC.

Of the three performance solutions:

- one must be a performance solution for fire safety
- two must be performance solutions for structural safety, health, amenity and sustainability.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- design principles that are applied when analysing the compliance of performance solutions for structural safety, health, amenity and sustainability:
    - access and egress, including access for people with a disability
    - damp and weatherproofing
    - energy efficiency
    - light and ventilation
    - room heights
    - sanitary and other facilities
    - services and equipment
    - sound transmission and insulation

© Commonwealth of Australia, 2026 BuildSkills Australia

    - structural safety
- NCC classifications and definitions for Class 1 and 10 buildings:
    - building types
    - geographic and climate zones
- NCC requirements for assessing performance solutions relevant to Class 1 and 10 buildings
- principles of fire safety engineering relevant to Class 1 and 10 buildings:
    - fire retardants for buildings in bushfire prone areas
    - purpose and scope of AS 3959 *Construction of buildings in bushfire-prone areas*
- project management strategies that ensure thorough and timely advice is delivered according to service level agreement
- regulatory intent of performance solutions
- scope and limitations of building surveyor role in relation to advising on or certifying performance solutions
- workplace requirements for assessing and advising on performance solutions for Class 1 and 10 buildings:
    - client service
    - documentation and reporting.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessors must also:

- be licensed as a Building Surveyor Level 1 (or equivalent) or Level 2 (or equivalent) in their state or territory, or
- demonstrate current membership of a relevant industry association and have current registration on the National Building Professionals Register in the Building Industry Control category (level 1), or
- be accredited under the Australian Institute of Building Surveyors (AIBS) National Accreditation Scheme at Building Surveyor level or be accredited by the Royal Institute of Chartered Surveyors as a building certifier.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to equipment, software, drawings, documentation and materials required to achieve the performance evidence.

CPCCCA2002 Use carpentry tools and equipment

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to select and safely use and maintain carpentry tools and equipment, meeting all relevant requirements of national construction codes, Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes hand tools, power tools, pneumatic tools and equipment.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Review work instructions to use tools and equipment.
		1.2	Plan all work to comply with laws and regulations, national construction codes, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.
		1.3	Select and use personal protective equipment (PPE) for each part of the task.
		1.4	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
2	Select, check and use tools and equipment.	2.1	Select equipment and hand, power and pneumatic tools for the carpentry task, identify their functions and operations, check for serviceability and report any faults.
		2.2	Use equipment and hand, power and pneumatic tools following WHS requirements and manufacturers' recommendations.
		2.3	Sharpen and maintain tools.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Clean up.	3.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		3.2	Check, maintain, store and secure tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must safely and effectively, across three different carpentry tasks, use and maintain all of the listed tools and equipment at least once:

- hand tools:
    - retractable tape measure
    - folding or steel ruler
    - combination square
    - string line
    - chalk line
    - hand saw
    - coping saw
    - carpenters hammer / claw hammer
    - wood chisel
    - hand plane
    - trimming knife
    - clamps
    - bevels
    - spirit level
    - tin snips

© Commonwealth of Australia, 2026 BuildSkills Australia

- power/battery/pneumatic tools and equipment:
    - circular saw
    - reciprocating saw
    - sliding compound saw
    - jigsaw
    - angle grinder
    - planer
    - laminate trimmer or router
    - drill
    - rotary hammer drill
    - impact driver
    - nail gun
    - bench grinder
    - extension lead
    - portable residual current device
    - air compressor and hoses.

The candidate must also:

- replace blades/cutters/grinding discs in:
    - a power saw
    - a powered planer
    - a router
    - grinder
- grind, sharpen and hone a hand plane blade
- grind, sharpen and hone a chisel.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace quality policies and standards for using carpentry tools and equipment
- safety requirements for using carpentry tools and equipment
- types of tools and equipment and their characteristics, uses and limitations:
    - hand tools including:
        - retractable tape measure
        - folding or steel ruler
        - combination square

CPCCCA2011 Handle carpentry materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to safely manually handle and store carpentry materials, meeting all relevant requirements of work health and safety (WHS) and Commonwealth and state or territory legislation.

The unit includes preparing material for mechanical handling and applying environmental management principles associated with carpentry materials.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001* Prepare to *work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA2011 Handle carpentry materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by handling carpentry materials for three different carpentry tasks, including:

- safely handling, sorting and stacking:
    - varying lengths of timber or similarly-proportioned materials onto an Australian standard pallet, a minimum of 0.5 cubic metres, secured ready for mechanical handling
    - different sizes and types of sheet material onto an Australian standard pallet, a minimum of 0.1 cubic metres, secured ready for mechanical handling
- preparing the following for mechanical handling:
    - varying lengths of timber or similarly-proportioned materials
    - different sizes and types of sheet material.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- requirements of Commonwealth and state or territory work health and safety (WHS) legislation relevant to handling carpentry materials
- safety data sheets
- workplace quality policies and standards for handling carpentry materials
- safety requirements for handling carpentry materials
- methods of securing materials
- types and uses of tools and equipment for handling carpentry materials:
    - hammers
    - pallets

© Commonwealth of Australia, 2026 BuildSkills Australia

    - pinch bars
    - tin snips
    - wheelbarrows
- requirements and processes for safely preparing the following materials for mechanical handling, and manual handling, sorting, and stacking:
    - concrete components
    - insulation
    - joinery units
    - metal sheeting
    - paints and sealants
    - plaster or fibre cement sheeting
    - reconstituted timber products
    - reinforcement materials
    - scaffolding components
    - structural steel sections and components
    - timber
- methods of handling carpentry materials:
    - material size, weight or shape factors necessitating the assistance of other workers
    - correct lifting and carrying techniques, use of pallets and control of waste
    - preparation for mechanical handling, including the use of forklifts, pallet jacks and trucks.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3001 Carry out general demolition of minor building structures

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 4.0.

Application

This unit of competency specifies the skills and knowledge required to carry out general demolition work of minor building structures to facilitate alterations, extensions and additions to a building in residential and commercial sites.

It includes work being completed to schedules, plans and specifications.

This unit is designed for those working as a member of a team safely demolishing existing building structures and disposing of the waste materials.

It applies to concreters, carpenters and other construction workers working as members of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Competency field(s)

N/A

Unit sector(s)

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan and prepare the demolition of minor building structures.	1.1 Review and clarify task for demolition of minor building structures. 1.2 Assess minor building structures to determine scope of demolition work. 1.3 Review jurisdictional requirements for demolition of minor building structures. 1.4 Review work health and safety (WHS) requirements for the task in accordance with safety plans and policies. 1.5 Identify and manage risks including determining the status of existing services. 1.6 Identify safety signage and barricade requirements. 1.7 Review environmental requirements for the task in accordance with environmental plans and legislative requirements. 1.8 Select plant, tools and equipment, check for serviceability and rectify or report any faults.
2. Demolish minor building structures.	2.1 Erect identified safety signage and barricades, and fit personal protective equipment (PPE). 2.2 Complete preparatory work for demolition of minor building structures. 2.3 Carry out demolition procedures in accordance with safe and effective processes of deconstructing or demolishing a minor building structure. 2.4 Safely and effectively handle materials and building component parts to designated storage area using appropriate material-handling techniques. 2.5 Safely and effectively handle, store and stack materials and components identified for salvaging, ready for transport.
3. Clean up after carrying out general demolition of minor building structures.	3.1 Clear work area and dispose of non-salvageable materials in accordance with legislation, regulations, codes of practice and task requirements. 3.2 Clean, check, maintain and store tools and equipment in accordance with manufacturers' specifications and workplace requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

- writing skills to complete workplace documentation
- numerical skills to manage storage or removal of materials
- oral communication skills to:
    - use questioning to identify and confirm requirements
    - discuss cause of problems
    - report work site hazards, including faults in tools, equipment and materials.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCA3001 Carry out general demolition of minor building structures

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must carry out general demolition of one minor building structure, including removal of an external load-bearing wall to form an opening of no less than three metres wide.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations relating to carrying out general demolition of minor building structures, including:
    - job safety analyses (JSAs)
    - safe work method statements (SWMSs)
    - safety data sheets (SDSs)
    - safety manuals and instructions for plant, tools and equipment
    - signage and barricades
    - personal protective equipment (PPE)
    - environmental and work site safety plans
- requirements of Australian Standards and the National Construction Code (NCC) relating to carrying out general demolition of minor building structures
- workplace requirements for all aspects of carrying out general demolition of minor building structures including interpreting work orders and other task documentation and reporting problems
- common industry hazard identification and risk controls for carrying out general demolition of minor building structures, including safe handling of materials and machinery, and the use of signage and barriers
- environmental requirements for carrying out general demolition of minor building structures, including those relating to:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - clean-up protection
    - noise and dust
    - vibration
    - waste management
- processes for selection of appropriate tools, equipment and materials for carrying out general demolition of minor building structures
- techniques and processes for safely and effectively planning and carrying out dismantling or demolition work in accordance with legislation and codes of practice
- recognition and safe handling of materials and building component parts, and methods for salvage or disposal, including:
    - bonded asbestos
    - brickwork
    - concrete
    - glass
    - metal
    - reconstituted timber products
    - tiles
    - timber
- recognition and safe handling of materials and building component parts, and methods for salvage or disposal
- processes for demolition of minor building structures, including:
    - detached carports
    - external sections of buildings (walls, cladding, attached carports, decks and roofs)
    - internal sections of buildings (walling, lining, built-in components and wet area)
    - pergolas and patios
    - retaining walls and fences
    - small concrete structures
    - small ground level buildings
- processes for demolition of types of construction, including:
    - blockwork
    - brickwork
    - concrete
    - metal framing

© Commonwealth of Australia, 2026 BuildSkills Australia

    - timber framing
- processes for managing risks, including:
    - in areas below floors
    - identification, relocation or disconnection of services
    - loads supported by walls
    - security, and public health and safety
    - weatherproofing of the structure
    - existing services, including:
        - electricity
        - gas
        - telephone and other communications
        - water
    - requirements for cleaning up work area and tools, materials storage and environmentally friendly waste management.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- a minor building structure for demolition
- specifications of the demolition task
- appropriate documents, materials, tools, equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPCCCA3002 Carry out setting out

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to identify perimeter site boundaries and survey indicators to establish, measure and set up profiled set-outs for buildings and structural components of building work, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes setting out pads, posts, slabs, strips, and stumps and installing string lines to profile the footings of a building and associated structures on a site.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Competency field(s)

N/A

Unit sector(s)

Carpentry and Joinery

© Commonwealth of Australia, 2026 BuildSkills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
2	Show site boundaries.	2.1	Locate survey pegs at corners of site.
		2.2	Set string lines to accurately show site boundary markings in accordance with site drawings and survey pegs.
3	Set out first line for building alignment.	3.1	Determine, from drawings, the distance of the building line from the boundary or existing building.
		3.2	Determine approximate position and length of line and building clearances at each end from drawings and survey pegs.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Install pegs and profiles, ensuring that they are level across and between one another and have adequate provision to mark footing width on profile.
		3.4	Accurately mark location for line with nails on profiles and set taut string line to true alignment with boundary.
4	Set out right-angled corners.	4.1	Determine and mark corner of building with peg on set building line to true measurement from adjacent boundary.
		4.2	Use triangulation principles to set up right angle to line from corner peg.
		4.3	Install profiles to approximate level of other profiles and set taut string line to right-angled alignment.
5	Install other building lines.	5.1	Install profiles for remaining building lines level with established profiles.
		5.2	Mark measurements for remaining building lines accurately, and nail on profiles to dimensions from drawings.
		5.3	Set taut string lines to nailed locations on profiles.
6	Check building lines for square.	6.1	Check diagonal measurements for square and adjust lines to provide square relationship within 3 mm tolerance over minimum diagonal length of 10 m.
		6.2	Check measurements for accuracy.

Assessment Requirements for CPCCCA3002 Carry out setting out

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by setting out one L- and one T-shape building on a site with fall.

Setting out must be to 3 mm tolerance over minimum diagonal length of 10 metres, and include pads, slabs, strips and piers.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of Australian Standards relevant to carrying out setting out
- workplace quality policies and standards for carrying-out setting-out
- safety requirements for carrying out setting out
- application and requirements for line, level and plumb in construction projects
- mathematical techniques associated with setting out
- processes for reading and interpreting construction plans, drawings and sketches when carrying out setting out of pads, slabs, strips and piers
- processes and techniques for accurate setting-out on flat, sloping and steep sites
- processes for setting-out
- site isolation responsibilities when carrying out setting out
- types, characteristics, technical capabilities and limitations of devices used to carry out setting out activities.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

© Commonwealth of Australia, 2026 BuildSkills Australia

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3003 Install flooring systems

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to plan, prepare, set out and install timber and steel flooring systems to support the internal and external walls of a residential building, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation and National Association of Steel-Framed Housing (NASH) standard for steel-framed construction in bushfire areas.

The unit includes installation of flooring systems in bedrooms, living areas, kitchens, bathrooms, balconies and decks.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) as required for each stage of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Set out and install support structure.	2.1	Position support structure, stumps/piers to set-out lines, drawings and specifications.
		2.2	Install support structure.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Check support structure, posts, stumps and piers for level, plumb and square.
1	Install bearers.	3.1	Mark and cut bearer material to lengths for joining over supports.
		3.2	Make arrangements for damp proof course and termite shield to be installed where specified by regulations.
		3.3	Locate and fix bearers and check and adjust for square, in-line and level.
		3.4	Fix waling plates for decks and balconies to external walls.
4	Install floor joists.	4.1	Set out location for floor joists using spacings in accordance with drawings and specifications.
		4.2	Check floor joists for straightness, then fit and fix to line and level.
		4.3	Fit and fix supporting blocks and trimmers around doorways and openings.
		4.4	Cut, fit and fix trimmers to support sheet flooring joints.
5	Install flooring.	5.1	Check flooring materials for suitability.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.2	Confirm floor measurements and cut and prepare flooring materials for installation with a minimum of waste.
		5.3	Install and secure flooring to manufacturers' specifications.
(	Clean up.	6.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		6.2	Check, maintain and store tools and equipment and report any faults.

Assessment Requirements for CPCCCA3003 Install flooring systems

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing each of the following flooring systems:

- a bearer and joist system on supports to carry external walls and internal walls parallel to joists for a home or equivalent, not less than 30 square metres, including:
    - balcony/deck fixings
    - deep joists
- a tongue and groove fitted strip flooring surface, not less than 5 square metres
- an approved wet-area floor system, not less than 5 square metres
- a sheet platform system for a home or equivalent, not less than 10 square metres.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code including requirements for attachment of decks, Australian Standards and National Association of Steel-Framed Housing (NASH) Standards relevant to installing flooring systems
- workplace quality policies and standards for installing flooring systems
- safety requirements for installing flooring systems
- requirements and arrangements for installing damp proof systems and termite barriers
- floor and flooring system types, characteristics, construction methods and installation techniques
- application of the following floor framing:
    - premanufactured joists
    - conventional bearers and joists

© Commonwealth of Australia, 2026 BuildSkills Australia

    - drop-in (or in-line or deep) joist construction
    - sub-floor frame, including timber or steel
    - sub-floor support construction
- flooring support systems:
    - concrete stumps
    - masonry piers
    - patented adjustable supports
    - steel posts
    - timber or brick walls
    - timber stumps
- flooring system materials and their uses as required by the National Construction Code (NCC) and other legislation:
    - strip flooring
    - engineered products
    - floor boards
    - sheet products
- acclimatisation of flooring materials
- types of imposed loads and their effects
- types of insulation products
- plans, specifications and drawings for installing flooring systems
- types and uses of tools and equipment used to install flooring systems
- processes for calculating material requirements to minimise waste when installing flooring systems
- regulatory requirements applicable to floor framing and flooring
- setting out and levelling techniques.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3004 Construct and erect wall frames

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to plan, prepare, set out, construct and erect load-bearing and non-load-bearing wall frames for the different types of loadings, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes setting out, cutting and fabrication of timber frames and preparation of steel frames and the erection, connection and bracing of frames.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA3004 Construct and erect wall frames

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- setting-out and constructing timber framed walls to a minimum height of 2.4 metres and minimum floor area of 30 square metres to accommodate roof and ceiling members and different types of cladding or linings, including:
    - two external load-bearing walls with one window opening and one door opening in each wall
    - two external straight walls with external intersection
    - two internal non-load-bearing walls encompassing an internal T junction and an external junction
- setting-out and erecting steel framed walls to a minimum height of 2.4 metres and minimum floor area of 30 square metres to accommodate roof and ceiling members and different types of cladding or linings, including:
    - two external load-bearing walls with one window opening and one door opening in each wall
    - two external straight walls with external intersection
    - two internal non-load-bearing walls encompassing an internal T junction and an external junction.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code (NCC) and Australian Standards relevant to constructing wall frames, including AS:1684 Residential timber-framed construction
- requirements of the National Association of Steel-framed Housing (NASH) Standards relevant to constructing and erecting wall frames

© Commonwealth of Australia, 2026 BuildSkills Australia

- workplace quality policies and standards for constructing and erecting wall frames
- safety requirements for constructing and erecting wall frames
- electrolysis and corrosion of dissimilar steels relevant to erecting steel wall frames
- plans, specifications and drawings for constructing and erecting wall frames
- types and uses of tools and equipment for constructing and erecting wall frames
- processes for:
    - setting out and measuring materials for frames
    - calculating material requirements
- applications for materials used for constructing and erecting wall frames
- timber types, structural properties and uses, including engineered timber products
- frame construction techniques.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

		2.2	Manage lifting and handling of materials, including lifting trusses and stacking loads on wall frames ready for use.
		2.3	Erect, plumb and fix roof trusses to set out positions in correct sequence to align at apex.
		2.4	Install bottom chord at constant height above internal wall plates and use to provide lateral support for internal walls.
		2.5	Fix ceiling trimming and creeper trusses.
		2.6	Construct and fix roof bracing following AS 4440 Installation of nail-plated timber roof trusses and National Association of Steel-framed Housing (NASH) Standards.
		2.7	Fix lateral restraints to truss chords in position to manufacturers' specifications.
		2.8	Install roof and internal wall bracing connections, including tie downs, for wind load following manufacturers' guidelines and AS 4440 and NASH.
1	Clean up.	3.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		3.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCA3006 Erect roof trusses

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Performance Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- setting out and erecting timber trusses manufactured to AS 4440 *Installation of nail-plated timber roof trusses* and steel trusses to the requirements of the NASH Standards including:
    - a minimum 30 square metres of timber roof trusses with a major and minor span, including:
        - one hip end and valley
        - one gable end
    - a minimum 30 square metres of steel roof trusses with a major and minor span, including:
        - one hip end and valley
        - one gable end
- installing:
    - gable bracing, bottom chord bracing, web bracing and top chord bracing installed in line with the requirements of both AS 4440 *Installation of nail-plated timber roof trusses* to the requirements of the NASH Standards
    - a connection between an internal brace wall running parallel to the bottom chord
    - a connection between an internal brace wall running at 90 degrees to the bottom chord.

© Commonwealth of Australia, 2026 BuildSkills Australia

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to erecting roof trusses, including AS 4440 Installation of nail-plated timber roof trusses required by the National Construction Code (NCC)
- requirements of the National Association of Steel-framed Housing (NASH) Standards relevant to erecting roof trusses
- workplace quality policies and standards relevant to erecting roof trusses
- safety requirements for erecting roof trusses
- plans, specifications and drawings for erecting roof trusses
- types and uses of tools and equipment required to erect roof trusses
- materials used in roof truss erection
- quality requirements for roof trusses
- roof truss erection and construction techniques
- types of roof construction and components of roof trusses
- techniques for lifting and positioning trusses
- processes and requirements for the temporary and permanent bracing of roof trusses and elementary bracing principles for various shaped roofs
- types of timber and their structural properties and uses, including engineered timber products.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3007 Construct pitched roofs

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to set out, construct and erect pitched roofs to accommodate roof coverings for weatherproofing purposes, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes determining the required materials and process, and constructing scotch valley gable, broken hip and valley roof structures.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001* Prepare to *work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Carpentry and Joinery

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Set out, prepare and erect pitched roof members.	2.1	Set out and mark position of members on top plates for roof type and rafter spacing.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Determine bevels for all roof members.
		2.3	Calculate and set out pattern rafter to length allowing for overhang and creeper reductions.
		2.4	Set out and cut main ridge boards to length.
		2.5	Cut common rafters to length, and check.
		2.6	Erect common rafters in correct sequence.
		2.7	Calculate lengths for hip and valley rafters from pitch of roof.
		2.8	Cut and fix hip and valley rafters.
		2.9	Cut and fix creeper rafters from pattern rafter allowing for overhang.
1	Install roof support.	3.1	Determine lengths for under-purlins.
		3.2	Cut and install under-purlins.
		3.3	Measure, cut and install struts to under-purlins, hips, valley and ridges.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.4	Install collar ties and tie-downs to span tables in *AS 1684 Residential timber-framed construction.*
		3.5	Fit trimmers to gable ends to take gable end rafter and barge board.
		3.6	Cut and fix valley boards and surrounding battens.
4	Clean up.	4.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		4.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- setting-out, constructing and erecting:
    - a skillion roof above 10 degrees for a structure of a minimum 10 square metres
    - a roof, or a series of roofs, together covering a minimum of 30 square metres, including:
    - a broken hip and valley
    - a gable end
    - a scotch valley
- setting-out:
    - a pattern rafter with birdsmouth, creeper reductions and eave over-hang
    - roof bevels
    - strutting beams and under purlins as required by span tables in *AS 1684 Residential timber-framed construction* and manufacturers' specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing pitched roofs, including AS 1684 Residential timber-framed construction

© Commonwealth of Australia, 2026 BuildSkills Australia

- workplace quality policies and standards relevant to constructing pitched roofs
- safety requirements relevant to constructing pitched roofs
- roofing frame construction techniques
- contents of, and terms and symbols used in plans, specifications and drawings for constructing pitched roofs
- types and uses of tools and equipment used for constructing pitched roofs
- processes, relevant to constructing pitched roofs, for:
    - setting out and measuring materials for frames
    - calculating material requirements
- materials relevant to constructing pitched roofs
- roofing set-out procedures
- types, structural properties and uses of timber, engineered timber products and steel for constructing pitched roofs
- characteristics and construction techniques of pitched roof types:
    - scotch valley
    - broken hip and valley
    - hip and valley
    - gable and verge
    - skillion
    - strut/props
- geometric development of bevels.

CPCCCA3008 Construct eaves

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare, set out and construct eaves, including the cutting and fixing of fascia and barges to provide a finish between the wall and the roof, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes:

- construction of boxed and raked eaves
- finishing of gable ends including verge and flush.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA3008 Construct eaves

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by marking and cutting roof members to line to accommodate plumb fascia and barge and constructing:

- three metres of timber verge gable eaves
- three metres of timber boxed gable eaves
- three metres of timber boxed eaves
- three metres of timber raked eaves
- three metres of steel fascia with hangers.

In constructing these timber eaves, the following must be included:

- an apex junction on the barge board
- a junction between the barge board and the plumb fascia
- a junction of the fascia and eave lining at the valley
- a junction of the fascia and eave lining at the hip.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code (NCC) and Australian Standards relevant to constructing eaves, including AS 1684 Residential timber-framed construction and the National Association of Steel-framed Housing (NASH) Standards
- workplace quality policies and standards relevant to constructing eaves
- safety requirements for constructing eaves
- construction techniques for eave fascia and soffit
- eaves design:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - sloping soffits and boxed eaves
    - verandas, concealed gutters and open eaves
- materials for constructing eaves:
    - beads
    - sheeting
    - joining mould
    - steel
    - quads
    - timber and steel fascia
    - roof battens
    - timber lining boards
- levelling techniques for constructing eaves
- plans, specifications and drawings for constructing eaves
- types and uses of tools and equipment for constructing eaves
- processes for the calculation of material requirements for constructing eaves
- timber shrinkage and required clearances for various constructions
- geometry for constructing eaves.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3009 Construct advanced roofs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to plan, prepare, set out and construct pitched roofs on irregular plan building shapes, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes gable, hip, hip and valley, or combinations of these in roofs that are applied to different types and styles of buildings. The roofs may have skewed, splayed or octagonal ends, may contain two separate roof pitches in the one structure, and have varying eave widths.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA3009 Construct advanced roofs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by constructing a roof, or a series of roofs, totalling a minimum of 30 square metres. These must include:

- a splayed end incorporating a hip end
- a splayed end incorporating a gable end
- incorporation of an octagonal end
- an intersection with another roof of a different pitch
- varying eave widths along the roof's length.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards, including AS:1684 Residential timber-framed construction, relevant to constructing advanced roofs
- workplace quality policies and standards relevant to constructing advanced roofs
- safety requirements for constructing advanced roofs
- types of tools and equipment required for constructing advanced roofs
- processes for determining the following for pattern rafters:
    - vertical height above birdsmouth
    - length of rafters for pitch of roof
    - pitch and plumb cut for rafters
- ridge boards:
    - abutment joints scarfed or butt jointed

© Commonwealth of Australia, 2026 BuildSkills Australia

    - those marked for rafter positions from wall plates
- plans, specifications and drawings for constructing advanced roofs
- processes for the calculation of material requirements for constructing advanced roofs
- roof calculations for lengths, quantities and pitch for constructing advanced roofs
- roof geometry
- roof set-out
- roof types and design.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) as required for each stage of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Install window units.	2.1	Check wall frame opening for adequate clearance for window unit.
		2.2	Position window unit with packing and flashings so that the head and sill are level, stiles are plumb and in wind, and reveals or frame are finished flush with face of inside wall lining.
		2.3	Select type, gauge and quantity of fasteners as per *Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors* and fix window to wall frame.

© Commonwealth of Australia, 2026 BuildSkills Australia

3	Prepare internal and external door openings, and construct and fix jamb.	3.1	Check wall frame for adequate clearance for door frame.
		3.2	Mark door jamb and head, cut to length, allowing for door clearances.
		3.3	Trench the door head to accommodate jambs, allowing for specified clearances.
		3.4	Assemble, square, fix and brace door frame with flush rebates.
		3.5	Select type, gauge and quantity of fasteners as per Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors. Install door frame into wall frame opening, ensuring the door jambs are plumb and in wind, positioned flush to linings, head is level, and all appropriate flashings are in place.
4	Install door.	4.1	Mark out hinges and fit to door and jamb.
		4.2	Fit door to frame and adjust gaps to requirements of *AS2688 Timber and composite doors.*
		4.3	Fit and fix door furniture and door stop components to manufacturers' specifications.
5	Install cavity door and door unit.	5.1	Fit hardware (rollers) to door according to manufacturer's specifications.
		5.2	Fit door to cavity sliding door unit and adjust height of rollers to ensure leading door edge is plumb and closes neat against cavity sliding door stile.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.3	Make final adjustments to packing of cavity sliding door stile.
		5.4	Fit and fix door furniture and cavity door centring locators, according to manufacturer's specifications.
	Clean up.	6.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		6.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCCA3010 Install windows and doors

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing in wall frames:
  - a standard window
  - a sliding cavity door unit and door
- constructing and fitting a standard external rebated door frame
- fitting and hanging one door, including door furniture, privacy set and door stops
- fitting and hanging a pair of doors.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards, relevant to installing windows and doors, including *AS2688 Timber and composite doors* and *AS2047 Windows and external glazed doors in buildings*, and *Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors*
- workplace quality policies and standards relevant to installing windows and doors
- safety requirements for installing windows and doors
- flashing requirements and installation techniques relevant to installing windows and doors
- plans, specifications and drawings for installing windows and doors
- types of tools and equipment required to install windows and doors, their characteristics, uses and limitations
- processes for setting out windows and doors
- processes for calculating material requirements for installing windows and doors

© Commonwealth of Australia, 2026 BuildSkills Australia

- materials relevant to installing windows and doors
- various types of doors:
    - flush panel, framed and panelled, and glazed
    - hinged door units including standard doors, sliding, flywire, combination window and door units, door sidelight units (glazed or unglazed) and internal doors
    - jambs, stiles and sills
    - flashing
- door furniture, including flush pulls, latches and deadlocks, push plates and closers, handles and locks
- window, door installation including flashing and fixing
- types of windows and doors, materials used and their characteristics and uses.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3011 Refurbish timber sashes to window frames

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. Correction of title of Element 4 to read: Clean up.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to refurbish timber sashes to window frames to rectify operation of external windows, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Refurbish casement/awning windows.	2.1	Remove sash and hardware.
		2.2	Refurbish, fit and hang sash to correct margins.
		2.3	Fit window hardware.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Refurbish double hung windows.	3.1	Remove sashes from frame in correct sequence.
		3.2	Refurbish and fit sashes to correct margins.
		3.3	Fit sash cords and weights or spiral balances or spring balances, check and adjust.
		3.4	Fit window hardware and mouldings.
4	Clean up.	4.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		4.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCA3011 Refurbish timber sashes to window frames

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5. Correction of title of Element 4 to read: Clean up.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- removing, refurbishing and refitting one sash to a top or side hung window frame
- removing, refurbishing and refitting one pair of sashes to a double hung window.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to refurbishing timber sashes to window frames
- workplace quality policies and standards relevant to refurbishing timber sashes to window frames
- safety requirements for refurbishing timber sashes to window frames
- plans, specifications and drawings for refurbishing timber sashes to window frames
- processes for calculating material requirements for refurbishing timber sashes to window frames
- timber sash refurbishment techniques
- types and uses of tools and equipment required to refurbish timber sashes to window frames
- materials and construction methods used to construct window frames and sashes

© Commonwealth of Australia, 2026 BuildSkills Australia

- window hardware:
    - window furniture, including hinges, sash stays, weights and cords, spiral balances, spring balances, locks, winders, handles and knobs, lifts
    - frame and sash moulding, including:
        - parting beads
        - pocket pieces
        - stop beads
        - outside linings
- processes for setting out hardware of refurbished windows.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3012 Frame and fit wet area fixtures

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to install supporting framework for fixtures and flashings for wet area construction of a bath, shower base, and prepare for wet area linings, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes setting out, cutting and fabrication of frames and installation of frames in bathroom, laundry, shower, toilet and en suite wet areas.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

CPCCCA3014 Construct and install bulkheads

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to construct bulkheads for decorative purposes, to contain fittings, such as range hoods and cupboards, to conceal services, and to help facilitate changes in ceiling heights, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes preparing for sheeting bulkheads with plasterboard, lining boards, reconstituted timber products and metal or plastic decorative panels; and installation of bulkheads which may be hung from, incorporated into, or fastened onto a structure in situ.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- constructing and installing:
    - one straight bulkhead framed in timber or steel measuring a minimum of 2 m width, 300 mm height and 300 mm depth
    - one curved bulkhead framed in timber or steel measuring a minimum of 2 m width, 300 mm height and 300 mm depth
- installing a pre-manufactured bulkhead measuring a minimum of 2 m width, 300 mm height and 300 mm depth.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing and installing bulkheads
- workplace quality policies and standards relevant to constructing and installing bulkheads
- safety requirements relevant to constructing and installing bulkheads
- purposes of bulkheads:
    - decoration, to contain fittings (bar hoods and cupboards) and help facilitate changes in height to ceilings
    - services
    - range hoods
- materials and methods used to construct and install bulkheads
- application of curved geometry in the construction of bulkheads

© Commonwealth of Australia, 2026 BuildSkills Australia

- load and anchor capacities for bulkheads
- use of plans, specifications and drawings when constructing and installing bulkheads
- types and uses of tools and equipment used to construct and install bulkheads
- processes for setting out and measuring materials used to construct bulkheads
- processes for calculating material requirements for constructing and installing bulkheads.

Assessment Conditions

CPCCCA3016 Construct, assemble and install timber external stairs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to construct, assemble and install timber external stairs of one or more flights to provide access into a building or structure, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes external stairs:

- installed from ground level to a landing
- constructed with open risers and with housed strings or metal brackets to accommodate treads
- freestanding or installed against an existing wall
- incorporating timber treads, stringers and balustrading.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA3016 Construct, assemble and install timber external stairs

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by constructing, assembling and installing one flight of timber external stairs from ground level to a minimum height of 1.1 metres, including a handrail and balustrade to the open side of the flight and landing.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing, assembling and installing timber external stairs
- workplace quality policies and standards relevant to constructing, assembling and installing timber external stairs
- safety requirements for constructing, assembling and installing timber external stairs
- application of and requirements for line, level and plumb when constructing and installing stairs
- processes for reading and interpreting plans, specifications and drawings for constructing, assembling and installing timber external stairs
- types and uses of tools and equipment required to construct and install timber external stairs
- materials relevant to constructing, assembling and installing timber external stairs
- processes for measuring and calculating material lengths and quantities for constructing, assembling and installing timber external stairs
- durability, quality and treatment requirements of timber used for external stairs
- techniques used for constructing and installing timber external stairs, including different methods of joining and fixing components

© Commonwealth of Australia, 2026 BuildSkills Australia

- range and characteristics of different stair types
- characteristics of different handrails and balusters.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3017 Install exterior cladding

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to apply material finishes to an external framed wall surface for the purpose of weatherproofing and securing the building, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes application of both sheet and linear style claddings in a range of materials.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC) including fire protection, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Prepare exterior wall frames for cladding.	2.1	Check frames are true and plumb.
		2.2	Check frame and trim or pack studs to provide an even surface across studs and noggins.
		2.3	Fit and fix rows of noggings to frames to line, flush with wall face.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Prepare frames to cladding manufacturers' installation instructions.
1	Fix thermal and moisture management.	3.1	Cut weatherproofing, vapour barrier, and flashing materials, fit into position, and secure.
		3.2	Identify locations for ancillary materials and prepare to required lengths, position and secure as per manufacturers' installation instructions.
4	Set out, cut and fix horizontal weatherboards.	4.1	Determine effective cover or overlap for cladding from recommended lap, type and profile of board and height of wall.
		4.2	Produce set-out rod or jig.
		4.3	Mark locations of each profile on the building paper or corner stop to determine height of each row of profile.
		4.4	Cut cladding to fit length of wall faces or to join on intermediate studs.
		4.5	Join butt joints of cladding at centre of studs with joint flush to face and line.
		4.6	Join manufactured boards using manufacturers' specification/method.
		4.7	Fix and finish internal and external corners to manufacturers' specification/method.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Fix panelling.	5.1	Determine starting position of first panel against windows, doors and corners in accordance with specified design and finished effect.
		5.2	Cut panelling to fit height of wall.
		5.3	Fix abutting joints of panelling following manufacturers' specifications and requirements for flashing.
		5.4	Cut, fit and fix panelling plumb and level.
6	Clean up.	6.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		6.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for CPCCCA3017 Install exterior cladding

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- producing a set-out rod for a minimum height of 2.1 metre using the effective cover of a weatherboard of a given profile
- installing weatherproofing, a vapour barrier and flashing
- fixing two different profiled weatherboards to eave height of at least 2.1 metres, incorporating an internal and an external corner with stops, flashings and sarking for a window and a door
- installing a minimum of two different types of external cladding panels, incorporating an internal and an external corner, abutting a window or door, and joints between boards determined by the material being used, manufacturers' recommendations and job specifications
- attaching vertical and horizontal cladding to frames.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to installing exterior cladding, including AS 1562 Design and installation of sheet roof and wall cladding
- requirements for fire management and moisture and energy efficiency for installing exterior cladding
- systems of cladding forming part of a fire-rated system
- workplace quality policies and standards relevant to installing exterior cladding
- safety requirements for installing exterior cladding
- materials and techniques used when installing common forms of exterior cladding

© Commonwealth of Australia, 2026 BuildSkills Australia

- manufactured cladding strips, sheets, boards and planks
- application of both sheet and linear style claddings in a range of materials
- use of pliable membranes, thermal break strips, sheets and battens relevant to installing exterior cladding
- process and requirements for installing flashing and sarking when installing exterior cladding
- procedures for safely handling and storing materials, and disposing of hazardous materials and waste
- plans, specifications and drawings relevant to installing exterior cladding
- types and uses of tools and equipment required to install exterior cladding
- processes for calculating material requirements for installing exterior cladding
- wall frame construction methods and their impact on processes to install exterior cladding.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3018 Construct, erect and dismantle formwork for stairs and ramps

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to construct, erect and dismantle formwork for stairs and ramps to provide access between floors and landings, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

It includes:

- establishing required levels on site
- constructing timber, metal or prefabricated formwork to contain wet poured concrete until it is completely cured
- stripping the formwork
- preparing and storing formwork for re-use.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Set out formwork.	2.1	Check formwork location for accuracy against plans and specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Check design of stairs or ramp and method of joining formwork, and determine levels from drawings, specifications and site inspection.
		2.3	Determine rise, going and pitch of stairs and ramp from drawings, specifications, site inspection, rise measurements, and requirements of the National Construction Code (NCC).
		2.4	Calculate full size of stairs or ramp and set out.
		2.5	Set out materials for formwork, including stringer form, to pitch of stairs with rises not exceeding specified space between treads.
1	Assemble and erect formwork.	3.1	Place, fix and brace landing bearers and joists.
		3.2	Erect and brace stairs or ramp formwork soffit.
		3.3	Cut, install and brace formwork for stringers.
		3.4	Locate and fix formwork stringers for stairs and ramps.
		3.5	Set out, cut square to length, and fix material for face of treads.
		3.6	Brace risers at mid-span to prevent deflection under the load of wet concrete.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Strip formwork.	4.1	Strip formwork and bracing sequentially and safely.
		4.2	Check formwork for reusability and dispose of damaged components.
		4.3	Safely de-nail, clean, oil and store or stack reusable formwork components.
5	Clean up.	5.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		5.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCA3018 Construct, erect and dismantle formwork for stairs and ramps

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by constructing, erecting, stripping and dismantling the formwork for:

- one flight of stairs, freestanding or against a wall with a minimum rise of 1800 mm
- one ramp with a minimum rise of 400 mm and 5.6 metres long.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing, erecting and dismantling formwork for stairs and ramps
- workplace quality policies and standards for constructing, erecting and dismantling formwork for stairs and ramps
- safety requirements for constructing, erecting and dismantling formwork for stairs and ramps
- line, level and plumb for constructing, erecting and dismantling formwork for stairs and ramps
- common formwork faults, problems and rectification methods
- materials used to construct and erect formwork
- fixings for formwork
- techniques to construct, erect and strip and dismantle formwork
- contents, terms and symbols used in plans, specifications and drawings for constructing, erecting and dismantling formwork for stairs and ramps
- types and uses of tools and equipment used to erect and strip and dismantle formwork
- processes for measuring and setting out formwork

© Commonwealth of Australia, 2026 BuildSkills Australia

- processes for calculating material requirements for constructing and erecting formwork for stairs and ramps
- regulations on stair and ramp construction for safe use, including disability access
- processes to construct stairs and ramps.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3019 Erect and dismantle formwork to suspended slabs, columns, beams and walls

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to erect and dismantle formwork to suspended slabs, columns, beams and walls to contain concrete in above-ground construction, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes:

- setting out, assembling and bracing formwork
- sorting formwork materials and preparing for re-use

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Competency field(s)

N/A

Unit sector(s)

Carpentry and Joinery

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
2	Erect formwork.	2.1	Clear work area and prepare surface for safe erection of formwork for suspended slabs, columns, beams and walls.
		2.2	Set-out formwork to requirements of drawings and specifications.
		2.3	Assemble formwork with support system to drawings, specifications and class of surface finish and set to correct height, level and line.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Brace formwork to maintain rigidity and stability.
		2.5	Erect formwork support system sequentially to initial set-out and task specifications.
		2.6	Fabricate and erect formwork shutters and edge boxing to designed form requirements and dimensions specified to allow for safe stripping.
		2.7	Install block-outs and cast-in services to specified locations.
		2.8	Remove debris, sawdust and other waste materials from completed formwork following waste management requirements.
		2.9	Apply release agent to formwork face to manufacturers' specifications.
3	Strip formwork.	3.1	Strip formwork and bracing sequentially and safely.
		3.2	Check formwork for re-usability and disposed of damaged components to requirements.
		3.3	Safely de-nail, clean, oil and store or stack reusable formwork components.
4	Clean-up.	4.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		4.2	Check, maintain and store tools and equipment and report any faults.

Assessment Requirements for CPCCCA3019 Erect and dismantle formwork to suspended slabs, columns, beams and walls

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by setting-out and erecting suspended slab formwork for a slab size of a minimum of 10 square metres.

The formwork must incorporate:

- one beam
- one wall of a minimum of 1.8 metres high by 1.0 metre long
- two different types of columns with a specified formwork system at a minimum height of 1.8 metres
- block-outs and cast-in services.

Formwork may be prefabricated or fabricated in situ and must be rigid and able to withstand the mass of wet concrete and actions imposed during placement. It must comply with regulations and specifications for height, level and loadings.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards including AS 3610 Formwork for concrete requirements relevant to erecting, stripping and dismantling formwork to suspended slabs, columns, beams and walls
- workplace quality policies and standards relevant to erecting, stripping and dismantling formwork to suspended slabs, columns, beams and walls
- safety requirements for erecting, stripping and dismantling formwork to suspended slabs, columns, beams and walls
- environmental requirements for erecting and dismantling formwork to suspended slabs, columns, beams and walls
- line, level and plumb for erecting formwork

© Commonwealth of Australia, 2026 BuildSkills Australia

- common formwork faults and problems, and suitable methods to rectify them
- formwork componentry
- materials and erection techniques used when erecting formwork to suspended slabs, columns, beams and walls
- contents of and terms and symbols used in plans, specifications and drawings relevant to erecting and dismantling formwork to suspended slabs, columns, beams and walls
- types and uses of tools and equipment used to erect and dismantle formwork
- processes for setting out formwork and measuring required materials
- purpose, application and properties of commonly used release agents relevant to erecting formwork to suspended slabs, columns, beams and walls.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3020 Erect and dismantle jump form formwork

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to erect and dismantle jump-form formwork for concrete-pouring activities to construct wall structures where the formwork process is continuous, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes curved and straight jump-form formwork, which is erected and then moved to its next position.

Jump-form formwork requires work as a member of a mixed trades team, including carpenters, riggers, electricians, concreters and steel fixers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Set out formwork.	2.1	Locate set out points and lines to engineer's drawings, survey datum points, and site drawings.
		2.2	Locate jump-form formwork to set out.

© Commonwealth of Australia, 2026 BuildSkills Australia

3	Assemble core form system.	3.1	Erect and fix internal prefabricated system wall form shutters into location.
		3.2	Fit system onto concrete nib walls at heights consistent with requirements.
		3.3	Install shear key feet.
		3.4	Fit platforms and assembly into core.
		3.5	Fit structural steel system grid work and hydraulic hose lines.
		3.6	Suspend wall form shutters and fit system cladding and platforms.
4	Locate and install penetrations.	4.1	Set out locations and dimensions of penetrations to designated tolerance.
		4.2	Construct penetrations, block-outs and cast-in services.
		4.3	Install penetrations.
5	Jump the formwork.	5.1	Erect and fix external prefabricated system wall shutters.
		5.2	Loosen and strip shutters to manufacturers’ and WHS requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.3	Instruct rigger to activate electric or hydraulic jacking of the system to the new position.
		5.4	Install trailing platforms.
		5.5	Dismantle formwork.
(	Clean up.	6.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		6.2	Check, maintain and store tools and equipment and report any faults.

Assessment Requirements for CPCCCA3020 Erect and dismantle jump form formwork

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by completing, as a member of a team, the erection and dismantling of curved and straight jump-form formwork for at least one jump operation, including penetrations, block-outs and cast-in services.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to erecting and dismantling jump-form formwork
- workplace quality policies and standards relevant to erecting and dismantling jump-form formwork
- safety requirements for erecting and dismantling jump-form formwork
- common formwork faults and problems, and suitable methods to rectify them
- concrete characteristics and properties used in jump-form formwork
- functions and operations of electric or hydraulic jacking systems relating to jump-form systems
- formwork materials and erection techniques
- contents of and terms and symbols used in plans, specifications for erecting and dismantling jump-form formwork
- types and uses of tools and equipment required to erect and dismantle jump-form formwork
- processes for calculating material requirements for erecting and dismantling jump-form formwork.

CPCCCA3022 Install curtain walling

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to fit and fix curtain walling facades to multi-storey structures to provide external cladding of structural steel or reinforced concrete, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes the installation of fabricated frameworks with metal cladding, fabricated framework with glass panels, precast concrete panels, and manufactured and natural stone products in or on the structure.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Prepare site for installation.	2.1	Set out location of curtain wall installation connections.
		2.2	Clear area below construction face to allow operation of support plant and equipment and isolate with barricades to work health and safety (WHS) requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Inspect surface of structure to receive curtain walling for conformity and prepare to receive fixings.
3	Install panels or cladding.	3.1	Check and install curtain wall fixing brackets to set out points.
		3.2	Place and fix curtain walling into correct position.
		3.3	Install curtain walling plumb and level, align and fix into position.
		3.4	Fit and secure junctions between placed sections of curtain walling to fixing specifications.
		3.5	Install curtain wall trims.
4	Seal curtain walling.	4.1	Clean surface areas in preparation for application of caulking sealants.
		4.2	Apply sealants to curtain walling and trims.
5	Clean up.	5.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal, materials handling and protection of the environment.
		5.2	Check, maintain and store tools and equipment and report any faults.

Assessment Requirements for CPCCCA3022 Install curtain walling

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing a minimum of 20 square metres of curtain walling for a multi-storey project:

In doing this, the candidate must:

- prepare the external surface to receive fixings
- secure fixings ensuring conformity with allowable tolerances
- install and fix sections of curtain walling checking for line and plumb
- seal erected surfaces using specified products.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to installing curtain walling
- workplace quality policies and standards for installing curtain walling
- safety requirements for installing curtain walling
- types of curtain walling materials, systems and techniques
- curtain wall fixing:
    - drilling holes
    - fixing brackets to steelwork
    - installing masonry anchors
    - trimming concrete surfaces for flatness
- contents of and terms and symbols used in plans, specifications and drawings for installing curtain walling

© Commonwealth of Australia, 2026 BuildSkills Australia

- procedures for safely using fall arrest systems and fall prevention methods
- processes for calculating material requirements for installing curtain walling
- purpose and safe use of swing scaffolding
- types and uses of tools and equipment used to install curtain walling.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3024 Install lining, panelling and moulding

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare, set out and install lining and panelling to masonry and timber and/or metal framed walls, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes installation of mouldings to provide decorative finishes.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA3024 Install lining, panelling and moulding

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by completing to specifications:

- lining a continuous wall that includes one opening with lining boards to a minimum of 3.0 metres by 2.4 metres
- lining a continuous wall that includes one opening with sheet panelling to a minimum of 3.0 metres by 2.4 metres
- fitting profiled architraves to a minimum of one door or one window or a combination of both, with specified margins and tight fitting mitre joints
- cutting and fixing a profiled skirting with a minimum of one internal scribed joint and one external mitre joint with tight fitting joints
- scribing and mitring a Scotia, quad and colonial architrave with a minimum of one internal joint and one external mitre joint with tight fitting joints
- constructing a raking mould using either an internal scribed or external mitre joint with tight fitting joints.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relating to all aspects of installing lining, panelling and moulding
- workplace quality policies and standards for installing lining, panelling and moulding
- safety requirements for installing lining, panelling and moulding
- types of tools and equipment required for installing lining, panelling and moulding, and their appropriate uses

© Commonwealth of Australia, 2026 BuildSkills Australia

- processes for lining of framed walling or battened surfaces to provide a finished surface:
    - all moulding applications where joining occurs at surface intersections and involves change of levels and mouldings running at a slope or rake.
    - junctions of surfaces, which may be at right angles or obtuse or acute angles
    - lining boards, which may be vertical, horizontal or raked
- applications of lining materials:
    - lining, panelling, mouldings, nails, screws, adhesives and gap fillers
    - lining and panelling sheet materials, including lining boards, veneer panelling, plywood, hardboard, MDF board, particle board and fibre cement board
    - to floors, walls, ceilings, windows, door frames and jambs, built-in cupboards, built-in robes, fitments and stairs
- preparation of surfaces for lining:
    - fixing of battens to surface
    - trimming of frame members to line
    - fixing of additional noggings
    - packing of frame members
    - wedging of frame members
- various mouldings:
    - beading (flat, quad, cover strips and nosings)
    - bull nosed
    - multi-curved
    - ornate period profile
    - Scotia
    - splayed
    - square
- edging:
    - architrave
    - raking moulds
    - skirting
- joints.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Locate and access plans, specifications and drawings.
		1.2	Verify currency of plans, specifications and drawings.
2	Interpret construction plans, drawings and their features.	2.1	Determine key features of plans, specifications and drawings.
		2.2	Interpret legend symbols and abbreviations.
		2.3	Check plans, specifications and drawings dimensions against workplace site for accuracy.
		2.4	Check plans and drawing dimensions against specifications for accuracy and inconsistencies.
3	Locate key features on site plan.	3.1	Orient the plans, specifications and drawings with the site.
		3.2	Locate site services, main features, contours and datum from the site plan.

© Commonwealth of Australia, 2026 BuildSkills Australia

4	Determine project requirements and plan project.	4.1	Review drawings, plans and specifications to determine construction details and dimensions for project.
		4.2	Determine location, dimensions and tolerances for ancillary works.
		4.3	Identify environmental controls and locations.
		4.4	Determine specifications for materials, standards of work, finishes and tolerances.
		4.5	Determine material requirements and processes to be followed.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCA3025 Read and interpret plans, specifications and drawings for carpentry work

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by reading and interpreting plans, specifications and drawings for two, minimum 30m2, carpentry projects. Each project must have a minimum of seven materials. A candidate must prepare a work plan for each project that should identify the dimensions, material requirements and processes to be followed.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- features and uses of project documentation, including:
    - construction plans
    - cross-sectional plans
    - dimensions and notes
    - illustrations
    - project specifications
    - site plans, elevations, floor plans and sections
    - structural detail and specification providing illustrations and dimensions
    - drawings
    - specifications
    - supplementary specifications

© Commonwealth of Australia, 2026 BuildSkills Australia

    - work schedules
    - detail relating to materials and quality of work, quality assurance, nominated subcontractors, and provision of site access and facilities
    - details relating to performance, including:
        - characteristics
        - material types
        - standards of work
        - tolerances
        - treatments and finishes
- processes for planning and scheduling carpentry work from plans and specifications.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCA3026 Assemble partitions

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to set out and assemble partitions for the purpose of dividing areas into useable spaces, meeting all relevant requirements of national construction codes, Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

It includes prefabricated and demountable partitions constructed of timber or metal.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Competency field(s)

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, national construction codes, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Set out and cut components.	2.1	Set out and mark location for partitions.
		2.2	Cut components to size.
		2.3	Distribute prefabricated or cut components and stack to suit job location and sequence of construction.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Assemble partitions.	3.1	Mark and prepare locations for member connections to designed spacings.
		3.2	Install fixing and fastenings to secure each junction of members tight together, flush on partition face and within ±2mm of set out.
		3.3	Assemble partitions and secure square and plumb to specification.
4	Clean up	4.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		4.2	Check, maintain and store tools and equipment and report any faults.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by setting out, cutting and assembling partitions a minimum of 4.8 metres in length and 1.8 metres in height, including:

- an L shape intersection
- a T intersection
- a window and door panel.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of national construction codes and Australian Standards relevant to assembling partitions
- workplace quality policies and standards relevant to assembling partitions
- safety requirements for assembling partitions
- types and uses of tools and equipment required for assembling partitions
- processes for assembling partitions for:
    - pre-glazed panels
    - lined or unlined door units
    - modular and custom window units
    - framed or solid
- fixing and fasteners for assembling partitions
- partition assembly techniques
- partitioning materials and manufacturers' instructions
- plans, specifications and drawings for partitions

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and rectify or report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
2	Set out fasteners.	2.1	Set out fasteners, adhering to minimum distances from edge of substrate material.
		2.2	Position and hold or fix material into designed position.
3	Prepare powder-actuated power tool.	3.1	Strip, check and reassemble tool.
		3.2	Check tool for operation and test fire following manufacturer's specifications and WHS requirements for use of powder-actuated power tools.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.3	Select fastener.
		3.4	Assess requirements for material, base and penetration and select charge.
		3.5	Install attachments and accessories to tool following manufacturers' specifications and WHS requirements for use of powder-actuated power tools.
		3.6	Locate fastener and charge in powder-actuated power tool to manufacturers' specifications.
4	Operate powder-actuated power tool.	4.1	Operate tool to fix fastener in place to manufacturers' recommendations, legislation, regulations and codes of practice.
		4.2	Check fastening penetration, applying appropriate depth into material.
		4.3	Adjust power regulating device for conditions.
		4.4	Perform misfire procedures in accordance with manufacturers' recommendations, legislation, regulations and codes of practice.
		4.5	Remove temporary holding and fixings.
5	Maintain powder-actuated power tools and kits.	5.1	Check safety features of tools for serviceability in accordance with manufacturers' recommendations.

© Commonwealth of Australia, 2026 BuildSkills Australia

		5.2	Clean and lubricate tools to manufacturers' recommendations.
		5.3	Perform periodic maintenance service to manufacturers' specifications.
6	Store powder-actuated power tools and charges.	6.1	Store charges in designated container in accordance with legislation, regulations and codes of practice, and record used charges.
		6.2	Store unused fasteners, tool and attachments in carry case following manufacturers' recommendations.
		6.3	Check logbook and record maintenance.
7	Clean up.	7.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		7.2	Record safety or waste disposal discrepancies in accordance with workplace procedures.

CPCCCA3028 Erect and dismantle formwork for footings and slabs on ground

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Equivalency changed to non-equivalent.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to erect and dismantle formwork for slabs on ground, rebates to slabs on ground, and steps to strip footings, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes:

- establishing required levels on site and constructing formwork using boxing materials, including timber, metal, masonry, fibre cement sheeting or reconstituted timber products, and fixings to contain wet poured concrete until it is completely cured
- stripping the formwork and preparing and storing it for re-use.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for CPCCCA3029 Erect and dismantle formwork for footings and slabs on ground

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by planning, preparing, erecting, stripping and dismantling formwork for **one (1)** slab on ground, including:

- a slab with a minimum area of 30 square metres, and
- a minimum thickness of 300 millimetres, and
- one internal and one external corner.

In the course of the above, the candidate must also:

- interpret site plans or specifications relating to formwork
- measure and set out formwork
- calculate materials required to complete the task
- wear personal protective equipment (PPE) as per site requirements
- comply with work health and safety (WHS) practices
- use a range of communication techniques essential to the safe completion of formwork erection, and formwork stripping, including communicating with other trades and plant operators during erection, pouring and stripping activities
- check and maintain line, level and plumb of formwork components during erection to ensure alignment and stability
- use appropriate tools and equipment to confirm accuracy to required tolerances
- identify and rectify deviations in line, level or plumb in accordance with site requirements confirm final alignment of erected formwork before placement of concrete.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building standards described in legislation, codes of practice and Australian Standards relevant to footings and slabs on ground
- Australian Standards applicable to slab-on-ground systems and formwork
- work health and safety (WHS) regulations and codes of practice or compliance codes, including hazard identification and risk controls
- different types of formwork relevant to footings and slabs on ground
- tools and equipment used for erecting and dismantling formwork
- formwork components

© Commonwealth of Australia, 2026 BuildSkills Australia

- formwork techniques, including:
    - measuring and setting out
    - installing edge forms and boxing
    - fixing and fastening methods to maintain stability and alignment
    - installing block-outs, rebates and cast-in items
    - maintaining interfaces with reinforcement and membranes
    - checking tolerances and inspection requirements
    - safe stripping, cleaning and preparation of formwork for reuse
- common formwork faults and problems, including:
    - misaligned set-out or incorrect levels
    - out-of-plumb or distorted edge forms
    - gaps or leakage at joints
    - inadequate bracing or staking, damaged or warped formwork components
    - incorrect placement of rebates or step-downs
    - suitable methods to re-align, re-level, re-brace, reseal, replace or adjust formwork prior to pour
- emergency planning for formwork operations, including:
    - formwork collapse or instability
    - entrapment
    - contact with underground or overhead services.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
    - personal protective equipment (PPE)
    - equipment required to erect and dismantle formwork for footings and slabs on ground
- be conducted in a safe environment; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Mandatory Workplace Requirements

Assessment of performance evidence may be in a workplace setting or an environment that accurately represents a real workplace.

CPCCCA3030 Construct, erect and dismantle formwork for stairs and ramps

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 11.0.

Application

This unit of competency specifies the skills and knowledge required to construct, erect and dismantle formwork for stairs and ramps to provide access between floors and landings, meeting all relevant requirements of the building standards described in Commonwealth and state or territory legislation, codes and Australian Standards.

It includes:

- establishing required levels on site
- constructing timber or metal formwork to contain wet poured concrete
- dismantling the formwork
- preparing and storing formwork for re-use.

Licensing/Regulatory Information

Completion of the general construction induction training required by applicable work health and safety (WHS) legislation is mandatory for any person carrying out construction work. Achievement of the current unit of competency that covers general construction induction training meets this requirement.

Assessment Requirements for CPCCCA3030 Construct, erect and dismantle formwork for stairs and ramps

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by constructing, erecting, stripping and dismantling the formwork for:

- one flight of stairs, freestanding or against a wall with a minimum rise of 1800 mm, and
- one ramp with a minimum rise of 400 mm.

In the course of the above, the candidate must also:

- interpret site plans, drawings and specifications relating to stair and ramp formwork
- prepare for work by confirming work requirements, reviewing SWMS/JSA, identifying hazards and applying required controls
- select, check and correctly use personal protective equipment (PPE) in accordance with site requirements
- select, check and use tools and equipment required to erect and dismantle formwork
- set out rise, going and pitch for stairs and ramps in accordance with applicable standards
- set out, assemble, fix and brace stair and ramp formwork to achieve required alignment and stability
- check and maintain line, level and plumb of formwork components during erection
- inspect stripped formwork components for damage and reusability and segregate damaged components
- tag out and/or dispose of damaged components, defective tools and equipment and store serviceable tools and equipment in accordance with site requirements
- safely stack and store reusable formwork elements and dispose of damaged formwork components safely.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislation, building standards and codes applicable to stair and ramp construction, including requirements for:
    - rise
    - going
    - gradient
    - landing requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

- work health and safety (WHS) regulations, codes of practice and compliance requirements relevant to formwork activities, including hazard identification and risk controls
- types of formwork relevant to stairs and ramps
- tools and equipment used for erecting and dismantling formwork
- common formwork components used for stairs and ramps
- formwork techniques, including:
    - measuring and setting out
    - fixing and fastening methods
    - edge forms and boxing
    - block-outs, rebates and cast-in items
    - interfaces with reinforcement
    - inspection requirements prior to stripping
- common faults, including:
    - misaligned pitch or incorrect rise/run
    - out-of-plumb forms
    - gaps/leakage at joints
    - inadequate bracing
    - damaged components
    - suitable methods to re-align, re-brace, reseal, replace or adjust formwork prior to pour
- emergency response procedures relevant to formwork operations, including response to:
    - formwork collapse or instability
    - entrapment or injury during pours and stripping
    - contact with underground or overhead services.

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
    - personal protective equipment (PPE)
    - equipment required to construct, erect and dismantle formwork for stairs and ramps
- be conducted in a safe environment; and,

© Commonwealth of Australia, 2026 BuildSkills Australia

- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Mandatory Workplace Requirements

Assessment of performance evidence may be in a workplace setting or an environment that accurately represents a real workplace.

CPCCCA3031 Erect and dismantle formwork to suspended slabs, columns, beams and walls

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 11.0.

Application

This unit of competency specifies the skills and knowledge required to erect and dismantle formwork to suspended slabs, columns, beams and walls to contain concrete in above-ground construction in accordance with building standards described in Commonwealth and state or territory legislation, codes and Australian Standards.

The unit includes:

- setting out, assembling and bracing formwork
- sorting and segregating formwork materials.

Licensing/Regulatory Information

Completion of the general construction induction training required by applicable work health and safety (WHS) legislation is mandatory for any person carrying out construction work. Achievement of the current unit of competency that covers general construction induction training meets this requirement.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Competency field(s)

N/A

Unit sector(s)

Carpentry and Joinery

Elements and Performance Criteria

Elements	**Performance criteria**

© Commonwealth of Australia, 2026 BuildSkills Australia

Elements describe the essential outcomes.	*Performance criteria describe the performance needed to demonstrate achievement of the element. Required knowledge, skills and application should be considered and clearly articulated.*
1. Plan and prepare	1.1 Obtain relevant safe working procedures (safe work method statement [SWMS] or job safety analyses [JSA] or their equivalent) 1.2 Confirm work requirements, sequence of activities and interfaces with other trades with relevant site personnel in accordance with site procedures 1.3 Identify hazards and assess risks associated with the task and implement or escalate control measures within the scope of own authority in accordance with site requirements 1.4 Wear personal protective equipment (PPE) prescribed in site signage and SWMS/JSA after checking its serviceability in accordance with site procedures 1.5 Select tools and equipment for the task and check serviceability in accordance with manufacturer and site requirements 1.6 Determine required quantities of materials and fasteners and position materials safely and accessibly to support planned work operations in accordance with site requirements 1.7 Verify services have been identified and confirm that controls are in place when operating near services
2. Erect formwork for suspended slabs and beams	2.1 Prepare the base or support surface to allow safe erection of formwork for suspended slabs and beams in accordance with work health and safety (WHS) and site requirements 2.2 Assemble and brace formwork and its support system in accordance with drawings and specifications, and set formwork to the required height, level and line 2.3 Fabricate and erect formwork shutters and edge boxing to the designed formwork requirements and specified dimensions 2.4 Erect and install beam sides and edge boards as required in accordance with drawings or site requirements 2.5 Erect block-outs and install cast-in services in accordance with plans or work instructions 2.6 Remove debris, sawdust and other waste materials from completed formwork in preparation for concrete placement, in accordance with site requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

3. Erect formwork for columns and wall sides	3.1 Prepare the base or support surface for safe erection of formwork for columns and walls in accordance with WHS and site requirements 3.2 Assemble and brace formwork and its support system in accordance with drawings and specifications, ensuring correct height, plumb and alignment 3.3 Fabricate and erect formwork shutters and support systems in accordance with designed form requirements and specification dimensions 3.4 Erect and secure column and wall shutters in accordance with drawings or site requirements 3.5 Erect block-outs and install cast-in services in accordance with plans or site instructions 3.6 Remove debris, sawdust and other waste materials from completed formwork in preparation for concrete placement, in accordance with site requirements
4. Strip formwork	4.1 Strip/dismantle formwork and bracing sequentially and safely 4.2 Check formwork for reusability and dispose of damaged components in accordance with site requirements
5. Clean up	5.1 Store and stack reusable formwork materials safely in accordance with site requirements 5.2 Check serviceability of tools and equipment and store serviceable items in accordance with site requirements 5.3 Tag out defective tools and equipment and arrange repair or disposal in accordance with site requirements

Range of conditions

Assessment Requirements for CPCCCA3031 Erect and dismantle formwork to suspended slabs, columns, beams and walls

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by setting-out and erecting suspended slab formwork for a slab size of a minimum of 10 square metres.

The formwork must include:

- one beam, and
- one wall of a minimum of 1.8 metres high by 1.0 metre long, and
- block-outs and cast-in services, and
- two columns with a specified formwork system at a minimum height of 1.8 metres, being:
    - one round column, and
    - one square column.

Formwork must:

- be rigid and able to withstand the mass of wet concrete and actions imposed during placement
- comply with regulations and specifications for height, level and loadings.

In the course of the above, the candidate must also:

- interpret site plans, drawings and specifications relating to suspended slab, beam, column and wall formwork
- prepare for work by confirming work requirements, reviewing SWMS/JSA, identifying hazards and implementing required controls
- select, check and correctly use personal protective equipment (PPE) in accordance with site requirements
- select, check and use tools and equipment required to erect and dismantle formwork
- set out and erect formwork for suspended slabs, beams, columns and walls to achieve required height, level, plumb and alignment
- assemble, fix and brace formwork and support systems to maintain stability during erection
- remove debris, sawdust and loose materials from completed formwork in preparation for subsequent work activities
- inspect stripped formwork components for damage and reusability and segregate damaged components

© Commonwealth of Australia, 2026 BuildSkills Australia

- tag out and/or dispose of damaged components, defective tools and equipment and store serviceable tools and equipment in accordance with site requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislation, building standards and codes applicable to formwork for suspended slabs, columns, beams and walls
- work health and safety (WHS) regulations, codes of practice and compliance requirements relevant to formwork activities, including hazard identification and risk controls
- different types of formwork systems relevant to suspended slabs, columns, beams and walls
- tools and equipment used for erecting and dismantling formwork
- formwork components
- formwork techniques, including:
    - measuring and setting out for horizontal and vertical elements
    - erecting, aligning and bracing formwork to maintain correct height, plumb, level and line
    - fixing and fastening methods for stability and alignment
    - installing block-outs, rebates, chamfers and cast-in items
    - maintaining interfaces with reinforcement, vapour barriers and inserts
    - checking tolerances, surface finish and inspection requirements prior to pour and prior to strip
    - safe stripping, cleaning and preparation of formwork for reuse
- common formwork faults and problems, including:
    - incorrect set-up or alignment out-of-plumb
    - out-of-level or twisted formwork
    - inadequate bracing
    - insufficient tightness at joints or gaps
    - incorrect or uneven soffit levels
    - improper positioning of reinforcement or cast-in items
    - suitable methods to re-align, re-brace, reseal, replace or adjust prior to pour
- emergency procedures relevant to formwork operations, including response to:
    - formwork collapse or instability
    - entrapment or injury during pours and stripping
    - contact with underground or overhead services.

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below. The assessment must:

- include access to:
    - personal protective equipment (PPE)
    - equipment required to erect and dismantle formwork for suspended slabs, columns, beams and walls
- be conducted in a safe environment; and,
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

CPCCCM1011 Undertake basic estimation and costing

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to prepare a basic estimate of material, labour and costs for a construction project.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Gather information.	1.1	Review plans and specifications for basic construction task.
		1.2	Create a material list for the basic construction task.
		1.3	Obtain unit costs of materials on material list from suppliers.
2	Estimate and cost materials for basic construction task	2.1	Estimate quantities of each item on material list.
		2.2	Calculate cost of materials based on estimated quantities and unit costs.
3	Estimate and cost labour for basic construction task.	3.1	Estimate labour hours required for the basic construction task.
		3.2	Calculate cost of labour based on estimated hours and hourly rate.
4	Document costs of basic construction task.	4.1	Calculate total cost of task materials and labour.
		4.2	Prepare basic costing sheet for the task.

© Commonwealth of Australia, 2026 BuildSkills Australia

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM1011 Undertake basic estimation and costing

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by estimating, calculating and recording materials and labour requirements for a construction task and preparing a basic costing sheet.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, national construction codes, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, plans and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and standards for estimating and costing basic construction tasks
- processes for reviewing and interpreting plans and specifications for basic construction tasks
- processes for sourcing material and unit costs
- processes for estimating:
    - quantities of materials for basic construction tasks
    - labour for basic construction tasks
- processes for calculating requirements and costs of:
    - materials for basic construction tasks
    - labour for basic construction tasks
- processes for preparing basic costing sheets.

Assessment Conditions

This unit must be assessed while undertaking workplace tasks:

© Commonwealth of Australia, 2026 BuildSkills Australia

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

CPCCCM2002 Carry out hand excavation

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to undertake hand excavation tasks to form excavations for footings and the provision of services.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
	Plan and prepare for hand excavation.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications.
		1.3	Select and use personal protective equipment (PPE) for each part of the task.
		1.4	Select tools and equipment, check for serviceability and report any faults.
2	Prepare excavation site and erect safety equipment.	2.1	Inspect work site to locate above ground services and assess hazards and determine risk controls.
		2.2	Locate service markers or taped areas to ensure underground services are avoided and free from interference.
		2.3	Establish line and depth using site pegs/profiles to mark excavation limits.
		2.4	Establish required signage and barricades and other risk controls.
		2.5	Establish temporary drainage system to divert surface and sub-surface water from excavation.

© Commonwealth of Australia, 2026 BuildSkills Australia

1	Dig excavations.	3.1	Dig excavations with hand tools to route, line and depth, following procedures to minimise risk to self and others.
		3.2	Install basic trench/excavation support.
		3.3	Use hand tools to remove loose material from excavation.
4	Check and store tools and equipment.	4.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		4.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM2002 Carry out hand excavation

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by excavating, by hand, a 3 metre trench with a right angle, .5 metres deep and .5 metres wide.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the Commonwealth and state or territory legislation relevant to carrying out excavations
- workplace quality policies and standards for carrying out excavations
- safety requirements for carrying out excavations
- environmental requirements for carrying out excavations
- types and uses of hand tools and equipment required for carrying out excavations
- locating services on construction sites
- use and types of service markers
- processes for establishing trench line and depth
- temporary drainage systems to divert surface and sub-surface water from excavations
- types of basic trench excavation support.

CPCCCM2004 Handle construction materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to safely handle and store commonly used construction materials manually or in preparation for mechanical handling.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001* Prepare *to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare to handle construction materials.	1.1	Review work instructions to handle construction materials.
		1.2	Prepare all work to comply with laws and regulations, national construction codes, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and safety data sheets (SDS), workplace requirements, drawings and specifications.
		1.3	Select and use personal protective equipment (PPE) for each part of the task.
		1.4	Select tools and equipment, check for serviceability and report any faults.
2	Manually handle, sort, stack and store construction materials.	2.1	Sort materials to suit material type, size and safety requirements, including SDS.
		2.2	Apply safe manual handling techniques to move materials to specified location or to stack and secure materials for mechanical handling in accordance with the type of material and equipment to be used.
		2.3	Stack materials clear of access ways and for ease of identification, retrieval, task sequence and task location.
		2.4	Protect materials against physical and water damage.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Apply procedures to ensure no cross-contamination of materials.
		2.6	Identify and isolate hazardous materials for separate handling.
		2.7	Apply dust suppression procedures to minimise health risk.
1	Clean up.	3.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		3.2	Check, maintain and store tools and equipment and report any faults.

Assessment Requirements for CPCCCM2004 Handle construction materials

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by handling construction materials for three different tasks, including:

- safely handling, sorting and stacking:
  - varying lengths of timber or similarly proportioned materials
  - different sizes and types of sheet material
  - bagged materials
  - simulated hazardous materials
- preparing the following for mechanical handling:
  - varying lengths of timber or similarly proportioned materials
  - different sizes and types of sheet material.

All work must be performed to the standard required in the workplace and must comply with work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- requirements of Commonwealth and state or territory work health and safety (WHS) legislation relevant to handling construction materials
- safety data sheets
- workplace quality policies and standards for handling construction materials
- safety requirements for handling construction materials
- methods of securing materials for mechanical handling

© Commonwealth of Australia, 2026 BuildSkills Australia

- types and uses of tools and equipment for handling construction materials:
    - hammers
    - pallets
    - pallet jacks
    - pinch bars
    - tin snips
    - wheelbarrows
    - hand trolleys
- requirements, including personal protection equipment, and processes for safely manually handling each of the following materials:
    - insulation
    - joinery units
    - metal sheeting
    - paints and sealants
    - plaster or fibre cement sheeting
    - reinforcement materials
    - scaffolding components
    - structural steel sections and components
    - timber
    - hazardous materials
- methods of handling construction materials:
    - material size, weight or shape factors necessitating the assistance of other workers
    - correct lifting and carrying techniques, use of pallets and control of waste
    - preparation for mechanical handling, including the use of forklifts, pallet jacks and trucks.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed while undertaking workplace tasks:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must complete three different construction tasks. Over the course of these three tasks, they must satisfy all the elements, performance criteria and foundation skills of this unit by safely and effectively using and maintaining and/or sharpening each of the following at least once:

- hand tools:
    - retractable tape measure
    - builders square
    - string line
    - hand saw
    - hammer
    - chisel
    - trimming knife
    - clamps
    - spirit level
    - tin snips
    - shovel/spade
    - mattock
    - crow bar/fencing bar
- power/battery/pneumatic tools and equipment:
    - circular saw
    - reciprocating saw
    - angle grinder
    - drill/driver drill

© Commonwealth of Australia, 2026 BuildSkills Australia

- nail gun
- bench grinder
- jack hammer
- extension lead
- portable residual current device
- air compressor and hoses.

Use of all tools must be to the standard required in the workplace and use must comply with work health and safety (WHS) requirements and manufacturers' specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace quality policies and standards for using basic construction tools and equipment
- safety requirements for using basic construction tools and equipment
- manufacturers' specifications for basic construction tools and equipment
- types and uses of basic tools and equipment, including:
  - hand tools:
    - retractable tape measure
    - builders square
    - string line
    - hand saw
    - hammer
    - chisel
    - trimming knife
    - clamps
    - spirit level
    - tin snips
    - shovel/spade
    - mattock
    - crow bar/fencing bar
  - power/battery/pneumatic tools and equipment:

- extension lead
- portable residual current device
- air compressor and hoses.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed while undertaking workplace tasks:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- industry-standard equipment used to perform the tasks specified in performance evidence
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

CPCCCM2006 Apply basic levelling procedures

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Application

This unit of competency specifies the outcomes required to carry out levelling in a single plane for the purpose of establishing correct and accurate set-out of building components. It includes the set-up, testing and use of levelling devices, and establishing and transferring heights using a range of levelling equipment.

The unit supports workers in the construction industry who use a variety of common methods and equipment when working with others and as a member of a team. It applies to levelling work on residential and commercial work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Unit sector(s)

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

© Commonwealth of Australia, 2026 BuildSkills Australia

1.	Plan and prepare.	1.1.	Job requirements are obtained, confirmed with relevant personnel, and applied to planning.
		1.2	Work site is inspected, and conditions and hazards are identified within scope of own role and reported according to workplace procedures.
		1.3.	***Health and safety requirements*** for levelling procedures are confirmed and applied to planning.
		1.4.	***Levelling tools and equipment*** are selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
		1.5.	Team roles and verbal and non-verbal communication signals are confirmed, as required.
2.	Set up and use levelling device.	2.1.	Required heights or levels are identified from work instructions.
		2.2.	Levelling device is set up, and ***levelling device tolerance is checked*** according to manufacturer specifications.
		2.3.	Levels are shot and heights are transferred to required location and ***marked*** according to job requirements.
		2.4.	Results of ***levelling activities*** are documented according to organisational requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

3.	Clean up.	3.1.	Work area is cleared and materials sorted and removed or recycled according to statutory and regulatory authority requirements.
		3.2.	Tools and equipment are cleaned, checked, maintained and stored according to manufacturer specifications.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	• interpret and calculate levelling readings and measurements.
Reading skills to:	• read and interpret documentation from a variety of sources, including drawings and specifications.
Writing skills to:	• enter routine data associated with levelling procedures legibly into workplace documentation.
Planning and organising skills to:	• plan and schedule work in a logical sequence.

Range of conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Health and safety requirements must include:	• emergency procedures, including:
	  o evacuation
	  o first aid
	• hazard identification and risk control procedures
	• safe operating procedures for levelling, including:
	  o manufacturer specifications
	  o safe work method statements (SWMS)
	  o safety data sheets (SDS)

© Commonwealth of Australia, 2026 BuildSkills Australia

	• selection, correct fitting, and use of personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices • selection and use of tools and equipment.

Levelling tools and equipment **must include:**	• each of the following:
	  ○ laser levels and targets
	  ○ marking equipment
	  ○ measuring tapes and rules
	  ○ spirit levels and straight edges
	• two of the following:
	  ○ automatic/optical levels
	  ○ plumb bobs
	  ○ water levels.

Levelling device tolerance checks must include one or more of the following:	• reverse readings for spirit level • two peg test for automatic level.
Marks for heights or levels must include:	• chalk or nail mark • mark on vertical surface • datum or survey peg • drawing or sketch.
Levelling activities must include three or more of the following:	• measuring and recording heights for the installation of signage • positioning offsets and recovery pegs for construction projects • recording ground levels at respective critical set-out points • recording heights or level and the transfer of data points • recording or checking levels in drainage • recording slab or pad levels for placement of steel columns or masonry piers • setting up levelling devices • shooting levels for concrete slabs

© Commonwealth of Australia, 2026 BuildSkills Australia

	• transferring levels and heights for formwork.

Assessment Requirements for CPCCCM2006 Apply basic levelling procedures

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Performance Evidence

A person who demonstrates competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also transfer levels and record differences in height for three different projects as required by job specifications, using at least three of the following levelling devices:

- a spirit level and straight edge
- automatic/optical levelling device
- levelling with water technique
- laser levelling device.

In doing the above work, the person must:

- conduct a two peg test with an automatic/optical level to confirm that the instrument meets manufacturer tolerances
- locate, interpret and apply relevant information in job specifications to the levelling task
- comply with site safety plan, and health and safety regulations applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others, including using agreed communication signals
- confirm accuracy of the readings taken, including set-up and movement of device in two locations
- accurately record results of each levelling procedure according to organisational requirements.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

© Commonwealth of Australia, 2026 BuildSkills Australia

- characteristics, technical capabilities and limitations of different types of levelling devices
- methods of performing calculations associated with levelling
- processes for setting out levelling tasks
- requirements for line, level and plumb in construction projects
- site and equipment safety requirements relevant to basic levelling procedures
- symbols and construction terminology used when interpreting construction plans
- techniques used when applying basic levelling procedures
- contents of and terms used in job safety analyses (JSA) and safe work method statements (SWMS) and the use of this documentation when levelling.

Assessment Conditions

Suitable assessment of performance requires:

- equipment and tools:
  - as listed in the range of conditions and assessment requirements
- specifications:
  - job requirements
  - health and safety requirements
  - manufacturer specifications
  - safety data sheets (SDS)
  - SWMS
  - workplace and relevant work site procedures
- relationships with team members and supervisor:
  - work must be completed as part of a team and under direct supervision and observation
- timeframe:
  - according to job requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPCCCM2007 Use explosive power tools

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Change to the Knowledge Evidence - removal of outdated references. Changes to Performance Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 4.0.

Application

This unit of competency specifies the skills and knowledge required to safely and effectively operate explosive power tools (EPTs) using explosive charges in a magazine to fasten materials or fix fasteners to bases.

The unit supports the application of knowledge to safely and effectively use a range of indirect action explosive powered fastening tools used in the construction industry.

It applies to workers who work with EPTs in the construction industry. It involves working under supervision in a team environment.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Competency field(s)

Unit sector(s)

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan and prepare to set up, operate and maintain indirect action EPTs.	1.1 Review and clarify task to set up, operate and maintain indirect action EPTs. 1.2 Review work health and safety (WHS) requirements for the task in accordance with safety plans and policies. 1.3 Identify safety signage and barricade requirements. 1.4 Review environmental requirements for the task in accordance with environmental plans and legislative requirements. 1.5 Calculate material quantity requirements. 1.6 Check EPTs for operation in accordance with manufacturers' specifications and safety requirements for use of EPT.
2. Set out fasteners.	2.1 Erect identified safety signage and barricades, and fit personal protective equipment (PPE). 2.2 Select fastener in accordance with requirements of the job. 2.3 Set-out fasteners adhering to minimum distances for set out from edge of substrate material in accordance with requirements. 2.4 Position material, check it is level, and temporarily fix or clamp into designed position in accordance with detailed drawings.
3. Operate EPTs.	3.1 Select charge in accordance with the requirements for material, base and penetration. 3.2 Install any attachments and accessories to EPT in accordance with manufacturers' specifications and WHS requirements. 3.3 Load fastener and charge into EPT in accordance with manufacturers' specification. 3.4 Carry out EPT operation and fix fastener into place in accordance with manufacturers' specifications and legislative requirements.

© Commonwealth of Australia, 2026 BuildSkills Australia

	3.5 Check depth of fastening penetration and adjust power regulating device in accordance with conditions. 3.6 Carry out misfire procedures in accordance with manufacturers' specifications and legislative requirements. 3.7 Remove temporary holdings and fixings without damage to material.
4. Maintain EPTs and kit.	4.1 Check safety features of tools for serviceability in accordance with manufacturers' specifications. 4.2 Clean and lubricate tools in accordance with manufacturers' specifications. 4.3 Carry out periodic maintenance service in accordance with manufacturers' specifications. 4.4 Replenish diminished stocks of charges and fasteners to designed effectiveness of EPT kit. 4.5 Check and complete logbook and record maintenance in accordance with manufacturers' specifications.
5. Secure and store EPT equipment and charges.	5.1 Store used charges in designated container in accordance with requirements. 5.2 Store unused fasteners, the EPT and attachments in a carry case in line with manufacturers' specifications.
6. Clean up after operating EPTs.	6.1 Clear work area and dispose of, re-use or recycle materials in accordance with legislation, regulations, codes of practice and task requirements. 6.2 Clean, check, maintain and store tools and equipment in accordance with manufacturers' specifications and workplace requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

- reading skills to:
    - interpret legislative requirements including those of Australian Standards and the National Construction Code (NCC)
- numeracy skills to:
    - apply measurements and calculations to fastener set-out
- oral communication skills to:
    - use questioning to identify and confirm requirements

© Commonwealth of Australia, 2026 BuildSkills Australia

- discuss cause of problems
- report work site hazards, including faults in tools, equipment and materials.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM2007 Use explosive power tools

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Change to the Knowledge Evidence - removal of outdated references. Changes to Performance Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 4.0.

Performance Evidence

To demonstrate competency in this unit, a person must use explosive power tools (EPTs) to fix metal and timber to one steel base and one concrete base.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional legislation and regulations relating to setting up, operating and maintaining indirect action EPTs including those for work health and safety (WHS), and protection of the environment, including:
    - job safety analyses (JSAs)
    - safe work method statements (SWMSs)
    - safety data sheets (SDSs)
    - safety manuals and instructions for plant, tools and equipment
    - signage and barricades
    - personal protective equipment (PPE)
    - environmental and work site safety plans
- functions, operations and limitations of EPTs
- EPT materials
- EPT charges and fasteners
- EPT attachments, including channel, rebate and other manufacturer attachments

© Commonwealth of Australia, 2026 BuildSkills Australia

- EPT, fastener and charge manufacturers' specifications
- processes for interpreting drawings and using information for:
    - setting-out fasteners, including:
        - regulated minimum distances
        - bases, including concrete, masonry or steel
    - positioning material
- processes for:
    - using EPTs, including:
        - stripping and assembling tools
        - completing log of serviceability
        - maintaining and cleaning tools
        - selecting charges and fasteners applicable to the base material and material being fixed
        - misfire procedures
        - using attachments
        - complying with storage and security regulations and work health and safety (WHS) requirements for the working environment
        - selecting signage
        - test fire
    - maintaining EPTs and kits
    - securing and storing EPT equipment and charges
- materials storage and environmentally friendly waste management
- processes for the calculation of material requirements
- security and storage procedures for equipment and charges
- workplace and equipment safety requirements.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- industry-standard indirect action EPTs, attachments, fasteners and charges

© Commonwealth of Australia, 2026 BuildSkills Australia

- specifications for tasks requiring use of EPTs
- appropriate documents, materials, tools equipment and PPE currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

CPCCCM2008 Erect and dismantle restricted height scaffolding

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 4.0.

Application

This unit specifies the skills and knowledge required to erect and dismantle restricted height scaffolding to provide work platforms for various occupational applications.

This unit is restricted to modular scaffolding to a height of 4 metres and includes:

- placement of safety barriers
- the application of knowledge to handle, erect and dismantle a range of restricted height scaffolding systems.

It applies to workers who work in a range of industries. It involves working in a team environment.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Competency field(s)

N/A

Unit sector(s)

Construction

© Commonwealth of Australia, 2026 BuildSkills Australia

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Plan to erect scaffolding up to 4 metres.	1.1 Review scaffolding task and workplace-specific information relating to the task and confirm with associated personnel. 1.2 Identify environmental protection and legislative requirements for scaffolding task and incorporate into planning and preparation. 1.3 Identify hazards, control measures and equipment associated with the workplace and scaffolding task from job safety analysis (JSA) and safe work method statement (SWMS). 1.4 Calculate scaffolding and material requirements and incorporate into planning and preparation. 1.5 Determine expected loading on scaffold and supporting structure using load tables, and incorporate into planning and preparation. 1.6 Identify site access and egress routes and incorporate into planning and preparation. 1.7 Plan scaffolding task in accordance with workplace requirements.
2. Prepare to erect scaffolding up to 4 metres.	2.1 Apply risk control measures and equipment including installing safety signs and barriers and using personal protective equipment (PPE). 2.2 Select plant, tools and equipment, check for serviceability and rectify or report any faults. 2.3 Select, prepare and locate materials using safe handling techniques. 2.4 Inspect scaffolding and components and label, reject or repair damaged items.
3. Erect scaffolding up to 4 metres.	3.1 Establish footing in accordance with the Australian Standard for scaffolding. 3.2 Erect scaffolding in accordance with regulations, planned risk prevention and control measures, acceptable safe work practices and manufacturers' specifications.
4. Inspect, repair and alter scaffolding up to 4 metres.	4.1 Inspect critical structural and safety areas of scaffolding for damage, corrosion and wear. 4.2 Check current use of scaffolding for compliance with type of scaffolding equipment.

© Commonwealth of Australia, 2026 BuildSkills Australia

	4.3 Review scaffolding to determine if changes or modifications were scheduled as per original planning. 4.4 Carry out alterations or repairs. 4.5 Complete inspection log and handover.
5. Dismantle scaffolding up to 4 metres and clean up.	5.1 Dismantle scaffolding using reverse of procedure for erection. 5.2 Clear work area and dispose of, re-use or recycle materials in accordance with legislation, regulations, codes of practice and task specifications. 5.3 Clean, check, maintain and store plant, tools and equipment in accordance with manufacturers' specifications and workplace requirements.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

- reading skills to:
  - understand written instructions, procedures and signage
- oral communication skills to:
  - use questioning to identify and confirm requirements
  - discuss cause of problems
  - report work site hazards, including faults in tools, equipment and materials
  - provide feedback.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM2008 Erect and dismantle restricted height scaffolding

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 4.0.

Performance Evidence

A person who demonstrates competency in this unit must erect and dismantle one modular scaffolding system up to four metres, including three bays (one with a return), one lift with ladder, and fall and edge protection.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- processes for identifying and incorporating into planning for erecting and dismantling scaffolding up to 4 metres
- task and workplace-specific information, including:
    - diagrams and sketches
    - engineering design specifications and manufacturers' specifications
    - safety date sheets (SDSs)
    - regulatory and legislative requirements pertaining to erecting and dismantling restricted height scaffolding
    - relevant Australian Standards.
- safe work procedures related to erecting and dismantling restricted height scaffolding including job safety analysis (JSA) and safe work method statement (SWMS), risk control measures and equipment, including:
    - signage and barricades
    - verbal, written and graphical instructions
    - work schedules, plans and specifications
    - scaffolding and material requirements
    - expected loadings on scaffolding and supporting structures
    - site access and egress routes.
- processes for:

© Commonwealth of Australia, 2026 BuildSkills Australia

- selecting and checking plant, tools and equipment and rectifying or reporting faults
- establishing footings for scaffolding up to 4 metres
- erecting and dismantling scaffolding up to 4 metres in accordance with regulations, planned risk prevention and control measures, acceptable safe work practices and manufacturers' specifications
- inspecting critical structural and safety areas of scaffolding for damage, corrosion and wear
- checking current use of scaffolding for compliance with type of scaffolding equipment
- cleaning, checking, maintaining and storing plant, tools and equipment.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- work sites and specifications to erect and dismantle a modular scaffolding system
- JSAs, SWMSs and jurisdictional requirements relating to erecting and dismantling a modular scaffolding system up to 4 metres
- scaffolding site
- scaffolding components and materials, safety equipment including signs, barricades and personal protective equipment (PPE)
- plant, equipment and tools
- load tables.

CPCCCM2009 Carry out basic demolition

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required remove components from single storey buildings and structures using basic demolition techniques. It includes the preparation of the site for the demolition process and the removal of components.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Competency field(s)

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare for basic demolition.	1.1	Read and interpret site demolition plan and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications.
		1.3	Select and use personal protective equipment (PPE) for each part of the task.
		1.4	Select tools and equipment, check for serviceability and report any faults.
2	Prepare demolition site and erect safety equipment.	2.1	Inspect work site to assess hazards and determine risk controls.
		2.2	Confirm with supervisor or regulatory authorities that existing services have been disconnected.
		2.3	Install signs and barriers around the demolition site and to identify underground and above-ground services.
		2.4	Identify and report hazardous material for separate demolition and handling.

© Commonwealth of Australia, 2026 BuildSkills Australia

3	Remove building components.	3.1	Remove building components in sequence and in accordance with site demolition plan, demolition method statement, standards and workplace procedures.
		3.2	Remove components to storage or disposal area using safe materials handling techniques.
4	Check and store tools and equipment.	4.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
		4.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM2009 Carry out basic demolition

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by, on one occasion, following a site demolition plan, demolition method statement and instructions to safely remove fixtures and fittings, ceilings and walls of a structure, clean up, and dispose of or salvage materials.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, workplace requirements and the site demolition plan.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the Commonwealth and state or territory legislation and Australian Standards relevant to carrying out basic demolition
- workplace policies and standards for carrying out basic demolition
- safety requirements for carrying out basic demolition, including personal protection equipment and asbestos safety requirements
- environmental requirements for carrying out basic demolition
- types and uses of tools and equipment required for carrying out basic demolition
- processes for:
    - assessing hazards and determining risk controls when carrying out basic demolition
    - identifying and reporting hazardous materials when carrying out basic demolition
- safe manual handling techniques for:
    - removing components to storage or disposal areas

© Commonwealth of Australia, 2026 BuildSkills Australia

- stacking components for storage
- preparing components for transport.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, industry standard equipment, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

CPCCCM2010 Work safely on scaffolding higher than two metres

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Application

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above two metres from ground level and where fall protection measures are required. It covers safe methods for accessing the work site; and safe methods of moving or passing tools, equipment and materials to heights above two metres, including handling methods that avoid excessive bending or twisting.

The unit supports construction workers operating from scaffolding over two metres in height that has already been constructed with signage and exclusion barriers in place, in order to reach upper storeys or roofs of buildings. It applies to workers who need to control the risk of falling and of falling objects when working on site or removing scaffold components.

It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.	
1.	Identify work requirements.	1.1.	Site of proposed work at heights is identified from relevant information.
		1.2.	Tasks to be completed are identified from work orders and supervisor instructions.
		1.3.	Personal protective equipment (PPE) suitable to the job is selected and checked for serviceability.
		1.4.	Method of accessing work area is identified according to ***safe work method statement*** (SWMS).
		1.5.	Safe work methods for moving tools, equipment and materials to work area are identified to minimise risks.
		1.6.	Verbal and non-verbal communication signals are confirmed with team members, supervisor and other personnel working on site, as required.
2.	Access work area.	2.1.	Work site is inspected and conditions and ***hazards*** are assessed and reported, as required, and risk controls selected according to SWMS.
		2.2.	***Safety of scaffolding*** is checked and faults are reported to relevant personnel.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3.	Arrangements are made to install required access equipment according to SWMS.
		2.4.	Access equipment is inspected for defects and issues are reported and rectified according to health and safety requirements.
		2.5.	Safe work methods are used to access work area and to move tools, equipment and materials to required locations on the work site.
		2.6.	Tools and materials are placed to eliminate or reduce the risk of items falling.
3.	Conduct work tasks.	3.1.	Work is conducted following workplace-approved procedures and SWMS.
		3.2.	Communication with team members and other site personnel is maintained as required to progress work tasks according to required timelines.
		3.3.	Fall protection equipment is kept in place and adjusted to cater for movement during work.
		3.4.	Scaffold components and fall barriers are kept in place during work.
4.	Finalise work processes.	4.1.	Egress from work area is completed following SWMS and work site supervisor approved methods for moving self, tools and materials to ground level.

© Commonwealth of Australia, 2026 BuildSkills Australia

		4.2.	Tools, equipment and materials returned to ground level are cleaned, checked, maintained and stored according to manufacturer specifications.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.	
Skill	**Performance feature**
Numeracy skills to:	• perform measurements relating to checking safety of scaffolding.
Oral communication skills to:	• report faults in scaffolding construction or materials • report non-routine hazards to a supervisor.
Reading skills to:	• interpret safe work methods and risk control strategies in the SWMS relating to job tasks.
Planning and organising skills to:	• plan and schedule work in a logical sequence.
Initiative and enterprise skills to:	• identify standard controls for routine hazards.

Range of conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.	
Safe work method statement must include:	• establishing exclusion areas using signage and barricades • identifying hazards and assessing risks associated with work site and job tasks • health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures • identifying risk control measures to be implemented for job tasks • safe operating procedures for:

© Commonwealth of Australia, 2026 BuildSkills Australia

	○ accessing, moving within, and leaving work site ○ moving and placing tools, equipment and materials • using tools and equipment, including PPE, prescribed by legislation, regulations, and work site and workplace requirements • using tools and equipment at heights.
Hazards to be considered must involve:	• air temperature • construction activity involving other workers and contractors • dust and vapours • electrical equipment • energy sources • equipment and materials • hazardous materials • light • manual handling • moisture • noise • stationary and moving plant • working at heights.
Safety of scaffolding must include checking for:	• access gate • bracing • condition of scaffold frame and planks • guard rails • locking pins for castors, if present • mid-rails • sheeting, if required • toe boards.

Assessment Requirements for CPCCCM2010 Work safely on scaffolding higher than two metres

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also identify, assess and manage risks while completing three different work tasks on scaffolding higher than two metres at different locations and in different conditions.

The work tasks conducted must involve transporting tools, equipment and materials to the work site; completing the task using the tools, equipment and materials; and then returning them to ground level.

In doing the above work, the person must:

- locate, interpret and apply relevant job task information, standards and specifications
- comply with site safety plan and safe work method statements (SWMS) for access to the work site and completion of the job tasks at heights
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use height access work methods, including inspecting scaffold for faults
- apply knowledge of construction materials to identify:
    - manual handling risks
    - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment to work safely at heights
- use safe handling requirements, based on information provided for equipment, products and materials.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- construction terminology relevant to working at heights
- contents of and terms used in job safety analyses (JSA) and SWMS for accessing work sites at heights and for completing job tasks while working at heights

© Commonwealth of Australia, 2026 BuildSkills Australia

- contents of and terms used in safety data sheets (SDS) relevant to the use of tools, equipment and materials
- emergency procedures relevant to working on scaffolding higher than two metres
- quality requirements relating to the set-up of equipment for accessing heights, and for job tasks completed while working at heights
- requirements of Australian standards and codes of practice governing work at heights, including:
    - AS 6001 Working platforms for housing construction
    - AS/NZS 1576 Scaffolding – General requirements
    - AS/NZS 4576 Guidelines for scaffolding
    - Safe Work Australia Model Code of Practice – Preventing Falls in Housing Construction
- types, characteristics, uses and limitations of plant, tools and equipment, including personal protective equipment (PPE), used for accessing work sites over two metres, and for applying safe work methods to complete job tasks while working at heights
- common faults in scaffolding and access equipment
- workplace and work site health and safety requirements relevant to working at heights.

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
    - scaffolding erected for access to a construction work site higher than two metres
    - access equipment to move self, tools, equipment and materials to working platforms, including ladders and hoists
    - tools, equipment and materials to conduct the work tasks specified in the performance evidence
    - PPE relevant to task
- materials:
    - materials required to perform three work tasks at height
- contingencies:
    - faults in scaffolding construction and access equipment
- specifications:
    - AS 6001 Working platforms for housing construction
    - AS/NZS 1576 Scaffolding – General requirements
    - AS/NZS 4576 Guidelines for scaffolding

© Commonwealth of Australia, 2026 BuildSkills Australia

    - diagrams or sketches relating to work at heights
    - instructions issued by authorised organisational or external personnel
    - JSA, SWMS and SDS relating to the work to be conducted at heights
    - Safe Work Australia Model Code of Practice – Preventing Falls in Housing Construction
    - schedules, plans and specifications for working at heights
    - signage at the work site
    - verbal, written and graphical instructions relating to work to be conducted at heights
- physical conditions:
    - different weather conditions, such as wet or windy weather
- relationships with team members and supervisor:
    - work must be completed as part of a team and under direct supervision and observation
- timeframe:
    - according to job specification.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPCCCM2012 Work safely at heights

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to work safely on construction sites where the worker has the potential to fall from one level to another.

This unit of competency does not cover the erection of scaffold or work platforms, but it does include identifying and reporting common faults with scaffold or work platform systems.

Work at heights is undertaken in a range of construction work, including new construction, renovation, refurbishment and maintenance.

This unit also applies to workers in other industries who need to control the two separate risks associated with people and objects falling from heights.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Identify task requirements.	1.1	Read work order and associated drawings and consult with relevant persons to determine the proposed work-at-heights task, including where and how work is to be carried out, and the equipment or plant to be used.
		1.2	Participate in the development of the safe work method statement (SWMS) for the specified task.
		1.3	Select appropriate work-at-heights control measures including required fall restraint devices and/or fall arrest devices in accordance with workplace and regulatory requirements.
		1.4	Determine location of anchor points for harness-based work to safely access required work area.
		1.5	Review completed SWMS and clarify issues with relevant persons.
2	Access and assess work area.	2.1	Select personal protective equipment (PPE), check for serviceability and report problems.
		2.2	Identify unstable, fragile or brittle work surfaces and implement control measures to prevent a fall from height.
		2.3	Check fall protection equipment, including required fall restraint and fall arrest devices to ensure serviceability and report problems.
		2.4	Identify, select and install signage and barricade equipment in accordance with SWMS or relevant safe work procedure.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.5	Install/fit fall protection equipment, including fall restraint devices and fall arrest devices as appropriate, within the limitations of licensing requirements, level of authority and SWMS.
		2.6	Ensure required fall protection, scaffold and barriers have been adequately installed and where necessary certified, in accordance with regulatory and workplace requirements.
		2.7	Connect to fall protection equipment, including temporary anchor points, without being exposed to a risk of a fall from height.
		2.8	Consult with relevant persons to confirm fall protection equipment and safety systems are correctly fitted, adjusted and installed, and are appropriate to the task.
		2.9	Access work area safely and move and place tools, equipment and materials using methods that eliminate or minimise the risk of falling objects.
1	Conduct work tasks.	3.1	Undertake work tasks in compliance with the SWMS and workplace requirements.
		3.2	Traverse between anchor points while remaining connected to the fall prevention system and protected from a risk of a fall from height.
		3.3	Use PPE appropriate to the task and in accordance with manufacturer requirements.
		3.4	Maintain communication with relevant persons while working at height.
		3.5	Keep fall protection equipment in place and adjust to allow for movement during work.
		3.6	Keep fall prevention equipment adjusted to prevent falling off or through a structure using the restraint technique.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.7	Keep scaffold/work platform components and fall barriers in place during work.
		3.8	Monitor control measures and consult with relevant persons to respond to changing work practices or site conditions.
		3.9	Exit from work area removing tools and materials in compliance with worksite procedures, safety and environmental requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM2012 Work safely at heights

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by working safely at heights above 2 m on three occasions, using different fall protection equipment/devices on each occasion.

One occasion must include a restraint technique (anchor point) system with a minimum of three anchor points.

The candidate must access the work area, traverse between anchor points and exit from the work area.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for working safely at heights under applicable Commonwealth, state or territory work health and safety (WHS) legislation, Australian Standards and codes of practice:
    - hazard identification and risk control
    - job safety and environmental analyses (JSEAs)
    - safe work method statements (SWMSs)
    - safety data sheets (SDSs)
    - safety manuals and instructions for plant, tools and equipment:
        - operation manuals
        - manufacturer specifications
        - safety signs and load charts for plant
    - signage and barricades
    - selection, fitting and use of personal protective equipment (PPE)
    - environmental and worksite safety plans

© Commonwealth of Australia, 2026 BuildSkills Australia

    - reporting problems
- processes for planning to work safely at heights:
    - assessment of weather and ground conditions that may affect safety while working at heights
    - assessment of conditions and hazards
    - determination of work requirements
    - identification of equipment defects
    - inspection of worksites
- methods for identifying common faults with scaffold or work platform systems
- types, characteristics, uses and limitations of equipment used when working safely at heights:
    - air compressors and hoses
    - anchor points
    - edge protection
    - elevated work platforms (EWPs)
    - fall arrest anchors
    - fall arrest inertia reels
    - guard rails
    - hand and power tools including nail guns
    - ladders
    - power leads
    - rescue equipment
    - ropes
    - safety harnesses, lanyards and attachments such as snap hooks and carabiners
    - scaffolding
    - shock absorbers
    - stairways
    - static line systems
    - temporary anchor systems
    - trestles
- safe methods for accessing work area, traversing between anchor points and exiting from work area including removing tools and materials when working at heights.

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry-standard equipment required to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.

CPCCCM2013 Undertake basic installation of wall tiles

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to use adhesive to undertake basic installation of tiles to flat wall substrates.

It includes the preparation, installation and grouting of tiles for walls, including cutting simple penetrations. It does not include tiling internal and external wall junctions and junctions between walls and floors.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Prepare for basic installation of wall tiles.	1.1	Read and interpret task work instructions.
		1.2	Select and use personal protective equipment (PPE) as required for each stage of the task.
		1.3	Plan all work to comply with laws and regulations, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.4	Select tools and equipment, check for serviceability and report any faults.
		1.5	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
		1.6	Cover surrounding surfaces to protect from damage.
2	Set out basic wall tiling.	2.1	Check tiles conform to the requirements of the task and are fit for purpose.
		2.2	Set out basic tile work grid pattern to be symmetrical and balanced.
3	Prepare substrate and tiles, and install tiles	3.1	Check that the wall substrate is flat.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2	Prepare and apply adhesive to substrate and/or tile surface.
		3.3	Prepare and install tiles set to level and plumb, maintaining joint and face alignment.
		3.4	Cut simple penetration/s in tiles.
		3.5	Check joints, tile edges and surface alignment.
4	Grout tiles.	4.1	Clean and prepare joints to receive grout.
		4.2	Mix and apply grout.
		4.3	Clean and polish tiles.
5	Clean up.	5.1	Clear work area and dispose of, reuse or recycle materials.
		5.2	Clean, check, maintain and store tools and equipment in accordance with manufacturers' recommendations.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM2013 Undertake basic installation of wall tiles

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by preparing a flat wall substrate and tiling a minimum of 1.62 square metres with a penetration.

All work must be performed to the standard required in the workplace and must comply with work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies for basic installation of wall tiles
- safety requirements for installing wall tiles, including personal protective equipment (PPE)
- environmentally friendly waste management for basic installation of wall tiles
- simple drawings for basic installation of wall tiles
- types and uses of tools and equipment for basic installation of wall tiles
- processes for calculation of material requirements for basic installation of wall tiles.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCM3001 Operate elevated work platforms up to 11 metres

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Changes to the Performance Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Application

This unit of competency specifies the outcomes required to operate specific types of elevated work platforms (EWPs) safely and effectively in different locations, including on uneven terrain. The unit includes locating, setting up, operating and shutting down scissor lifts and self-propelled boom lifts with a boom length under 11 metres.

The unit supports construction workers in the safe and effective operation of electrical, hydraulic and mechanical EWPs.

The unit does not cover truck-mounted EWPs, powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more.

It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.	
1.	Plan and prepare.	1.1.	Job requirements are obtained, confirmed and applied to planning.
		1.2.	Work site is inspected and terrain level checked to determine stabilising and safe working area requirements.
		1.3	Work site conditions and hazards are assessed and site health and safety requirements confirmed and applied to planning.
		1.4	***Safe work method statement*** (SWMS) for the type of EWP and job and work site requirements is reviewed with relevant personnel and confirmed.
		1.5.	Plant, tools and equipment, including personal protective equipment (PPE), are selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
		1.6.	Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.
		1.7.	Verbal and non-verbal communication signals are confirmed with team members, supervisor, and other personnel working on site, as required.

© Commonwealth of Australia, 2026 BuildSkills Australia

		1.8.	Rescue plan, including use of fall arrest system, is established and practised before using EWP.
2.	Conduct routine checks of EWP.	2.1.	Power source is connected to platform equipment according to manufacturer specifications.
		2.2.	Routine pre-operational equipment checks are carried out according to operator manual or manufacturer specifications, and logbooks for defect checks and EWP maintenance schedules.
		2.3.	Equipment is switched on in line with start-up procedures, and controls are checked for correct operation and ease of movement.
		2.4.	EWP is checked to ensure that ***emergency safety devices*** specified in operator manual are present and operating correctly.
3.	Locate EWP in place.	3.1.	Platform is positioned for work application and stabilisers, if fitted, are engaged to set equipment base level into place according to safe operating procedures.
		3.2.	Tools, equipment and materials are placed into bucket or on platform according to job application requirements.
4.	Elevate platform to work location.	4.1.	Fall arrest harness is fitted securely and lanyard is connected to attachment point.
		4.	EWP controls are operated according to manufacturer recommendations and platform is elevated to work position.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.	
		4.3.	Power is switched off where specified and locking devices are engaged according to operator manual.
		4.4.	Work is carried out according to job specification, operator manual, and health and safety requirements.
5.	Lower platform and shut down.	5.1.	Controls are operated according to manufacturer recommendations and platform is lowered to down position.
		5.2.	Shut-down procedures are carried out according to operator manual instructions and equipment is switched off.
6.	Clean up.	6.1.	Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice, and job specifications.
		6.2.	EWP, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices.
		6.3.	***Work completion procedures*** are applied and relevant personnel notified that work is finished.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.	
Skill	**Performance feature**

© Commonwealth of Australia, 2026 BuildSkills Australia

Numeracy skills to:	• interpret safe working load of EWP from manufacturer specifications • calculate the load to be put on EWP.
Oral communication skills to:	• provide work site personnel with key safety information when elevating and lowering an EWP • use listening and questioning to clarify job and health and safety requirements.
Reading skills to:	• interpret operator manual instructions for using different controls of EWPs and operating on different types of terrain.
Writing skills to:	• legibly complete required documentation, including: o equipment inspection and handover documents that form part of work completion procedures o faulty equipment or workplace incident reports.
Planning and organising skills to:	• plan and schedule work in a logical sequence.

Range of conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.	
Safe work method statement must include:	• assessing terrain at work site • identifying location of overhead power lines directly above or within specified clearance distances as set out in documentation, such as WorkSafe Victoria's 'No Go Zones For Overhead Electrical Power Lines' • reference to permission to operate EWP from the power authority, if required • identifying hazards and assessing risks for type of EWP, work site and job tasks, including existence of underground pits • health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures

© Commonwealth of Australia, 2026 BuildSkills Australia

	• establishing exclusion areas using signage and barricades • identifying risk control measures to be implemented for job tasks • safe operating procedures for type of EWP • safe working load of the EWP • using tools and equipment, including PPE, prescribed by legislation, regulations, and work site and workplace requirements.
Emergency safety devices must be applicable to the EWP and include three or more of the following:	• bleed valves • electronic override • emergency electric hydraulic pump • emergency or controlled descent device • ground controls • manual hydraulic pump.
Work completion procedures must include:	• completing logbook • completing post-operational checks • safely and securely storing safety equipment.

Assessment Requirements for CPCCCM3001 Operate elevated work platforms up to 11 metres

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0. Changes to the Performance Evidence.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also set up and operate each of the following types of elevated work platforms (EWPs) at two different locations on the site, including moving the plant around the work site safely:

- self-propelled boom lift (BL)
- scissor lift (SL).

The following functions and controls must be performed while operating both BL and SL:

- boom up and down
- operate attachments
- operate outriggers, where fitted.
- The following functions and controls must be performed while operating the BL:
- slew left and right
- telescope in and out.

At least one EWP must be set up and operated on uneven terrain, using outriggers as required.

In doing the above, the person must fit harnesses and attach lanyards as follows:

- energy or shock absorbers, which must be used with all fall arrest equipment
- lanyards, which must be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is two metres.

In doing the above, the person must also:

- establish and apply a rescue plan

© Commonwealth of Australia, 2026 BuildSkills Australia

- apply safe operating procedures, including conducting operational risk assessment and treatments associated with:
    - earth leakage boxes
    - lighting
    - power cables, including overhead service trays, cables and conduits
    - restricted access barriers
    - surrounding structures
    - traffic control
    - trip hazards
    - work site visitors and the public
    - working at heights up to 11 metres
    - working in proximity to others
    - working with dangerous materials
- locate, interpret and apply information relating to job requirements, including:
    - diagrams and sketches
    - environmental requirements, including:
        - clean-up protection
        - noise and dust management
        - vibration management
        - waste management
    - quality requirements relevant to EWP work
    - instructions issued by authorised organisational and external personnel
    - manufacturer specifications, operator manual, and instructions where specified
    - signage
    - industry standards and job specifications
    - verbal, written and graphical instructions
    - work schedules, plans and specifications
- comply with site safety plan and health and safety legislation, regulations and codes of practice applicable to workplace operations
- safely and effectively use tools, plant and equipment relevant to EWP work
- ensure safe working load of EWP is not exceeded
- communicate with others on the work site using verbal and non-verbal communication and communication technology
- work effectively and safely with others on the work site.

© Commonwealth of Australia, 2026 BuildSkills Australia

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- functions and operational limitations of EWP equipment
- types of EWP equipment and health and safety authority certification of competency requirements
- controls and techniques for using EWP
- health and safety requirements for construction work sites, including:
    - procedures relating to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements, and evacuation procedures
    - hazard identification and risk control procedures, including for handling hazardous materials and dangerous goods
    - selection and use of personal protective equipment (PPE)
    - location and use of firefighting equipment
    - selection and use of tools and equipment
- processes for identifying equipment faults
- general construction terminology relevant to operating EWPs
- safe operating procedures for operating EWPs, including contents of and terms used in:
    - job safety analyses (JSA)
    - safe work method statements (SWMS)
    - safety data sheets (SDS)
- processes for calculating load mass requirements
- quality requirements relevant to operating EWPs
- regulatory and legislative requirements relevant to operating EWPs
- AS 2550 Set: Cranes, hoists and winches - Safe use
- relevant Acts, regulations and codes of practice relevant to working safely at heights on construction sites
- procedures for working safely at heights
- signalling methods and communications relevant to operating EWPs
- types, characteristics, use and limitations of plant, tools and equipment relevant to operating EWPs
- use and limitations of fall rescue systems.

© Commonwealth of Australia, 2026 BuildSkills Australia

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - EWPs
  - extension leads
  - safety harnesses and lanyards
  - special attachments for the EWP when shifting equipment
  - PPE prescribed under legislation, regulations, codes of practice and workplace policies and practices
- materials:
  - logbooks
  - service manuals
  - operator manuals
- contingencies:
  - uneven terrain
- specifications:
  - AS 2550 Set: Cranes, hoists and winches - Safe use

CPCCCM3002 Operate a truck-mounted loading crane

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit specifies the skills and knowledge required to safely and effectively operate a truck-mounted loading crane to load and unload building products delivered from suppliers to the construction site. It includes set-up, operation, control and shutdown of the crane.

This unit supports workers who safely and efficiently use a truck-mounted loading crane to handle construction materials and who would be expected to take responsibility for organising and completing these tasks with a high degree of self direction.

Completion of the general construction induction training program, specified in the Safe Work Australia model Code of Practice: Construction Work, is required by anyone carrying out construction work. Achievement of CPCWHS1001 Prepare to work safely in the construction industry meets this requirement.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare to operate truck-mounted crane.	1.1	Interpret work order and associated documentation and clarify requirements with relevant persons.
		1.2	Plan all work to comply with relevant legislation, regulations, standards, codes, work health and safety, environmental and workplace requirements.
		1.3	Select plant, tools and equipment required for work tasks, check for serviceability and rectify or report identified faults.
		1.4	Conduct calculations to ensure load mass does not exceed the working capacity of the crane and manufacturer limits.
		1.5	Select and fit personal protective equipment (PPE) appropriate for work activities.
2	Set up and operate truck-mounted crane.	2.1	Position truck at the designated drop-off point on a level operating surface.
		2.2	Activate crane and manoeuvre it to its operating position from its lockdown position.
		2.3	Check crane movements comply with requirements for safe crane operation.
		2.4	Prepare load for lifting in accordance with crane, truck and dogging requirements.
		2.5	Check that site is clear and safe to receive or dispatch the load.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.6	Manoeuvre load to position using controls in accordance with manufacturer requirements.
		2.7	Monitor load continually throughout its travels.
		2.8	Shut down crane and return it to its lockdown position.
1	Finalise operation of truck-mounted crane.	3.1	Complete documentation in accordance with workplace requirements.
		3.2	Clear work area and dispose of, reuse or recycle materials in accordance with regulatory and workplace requirements.
		3.3	Clean, check, maintain and store plant, tools and equipment in accordance with manufacturer and workplace requirements.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCM3002 Operate a truck-mounted loading crane

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by setting up and operating a truck-mounted loading crane involving loading and unloading at least two full loads of building and construction materials and products, and extending all functions of the crane to their maximum working capacity.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for operating a truck-mounted loading crane under applicable Commonwealth, state or territory work health and safety (WHS) legislation, Australian Standards and codes of practice:
- job safety and environmental analyses (JSEAs)
- safe work method statements (SWMSs)
- safety data sheets (SDSs)
- safety manuals and instructions for plant, tools and equipment
- signage and barricades
- environmental and worksite safety plans
- personal protective equipment (PPE)
- reporting problems
- processes for preparing loads for lifting in accordance with crane, truck and dogging requirements
- designs and functions of truck-mounted loading cranes
- safe truck-mounted crane operations:
    - boom up and down

© Commonwealth of Australia, 2026 BuildSkills Australia

    - operation of attachments
    - operation of outriggers
    - slew left and right
    - telescope in and out
- mathematical processes for ensuring load masses do not exceed the working capacity of the crane and manufacturer limits
- requirements for cleaning up work area, maintaining and storing plant, tools, equipment and materials, and for environmentally friendly waste management.

Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry-standard equipment required to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.

CPCCCM3003 Work safely around electrical sources, services and assets

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Application

This unit of competency specifies the outcomes required to ensure the safety of personnel and equipment when working with or operating plant while in close proximity to electrical sources, underground and overhead services, and assets.

The unit supports construction workers working on powered construction sites who must check and confirm the location of electrical sources, underground and overhead services, and assets before commencing work. It applies to residential and commercial work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

© Commonwealth of Australia, 2026 BuildSkills Australia

1.	Plan and prepare.	1.1.	Work instructions, including plans, specifications, environmental and quality requirements, and operational details, are obtained, confirmed with relevant personnel, and applied to planning.
		1.2.	***Health and safety requirements*** are identified and applied to planning.
		1.3.	Plant, tools and equipment are selected to carry out tasks according to job requirements, checked for serviceability, and any faults are rectified or reported prior to starting work.
2.	Apply safe work practices.	2.1	Relevant authorities are contacted to identify type and location of ***electrical sources, underground or overhead services, and assets***.
		2.2	Plant is positioned according to safe work method statement (SWMS).
		2.3	Plant operation procedures are followed to comply with SWMS.
		2.4.	Work is conducted in or around the electrical source, service or asset according to SWMS.
		2.5.	On completion of work, personnel, plant and equipment are retracted from powered area following SWMS.
3.	Clean up.	3.1.	Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

		3.2.	Plant, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices.
		3.3.	Work completion procedures are followed and relevant personnel are notified that work is finished.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	• evaluate the relevance of information relating to the location of electrical sources, underground or overhead services, and assets to the work to be undertaken.
Oral communication skills to:	• share information with team members and other personnel on site • participate in straightforward conversations with colleagues and external authorities, and ask questions to identify and confirm requirements.
Reading skills to:	• interpret a range of documentation, including SWMS, site plans and job specifications.
Writing skills to:	• report faults in plant or equipment to relevant personnel.

Range of conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Health and safety requirements must include:	• emergency procedures, including:
	  ○ first aid
	  ○ evacuation
	  ○ location and use of firefighting equipment

© Commonwealth of Australia, 2026 BuildSkills Australia

	• hazard identification and risk control procedures, including for handling hazardous materials and substances
	• safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
	  ○ earth leakage boxes
	  ○ job specifications
	  ○ lighting
	  ○ manual handling techniques
	  ○ electric lines, including overhead service trays, cables and conduits
	  ○ restricted access barriers
	  ○ safety data sheets (SDS)
	  ○ surrounding structures
	  ○ traffic control
	  ○ trip hazards
	  ○ use of signage and barricades
	  ○ requirements for:
	  ▪ work site visitors and the public
	  ▪ working at heights
	  ▪ working in confined spaces
	  ▪ working in proximity to others
	• selection, correct fitting, and use of personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices
	• selection and use of tools and equipment
	• workplace environmental requirements.

Electrical sources, underground or overhead services, and assets must include:	• distribution towers • generators • poles • substations • temporary services • train and tram assets

© Commonwealth of Australia, 2026 BuildSkills Australia

	• transmission towers • underground and overhead lines • underground conductors.

Assessment Requirements for CPCCCM3003 Work safely around electrical sources, services and assets

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. On two different sites the person must also:

- locate electrical sources, underground and overhead services, and assets
- undertake work according to the safe work method statement (SWMS)
- retract from powered area on completion of work.

The above work must involve:

- locating, interpreting and applying information, standards and specifications relating to working safely around electrical sources, services and assets
- complying with site safety plan and work health and safety (WHS) legislation, regulations and codes of practice applicable to workplace operations
- locating on-site electrical sources, underground and overhead services, and assets and identifying associated required safe work practices
- installing safety signage and barricades before commencing work
- safely positioning plant and equipment on site, giving consideration to location of electrical sources, underground and overhead services, and assets.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- environmental requirements relevant to the work site and job task, including:
    - clean-up protection
    - noise and dust management
    - vibration management
    - waste management
- equipment safety requirements, including procedures for accessing and interpreting:
    - SWMS

© Commonwealth of Australia, 2026 BuildSkills Australia

    - safety data sheets (SDS)
- procedures for materials storage and environmentally friendly waste management
- techniques to read and interpret plans, specifications and drawings
- safe work practices required on construction sites, including:
    - required signage and barricades
    - required personal protective equipment (PPE)
    - site-specific emergency procedures, including:
        - evacuation
        - first aid, including cardiopulmonary resuscitation (CPR)
        - location and use of firefighting equipment
    - techniques for working with electrical sources, services and assets
    - procedures for working safely at heights
- types, characteristics, uses and limitations of plant, tools and equipment used in the work specified in performance evidence.

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
    - PPE, as appropriate to the task
- materials:
    - signage and barricades appropriate to the task and work site
- specifications:
    - verbal or written instructions and task-specific information issued by authorised personnel
    - plans and specifications appropriate to the task
    - SDS appropriate to the tools and equipment used to perform tasks
    - SWMS
- relationships with team members and supervisor:
    - work may be conducted alone or as part of a team
- timeframe:
    - according to job requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPCCCM3004 Identify and apply information in construction plans, drawings and specifications

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Application

This unit of competency specifies the outcomes required to identify work site details and scope of work requirements from construction plans, drawings and specifications, and to apply that information to the initial scheduling and preparation for the work. Work tasks may relate to different areas of work and can include shopfitting, carpentry, construction and painting.

The unit supports construction workers at the early stages of work when the first site visits are made and work requirements are clarified with the client or project manager. It applies to residential and commercial construction projects.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.	
1.	Prepare for site visit.	1.1.	***Plans, drawings and specifications*** for construction work are obtained, checked for currency, including latest amendments as required, and work site location is noted.
		1.2.	Construction plans, drawings and specifications are checked for inclusion of key information required for the work, and items requiring clarification are noted for discussion with relevant personnel.
		1.3.	Work site visit is scheduled with relevant personnel to confirm and clarify scope of works and job-specific details not included on plans, drawings and specifications.
2.	Check work site and confirm work requirements.	2.1.	Work site is accessed according to client and organisational requirements.
		2.2.	***Layout and features*** of existing site are checked against plans, drawings and specifications, and items requiring clarification and observed differences in features or dimensions are noted and resolved with relevant personnel.
		2.3.	Plans, drawings, specifications and technical details for the work to be completed are confirmed, and items requiring clarification are resolved with relevant personnel.
		2.4.	Amended plans, drawings or specifications and building approval documentation are obtained, as required, and checked for accuracy.
3.	Prepare information and resources for	3.1.	Work stages and individual job tasks are determined from construction plans, drawings and specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

	individual job tasks.		
		3.2.	Simple sketch or sketches are prepared for individual tasks.
		3.3.	Job tasks are sequenced and scheduled in consultation with client, project manager and other contractors, as required.

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	• draw on past experience of interpreting plans, drawings and specifications when interpreting new construction work documentation.
Numeracy skills to:	• estimate timeframes for different tasks and apply to scheduling • interpret different scales and ratios on plans and drawings and apply when producing simple sketches with accurate dimensions.
Oral communication skills to:	• use construction terminology in discussions with site personnel to clarify issues relating to plans, drawings and specifications • use listening and questioning skills and appropriate terminology to elicit information from clients regarding work requirements.
Reading skills to:	• interpret symbols, shading and notations used on construction plans and architectural drawings.
Problem-solving skills to:	• assess the nature and scope of task requirements and factor in contingency estimates when scheduling.

Range of conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

© Commonwealth of Australia, 2026 BuildSkills Australia

Plans, drawings and specifications must include five or more of the following:	• cross sections • detail plans • elevations • finishing schedules • floor plans • footings and slab set-outs • roof framing layout • site plans • sectional views • sub-floor and floor plans • wall framing plans • window and door schedules.
Layout and features must include at least four of the following:	• adjacent buildings • contours and contour lines • datums • existing structures • on-site storage • power, gas, water and telecommunications services • reduced levels • site access and egress points.

Assessment Requirements for CPCCCM3004 Identify and apply information in construction plans, drawings and specifications

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also:

- interpret at least five construction plans, drawings and specifications for three different work tasks or three different construction sites
- apply the above information to prepare for work, including preparing information and a simple sketch or sketches for each task.

In doing the above, the person must also confirm the actual dimensions of at least three different elements of buildings by interpreting at least two different scales. Where there are differences in measurements, the person must refer to relevant personnel before starting work.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- essential information to be included in simple sketches for tasks specified in the performance evidence
- processes for arranging work site access
- processes for reporting inaccuracies identified in plans, drawings and specifications
- processes for seeking amendments to inaccurate plans, drawings and specifications
- methods of sequencing and scheduling job tasks
- types and key features of construction plans, drawings and specifications used in construction projects
- methods for representing details of construction requirements on plans, drawings and specifications
- construction terminology and symbols used on plans and drawings and in job specifications.

Assessment Conditions

Suitable assessment of performance requires:

© Commonwealth of Australia, 2026 BuildSkills Australia

- specifications:
    - plans, drawings and specifications for the three different tasks or three different construction sites specified in the performance evidence
- contingencies:
    - differences in measurements
- physical conditions:
    - access to site or sites represented on the plans and drawings for the work tasks
- relationship with client:
    - consultation with client or client's representative is required.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPCCCM3005 Calculate costs of construction work

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Application

This unit of competency specifies the outcomes required to estimate materials, overheads, labour and time requirements and establish costs for the provision of products and services for construction work.

The unit supports tradespersons and those in independent construction job roles to cost a construction project or part of a construction project. It applies to construction work on residential and commercial sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Construction

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

© Commonwealth of Australia, 2026 BuildSkills Australia

1.	Gather information.	1.1.	Job requirements are determined through discussion with customer or from information supplied.
		1.2.	***Plans and specifications*** are accessed and site is inspected to confirm requirements.
		1.3.	Details of products and services to be provided are developed and checked for availability and fitness for purpose.
		1.4.	Delivery point and methods of transportation are determined where necessary.
		1.5.	Details of job tasks are accurately recorded and checked according to workplace procedures.
		1.6.	Information about material, labour and overhead costs is obtained and checked to be current and accurate.
2.	Estimate materials, labour and time.	2.1.	Work, including preparatory tasks, is planned and sequenced to cover all necessary activity.
		2.2.	***Types and quantities of materials*** required for work are estimated based on availability, fitness for purpose, and current costs.
		2.3.	Labour requirements to perform work tasks and complete the job are estimated.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4.	Time requirements to perform work tasks are accurately estimated and checked with appropriate personnel.
3.	Calculate costs.	3.1.	Totals of individual materials, ***labour and overhead costs*** are calculated according to workplace procedures and statutory requirements.
		3.2.	***Other project-specific costs*** are identified and calculated according to workplace procedures.
		3.3.	Total work cost is calculated, including mark-up percentages set by appropriate personnel.
		3.4.	Final cost for work is calculated by applying profit margin according to workplace procedures, and is checked for accuracy.
4.	Document and verify details.	4.1.	Details of costs and charges are clearly and accurately documented according to workplace procedures.
		4.2.	Costs, calculations or other details are verified according to workplace procedures and current costing data.
		4.3.	Costing estimate and materials take-off are prepared for quote.
		4.4.	***Costing documents*** are accurately completed for future reference according to workplace procedures.

© Commonwealth of Australia, 2026 BuildSkills Australia

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Learning skills to:	• draw on experience of estimating labour time requirements and material costs, and apply knowledge to new jobs to be costed.
Oral communication skills to:	• confirm requirements with customer • use listening and questioning to clarify any issues.
Reading skills to:	• read and interpret material specifications, job safety analyses (JSA) and Australian standards relevant to work to be undertaken.
Writing skills to:	• produce accurate and legible written costing information.
Technology skills to:	• find and interpret information relevant to current costings for materials and labour using simple internet searches • use estimating and costing templates and software.

Range of conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

Plans and specifications must include three or more of the following:	• building codes • conceptual and preliminary sketches or drawings • environmental requirements relating to the acquisition, use and disposal of materials • project brief and scope of works, including relevant project plans and detailed project requirements • quotation conditions and terms of contract • relevant Australian standards and industry standards.

© Commonwealth of Australia, 2026 BuildSkills Australia

Types and quantities of materials must include five or more of the following:	• aluminium • brick and blockwork • cement, sand, aggregates and bonding agents • claddings • decorative finishes • doors, windows and trims • fillers • fixings and fastenings • glazing • hardware • medium density fibreboard (MDF) or alternative substrate panelling • paint • prefinished boards and laminates • solid surfaces • steel • tiles • timber.
Labour costs must include:	• estimation of time for manufacture, delivery, installation or application • personal protective equipment (PPE) • wages and on-costs for different types of construction workers.
Overhead costs must include:	• administration • insurance • transport • use of communication technology.
Other project-specific costs must include at least two of the following:	• plant and equipment hire • project-related signs • site facilities • statutory fees and charges • transport and delivery charges

© Commonwealth of Australia, 2026 BuildSkills Australia

	• waste removal fees.
Costing documents must include three of the following:	• costing spreadsheets • job sheets • labour time allocation • materials lists and estimates • quotation templates • take-off sheets.

Assessment Requirements for CPCCCM3005 Calculate costs of construction work

Modification History

Release	Comments
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 2.0.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also cost three different construction jobs, where the costing includes:

- estimating quantities of material required
- determining the types and amount of labour required to complete the work
- estimating time required to complete the work
- estimating overheads associated with the work
- totalling all costs and applying profit margin to establish a client quote.

In doing the above work, the person must:

- locate, interpret and apply information, standards and specifications relevant to estimating and costing work
- calculate final cost for the work and prepare a written quotation for each of the work requirements.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- accuracy and detail required in costing estimates for construction work
- construction terminology used in plans and specifications for construction work
- contents and impact of job safety analyses (JSA) and safe work method statements (SWMS) on costing construction work
- environmental and sustainability requirements relevant to the costing being determined
- procedures for applying the Goods and Services Tax (GST) to costings
- procedures for determining wages and overhead costs relevant to a quotation for construction work

© Commonwealth of Australia, 2026 BuildSkills Australia

- international system of units (SI) of measurements relevant to the construction industry
- process of estimating and costing construction work
- quality requirements of construction projects and their impact on time required for completion
- relevant statutory and authority requirements related to estimating and costing construction work
- sources of information on material requirements and processes for calculating them
- standards applicable to the work being costed, such as Australian standards and those in the National Construction Code
- terms and content of relevant contract documentation to inform estimate.

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - calculator
  - computer with internet access
- specifications:
  - plans and specifications for the work to be undertaken
  - costing information
- relationship with client:
  - consultation with client is required.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

CPCCCO2013 Carry out concreting to simple forms

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to safely install formwork, reinforcement and place and finish concrete for the construction of minor slabs, pathways and other minor works to a specified design finish, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Plan and prepare.	1.1	Read and interpret work instructions and plan sequence of work.
		1.2	Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
		1.3	Select tools and equipment, check for serviceability and report any faults.
		1.4	Select and use personal protective equipment (PPE) for each part of the task.
		1.5	Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
		1.6	Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
2	Erect simple formwork.	2.1	Prepare substrate.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.2	Review formwork design from drawings.
		2.3	Erect formwork.
		2.4	Install vapour barrier.
3	Place and tie reinforcement.	3.1	Handle, cut and position reinforcing components.
		3.2	Position reinforcing bars and mesh.
		3.3	Position bar chairs and spacers with minimum edge cover.
4	Place concrete.	4.1	Clean formwork or excavation of excess material and debris before concrete placement.
		4.2	Transport concrete by wheelbarrow.
		4.3	Place concrete in formwork to specified depth.
		4.4	Screed concrete to the alignment of formwork and specified datums.
		4.5	Finish surface of concrete to specifications.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Strip simple formwork.	5.1	Denail timber components following stripping of formwork.
		5.2	Clean and stack components and store for reuse or bundle for removal.
		5.3	Remove formwork components from site.
6	Clean up.	6.1	Clean up, meeting all legislative and workplace requirements for safety, waste disposal, materials handling and protection of the environment.
		6.2	Check, maintain and store tools and equipment and report any faults.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCO2013 Carry out concreting to simple forms

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Knowledge Evidence formatted for clarity.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by carrying out concreting to a simple form slab of at least 1 square metre and 100 mm in depth by:

- preparing substrate
- erecting formwork
- cutting, placing and tying reinforcement
- placing and hand-screeding concrete to the required finished level and job specification.

All work must be planned and performed using appropriate tools and equipment to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to concreting to simple forms
- workplace quality policies and standards relevant to concreting to simple forms
- safety requirements for concreting to simple forms

© Commonwealth of Australia, 2026 BuildSkills Australia

- types and uses of tools and equipment required for concreting to simple forms
- uses of concreting materials, including:
    - bar chairs
    - bracing
    - edge form and boards
    - fabric sheet mesh
    - pegs
    - spacers
    - reinforcing bars
    - vapour barriers
- concreting techniques, including:
    - placing
    - screeding
    - finishing
    - floating
- simple forms of concrete, including:
    - beam thickeners
    - channels
    - garden edges
    - pathways
    - post holes
    - simple concrete aprons and slabs
- finishing, including:
    - broomed
    - trowelled
    - trowelling machine finish
    - wood-floated
- properties and use of concrete relevant to concreting to simple forms, including:
    - uses and limitations at differing strength levels
    - ingredients and proportions
    - maintaining design strength during placement
    - mixing techniques
    - curing techniques

© Commonwealth of Australia, 2026 BuildSkills Australia

    - vibrating and over-vibration
- levelling techniques for concreting to simple forms
- materials storage and environmentally friendly waste management
- plans, drawings and specifications for concreting to simple forms
- processes for the calculation of material requirements for concreting to simple forms, including volume of concrete
- quality requirements for concreting to simple forms
- simple formwork and reinforcing componentry.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

CPCCCO2014 Carry out concrete work

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Correction to Foundation Skills.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to carry out concreting work on general construction projects for the construction of in situ reinforced concrete structures, such as slabs and other common concrete works.

It includes setting-out, reinforcing, erecting and dismantling formwork, and placing, finishing and curing concrete.

The unit supports workers to use the tools, equipment and materials to carry out concrete work, working as members of a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Determine requirements to carry-out concrete work.	1.1	Review and clarify concrete work task.
		1.2	Review task specifications, and check to make sure they are in accordance with legislation, regulations and codes of practice.
		1.3	Review work health and safety (WHS) requirements for the task in accordance with safety plans and policies.
		1.4	Identify safety signage and barricade requirements.
		1.5	Review environmental requirements for the task in accordance with environmental plans and legislative requirements.
		1.6	Determine plant, tools, equipment and formwork components and materials required to carry out task.
		1.7	Calculate materials quantities.
		1.8	Determine location of steel reinforcement and formwork from drawings and reinforcement schedule.
2	Prepare to carry-out concrete work.	2.1	Erect identified safety signage and barricade requirements, and fit personal protective equipment (PPE).
		2.2	Obtain, safely handle, locate and prepare materials.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.3	Obtain plant, tools, equipment and formwork components and materials, check for serviceability and rectify or report any faults
		2.4	Check reinforcement against reinforcement drawings and specifications.
		2.5	Select fixing and fasteners.
3	Set out for concrete work.	3.1	Set string lines accurately from existing pegs.
		3.2	Check grades to ensure correct fall.
		3.3	Protect surfaces to prevent damage.
4	Construct and install reinforcement for concrete work.	4.1	Cut and bend reinforcing fabric and bars in accordance with project drawings and specifications.
		4.2	Tie and fix fabric and bars to configuration from project drawings and specifications.
		4.3	Attach stiffening rods to panels as required to facilitate handling.
		4.4	Locate reinforcement material in formwork and place on bar chairs or spacers in accordance with drawings, noting clearance from formwork.
		4.5	Locate and secure cast-in items.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Erect formwork for concrete work.	5.1	Clear work area and prepare surface for safe erection of formwork.
		5.2	Set out formwork to requirements of drawings and specifications.
		5.3	Assemble and erect formwork to specifications.
		5.4	Remove debris, sawdust and other waste material from formwork.
		5.5	Apply form release agent in accordance with manufacturers' specifications.
6	Carry out concrete work.	6.1	Use correct manual handling techniques with wheelbarrow to transport concrete and to discharge into formwork.
		6.2	Ensure control of discharge of concrete from concrete pump line and chute into formwork.
		6.3	Place concrete in accordance with requirements and screed to specified levels and grades.
		6.4	Compact concrete to specification using immersion vibrator or other specified method.
		6.5	Finish and cure concrete in accordance with specifications.
		6.6	Position and install control joints to specification and to current Australian Standard and codes.

© Commonwealth of Australia, 2026 BuildSkills Australia

		6.7	Position dowel joints in accordance with specification.
		6.8	Ensure concrete surface is adequately covered and protected.
7	Strip formwork from concrete work.	7.1	Carefully remove edge boxing and braces in sequence.
		7.2	De-nail, clean and store timber components.
		7.3	Remove, clean, oil and store steel components.
		7.4	Discard damaged formwork components after stripping.
		7.5	Clean screens safely before movement.
8	Clean up after completing concrete work.	8.1	Clear work area and dispose of, reuse or recycle materials in accordance with legislation, regulations, codes of practice and task requirements.
		8.2	Clean, check, maintain and store plant, tools and equipment in accordance with manufacturers' specifications and workplace requirements.

Foundation Skills

A person demonstrating competency in this unit must have the following language, literacy, numeracy and employment skills:

- reading skills to:
  - interpret task documentation, including drawings, specifications and plans
  - review safety plans and policies and environmental plans

© Commonwealth of Australia, 2026 BuildSkills Australia

  - understand written instructions, procedures and signs
  - interpret manufacturers' specifications and workplace requirements
  - interpret legislative requirements including those of regulatory authorities, Australian standards and the National Construction Code (NCC)
- numeracy skills to:
  - calculate quantities of materials
  - calculate formwork and fixing requirements
  - set out for concrete work
- communication and teamwork skills to:
  - determine requirements
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - identify and accurately report any faults
  - use and interpret non-verbal communication, such as hand signals

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Assessment Requirements for CPCCCO2014 Carry out concrete work

Modification History

Release	Comments
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1. Correction to Foundation Skills.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency in this unit, a person must carry out concrete work in three concreting projects. Each project must:

- use a minimum of two cubic metres of concrete
- incorporate a minimum of two different finishes.

At least one project must contain angled formwork and bent reinforcement.

In doing this, the person must meet the requirements of the unit's elements and associated performance criteria:

- determining requirements to carry-out concrete work
- preparing to carry-out concrete work\
- setting-out for concrete work
- constructing and installing reinforcement for concrete work
- erecting formwork for concrete work
- carrying out concrete work
- stripping formwork from concrete work
- cleaning-up after completing concrete work.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- rules and guidelines for using explosive power tools under applicable Commonwealth, state or territory legislation, standards and codes of practice. These include requirements for work health and safety and protection of the environment:

© Commonwealth of Australia, 2026 BuildSkills Australia

    - job safety analyses (JSAs)
    - safe work method statements (SWMSs)
    - safety data sheets (SDSs)
    - safety manuals and instructions for plant, tools and equipment
    - signage and barricades
    - personal protection equipment (PPE)
    - working at heights requirements
    - environmental and work site safety plans
- requirements of state and territory regulators, Australian standards and the National Construction Code (NCC) relating to carrying out concrete work
- site and equipment safety requirements, including:
    - job safety analysis (JSA) and safe work method statements (SWMS)
    - safety data sheets (SDS)
- workplace requirements for all aspects of carrying out concrete work including interpreting work orders and reporting problems
- interpreting engineering drawings and specifications
- processes for determining materials quantities
- quality requirements
- concreting work, including:
    - beams
    - columns
    - footings
    - footpaths
    - lintels
    - pads
    - ramps
    - repairing of kerb and channel
    - slabs on ground
    - stairs
    - structural members
    - suspended slab
    - walls
- concrete characteristics and properties
- concreting principles

© Commonwealth of Australia, 2026 BuildSkills Australia

- steel reinforcement characteristics
- structural technology principles relative to minor concreting works
- concreting equipment types, characteristics, technical capabilities and limitations, including:
    - bolt cutters
    - brushes
    - buckets
    - chutes
    - curing agent applicator
    - edging tools
    - floats
    - hammers
    - hoses
    - kibble
    - mesh guillotine
    - nips
    - rakes
    - reinforcement benders
    - rods
    - screeds
    - short handle shovels
    - shutters
    - sponges
    - steam generator
    - tarpaulins
    - tremies
    - trowels
    - vibrators
    - wheelbarrows
- types of concreting formwork, their applications and installation methods, including:
    - expanded polystyrene
    - fiberglass

  - steel shutters
  - structural cardboard
  - timber
- concreting processes and equipment, including:
  - setting out
  - erecting formwork
  - transporting concrete, including:
    - crane and kibble
    - pre-mix truck
    - pumping equipment
    - wheelbarrow
  - placing concrete, including:
    - kibble
    - pumping equipment
    - shoveling
    - tremies
    - truck placed
    - vibrating
    - wheelbarrow
- materials handling methods
- finish techniques, including:
  - broom finished
  - brushed
  - using bull float
  - using mechanical troweling machine
  - using steel trowel
  - using wood float
- curing, including:
  - applied moisture
  - coating with a membrane
  - curing compound
  - flooding
  - plastic sheeting
  - steam.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Candidates must have access to:

- industry-standard equipment used to perform the tasks specified in performance evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.

CPCCCO4001 Supervise concreting work

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Changes to the Performance Criteria 3. Monitor and manage concrete material delivery: 3.1 through 3.5.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the outcomes required to oversee on-site preparation and finish of concreting work. It includes initiating, supervising and monitoring concreting operations to ensure completion within scheduled timeframes and quality standards.

This unit of competency applies to builders, site supervisors and other industry personnel responsible for concreting work on residential and commercial projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCWHS1001Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite unit(s)

Nil.

Competency field(s)

N/A

Unit sector(s)

Concreting

Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe what needs to be done to demonstrate achievement of the element.	
1	Supervise preparation for concreting work.	1.1	Communicate work instructions to team members and invite and address questions.
		1.2	Confirm team members' understanding of work health and safety (WHS) and environmental requirements.
		1.3	Confirm team members' selection of materials, tools and equipment is consistent with job requirements.
		1.4	Process reports of faulty equipment and tools and source replacements as required.
		1.5	Manage and monitor team members' manual handling of equipment and tools to ensure workplace safety requirements are met.
2	Supervise on-site preparation for concrete pour.	2.1	Direct and monitor site excavation and preparation of sub-grade to meet safety, quality and scheduled timeframe requirements.
		2.2	Supervise, monitor and direct formwork installation to comply with work plans and specifications.
		2.3	Check levels for finish heights against datum.

© Commonwealth of Australia, 2026 BuildSkills Australia

		2.4	Inspect placement of reinforcing to ensure compliance with specifications.
		2.5	Confirm site and preparation work is ready for concrete pour.
3	Monitor and manage concrete material delivery.	3.1	Confirm concrete quantities and specifications with supplier and place order.
		3.2	Confirm delivery schedule, location and method of placement with supplier with placed order.
		3.3	Check accuracy of concrete against delivery documentation and consult with product specialist to ensure accuracy of concrete properties.
		3.4	Monitor and manage delivery to ensure continuous and timely concrete supply for the project.
		3.5	Monitor progress of concrete pour to assess status and calculate and adjust for potential shortfall or over-supply.
4	Monitor and manage concreting on-site work.	4.1	Monitor weather conditions and apply contingencies as required to ensure safety, quality and timeliness of project completion.
		4.2	Supervise concrete pour and compacting and levelling procedures to comply with specifications.
		4.3	Manage concrete finish in compliance with specifications.
		4.4	Check completed work for compliance and coordinate team members to address areas of non-compliance.

© Commonwealth of Australia, 2026 BuildSkills Australia

5	Supervise site clean-up.	5.1	Arrange for clean-up of tools and equipment, and disposal and removal of excess material to meet organisation quality processes and environmental requirements.
		5.2	Organise safe storage and protection of tools, equipment and materials.
		5.3	Debrief team members and action identified opportunities for learning or improvement.
		5.4	Complete and process project documentation according to workplace and project requirements.

Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- oral communication skills to:
  - interact with team members and suppliers and choose appropriate language to give instructions and feedback
- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation.

Range of conditions

No conditions apply to this unit of competency at the time of publication.

Unit Mapping Information

Assessment Requirements for CPCCCO4001 Supervise concreting work

Modification History

Release	Comments
3	Updated reference to general construction induction training program.
2	This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4. Changes to the Performance Criteria 3. Monitor and manage concrete material delivery: 3.1 through 3.5.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by supervising concreting works for three different concreting projects.

In doing this, the candidate must:

- supervise team members ensuring timely completion of each project to required quality standards and specifications
- manage the accurate placement of formwork, reinforcing, services and penetrations
- supervise accurate transfer of datum, finish heights of concrete, concrete compaction and concrete finishes
- organise concrete testing and documenting results.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- application, processes and techniques of concreting:
    - suspended slabs
    - slabs on ground
- properties and limitations of concrete:
    - composition
    - slump test measurement

© Commonwealth of Australia, 2026 BuildSkills Australia

    - temperature
- principles of task management
- regulations, standards and codes of practice relevant to concreting work
- organisational quality assurance requirements
- team leadership strategies
- operational and functional factors of concreting tools and equipment
- workplace safety:
    - hierarchy of control
    - hazardous manual tasks
    - working at heights
    - hazardous materials and substances
    - personal protective equipment (PPE)
- sustainability and environmental requirements:
    - clean-up management
    - dust suppression
    - noise management
    - stormwater management
    - vibration management
    - waste management.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government legislation
- current industry and Australian codes and standards
- project schedules, construction drawings, site plans and specifications
- organisational policies, procedures and other quality documentation to undertake the performance criteria and assessment requirements
- tools and equipment to supervise safe concrete works and document test outcomes.

CPCCDE3017 Select and use hand tools and equipment for demolition tasks

Modification History

Release	Comments
2	Updated reference to general construction induction training program.
1	This unit of competency was first released in CPC Construction, Plumbing and Services Training Package Release 5.0.

Application

This unit of competency specifies the skills and knowledge required to select and use hand tools and equipment safely and effectively to complete different demolition tasks.
