Qualification Description

This is a qualification for fire protection technicians responsible for non-trade installation, commissioning and complex servicing of fire protection systems or for supervision of fire protection services work.

At Certificate III level, fire protection technicians may specialise in activities relating to certain types of systems, such as:

- installing and commissioning pre-engineered fire-suppression systems
- installing gaseous fire-suppression system containers and actuators
- conducting complex servicing of fire protection systems.

Licensing, legislative, regulatory or certification requirements apply to fire protection inspection and testing in some states and territories. For further information, check with the relevant regulatory authority.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

To achieve this qualification, competency must be demonstrated in:

- 16 units of competency:
